LINEAR SYSTEMS

The use of the optimal output feedback algorithm in integrated control system design p 250 A84-16669

Model reference adaptive control for linear time varying and nonlinear systems p 251 A84-19085

Using integrals of the state transition matrix for efficient transient-response computations p 390 A84-24999

Exact multi-input pole placement by linear-quadratic synthesis p 391 A84-25513

Symmetric linear systems --- twin-lift helicopter control models for heavy construction use p 391 A84-25538

Suboptimal control of a class of stochastic systems with random, partially observable parameters p 392 A84-25539

Implementation of failure-detection systems with adaptive observers p 392 A84-25540

Methods of reference basis for identification of linear dynamic structures p 474 A84-27148

Synthesis of a controller of simple structure for a multilink system stable in the case of infinite gain factors p 490 A84-27873

Multivariable prefilter design for command shaping [AIAA PAPER 84-1829] p 934 A84-43406

Multivariable control for the F-100 engine using the LQG/LTR methodology --- p 490 A84-27873

Linear-Quadratic-Gaussian/Loop Transfer Recovery [AIAA PAPER 84-1910] p 887 A84-43450

Nonlinear control of mismatched uncertain linear systems and application to control of aircraft p 989 A84-49186

Linear theory of pressure oscillations in liquid-fueled ramjet engines [AD-A131610] p 61 N84-10075

ATOPS B-737 inner-loop control system linear model construction and verification [NASA-CR-166055] p 64 N84-10078

Nonlinear transform [NASA-CR-166506] p 252 N84-15877

Investigation and appreciation of optimal output feedback. Volume 1: A convergent algorithm for the stochastic infinite-time discrete optimal output feedback problem [NASA-CR-3828] p 902 N84-31217

Refinement and evaluation of helicopter real-time self-adaptive active vibration controller algorithms [NASA-CR-3821] p 964 N84-33378

LINEAR VIBRATION

Linear problem of a vibrator oscillating harmonically at supercritical frequencies in a subsonic boundary layer p 579 A84-35497

LINEARITY

The linear vortex distribution using the alternative approach [NIAST-82/80] p 269 N84-16133

A method for computing the leading-edge suction in a higher-order panel method [NASA-CR-3730] p 409 N84-20479

Effect of fuselage upwash on the supersonic longitudinal aerodynamic characteristics of 2 fighter configurations [NASA-TP-2330] p 665 N84-27676

The Shock and Vibration Digest, volume 16, no. 7 [AD-A143958] p 926 N84-31679

Description and prediction of transition in two-dimensional, incompressible flow p 1009 N84-33758

LINGUISTICS

Linguistic methodology for the analysis of aviation accidents [NASA-CR-3741] p 185 N84-15135

LININGS

Ceramic composite liner material for gas turbine combustors [AIAA PAPER 84-0363] p 236 A84-16044

Experiments on sound radiation from a duct with a circumferentially varying liner p 735 A84-36488

Design and flight test of a Kevlar acoustic liner p 699 A84-37933

An acoustic evaluation of circumferentially segmented duct liners p 938 A84-44631

A laboratory test for evaluating the fire containment characteristics of aircraft class D cargo compartment lining material [DOT/FAA/CT-83/44] p 27 N84-10035

Effects of broadened property fuels on radiant heat flux to gas turbine combustor liners [NASA-TM-83537] p 315 N84-16494

Liner environment effects study p 454 N84-20558

Combustor liner construction [NASA-CASE-LEW-14035-1] p 605 N84-24577

Advanced combustor liner cooling concepts p 608 N84-24756

Protective linear materials for transparent plastics [AD-P003204] p 712 N84-26617

LIQUID ATOMIZATION

Producing a cryogenic gust in an Eiffel type atmospheric wind tunnel with short gust p 545 N84-23569

Atomization of liquid sheets in high pressure airflow [NASA-TM-83731] p 810 N84-30223

LIQUID BEARINGS

Experimental determination of gap flow-conditioned forces at turbine stages and their effect on the running stability of simple rotors [NASA-TM-77293] p 246 N84-15553

Unbalance response of a single mass rotor mounted on dissimilar hydrodynamic bearings p 388 N84-19919

LIQUID CHROMATOGRAPHY

Liquid chromatographic analysis of a formulated ester from a gas-turbine engine test [ASLE PREPRINT 83-LC-1A-1] p 472 A84-28995

Simple method for analysis of benzo(a)pyrene in exhaust particles from jet engine by high-performance liquid chromatography using xretlut extraction p 710 A84-38500

LIQUID CRYSTALS

Visualization of boundary layer transition on a cone with liquid crystals p 332 A84-25203

The readability of liquid crystal displays for helicopter cockpit applications - Effects of backlighting with electroluminescence [SAE PAPER 831522] p 446 A84-29514

LIQUID FILLED SHELLS

Flight data on liquid-filled shell for spin-up instabilities [AD-A139138] p 517 N84-23610

An explanation of spin-up instabilities for a 155mm binary projectile [AD-A141534] p 808 N84-29173

LIQUID HYDROGEN

An assessment of the safety of hydrogen-fueled aircraft p 25 A84-11043

Analytical design of a liquid hydrogen fueled turbofan-ramjet engine for flight Mach numbers zero to five p 133 N84-12187

Analysis of a topping-cycle, aircraft, gas-turbine-engine system which uses cryogenic fuel [NASA-TP-2294] p 455 N84-21549

LIQUID INJECTION

A study of dynamic measurements made in the settling chamber of the Langley 0.3-meter transonic cryogenic tunnel [AIAA PAPER 84-0596] p 365 A84-24186

Improving the parameters of a gas turbine engine by injecting water into the air that cools the turbine p 357 A84-25569

Effects of viscosity and surface tension on a jet plume in supersonic crossflow p 405 A84-27128

The effect of the injection of water into the cooling air on the fuel economy of gas turbine engines during operation with the afterburner p 986 A84-47570

Supersonic flows around a circular cone with or without blowing on the surface [AD-A143258] p 851 N84-32362

LIQUID NITROGEN

A study of dynamic measurements made in the settling chamber of the Langley 0.3-meter transonic cryogenic tunnel [AIAA PAPER 84-0596] p 365 A84-24186

LIQUID PHASES

Liquid and solid phase compositions in a partially frozen JP-5 fuel low in n-alkanes [AD-A143390] p 916 N84-32553

LIQUID PROPELLANT ROCKET ENGINES

Reusable single-state-to-orbit vehicle concept utilizing composite engines [AIAA PAPER 84-1498] p 709 A84-37663

LIQUID SLOSHING

Vibration of a structure with a tank containing fluid p 311 A84-19645

LIQUID-SOLID INTERFACES

Experimental observation of the dynamic behavior of noncontacting coned-face mechanical seals [ASLE PREPRINT 83-LC-3B-1] p 479 A84-28990

Dual clearance squeeze film damper [NASA-CASE-LEW-13506-1] p 535 N84-22562

LIQUIDS

Carbon-13 and proton nuclear magnetic resonance analysis of shale-derived refinery products and jet fuels and of experimental referee broadened-specification jet fuels [NASA-CR-174761] p 916 N84-32552

LITERATURE

The Shock and Vibration Digest, volume 16, no. 3 [AD-A139707] p 560 N84-22976

LITHIUM ALLOYS

Age hardening behavior of Al-Li-(Cu)-(Mg)-Zr P/M alloys p 549 A84-32858

Lightweight aluminum-lithium alloys poised for takeoff p 710 A84-36800

Lighter aluminum alloy development progresses p 797 A84-40791

LOAD DISTRIBUTION (FORCES)

The effect of mode III loading on fatigue crack growth in a rotating shaft p 312 A84-19747

Analysis of structural failure probability under spectrum loading conditions p 313 A84-21367

Estimation of deformation kinetics of GTE blades in conditions of low-frequency temperature and high-frequency mechanical loads p 717 A84-37369

A calculation of load distribution in wings in a supersonic flow p 839 A84-45711

The use of the perturbation method for determining the optimum distribution of the load-bearing material in swept wings p 920 A84-45725

A study of crack growth rate in a notched strip under biharmonic loading p 920 A84-45726

Load deflection characteristics of inflated structures [NASA-CR-174585] p 86 N84-12028

Corrosion and load transfer effects on fatigue of mechanically fastened joints. Fatigue of zero load transfer specimen [AD-A139042] p 561 N84-22985

Effect of radial load distribution on the first-harmonic inflow velocity of a helicopter rotor at transition speeds [AD-A142840] p 848 N84-31100

LOAD TESTS

Structural flight load testing pre and post flight analysis [AIAA PAPER 83-2763] p 50 A84-12349

Health monitoring of helicopter gearboxes p 257 A84-19631

Fracture toughness acceptance testing of aluminum alloys for aircraft applications p 711 A84-39212

Development of a new hybrid material (ARALL) for aircraft structures --- aramid reinforced aluminum laminate p 913 A84-42866

Experimental and analytical investigation of active loads control for aircraft landing gear p 354 N84-19886

Calibration of CT-4A fatigue test article, March 1983 [AD-A142880] p 679 N84-31115

LOADING OPERATIONS

Aircraft loading adapter for use with ordnance lift vehicle. [AD-D011147] p 992 N84-33421

LOADING RATE

Fatigue crack initiation in aluminum alloys under programmed block loading p 374 A84-24963

LOADS (FORCES)

- Statistics of crack growth of a superalloy under sustained load p 614 A84-36175
- An experimental investigation of a free-tip rotor configuration in a forward flight wind-tunnel test [NASA-TM-84409] p 17 N84-10018
- The engineering significance of defects in composite structures p 76 N84-10222
- Statistics of crack growth of a superalloy under sustained load [AD-A130395] p 80 N84-10616
- The initial design of active control systems for a flexible aircraft p 68 N84-11125
- Airloads on bluff bodies, with application to the rotor-induced downloads on tilt-rotor aircraft [NASA-TM-84401] p 20 N84-11142
- Preliminary results of the first static calibration of the RSRA helicopter active-isolator rotor balance system [NASA-TM-84395] p 124 N84-13178

- LOFTING**
- FOD (Foreign Object Damage) generation by aircraft tires — probability of engine ingestion and airfield surface movements [AD-A133319] p 205 N84-15146

Some mathematical tools for a modeller's workbench p 491 N84-22204

LOGIC CIRCUITS

- Video processor for air traffic control beacon system [NASA-CASE-KSC-11155-1] p 244 N84-15395
- Lighting simulator circuit parameters and performance for severe-threat, high-action-integral testing [DE84-009065] p 810 N84-30211
- High temperature electronics technology [AD-A143571] p 928 N84-32714

LOGIC DESIGN

Development of threat logic for airborne TCAS — Traffic Alert and Collision Avoidance System p 423 A84-26790

Operational and functional description of the AERA packages [AD-A136852] p 346 N84-19326

Minimum operational performance standards for traffic alert and collision avoidance system (TCAS) airborne equipment, volume 1 [RTCA/DO-185-VOL-1] p 593 N84-25685

Minimum operational performance standards for traffic alert and collision avoidance system (TCAS) airborne equipment, volume 2 [RTCA/DO-185-VOL-2] p 593 N84-25686

Logistics engineering design techniques for fault-tolerant avionics systems [AD-A137456] p 354 N84-19349

LOGISTICS MANAGEMENT

Black Hawk - A logistics success story p 825 A84-46336

RIM-AIR (Repairable Integrated Model for aviation) study [AD-A131141] p 4 N84-11113

Integrated logistic supportability (Aviation material) [AD-A132367] p 88 N84-13146

Lessons learned—advanced attack helicopter [AD-A135521] p 294 N84-17177

A multi-period repair parts inventory model for a naval air rework facility [AD-A136873] p 328 N84-19280

Naval aviation IMA repair capability: A readiness to resources approach [AD-A140465] p 572 N84-25612

AN/TPN-19 improvements program management plan [AD-A140728] p 677 N84-26690

Aircraft Spare Stockage Methodology (aircraft spares) study [AD-A142259] p 740 N84-28730

Concurrency of design criteria: A key to trainer readiness [AD-P003454] p 907 N84-32231

LONG TERM EFFECTS

Long term evaluation of the effects of shale oil produced JP-4 on aircraft construction materials [AD-A131665] p 123 N84-12161

Effects of long-time elevated temperature exposures on hot-isostatically-pressed power-metalurgy Udimet 700 alloys with reduced cobalt contents [NASA-TM-83632] p 799 N84-28917

Residual-strength tests of L-1011 vertical fin components after 10 and 20 years of simulated flight service [NASA-TM-83632] p 801 N84-29970

LONGERONS

Characterization of a sample of aluminum alloy longeron in 7050 T73552 of Alcoa origin. Summary of test number MO 570300 p 690 N84-27729

LONGITUDINAL CONTROL

Dynamics of longitudinal motion of an aeroplane with a deformable control system p 63 A84-11998

Analysis of aircraft attitude control systems prone to pilot-induced oscillations p 225 A84-17366

A mathematical model for performance comparisons of different types of tail units. p 361 A84-25191

Back-up flight control system p 361 A84-25489

Real time study of a microprocessor based flight control system p 703 A84-38883

Limited evaluation of the longitudinal flying qualities of a centerstick controlled NT-33A aircraft with variations in stick force per g and stick force per inch [AIAA PAPER 84-2094] p 787 A84-42347

A comparison of fixed-base and in-flight longitudinal handling qualities simulations [AIAA PAPER 84-2104] p 788 A84-42375

An advanced pitch change mechanism incorporating a hybrid traction drive [AIAA PAPER 84-1383] p 888 A84-44182

An integrated AFCS for the "PROFILE"-mode p 137 N84-12069

Flying qualities experiments of rate command/attitude hold systems in the HFB 320 in-flight simulator [DFVLR-FB-83-25] p 232 N84-15163

Functional integration of vertical flight path and speed control using energy principles p 463 N84-20588

L-1011 testing with relaxed static stability p 463 N84-20591

Design of longitudinal control laws for the X-29A backup analog flight control system [AD-A137814] p 463 N84-20601

A study of helicopter gust response alleviation by automatic control [NASA-TM-85870] p 543 N84-23655

An advanced pitch change mechanism incorporating a hybrid traction drive [NASA-TM-83709] p 572 N84-25605

Computer program to simulate digital computer based longitudinal flight control laws in a high performance aircraft [AD-A140143] p 611 N84-25719

Pitch control of a satellite using stabilizing flaps [INPE-3185-PRE/550] p 910 N84-31246

Development and flight evaluation of an augmented stability active controls concept with a small tail [NASA-CR-173880] p 903 N84-32395

LONGITUDINAL STABILITY

Investigations of the flight characteristics of airliners with reduced static longitudinal stability [DGLR PAPER 82-091] p 62 A84-10566

Trimming advanced fighters for STOL approaches p 63 A84-11046

Some effects of high-rate springs in elevator control systems p 64 A84-12492

A vortex-lattice method for calculating longitudinal dynamic stability derivatives of oscillating delta wings p 225 A84-17426

Identification of longitudinal flying characteristics of an aeroplane and the effect of nonstationary aerodynamics p 304 A84-22322

Evaluation of angle of attack and sideslip angle using a coupled nonlinear monitor for longitudinal and lateral motions [DGLR PAPER 83-109] p 460 A84-29672

Aircraft longitudinal motion control by utilizing degrees of freedom in pole assignment p 460 A84-29752

Longitudinal stability analysis of elastic vehicles p 525 A84-31776

Problems in the longitudinal dynamics of a flight vehicle in a bounded flow p 702 A84-37234

Parameter identification applied to the oscillatory motion of an airplane near stall p 702 A84-37934

Selection of SAS' longitudinal feedback coefficients to improve riding qualities p 785 A84-41778

Parameters estimation of a nonstationary aerodynamics model for longitudinal motion of aeroplane from flight measurements p 898 A84-44948

Longitudinal motion of aircraft in wind shears — German thesis p 900 A84-45526

Power effects on the longitudinal characteristics on single-engine propeller-driven aircraft [ARL-AERO-REPT-157] p 124 N84-13174

A wind tunnel investigation to determine dominant forebody strake design characteristics for an F-15 equipped with conformal fuel tanks [AD-A136912] p 340 N84-19292

L-1011 testing with relaxed static stability p 463 N84-20591

On the stick-free longitudinal dynamic stability of a general aviation aircraft equipped with an all-movable horizontal tail p 705 N84-27748

In-flight investigation of longitudinal flying qualities criteria [AD-A143614] p 990 N84-33419

LONGITUDINAL WAVES

Observations of longitudinal rolls in a near neutral atmosphere p 487 A84-27174

LOOP ANTENNAS

An experimental investigation of the improvement in the reception of TM (Transverse Magnetic)-polarized LF (Low-Frequency) waves with a two-element spaced array [AD-A142478] p 809 N84-30159

LOOPS

Hardware-in-the-loop simulation techniques used in the development of the Sea Harrier avionics system p 214 N84-15071

LORAN C

Current developments in Loran-C p 35 A84-10867

The impact of cross-rate interference on the acquisition and track modes of Loran-C receivers p 39 A84-12434

The ONI-7000 airborne Loran-C system p 41 A84-12461

Loran-C navigation system for Saudi Arabia p 521 A84-32341

SUBJECT INDEX

LOW TEMPERATURE TESTS

Joint University Program for Air Transportation Research, 1982 [NASA-CP-2285] p 4 N84-11099

Investigation of air transportation technology at Ohio University, 1982 p 28 N84-11100

Enhanced character sizes for the VDM-1 video display board p 57 N84-11101

RF front end interface and AGC modification p 43 N84-11102

Preliminary description of the area navigation software for a microcomputer-based Loran-C receiver p 43 N84-11103

Investigation of air transportation technology at MIT p 28 N84-11104

Lateral runway approach guidance using Loran-C p 57 N84-11105

Relative-datum Loran navigation p 43 N84-11107

CONUS Loran-C error budget: Flight test [AD-A139871] p 592 N84-24568

LOSSES

Secondary flows and losses in a turbine cascade p 301 N84-16203

Experimental verification of an endwall boundary layer prediction method p 302 N84-16211

Thermal analysis of a planetary transmission with spherical roller bearings operating after complete loss of oil [NASA-TP-2367] p 930 N84-32824

LOUVERS

Materials for Advanced Turbine Engines (MATE): Project 3: Design, fabrication and evaluation of an oxide dispersion strengthened sheet alloy combustor liner, volume 1 [NASA-CR-174691] p 915 N84-32504

LOW ALTITUDE

Display-oriented cockpit for low-level night flight (experimental program NSC) p 55 A84-11060

Low level delivery test program - Correlation of wind tunnel/sled track test separation results [AIAA PAPER 83-2761] p 72 A84-12347

A new characterization of supercooled cloud design criteria for aircraft ice protection systems below 10,000 feet AGL [AIAA PAPER 84-0182] p 247 A84-17935

Low altitude wind shear statistics derived from measured and FAA proposed standard wind profiles [AIAA PAPER 84-0114] p 248 A84-19233

Low altitude navigation and targeting infrared system for night (LANTIRN) p 420 A84-26702

Position updating using a passive millimeter wave sensor - for low altitude air navigation p 591 A84-36263

Low altitude simulator training: A-10 aircraft [AD-A130794] p 73 N84-10106

Some comments on the hazards associated with manoeuvring flight in severe turbulence at high speed and low altitude p 228 N84-15089

A helicopter flight investigation of roll-control sensitivity, damping and cross coupling in a low altitude lateral manoeuvring task [NASA-TM-84376] p 305 N84-16216

Thermal control of tethered satellite in a very low altitude aerodynamic mission p 373 N84-19444

Estimation of the flight parameters of low flying aircraft using the radiated noise p 595 N84-24569

T-38 student windshield birdproofing efforts utilizing metal and composite materials for aft arch reinforcement [AD-P003189] p 672 N84-26602

Missile system for low altitude air defence p 910 N84-31255

Low-Altitude Database Development Evaluation and Research (LADDER) [AD-P003468] p 944 N84-32243

A laser image generation system for helicopter Nap-of-the-Earth (NOE) flight training [AD-P003481] p 928 N84-32248

LOW ASPECT RATIO

Unified aeroelastic flutter theory for very low aspect ratio panels p 77 A84-10142

A prediction method for characteristics of cooled transonic turbines with low aspect ratio and high load p 59 A84-12043

Performance of a high-work low aspect ratio turbine tested with a realistic inlet radial temperature profile [AIAA PAPER 84-1161] p 777 A84-40239

Experimental measurements of wake characteristics of low aspect-ratio delta and flapped-plate airfoils [AD-A130398] p 18 N84-10026

Low aspect ratio wing/body vortex interaction at large angles of pitch and yaw p 20 N84-11140

Performance of a high-work low aspect ratio turbine tested with a realistic inlet radial temperature profile [NASA-TM-83655] p 607 N84-24589

Low aspect ratio turbine design at Rolls-Royce p 808 N84-29169

LOW ASPECT RATIO WINGS

On Reynolds number effects in vortex flow over aircraft wings [AIAA PAPER 84-0137] p 160 A84-17905

Numerical simulation of the tip vortex off a low-aspect-ratio wing at transonic speed [AIAA PAPER 84-0522] p 168 A84-18149

Empirical curves for predicting supersonic aerodynamics of very-low-aspect-ratio lifting surfaces [AIAA PAPER 84-0575] p 169 A84-18173

Hypersonic nonequilibrium gas flow past a low-aspect-ratio wing p 260 A84-19562

Three-dimensional hypersonic flow of a radiating gas past a wing p 264 A84-21131

An efficient coordinate transformation technique for unsteady, transonic aerodynamic analysis of low aspect-ratio wings [AIAA PAPER 84-0872] p 505 A84-31686

Investigation of two extremal problems of quadrupole wing theory p 717 A84-37230

Divergence of forward swept wings p 682 A84-38424

Computational-experimental pressure distributions on a transonic, low-aspect-ratio wing [AIAA PAPER 84-2092] p 750 A84-42345

Three-dimensional hypersonic flow past a wing with a low aspect ratio p 838 A84-45702

Pressure distribution on a low-aspect-ratio wing in hypersonic flow p 841 A84-45729

Hypersonic air flow past low-aspect-ratio wings and thin bodies p 841 A84-45733

A similarity law for hypersonic flow of uniformly reacting air past a low-aspect-ratio wing p 841 A84-45734

Separated flow around a conic combination of a low-aspect-ratio wing and a nonsymmetrical fuselage p 957 A84-47051

A method for the construction of a flutter model wing having given influence coefficients p 1008 A84-49545

Effects of blowing spanwise from the tips of low-aspect ratio wings of varying taper ratio, with application to improving STOL capability of fighter aircraft [AD-A135688] p 337 N84-18175

Numerical simulation of the tip vortex off a low-aspect-ratio wing at transonic speed [NASA-TM-85932] p 510 N84-22535

Theory of hypersonic three-dimensional flow of nonsteady gas stream with relaxation past thin wing with arbitrary aspect ratio p 512 N84-22791

LOW COST

The design and measured performance of an experimental GPS navigation receiver for general aviation p 38 A84-12428

ACAP - A giant step towards low cost composite aircraft - Advanced Composite Airframe Program p 195 A84-17205

The 'affordable' fighter market p 289 A84-20599

Low cost thermal protection system processing [AD-D011142] p 915 N84-32434

LOW DENSITY WIND TUNNELS

Design study for a low density wind tunnel [INPE-3072-TDL/160] p 708 N84-26707

LOW NOISE

RF subsystems for precision DME p 520 A84-32335

LOW PRESSURE

Low pressure measurement techniques in a hypervelocity wind tunnel p 367 A84-25213

Stress mapping of a low pressure compressor for an advanced turbojet engine [ASME PAPER 84-GT-99] p 981 A84-46939

Energy efficient engine: Low-pressure turbine subsonic cascade component development and integration program [NASA-CR-165592] p 701 N84-27738

LOW REYNOLDS NUMBER

A comparison between the predicted and experimental characteristics of a NACA 64(3)-418 aerofoil at low Reynolds numbers p 6 A84-10090

Correlation of hypersonic stagnation point heat transfer at low Reynolds numbers p 10 A84-10146

Clark-Y airfoil performance at low Reynolds numbers [AIAA PAPER 84-0052] p 157 A84-17848

The influence of airfoil roughness on the performance of flight vehicles at low Reynolds numbers [AIAA PAPER 84-0540] p 174 A84-19258

Jet noise at low Reynolds number p 321 A84-21504

Wind-tunnel tests on a high performance low-Reynolds number airfoil [AIAA PAPER 84-0628] p 331 A84-24206

The influence of laminar separation and transition on low Reynolds number airfoil hysteresis [AIAA PAPER 84-1617] p 650 A84-38010

Boundary layer characteristics of the Miley airfoil at low Reynolds numbers p 829 A84-44507

Airfoil heat transfer calculation using a low Reynolds number version of a two-equation turbulence model [ASME PAPER 84-GT-261] p 1005 A84-47032

An application of the finite element method to the solution of low Reynolds number, incompressible flow around a Joukowski aerofoil, with emphasis on automatic generation of grids [AD-A133008] p 176 N84-14127

On the stability of flight vehicles in the low Reynolds number non-linear regime [AD-A140008] p 583 N84-24561

LOW SPEED

A comparison with theory of peak to peak sound level for a model helicopter rotor generating blade slap at low tip speeds p 84 A84-15201

A method for predicting low-speed aerodynamic characteristics of transport aircraft p 330 A84-24102

A comparison of turbulence intensity measurements using a laser velocimeter and a hot wire in a low speed jet flow p 478 A84-28741

An experimental investigation of the vortex flow over delta and double-delta wings at low speed p 99 N84-12106

Analysis of nonplanar wing-tip mounted lifting surfaces on low-speed airplanes p 204 N84-15142

Experimental studies of flow separation of three airfoils at low speeds [NASA-CR-3530] p 754 N84-28736

Flight characteristics of a manned, low-speed, controlled deep stall vehicle [NASA-TM-86041] p 773 N84-29863

LOW SPEED STABILITY

Vortex induced lift on two dimensional low speed wings [AD-A146318] p 827 A84-44133

Effect of Reynolds number on upper cowl flow separation p 837 A84-45051

LOW SPEED WIND TUNNELS

Transport configuration wind tunnel tests with engine simulation [AIAA PAPER 84-0592] p 364 A84-24183

Control of turbine simulators for low speed windtunnel tests p 367 A84-25211

An experimental study of the performance of clustered parachutes in a low speed wind tunnel [AIAA PAPER 84-0822] p 402 A84-26585

Modernization of the Breguet low-speed wind tunnel at Velizy [AAAF PAPER NT 83-11] p 544 A84-32481

Experimental study of the behavior of 3D-turbulent boundary layer in a simplified wing/body junction [AIAA PAPER 84-1529] p 647 A84-37954

Low speed closed circuit high pressure tunnel for gas flow spark gap studies [AIAA PAPER 84-1596] p 705 A84-37995

Transient aerodynamic characteristics of a two-dimensional low-speed wing at several angles of attack [AIAA PAPER 84-2076] p 749 A84-42332

Active control of asymmetric vortex effects in circular cylinder [AIAA PAPER 84-2101] p 751 A84-42351

Low flight speed fan noise from a supersonic inlet p 938 A84-44508

The experimental investigation of the spatial vortex patterns of some slender bodies at high angle of attack in low speed tunnel p 835 A84-45012

Low speed twin engine simulation on a large scale transport aircraft model in the DNW p 906 A84-45056

The cryogenic wind tunnel Cologne p 545 N84-23568

Recent modifications and calibration of the Langley low-turbulence pressure tunnel [NASA-TP-2328] p 665 N84-27675

The 6M x 8M low speed wind tunnel p 907 N84-31221

LOW TEMPERATURE

The filterability of T-6 fuel at low temperatures p 374 A84-25590

Heat transfer in airplane fuel tanks at low temperatures [ASME PAPER 83-HT-102] p 479 A84-29095

Low temperature behavior of fuels in simulated aircraft tanks [AD-A130267] p 76 N84-10336

Simulation of T-38 aircraft student canopy response to cockpit pressure and thermal loads using MAGNA (Materiality and Geometrically Nonlinear Analysis) [AD-P003231] p 733 N84-26644

LOW TEMPERATURE TESTS

Fracture temperature and flaw growth in nitronic 40 at cryogenic temperatures [NASA-TP-2312] p 552 N84-23750

Low temperature evaluation of advanced technology hydraulic system (8,000 psi) [AD-A143389] p 903 N84-32396

LOW THRUST

LOW THRUST

Residual thrust due to decomposition of insulator materials — in solid propellant rocket engines p 709 A84-38150

LOW TURBULENCE

Dynamic flow quality measurements in the Langley Low Turbulence Pressure Tunnel [AIAA PAPER 84-0621] p 366 A84-24201
Recent modifications and calibration of the Langley low-turbulence pressure tunnel [NASA-TP-2328] p 665 N84-27675

LOW VISIBILITY

An investigation of side-stick-controller/stability and control-augmentation system requirements for helicopter terrain flight under reduced visibility conditions [AIAA PAPER 84-0235] p 226 A84-17965
Optonics for PAH-2/HAC/HAP - Strangers in the sight p 444 A84-26898
A holographic head-up display for low visibility landing operations [SAE PAPER 831451] p 445 A84-29492

LUBRICANT TESTS

Parametric evaluation of a solid-lubricated ball bearing [ASLE PREPRINT 83-LC-1B-1] p 479 A84-28994
Liquid chromatographic analysis of a formulated ester from a gas-turbine engine test [ASLE PREPRINT 83-LC-1A-1] p 472 A84-28995

LUBRICANTS

Fuel-and-lubricant chemistry in civil aviation: Handbook — In Russian p 236 A84-18506
Classification of fuels and lubricating materials for aviation equipment p 548 A84-31123
Effects of wear metal on lubricant deposition [AD-A142027] p 801 N84-29008
Transmission efficiency measurements and correlations with physical characteristics of the lubricant [NASA-TM-83740] p 810 N84-30293

LUBRICATING OILS

Ferrographic and spectrometer oil analysis from a failed gas turbine engine p 78 A84-11273
A portable x-ray analyzer for wearmetal particles in lubricants p 240 A84-17543
Evaluation of thermal-oxidative stability of aviation oils on the OP-100 device p 374 A84-25589
AIR 1828 - A guide to gas turbine engine oil system monitoring [SAE PAPER 831477] p 451 A84-29456
The CEMS (Comprehensive Engine Management System) IV OAP (Oil Analysis Program) algorithm [AD-A131055] p 60 N84-10072
150 hour engine test of corrosion inhibited MIL-L-23699C oil [AD-A131833] p 140 N84-12317
Turbine engine lubricant reclamation [AD-A135926] p 375 N84-18410
Aircraft accident report. Eastern Air Lines, Incorporated, Lockheed L-1011, N334EA, Miami International Airport, Miami, Florida, May 5, 1983 [NTSB-AAR-84-04] p 518 N84-23613
Perfluoroalkylether substituted phenyl phosphines [AD-D011122] p 915 N84-32529

LUBRICATION

Measurements of squeeze film bearing forces to demonstrate the effect of fluid inertia [ASME PAPER 84-GT-11] p 1001 A84-46882
The effect of fluid inertia and viscoelasticity in squeeze-film damper bearings [AD-A138054] p 486 N84-21880

LUGS

Surface cracking of quenched and tempered steel by shear instability - Cause of premature fatigue cracks in helicopter main rotor spindle lugs? p 914 A84-46339
Semielliptical cracks along holes in plates and lugs [AD-A130786] p 80 N84-10622

LUMINAIRES

Artificial aging of transparent aerospace materials [AD-P003210] p 713 N84-26623

LUMINESCENCE

Evaluation of arctic test of tritium radioluminescent lighting [AD-A139176] p 523 N84-23619

M

MACH CONES

Coherent structures producing Machwaves inside and outside of the supersonic jet p 170 A84-18353

MACH NUMBER

Effects of Mach number on upstream influence in sharp fin-induced shock wave turbulent boundary layer interaction [AIAA PAPER 84-0095] p 159 A84-17878
Investigation of mixing in a turbofan exhaust duct. II Computer code application and verification p 448 A84-27140

Hypersonic Mach number and real gas effects on Space Shuttle Orbiter aerodynamics p 405 A84-27435

Allowance for the effect of the finiteness of Mach numbers on regime coefficients in the theory of local interaction p 406 A84-28294

The validity conditions in three-dimensional supersonic linear aerodynamics p 505 A84-31122

Effects of Mach number on the development of a subsonic multiple jet [AIAA PAPER 84-1656] p 652 A84-38038

The three-dimensional turbulence transport properties in the boundary layers of conical body configurations at Mach 3 [AIAA PAPER 84-1528] p 743 A84-40815

Interference effects between spherically blunted cylinders at M = 2.5 and 1.5 [AIAA PAPER 84-2098] p 750 A84-42349

Advantage of internal bleed for the performance of a two-dimensional air intake in the extended Mach-number range 1.8 - 3+ [ONERA, TP NO. 1984-38] p 838 A84-45183

Effect of Mach and Reynolds numbers on heat transfer at the blunt leading edge of a variable-sweep wing in the region of bow-wave incidence p 840 A84-45723

An approximate determination of the critical Mach number from the calculated pressure distribution p 960 A84-47088

A study of transonic normal shock wave-turbulent boundary layer interactions in axisymmetric internal flow p 16 N84-10015

Aerodynamic characteristics, including effect of body shape, of a Mach 6 aircraft concept [NASA-TP-2235] p 107 N84-13184

Phase averaged measurements of the coherent structure of a mach number 0.8 jet [NASA-CR-175359] p 269 N84-16134

Mach 0.6 to 3.0 flows over rectangular cavities [AD-A134579] p 272 N84-18153

Assessment of real gas effects on the prediction of the aerodynamics of high velocity Army shells [AD-A134739] p 276 N84-17150

Evaluation of a flow direction probe and a pitot-static probe on the F-14 airplane at high angles of attack and sideslip [NASA-TM-84911] p 437 N84-20514

Mach number correlation for a two-dimensional helicopter rotor-blade analysis in the tip region p 412 N84-21509

Base pressure measurements on a projectile shape at Mach numbers from 0.91 to 1.20 [AD-A141341] p 669 N84-27699

A review of some Reynolds number effects related to bodies at high angles of attack [NASA-CR-3809] p 848 N84-31097

MACH REFLECTION

A uniformly valid asymptotic solution for unsteady subsonic flow through supersonic cascades p 154 A84-17454

Pan Air applications to mutual interference effects due to close proximity — computer program for subsonic and supersonic flow calculation about complex aircraft configurations [AIAA PAPER 84-0217] p 162 A84-17953

Numerical calculations of complex Mach reflection [AIAA PAPER 84-1679] p 658 A84-39314

PAN AIR applications to mutual interference effects — computer program for subsonic and supersonic flow calculation about complex aircraft configurations p 963 A84-49093

Mach reflection flow fields associated with strong shocks [AD-A131384] p 21 N84-11148

MACH-ZEHNDER INTERFEROMETERS

High speed interferometric method for density field investigation in a boundary layer behind the shock wave p 919 A84-45491

MACHINERY

Technology advances in engineering and their impact on detection, diagnosis and prognosis methods; Proceedings of the Thirty-sixth Meeting, Scottsdale, AZ, December 6-10, 1982 p 240 A84-17531

MACHINING

New technology expands uses of a precision cast-machined aluminum plate p 235 A84-17186

Machining of fiber-reinforced synthetic materials in aircraft construction [DGRL PAPER 83-81] p 481 A84-29654

Experimental studies on chemical reactivity and dimensional growth in machining of titanium alloys [ASME PAPER 84-GT-276] p 1006 A84-47038

Economic use of CBN grinding tools in the production of jet turbine components [CSIR-TRANS-1736] p 928 N84-32561

MAGNESIUM ALLOYS

Effects of metal flow on fatigue strength and mechanical properties of ZK60A magnesium alloy forging p 913 A84-44173

MAGNESIUM COMPOUNDS

Polycrystalline MgAl₂O₄ spinel for high performance windows [AD-P003202] p 712 N84-26615

MAGNETIC BEARINGS

The active magnetic bearing enables optimum damping of flexible rotor [ASME PAPER 84-GT-117] p 1003 A84-46951

MAGNETIC CONTROL

Multivariable frequency domain controller for magnetic suspension and balance systems — for wind tunnel aircraft models p 232 A84-19138

MAGNETIC EFFECTS

USSR report: Physics and mathematics [JPRS-UPM-84-005] p 941 N84-32081

MAGNETIC LEVITATION VEHICLES

Magnetic levitation - The track currents p 917 A84-43574

MAGNETIC SUSPENSION

Progress towards large wind tunnel magnetic suspension and balance systems [AIAA PAPER 84-0413] p 231 A84-18075

Multivariable frequency domain controller for magnetic suspension and balance systems — for wind tunnel aircraft models p 232 A84-19138

The drag of magnetically suspended wind-tunnel models with nose-cones of various shapes [NASA-TM-77325] p 270 N84-16137

Magnetic suspension and balance system study [NASA-CR-3802] p 794 N84-29888

MAGNETOHYDRODYNAMIC FLOW

Hall effects on MHD free-convection flow past an accelerated vertical porous plate p 939 A84-45292

Magnetohydrodynamic flow past nonconducting wedge p 738 N84-26931

MAGNETOHYDRODYNAMIC GENERATORS

Turbomachines and MHD generators of gas-turbine and combined power plants — Russian book p 477 A84-28670

MAGNETOMETERS

Design of incident field B-dot sensor for the nose boom of NASA F-106B aircraft [AD-A141765] p 776 N84-28787

MAGNETOSTRICTION

Improved accuracy magnetostrictive torque meter [AIAA PAPER 84-1280] p 717 A84-37642

MAGNETS

Permanent-magnet motors and generators for aircraft p 60 N84-10062

Cycloconverter on the all-electric airplane p 79 N84-10069

MAGNUS EFFECT

Navier-Stokes computational study of the influence of shell geometry on the Magnus effect at supersonic speeds p 9 A84-10107

The boundary layer on an axisymmetric body with and without spin p 9 A84-10128

PNS computations for spinning and fin-stabilized projectiles at supersonic velocities [AIAA PAPER 84-2118] p 751 A84-42362

Computations of projectile magnus effect at transonic velocities [AD-A133212] p 179 N84-15127

MAINTAINABILITY

Reconnaissance system maintainability from concept to deployment p 474 A84-27252

Supportability considerations of advanced fighter engines [AIAA PAPER 84-1257] p 635 A84-36966

Reliability and maintainability issues for future military helicopter engines p 892 A84-46358

Design, development and flight test of a demonstration advanced avionics system p 214 A84-15067

Structural composites technology working group report [IDA/OSD R and M (Institute for Defense Analyses/Office of the Secretary of Defense Reliability and Maintainability) study [AD-A137331] p 387 N84-18829

Engineering and technical services to improve reliability and maintainability of instrument landing system components [DOT/FAA/PM-84/7] p 427 N84-20503

Future engine technologies and their effect on maintenance — aircraft engines [PNR-90190] p 540 N84-23651

Nondestructive Evaluation Technology Working Group report [IDA/OSD R and M (Institute for Defense Analyses/Office of the Secretary of Defense Reliability and Maintainability study) [AD-A139484] p 563 N84-23919

SUBJECT INDEX

F/A-18 AN/APG-65 radar case study report (IDA/OSD R and M (Institute for Defense Analyses/Office of the Secretary of Defense Reliability and Maintainability) study [AD-A142103] p 807 N84-29057

AN/APN-128 Lightweight Doppler Navigation System (LDNS) case study report (IDA/OSD R and M (Institute for Defense Analyses/Office of the Secretary of Defense Reliability and Maintainability) study [AD-A142072] p 766 N84-29860

F-15 AN/APG-63 radar case study report IDA/OSD R and M (Institute for Defense Analyses/Office of the Secretary of Defense Reliability and Maintainability) study [AD-A142071] p 777 N84-29873

F-16 APG-66 fire control radar case study report IDA/OSD R and M (Institute for Defense Analyses/Office of the Secretary of Defense Reliability and Maintainability) study [AD-A142075] p 777 N84-29874

T700 engine case study report. IDA/OSD R and M (Institute for Defense Analyses/Office of the Secretary of Defense Reliability and Maintainability) study [AD-A143104] p 893 N84-31211

MAINTENANCE

Preliminary evaluation of large area bonding processes for repair of graphite/polyimide composites p 235 A84-17202

Probabilistic fracture mechanics and fatigue methods: Applications for structural design and maintenance p 312 A84-21360

Avionics maintenance - A perspective p 441 A84-26767

Fatigue reliability of gas turbine engine components under scheduled inspection maintenance [AIAA PAPER 84-0850] p 533 A84-31670

The study of graphite/epoxy repair variables using a double lap shear specimen p 710 A84-38889

Rehabilitation of the Mauritius Island Plaisance airport Upgrading the runway p 791 A84-40023

Repairs without interruption of the air traffic on the runway of the Geneva-Cointrin airport p 791 A84-40024

Improved acrylic systems for rapid runway repair [AD-A130389] p 73 N84-10103

The effects of weather on rapid runway repair, volume 2 [AD-A130350] p 73 N84-10105

Defect occurrences in the manufacture of large CFC structures and work associated with defects, damage and repair of CFC components p 76 N84-10223

Optimization of long range major rehabilitation of airfield pavements p 74 N84-11181

Effects of integrated maintenance on the definitions of onboard equipments --- Mirage 2000 aircraft p 121 N84-12068

Integrated logistic supportability (Aviation material) [AD-A132367] p 88 N84-13146

Flight service evaluation of advanced composite ailerons on the L-1011 transport aircraft [NASA-CR-172246] p 141 N84-13223

AVRADCOM research helicopter vibration p 353 N84-19867

Integrated testing and maintenance technologies [AD-A138587] p 503 N84-22528

Moisture transport in composites during repair work [AD-A138658] p 550 N84-22703

Uninstalled aero engine testing in operation in the Royal Air Force p 612 N84-25731

Swedish Air Force maintenance programme for aged transparent enclosures for jet trainer and jet fighter aircraft [AD-P003208] p 637 N84-26621

Heat: Initiated furan resin for rapid runway repair [AD-A140902] p 707 N84-26713

Justification of estimates for fiscal year 1985 submitted to Congress February 1984. Aircraft procurement, Air Force [AD-A140837] p 737 N84-27610

Safety study: Airport certification and operations [PB84-917002] p 760 N84-28761

Bomb damage repair: Precast slab design [AD-A141687] p 793 N84-28819

Study of the FAA (Federal Aviation Administration) program to modernize maintenance operations [AD-A142295] p 741 N84-29848

Field repair of AH-16 helicopter window cutting assemblies [NASA-TM-85831] p 774 N84-29864

Effects of variations in coldworking repair procedures on flaw growth and structural life [AD-A141966] p 812 N84-30336

Improvements to software maintenance methods in real time embedded aviation flight systems [AD-A141949] p 815 N84-30742

Composite structure repair [AD-A141456] p 914 N84-31300

Damaged radar radome repair device [AD-D011158] p 998 N84-33528

Radio frequency distribution assembly, operations and maintenance manual [AD-A143864] p 1009 N84-33649

Evaluation of aircraft battery charge, discharge, and analyzation requirements for ground support equipment [AD-A144243] p 1011 N84-34678

MAINTENANCE TRAINING

Cost-effective and efficient maintenance training devices: A user accepted design process [AD-P003456] p 908 N84-32233

MALFUNCTIONS

Weibull/Weibayes analysis of hydraulic pump malfunction data [SAE PAPER 831542] p 481 A84-29467

MAN ENVIRONMENT INTERACTIONS

Guidelines for assessment and control of noise p 816 N84-29477

MAN MACHINE SYSTEMS

Artificial Intelligence - An implementation approach for advanced avionics [AIAA PAPER 83-2401] p 54 A84-10046

Analysis of incorrect human behavior in flight accidents and possibilities for influencing this behavior p 108 A84-15418

F-16 power approach handling qualities improvements p 180 A84-15982

Real-time pilot guidance system for improved flight-test maneuvers p 205 A84-16161

Cockpit integration in the HH-60D Night Hawk helicopter p 207 A84-16559

Speech technology for avionic computers p 208 A84-16573

The cockpit voice entry trail - Where is it going? p 208 A84-16574

Buffered receptor, avionics integration network (BRAIN) - A concept proposed for memory managed avionics p 238 A84-16610

Integrated pilot - Optimal augmentation synthesis for complex flight vehicles: Experimental validation p 223 A84-16670

Analysis of aircraft attitude control systems prone to pilot-induced oscillations p 225 A84-17366

Toward a unifying theory for aircraft handling qualities [AIAA PAPER 84-0236] p 197 A84-17966

Implementation of aircraft parameter identification p 200 A84-18610

Toward the totally integrated airplane p 258 A84-21887

HH-60D helmet mounted display formats - A pilot's view and a human factors view [SAE PAPER 831446] p 445 A84-29489

Efforts to assure anthropometric cockpit compatibility in Navy aircraft [SAE PAPER 831455] p 432 A84-29493

Methods and instrumentation for evaluation of advanced displays and pilot performance [SAE PAPER 831462] p 446 A84-29497

Flight management - The real man machine interface [SAE PAPER 831365] p 458 A84-29498

Advanced cockpit design for multi-role fighter avionics integration [SAE PAPER 831471] p 432 A84-29503

F-15 dual role fighter cockpit integration [SAE PAPER 831472] p 432 A84-29504

Information forming - A search and transfer problem --- for aircraft flight decks [SAE PAPER 831497] p 418 A84-29506

Voice control on military aircraft p 676 A84-37038

Control and display requirements for single pilot IFR [AIAA PAPER 84-2240] p 691 A84-39283

The role of pilots and automation in future transport flight stations p 768 A84-41059

Design and flight test of one-man operability in the F/A-18 p 768 A84-41071

The high acceleration cockpit (HAC) - A technology base overview [AD-A145439] p 770 A84-41697

Considerations in the use of in-flight and ground based simulation [AIAA PAPER 84-2102] p 792 A84-42352

Automation effects in a stereotypical multiloop manual control system --- for aircraft [AIAA PAPER 84-1896] p 934 A84-43481

A flight test evaluation of the pilot interface with a digital advanced avionics system [AIAA PAPER 84-1819] p 865 A84-43487

Ruggedized military ATC display requirements - The U.S. Marine Corps solution p 859 A84-44746

Suppression of biodynamic disturbances and pilot-induced oscillations by adaptive filtering p 900 A84-45578

MANAGEMENT PLANNING

The IRIS workstation --- Integrated Raster Imaging System p 1014 A84-46694

Design environments and the user interface for CAD of control systems p 66 N84-10095

Low altitude simulator training: A-10 aircraft [AD-A130794] p 73 N84-10106

A comparison of manual and vocal response modes for the control of aircraft subsystems [AD-A132048] p 115 N84-12152

System architecture: Key to future avionics capabilities p 211 N84-15035

Flight Mechanics and System Design Lessons From Operational Experience [AGARD-CP-347] p 150 N84-15076

The analysis of records of parameters: An indispensable tool in oversight and in operations control p 184 N84-15082

New flight deck design in the light of the operational capabilities p 204 N84-15097

Aircrew training devices: Utility and utilization of advanced instructional features. Phase I: Tactical Air Command [AD-A135052] p 307 N84-17190

Computer programs for helicopter high speed flight analysis [AD-A136376] p 350 N84-18191

A pilot/vehicle model analysis of the effects of motion cues on Harrier control tasks [AD-A136291] p 363 N84-18209

An optimal control approach to pilot/vehicle analysis and Neal-Smith criteria [NASA-CR-170416] p 463 N84-21551

En route/terminal ATC (Air Traffic Control) operations concept [AD-A138991] p 522 N84-22550

STP: A mechanized logic for specification and verification p 629 N84-25308

Emulation of a voice interactive Doppler navigation set [AD-A140204] p 593 N84-25687

F-14 modeling study [NASA-CR-172336] p 598 N84-25701

MAGIC (Microcomputer Applications of Graphics and Interactive Communications). 1: A study of manual versus vocal control under heavy task loading [AD-P003320] p 734 N84-28456

Digital multivariable tracker control laws for the KC-135A [AD-A141118] p 776 N84-28786

A review of US Army aircrew-aircraft integration research programs [NASA-TM-85947] p 790 N84-28809

Proposal and development plan for an aircraft systems integration laboratory [AD-A141827] p 794 N84-28822

MAN POWERED AIRCRAFT

The performance of man-powered aircraft p 502 A84-32789

Human-powered flight p 947 A84-47271

MANAGEMENT

Augustine's laws and major system development programs --- Book p 145 A84-14304

MANAGEMENT ANALYSIS

Augustine's laws and major system development programs --- Book p 145 A84-14304

MANAGEMENT INFORMATION SYSTEMS

Future developments in FAA telecommunications p 857 A84-44729

Information needs and system specifications for the B-1B executive information system [AD-A134424] p 324 N84-17054

Naval aviation IMA repair capability: A readiness to resources approach [AD-A140465] p 572 N84-25612

MANAGEMENT METHODS

FACSKED - A facility for scheduling p 823 A84-44750

MANAGEMENT PLANNING

The national air-space system contingency plan p 22 A84-10416

Results of the Italian CNR project 'Navigation Aids and Air Traffic Control' p 111 A84-14306

Avionics software management and control p 488 A84-26714

Develop a normative or descriptive model of the international/domestic civil aviation industry, volume 3 [AD-A131878] p 86 N84-12051

Develop a normative or descriptive model of the international/domestic civil aviation industry, volume 2 [AD-A131877] p 87 N84-12052

Develop a normative or descriptive model of the international/domestic civil aviation industry. Volume 1: Executive summary [AD-A131876] p 87 N84-12053

Identification of bottlenecks and capacity constraints in F-14, F-15, F-16, and F/A-18 aircraft production [AD-A134629] p 259 N84-17121

MANAGEMENT SYSTEMS

- Redesign of cargo mobility containers
[AD-A137396] p 343 N84-19312
- The avionics integrity program (AVIP)
[AD-P002617] p 568 N84-23362
- AN/TPN-19 improvements program management plan
[AD-A140728] p 677 N84-26690
- Studies of US universities' research equipment needs inconclusive
[AD-A141784] p 793 N84-28821
- Proposal and development plan for an aircraft systems integration laboratory
[AD-A141827] p 794 N84-28822
- Analysis of benefits realized from multiyear contracting for the Black Hawk helicopter
[AD-A143485] p 945 N84-33254
- Integrated technology wing design study
[NASA-CR-3586] p 975 N84-33402

MANAGEMENT SYSTEMS

- Tactical flight management system design
[AIAA PAPER 83-2559] p 63 N84-10575
- Tactical Flight Management - System definition
p 40 N84-12447
- The engineering flight simulator - A resource essential to Flight Management System development and certification
p 465 N84-26720
- Flight management systems - Wanted but only when they work
p 702 N84-36574
- DC-10-10 winglet flight test program management
p 866 N84-44452
- The O'Hare Runway Configuration Management System
p 858 N84-44732
- A new approach to mission management for combat aircraft
p 899 N84-45046
- Airline Maintenance Management System (AMMS)
p 947 N84-46582
- Design and development of the multifunction flight control reference system
p 126 N84-12065
- Navy's advanced aircraft armament system program concept objectives
p 202 N84-15045
- Consideration of MIL-STD-1780, aircraft/store electrical interface standard on stores management system architectures
[AD-P003529] p 883 N84-31133

MANEUVERABILITY

- Supermaneuverability --- for fighter aircraft tactical capabilities
[DGLR PAPER 83-106] p 460 N84-29669
- Fighter maneuverability
p 541 N84-32698
- Requirements, definition and preliminary design for an axisymmetric vectoring nozzle, to enhance aircraft maneuverability
[AIAA PAPER 84-1212] p 680 N84-37635
- The utility of speed, agility, and maneuverability for an LHX type mission
p 877 N84-48371
- Effect of thrust vectoring and wing maneuver devices on transonic aeropropulsive characteristics of a supersonic fighter
[NASA-TP-2119] p 18 N84-10025
- Aerodynamic design for improved maneuverability by use of three-dimensional transonic theory
[NASA-TP-2282] p 335 N84-18161
- Near-optimal finite solutions to the 3 and 4 step discrete evasion games
[AD-A136811] p 393 N84-20314
- Special Course on V/STOL Aerodynamics
[AGARD-R-710] p 573 N84-25625
- New world records set by AN-72 transport
p 687 N84-27672

MANEUVERABLE REENTRY BODIES

- Studies of boundary layer transition and surface roughness effects in hypersonic flow
[AD-A140803] p 662 N84-26670

MANEUVERS

- High altitude maneuver control tests in the NSWC (Naval Surface Weapons Center) hypervelocity wind tunnel
[AD-A136105] p 337 N84-18178
- Minimum time turns with direct sideforce
[AD-A136958] p 352 N84-19342
- Flight operation manual for the Mi-8 helicopter
[AD-A143860] p 976 N84-33407

MANNED SPACE FLIGHT

- Remembered images, NASA 1958-1983
[NASA-EP-200] p 372 N84-18224

MANUAL CONTROL

- Toward a unifying theory for aircraft handling qualities
[AIAA PAPER 84-0236] p 197 N84-17966
- The development and function of the three ring release and hand deployed pilot chute
[AIAA PAPER 84-0829] p 416 N84-26588
- Limited evaluation of the longitudinal flying qualities of a centerstick controlled NT-33A aircraft with variations in stick force per g and stick force per inch
[AIAA PAPER 84-2094] p 787 N84-42347
- Automation effects in a stereotypical multiloop manual control system --- for aircraft
[AIAA PAPER 84-1896] p 934 N84-43481

- An evaluation and force gradient determination of mechanically linked reversible sidestick controllers for General Aviation aircraft
[AIAA PAPER 84-1916] p 897 N84-43488
- Effects of time delays on systems subject to manual control
p 900 N84-45580
- A comparison of manual and vocal response modes for the control of aircraft subsystems
[AD-A132048] p 115 N84-12152
- The integrated manual and automatic control of complex flight systems
[NASA-CR-173308] p 362 N84-18207
- Frequency encoded auditory display of the critical tracking task
[NASA-TM-85869] p 531 N84-22558

MANUALS

- A review of the new ICAO Accident Prevention Manual
p 417 N84-28256
- Aircraft structural design --- Russian book
p 874 N84-46047
- Flight systems raster graphics software reference manual
[ARL-SYS-TM-72] p 938 N84-33072
- Flight operation manual for the Mi-8 helicopter
[AD-A143860] p 976 N84-33407
- Radio frequency distribution assembly, operations and maintenance manual
[AD-A143864] p 1009 N84-33649

MANUFACTURING

- Product liability in aviation and its insurability
p 84 N84-11311
- HV power supply manufacturing improvement --- High Voltage design featuring increased MTBF and decreased life cycle cost for airborne applications
p 216 N84-16537
- Standard Central Air Data Computer (SCADC) into production
p 206 N84-16549
- Manufacture of the Army/Bell advanced composite helicopter airframe
p 148 N84-17149
- Army Aviation Manufacturing Technology Conference, 3rd, Williamsburg, VA, March 7-11, 1983, Report
p 257 N84-19858
- Applicable parameters in the manufacturing of parts made of special steel for aircraft flight control systems
p 482 N84-29962
- American Helicopter Society, Annual Forum, 39th, St. Louis, MO, May 9-11, 1983, Proceedings
p 824 N84-46326
- Defect occurrences in the manufacture of large CFC structures and work associated with defects, damage and repair of CFC components
p 76 N84-10223
- Use of small crack data to bring about and quantify improvements to aircraft structural integrity
[AD-A135012] p 318 N84-17623
- Applications of composite materials in helicopter construction
[AD-A136678] p 352 N84-19336
- Design and manufacturing practices to minimize corrosion in aircraft
p 597 N84-25620
- Testing of turboshaft engines
p 612 N84-25729
- Notice for airman, part 2. Index of approved manufacturing operations for aeronautical appliances according to paragraph 18 of test procedures for aeronautical appliances
[NFL-II-38/84] p 948 N84-34394

MAP MATCHING GUIDANCE

- Integrated electronic map system --- for aircraft navigation
p 441 N84-26763
- Performance analysis of elevation map referenced navigation systems
p 423 N84-26764

MAPPING

- Multi-dimensional aspects of digital color map displays --- for cockpits
p 441 N84-26760
- A conformal mapping technique for nonsymmetric potential flows with separation
p 20 N84-11138
- Multi-models to increase accuracy
p 629 N84-25154

MAPS

- An airborne programmable digital to video converter
[AD-A134839] p 296 N84-17181
- The integrated mission-planning station: Functional requirements, aviator-computer dialogue, and human engineering design criteria
[AD-A136909] p 355 N84-19352

MARINE ENVIRONMENTS

- A study of post-egress procedures and techniques conducted to increase aircrew survival: following emergency escape over water
p 24 N84-10745
- V/STOL for sea control
[AIAA PAPER 83-2436] p 85 N84-13389
- Models for combining single channel NAVSTAR/GPS with dead reckoning for marine positioning
p 188 N84-18317
- Offshore positioning with an integrated GPS/inertial navigation system
p 188 N84-18318

- Observations of longitudinal rolls in a near neutral atmosphere
p 487 N84-27174
- Ship satellite-navigation systems (2nd revised and enlarged edition) --- Russian book
p 554 N84-30797
- Causes and prevention of structural materials failures in naval environments
[AD-A141560] p 800 N84-28972
- Flight service evaluation of two aluminum-brazed titanium spoilers
[NASA-CR-172371] p 915 N84-31343

MARINE PROPULSION

- Industrial and marine engine derivatives: A spin-off from aviation --- gas turbine engines
[PNR-90197] p 537 N84-22581

MARINE TECHNOLOGY

- Canadian Symposium on Air Cushion Technology, 17th, Ottawa, Canada, October 4-6, 1983, Preprints
p 821 N84-42686
- Status report of the programs --- of MBB
p 530 N84-23626
- VTOL shipboard letdown guidance system analysis
[NASA-CR-166519] p 611 N84-25716
- Compendium of US incompressible flow facilities
[AD-A143650] p 993 N84-33424

MARINE TRANSPORTATION

- Loran-C navigation system for Saudi Arabia
p 521 N84-32341
- USSR report: Transportation, no. 126
[JPRS-84457] p 3 N84-10001
- USSR report: Transportation
[JPRS-UTR-84-004] p 503 N84-23551
- USSR report: Transportation
[JPRS-UTR-84-027] p 949 N84-34422

MARITIME SATELLITES

- Ship satellite-navigation systems (2nd revised and enlarged edition) --- Russian book
p 554 N84-30797

MARKERS

- Generation of marker lines by means of marker loads --- in flight fatigue tests
p 727 N84-27074
- Marking and lighting of unpaved runways - In-service testing
[AD-A140958] p 708 N84-27751

MARKET RESEARCH

- BK-117 - A German-Japanese helicopter for the world market
p 47 N84-11084
- Design, development and management of the SAAB-Fairchild 340 program
p 871 N84-44984
- Aeronautics systems technology studies
[NASA-CR-174572] p 3 N84-11098
- Developmental possibilities and restrictions in air transport --- conferences
[ESA-TT-744] p 342 N84-19307
- Development possibilities in commercial air transport in the Federal Republic of Germany
p 342 N84-19308
- Competitive assessment of the U.S. Civil aircraft industry
[PB84-154913] p 632 N84-25525

MARKETING

- The 'affordable' fighter market
p 289 N84-20599
- The MLS order - A vast market opens up, or does it?
p 424 N84-26896
- Minister Bugayev promises improved Aeroflot services
p 27 N84-10002

MARKOV PROCESSES

- Target acceleration modeling for tactical missile guidance
p 521 N84-32709
- Complex radio direction finder with electronic stabilization of the directivity diagram
p 676 N84-38756

- Application of a probabilistic tracking filter: A first evaluation with emphasis on air traffic control. Part 1: Evaluation results
[NLR-TR-82088-U-PT-1] p 972 N84-33397

- Application of a probabilistic tracking filter: A first evaluation with emphasis on air traffic control. Part 2: Live traffic samples
[NLR-TR-82088-U-PT-2] p 972 N84-33398

MASERS

- USSR report: Physics and mathematics
[JPRS-UPM-84-005] p 941 N84-32081

MASS BALANCE

- Dynamical analysis of a two-gimbal mass-unbalanced dynamically tuned gyroscope
p 806 N84-41785

MASS DISTRIBUTION

- Behavior of the flow through a numerically captured shock wave
p 153 N84-17451

- Further experimental determination of parachute virtual mass coefficients
[AIAA PAPER 84-0797] p 401 N84-26565

MASS FLOW

- Mass flow limitation of supersonic blade rows due to leading edge blockage
[ASME PAPER 84-GT-233] p 956 N84-47013
- The new calibration tank for engine simulators at DFVLR Goettingen
p 546 N84-23593

SUBJECT INDEX

Artificial mass concept and transonic viscous flow equation
[AD-P002946] p 517 N84-24188

MASS FLOW FACTORS
Hot-wire investigation of an unseparated shock-wave/turbulent boundary-layer interaction p 508 A84-32602

MASS FLOW RATE
Turbulence measurements in a compressible reattaching shear layer p 656 A84-38830

MASS TRANSFER
Film cooling effectiveness on a turbine blade p 355 A84-23915
Hypersonic interactions with surface mass transfer. I - Steady flow. II - Unsteady flow p 405 A84-27126

MATERIALS HANDLING
Processing characteristics of T300-6K/V378A graphite/bis-maleimide p 233 A84-17148
Redesign of cargo mobility containers [AD-A137396] p 343 N84-19312

MATERIALS SCIENCE
Structures, Structural Dynamics and Materials Conference, 25th, Palm Springs, CA, May 14-16, 1984, and AIAA Dynamics Specialists Conference, Palm Springs, CA, May 17, 18, 1984, Technical Papers. Part 2 p 556 A84-31684
Thin-walled structures in aerospace design p 720 A84-38110
Validated Engineering Data Index, 1983 - 1984 p 485 N84-21758
Technical and scientific publication 1983: Research and development p 633 N84-26430
Rigid closed-cell polyimide foams for aircraft applications and foam-in-place technology [NASA-CR-171805] p 916 N84-32535

MATERIALS TESTS
High wind balloon material test and launch concept description [AIAA PAPER 84-0789] p 415 A84-26558
Thermography - Applications to the manufacture and nondestructive characterization of composites p 477 A84-28639
Survey of quality results obtained in serial production of aerospace composite structures p 558 A84-32993
Crash performance of Al and fiber-reinforced-composite structural elements p 760 A84-42567

MATHEMATICAL MODELS
Modeling to predict pilot performance during CDTI-based in-trail following experiments [AIAA PAPER 84-0517] p 250 A84-18145
Identification of multivariable high performance turbofan engine dynamics from closed loop data p 218 A84-18582
A mathematical model for efficient estimation of aircraft motions p 226 A84-18614
On the determination of airplane model structure form flight data p 200 A84-18615
Computational models of the interaction between vortices and the permeable boundary of a subsonic flow region p 267 A84-21732
Parachute/submunition system coupled dynamics [AIAA PAPER 84-0784] p 400 A84-26555
Improved prediction of parachute line sail during lines-first deployment [AIAA PAPER 84-0786] p 400 A84-26556
A method for calculating the pressure field about a ribbon parachute canopy in steady descent [AIAA PAPER 84-0794] p 400 A84-26562
Aircraft de-icing performance analysis by an adapted temperature field analyzer program [SAE PAPER 831141] p 431 A84-29069
The investigation of engines feed systems dynamic characteristics by hydrodynamic modelling method p 709 A84-38151
Some thoughts on mathematical models for flight dynamics p 704 A84-39716
Forecasting maximum speed of aeroplanes - A case study in technology forecasting p 813 A84-40766
Mathematical methods used in a master-geometry system p 805 A84-41646
Modeling of the aerodynamic response to arbitrary aircraft maneuvers - A numerical validation [AIAA PAPER 84-2079] p 750 A84-42335
Optimal state-rate feedback explicit model-following [AIAA PAPER 84-1857] p 934 A84-43479
Three-dimensional target signature modeling p 856 A84-43887
The structural modelling of rotating blades p 889 A84-44963
Mathematical of linear unsteady aerodynamics of whole aircraft p 834 A84-44996
Vibration analysis of turbomachinery blades by shell theory p 59 N84-10053
Mathematical modelling and theoretical methods for the aerodynamic behaviour of control devices p 65 N84-10085

Modeling and simulation techniques p 66 N84-10096

RIM-AIR (Repairable Integrated Model for aviation) study [AD-A131141] p 4 N84-11113
Aerospatial'es approach to the study of flutter at the design stage of the project p 67 N84-11118
Computational modeling of aerodynamic heating for XM797 nose cap configurations [AD-A133684] p 175 N84-14126
A model of the trailing edge separation on an airfoil [AD-A126703] p 179 N84-15125
Spinning mode acoustic radiation from the flight inlet [NASA-CR-172273] p 255 N84-15896
Design of a lateral ride comfort control system for STOL aircraft [UTIAS-TN-247] p 292 N84-16165
Analytical study of the twin-jet shielding [NASA-CR-175357] p 321 N84-16943
Secondary flow spanwise deviation model for the stators of NASA middle compressor stages [NASA-CR-173360] p 358 N84-18202
Numerical fluid dynamics [AD-A135900] p 384 N84-18593
Error reduction program: A progress report p 454 N84-20536
Pilot modeling, modal analysis, and control of large flexible aircraft p 462 N84-20584
Enhancement and verification of the Navy CASEE (Comprehensive Aircraft Support Effectiveness Evaluation) model (calendar year 1983 task) [AD-A138516] p 399 N84-21505
Development and flight test evaluation of an analytical model of the air-to-air tracking task [AD-A138058] p 464 N84-21555
A Generalized Escape System Simulation (GESS) computer program: GESS user's guide, version 2, volume 1 [AD-A138844] p 518 N84-22545
Model identification and parameter estimation of the power, lift, and drag of light aircraft from a single maneuver p 527 N84-22552
Hypersonic flow around flat body in case of intense radiative heat exchange p 513 N84-22795
Wave drag of elongated astroid bodies at moderate supersonic flight velocities p 513 N84-22797
A study of aeroelastic and structural dynamic effects in multi-rotor systems with application to hybrid heavy lift vehicles [NASA-CR-173505] p 529 N84-23620
An algorithm for the prediction of unsteady potential flow about an arbitrary airfoil [GU-AERO-8306] p 582 N84-24553
Optimal cooperative control synthesis applied to a control-configured aircraft [NASA-CR-170411] p 610 N84-24593
A simplified method of evaluating aircraft handling qualities using a pilot transfer function model [GU-AERO-8302] p 610 N84-24595
An aerodynamic study of combustion in the combustion chambers of turbomachines: Experimental and theoretical approaches p 608 N84-24764
Multi-models to increase accuracy p 629 N84-25154
An investigation of aerodynamic characteristics of wings having vortex flow using different numerical codes [NASA-CR-173596] p 584 N84-25639
Nonlinear problems in flight dynamics [NASA-TM-85940] p 585 N84-25648
Study of effects of fuel properties in turbine-powered business aircraft [NASA-CR-174627] p 617 N84-25854
Computational Fluid Dynamics, volume 2 [VKI-LS-1984-04-VOL-2] p 627 N84-25986
Numerical computation of vortical flows about wings p 587 N84-25987
NERF: A computer program for the numerical evaluation of reliability functions-reliability modeling, numerical methods and program documentation [AR-00-984] p 627 N84-26048
Control of separated flowfields using forced unsteadiness p 661 N84-26654
Mathematical modeling of transient separation flow around circular cylinder p 724 N84-26916
Theoretical modelling of three-dimensional vortex flows in aerodynamics [AD-A134966] p 726 N84-27007
Dilution jets in accelerated cross flows [NASA-CR-174717] p 782 N84-28794
UH-60A Black Hawk engineering simulation program. Volume 1: Mathematical model [NASA-CR-166309] p 789 N84-28806
An integrated, optimization-based approach to the design and control of large space structures [AD-A141856] p 796 N84-28896

MAXIMUM LIKELIHOOD ESTIMATES

General aviation aircraft interior noise problem: Some suggested solutions [NASA-CR-173784] p 819 N84-29685
Decision analysis model for passenger-aircraft fire safety with application to fire-blocking of seats [AD-A142477] p 761 N84-29859
Improved pilot model for application to a computer flight testing program for helicopters [NLR-MP-83052-U] p 774 N84-29869
A theoretical and experimental study of turbulent nonevaporating sprays [NASA-CR-174668] p 783 N84-29877
Design of a candidate flutter suppression control law for DAST ARW-2 [NASA-TM-86257] p 790 N84-29883
Atomization of liquid sheets in high pressure airflow [NASA-TM-83731] p 810 N84-30223
Interactive aircraft flight control and aeroelastic stabilization [NASA-CR-173866] p 902 N84-31214
Unsteady transonic flow in cascades [NASA-TM-83780] p 849 N84-32351
A mathematical simulation model of the CH-47B helicopter, volume 2 [NASA-TM-84351-VOL-2] p 881 N84-32380
Analysis, testing, and evaluation of faulted and unfaulted Wye, Delta, and open Delta connected electromechanical actuators [NASA-CR-171808] p 928 N84-32707
A discrete element prediction approach for turbulent flow over rough surfaces p 1009 N84-33744
A theoretical model for the cross spectra between pressure and temperature downstream of a combustor [NASA-TM-83671] p 1016 N84-34231

MATHEMATICAL PROGRAMMING
Choice of optimal control programs for panels of satellite solar batteries p 469 A84-26980
Calculation of the optimal design parameters of a stiffened panel by means of mathematical programming p 805 A84-41656

MATHEMATICS
USSR report: Physics and mathematics [JPRS-UPM-84-005] p 941 N84-32081

MATRICES (MATHEMATICS)
Calculation for attitude angles of an attitude aeroplane strapdown system p 360 A84-23910
Aerospatial'es approach to the study of flutter at the design stage of the project p 67 N84-11118
Multivariable control laws for the AFTI/F-16 [AFIT/GE/EE/83S-4] p 609 N84-24531
Stability of pumps and compressors p 625 N84-25963
STABCAR: A program for finding characteristic root systems having transcendental stability matrices [NASA-TP-2165] p 733 N84-27461
An efficient approximate factorization implicit scheme for the equations of gasdynamics [NASA-TM-85957] p 814 N84-29556
Potential application of artificial concepts to aerodynamic simulation [NASA-TM-85976] p 847 N84-31093

MATRIX MATERIALS
Repair investigation for bismaleimide structure p 147 A84-17118
Supersonic radomes in composite materials p 550 A84-32980
High performance composites and adhesives for V/STOL aircraft [AD-A139168] p 552 N84-23702
Improved high temperature resistant matrix resins [NASA-CR-168210] p 800 N84-28995
Natural weathering of selected organic matrix composites [AD-A144091] p 997 N84-33527

MAXIMUM ENTROPY METHOD
Doppler polarisation spectral resolution of radar signals p 860 A84-45627

MAXIMUM LIKELIHOOD ESTIMATES
A Kalman filter application for position estimation of an airborne relay vehicle in the precision location strike system p 208 A84-16564
Formulation of a practical algorithm for parameter estimation with process and measurement noise p 251 A84-18611
Aircraft parameter estimation with non-rational turbulence model p 227 A84-18629
On-line methods for rotorcraft aeroelastic mode identification p 200 A84-19177
Comparison of innovations-based analytical redundancy methods p 391 A84-25519
Maximum-likelihood parameter estimation in nonlinear flight-mechanics systems [DGLR PAPER 83-108] p 491 A84-29671

- More than you may want to know about maximum likelihood estimation — applied to aircraft control and stability
[AIAA PAPER 84-2070] p 786 A84-42327
Maximum likelihood algorithm using an efficient scheme for computing sensitivities and parameter confidence intervals
[AIAA PAPER 84-2084] p 814 A84-42339
Flight investigation of various control inputs intended for parameter estimation
[NASA-TM-85901] p 790 N84-29884
- MCDONNELL DOUGLAS AIRCRAFT**
Flight service of composite structure on McDonnell Douglas commercial airplanes p 683 A84-39030
Flight service of composite structures on McDonnell Douglas commercial airplanes p 863 A84-42746
DC is gone, but Douglas is back — MD-80 aircraft p 948 A84-48518
- MEASURE AND INTEGRATION**
Critical factors and operational research in tactical fighter avionic system development p 214 N84-15062
- MEASUREMENT**
In-flight measurement of pressure distribution over T-38 student canopy
[AD-P003207] p 660 N84-26620
Effects of aircraft and flight parameters on energy-efficient profile descents in time-based metered traffic
[NASA-CR-172338] p 676 N84-26685
- MEASURING INSTRUMENTS**
Air Force Flight Test Instrumentation System
[AIAA PAPER 83-2736] p 72 A84-12329
Applications of inertial systems as flight test sensors
[AIAA PAPER 83-2738] p 56 A84-12330
ICIASF '83; International Congress on Instrumentation in Aerospace Simulation Facilities, Saint-Louis, Haut-Rhin, France, September 20, 1983, Record p 367 A84-25201
A comparison of techniques for measuring particulate emissions of a gas turbine engine
[ASME PAPER 83-JPGC-GT-14] p 450 A84-28983
Data-measuring systems for flight testing of fixed wing and rotary wing aircraft — Russian book p 775 A84-40134
Automation of the inspection of part shapes using coordinate-measuring machines at N.P. LET p 739 A84-41648
Automated coordinate measuring machine to measure twist and contour of main rotor blades at Bell Helicopter Textron p 923 A84-46347
Evaluation of the crack gage as an advanced individual aircraft tracking concept p 142 N84-12551
Vortical flow exploration methods developed for the F1 wind tunnel p 563 N84-23598
Comparison of icing cloud instruments for 1982-1983 icing season flight program
[NASA-TM-83569] p 776 N84-29870
- MECHANICAL DEVICES**
Experimental observation of the dynamic behavior of noncontacting coned-face mechanical seals
[ASLE PREPRINT 83-LC-3B-1] p 479 A84-28990
Stores weight and inertia system update: Cable attachment redesign, flexible length parameter calibration, data sheet revision
[AD-A141087] p 773 N84-28781
Regulation of mechanical characteristic of iron-powder electromagnetic brake p 925 N84-31444
- MECHANICAL DRIVES**
Kinematic precision of gear trains
[ASME PAPER 82-WA/DE-34] p 238 A84-15951
Electrically compensated aircraft alternator drive p 216 A84-16535
An advanced pitch change mechanism incorporating a hybrid traction drive
[AIAA PAPER 84-1383] p 888 A84-44182
Flight evaluation of a linear optical displacement transducer
[AD-A132638] p 211 N84-14141
An advanced pitch change mechanism incorporating a hybrid traction drive
[NASA-TM-83709] p 572 N84-25605
Constant speed drive with compensation using differential gears
[AD-D011156] p 1010 N84-33812
- MECHANICAL ENGINEERING**
A contribution to the computation of rotor moments of inertia suitable for computer processing p 732 A84-38427
A summary of the Naval Postgraduate School Research Program
[AD-A132871] p 256 N84-15024
Validated Engineering Data Index, 1983 - 1984 p 485 N84-21758
Bibliography of technical publications and papers, October 1982 - September 1983
[AD-A138907] p 569 N84-23403

- USSR report: Engineering and equipment
[JPRS-UEQ-84-003] p 724 N84-26895
The initial mechanical design of hot gas turbine blading using limited information p 808 N84-29234
- MECHANICAL OSCILLATORS**
Propagation of unsteady perturbations in a boundary layer with self-induced pressure p 93 A84-14930
JDF-1 small light-weight electric eddy current oscillator
[AD-A137572] p 483 N84-20761
- MECHANICAL PROPERTIES**
Towards minimum weight structures by the use of composites p 140 A84-13807
A second generation modified bismaleimide resin with Tg of 570 F — adhesives for aircraft engines p 234 A84-17156
Advancements in titanium castings p 235 A84-17206
Environmental and high strain rate effects on composites for engine applications p 236 A84-17444
Mechanical and physical properties of plasma-sprayed stabilized zirconia p 308 A84-19786
The effect of the microstructure on slow crack propagation and the mechanical properties of hot-pressed silicon nitride between room temperature and 1500 C — German thesis p 308 A84-22237
Japan Titanium Society, Anniversary International Symposium, 30th, Kobe, Japan, November 15-18, 1982, Proceedings p 373 A84-23826
The role of titanium alloys in the history of jet engines p 373 A84-23832
Recent development in titanium alloys p 373 A84-23833
The development of an ODS turbine blade alloy (INCONEL alloy MA 6000) for use in small gas turbine engines — Oxide Dispersion Strengthened p 470 A84-28326
New fireworthy composites for use in transportation vehicles p 472 A84-28673
Determination of the air flight fitness of carbon fiber-reinforced structural components using the Alpha jet horizontal stabilizers and elevators as an example
[DGLR PAPER 83-080] p 472 A84-29653
A strength analysis of aircraft designs by means of an incremental technique that uses the finite element method p 553 A84-30410
1982 National Powder Metallurgy Conference, Montreal, Canada, May 24-27, 1982, Proceedings p 549 A84-32851
Age hardening behavior of Al-Li-(Cu)-(Mg)-Zr P/M alloys p 549 A84-32858
The mechanical properties of titanium P/M parts produced from superclean powders p 549 A84-32859
Hot isostatic pressing for the repair of hot section turbine parts p 710 A84-38808
Fibre-resin composites - New applications and developments; Proceedings of the Seminar and Workshop, University of Manchester Institute of Science and Technology, Manchester, England, June 22, 1982 p 913 A84-42861
Development of a new hybrid material (ARALL) for aircraft structures — aramid reinforced aluminum laminate p 913 A84-42866
Highly compact ceramic recuperator for engine applications
[ASME PAPER 84-GT-50] p 1001 A84-46907
GTE sintered silicon nitride — for advanced heat engines
[ASME PAPER 84-GT-228] p 996 A84-47008
Composite structural materials
[NASA-CR-173259] p 310 N84-17293
Effects of JP-4 fuel on Graphite/Epoxy composites
[AD-A135418] p 310 N84-17296
Investigation of the FAA overlay design procedures for rigid pavements
[AD-A135317] p 371 N84-18222
Acta aeronautica et astronautica sinica (selected articles) p 400 N84-21506
Overview of zirconia with respect to gas turbine applications
[NASA-TP-2286] p 473 N84-21740
Status of understanding for gear materials p 623 N84-25061
Solid state compressor
[AD-A140498] p 627 N84-26032
An industry test program for interlayer equivalency
[AD-P003200] p 723 N84-26613
Processing and properties of airframe materials
[AD-A140832] p 713 N84-26797
Electropositive bivalent metallic ion unsaturated polyester complexed polymer concrete p 802 N84-29979
The Shock and Vibration Digest, volume 16, no. 7
[AD-A143958] p 926 N84-31679

- Improving the birdstrike resistance and durability of aircraft windshield systems: Program technical summary
[AD-A143712] p 968 N84-33395
Process for improving mechanical properties of epoxy resins by addition of cobalt ions
[NASA-CASE-LAR-13230-1] p 999 N84-34571
- MECHANICAL SHOCK**
The Shock and Vibration Digest, volume 15, no. 8
[AD-A133708] p 387 N84-19849
The Shock and Vibration Bulletin. Part 1: Welcome, keynote address, invited papers, pyrotechnic shock, and shock testing and analysis p 387 N84-19866
The Shock and Vibration Bulletin. Part 2: Fluid-structure dynamics and dynamic analysis
[AD-A134453] p 387 N84-19881
- MECHANIZATION**
Electrical/Electronic - A phased approach to automated aircraft loom manufacture p 476 A84-28019
Integrated Application of Active Controls (IAAC) technology to an advanced subsonic transport project: Current and advanced act control system definition study
[NASA-CR-3545] p 704 N84-27744
- MEDIA**
Exact solution to problem of interaction between wedge moving at supersonic velocity and interface of two gaseous media p 512 N84-22790
- MEDICAL EQUIPMENT**
Hyperbaric chamber equipment: A consolidated equipment list from selected multiplace hyperbaric facilities
[AD-A141702] p 793 N84-28820
- MEDICAL SERVICES**
A new concept for a rescue helicopter to meet the needs of emergency medicine, based on the BK-117 p 25 A84-11067
Air rescue service in the Federal Republic of Germany
Requirements for the helicopter p 276 A84-19606
- MELTING POINTS**
A statistical examination of the effect of composition on the freezing points of hydro-carbon mixtures
[AD-A131000] p 77 N84-11321
Experimental results for the rapid determination of the freezing point of fuels
[NASA-CR-168305] p 375 N84-18419
- MEMBRANE STRUCTURES**
Possibility of various airfoil shape modes and their steady state stability of single membrane sailing p 509 A84-32758
Aerodynamic properties of a two-dimensional inextensible flexible airfoil p 655 A84-38826
Aerodynamic characteristics of pretensioned elastic membrane rectangular sailings p 842 A84-45988
The 2-dimensional inextensible lifting membrane airfoil, theory and experiment
[AD-A135251] p 275 N84-17147
- MEMBRANES**
Aircraft fuel tank inerting system
[AD-A141863] p 773 N84-28785
- MEMORY (COMPUTERS)**
Trends in computational capabilities for fluid dynamics
[NASA-TM-86012] p 965 N84-33383
- MERCATOR PROJECTION**
Path discrepancies between great circle and rhumb line
[NASA-TM-85522] p 285 N84-17168
- MERIDIONAL FLOW**
A study of axial turbine loss models in a streamline curvature computing scheme p 748 A84-41633
Turbine aerodynamic design using through-flow theory. Meridional through-flow calculation p 245 N84-15474
- MESH**
Mesh generation for wing-body-tail configurations p 14 A84-11592
Practical three-dimensional mesh generation using transfinite interpolation p 245 N84-15463
- MESOMETEOROLOGY**
A numerical weather prediction system designed to simulate atmospheric downburst phenomena
[AIAA PAPER 84-0352] p 319 A84-21865
- MESSAGE PROCESSING**
A dual digital to video converter for avionics symbology and messages
[AD-A138383] p 448 N84-21547
- METAL BONDING**
Adhesion between metals and nonmetals - Long applied, but still not understood p 380 A84-24683
Methods for investigating polymer/metal bonded layers p 374 A84-24685
Some effects of alloying elements on the performance of bonded aluminum alloy joints p 470 A84-26625
Metal bonding slowly winning over reluctant designers p 923 A84-46484

SUBJECT INDEX

METAL COATINGS

On the development of plasma-sprayed thermal barrier coatings --- for gas turbine engine metals p 374 A84-25019

High-temperature protective coatings; Proceedings of the Symposium, Atlanta, GA, March 7, 8, 1983 p 798 A84-42651

The structure and behavior of vacuum plasma sprayed overlay coatings on nickel based superalloys [AD-A132631] p 237 N84-14301

METAL CUTTING

Ultrasonics assists tough material machining p 806 A84-41938

A method for machining metal airscrews on a lathe p 919 A84-45698

T-700 blisk/impeller cutter life improvement program p 923 A84-46346

Economic roughing and finish milling with end mills made of high speed tool steel class HSSE: High cobalt alloyed p 383 N84-18442

METAL FATIGUE

AE source identification by frequency spectral analysis for an aircraft monitoring application p 237 A84-15909

Micro-mechanical modelling of mode III fatigue crack growth in rotor steels p 235 A84-17251

Creep and fatigue interactions in a nickel-base superalloy p 236 A84-18722

The use of tests of goodness of fit during an analysis of fatigue data --- for gas turbine blades p 218 A84-19179

A survey of serious aircraft accidents involving fatigue fracture p 279 A84-20446

Life distribution under various operating conditions of random cyclic loads --- fatigue strength of aircraft construction elements p 309 A84-22407

Resistance of gas turbine engine disks in superalloys to creep and fatigue damage p 473 A84-29964

In situ indications of ductility evolution during high-temperature fatigue testing with and without hold times p 548 A84-30658

Repair of cracked or defective metallic aircraft components with advanced fibre composites - An overview of Australian work p 501 A84-31785

Improved damage-tolerance analysis methodology p 917 A84-44516

Short cracks and crack closure in Al 2024-T3 p 913 A84-45015

Boeing 757/767 durability programs p 874 A84-45044

A study of crack growth rate in a notched strip under biharmonic loading p 920 A84-45726

Development of a stochastic model for fatigue cracks in aircraft structures p 922 A84-46337

Surface cracking of quenched and tempered steel by shear instability - Cause of premature fatigue cracks in helicopter main rotor spindle lugs? p 914 A84-46339

Fatigue crack growth and low cycle fatigue of two nickel base superalloys [NASA-CR-174534] p 76 N84-10267

Acta aeronautica et astronautica sinica (selected articles) [AD-A138531] p 400 N84-21506

Statistical and vibratory fatigue limit characteristics of aluminum cast alloys p 561 N84-23558

Additionally compressed titanium fine cast components p 551 N84-23559

Welding of components made of the aluminum cast alloy A357 p 561 N84-23561

The use of novel processing procedures for improving the overall fatigue resistance of high strength aluminum alloys [AD-A141107] p 800 N84-28966

The use of adhesive-bonded rivets to lessen the reductions in fatigue life caused by rivet holes [ARL-STRUC-REPT-399] p 999 N84-34617

METAL FIBERS

Fiber metal abrasable seals [ASME PAPER 84-GT-67] p 1001 A84-46914

METAL FILMS

Fire blocking systems for aircraft seat cushions [NASA-CASE-ARC-11423-1] p 958 N84-33394

METAL FINISHING

Economic roughing and finish milling with end mills made of high speed tool steel class HSSE: High cobalt alloyed p 383 N84-18442

METAL IONS

Electropositive bivalent metallic ion unsaturated polyester complexed polymer concrete [DE84-011080] p 802 N84-29979

Process for improving mechanical properties of epoxy resins by addition of cobalt ions [NASA-CASE-LAR-13230-1] p 999 N84-34571

METAL JOINTS

Development of fatigue and crack propagation design and analysis methodology in a corrosive environment for typical mechanically-fastened joints. Volume 2: State-of-the-art assessment [AD-A136415] p 385 N84-18692

Corrosion and load transfer effects on fatigue of mechanically fastened joints. Fatigue of zero load transfer specimen [AD-A139042] p 561 N84-22985

METAL MATRIX COMPOSITES

Flight simulation behaviour of aramid reinforced aluminium laminates (ARALL) p 232 A84-16337

Nondestructive evaluation of boron-carbide-coated, boron-fiber-reinforced titanium p 470 A84-28240

Development of a new hybrid material (ARALL) for aircraft structures --- aramid reinforced aluminum laminate p 913 A84-42866

Metal matrix composite structural panel construction [NASA-CASE-LAR-12807-1] p 77 N84-11214

Acta aeronautica et astronautica sinica (selected articles) [AD-A138531] p 400 N84-21506

Nonlinear analysis for high-temperature composites: Turbine blades/vanes p 927 N84-31699

Potential of metal-matrix composites as superalloy substitutes p 997 N84-33474

METAL OXIDES

Joining and coating of oxide dispersion strengthened superalloys p 471 A84-28333

Improved thermal barrier coating system [NASA-CASE-LEW-14057-1] p 998 N84-33595

METAL PLATES

New technology expands uses of a precision cast-machined aluminum plate p 235 A84-17196

Solid state compressor [AD-A140498] p 627 N84-26032

Strains in an elastic plate containing an interference-fit bolt near a free edge [AR-003-012] p 811 N84-30333

The use of adhesive-bonded rivets to lessen the reductions in fatigue life caused by rivet holes [ARL-STRUC-REPT-399] p 999 N84-34617

METAL POWDER

The mechanical properties of titanium P/M parts produced from superclean powders p 549 A84-32859

Status of understanding for gear materials p 623 N84-25061

Regulation of mechanical characteristic of iron-powder electromagnetic brake p 925 N84-31444

METAL SHEETS

Superplastic forming, an economical sheet-forming process [MBB-BB-555-83-OE] p 314 A84-22851

Crack propagation behavior in plated sheet metal consisting of AlCuMg(2) and AlZnMgCu(1.5) in the case of dynamic stresses [MBB-VFW-44-83-OE] p 558 A84-33144

Crack closure and overload effects in fatigue p 721 A84-39218

Fatigue crack growth in aluminum alloy sheet material under constant amplitude and simplified flight simulation loading [VTH-LR-381] p 376 N84-19561

Flexible manufacturing line for aircraft structures of sheet metal [BMFT-FB-W-84-011] p 740 N84-28731

METAL STRIPS

A study of crack growth rate in a notched strip under biharmonic loading p 920 A84-45726

METAL SURFACES

Evaluation of a primary anticorrosion surface treatment for adhesively bonded aluminum structure p 234 A84-17180

Evaluation of thermal-oxidative stability of aviation oils on the OP-100 device p 374 A84-25589

Carbon fibre fabric repairs to metal aircraft structures p 502 A84-32983

Prediction of the life of all-metal vibration isolators made of MR material p 1007 A84-47553

Coating with overlay metallic-cermet alloy systems [NASA-CASE-LEW-13639-2] p 714 N84-27855

METAL WORKING

Plastic forming of thin-walled aircraft parts (Theory and computation) --- Russian book p 78 A84-10466

Progress on isothermal shape rolling p 239 A84-17185

Japan Titanium Society, Anniversary International Symposium, 30th, Kobe, Japan, November 15-18, 1982, Proceedings p 373 A84-23826

Fabrication of titanium and its alloys for aircraft components p 378 A84-23829

Large titanium disc manufactured under the 65,000 metric ton press p 379 A84-23831

Machining of component parts of aircraft jet engine p 379 A84-23834

METEOROLOGICAL PARAMETERS

Metallurgical aspects of metallic materials and damage tolerance in accessory gearboxes p 482 A84-29961

Superplastic forming of structural alloys; Proceedings of the Symposium, San Diego, CA, June 21-24, 1982 p 549 A84-32676

Concurrent superplastic forming/diffusion bonding of titanium p 549 A84-32684

METAL-METAL BONDING

Materials for Advanced Turbine Engines (MATE): Project 3: Design, fabrication and evaluation of an oxide dispersion strengthened sheet alloy combustor liner, volume 1 [NASA-CR-174691] p 915 N84-32504

METAL-WATER REACTIONS

The cyclic fracture toughness of pressed panels of D16chT and V95pcht2 alloys in liquid media p 308 A84-19582

METALLIZING

High temperature electronics technology [AD-A143571] p 928 N84-32714

METALLOGRAPHY

Micro-mechanical modelling of mode III fatigue crack growth in rotor steels p 235 A84-17251

METALS

X-ray wear metal monitor [AD-A131251] p 61 N84-10076

Repeatability of mixed-mode adhesive debonding [NASA-TM-85753] p 376 N84-19565

Journal of aeronautical materials (selected articles) [AD-A140181] p 572 N84-25611

Successful utilization of economic, light aluminum-casted structures in airplane construction [VFW-31/83-O] p 599 N84-26439

Effects of wear metal on lubricant deposition [AD-A142027] p 801 N84-29008

Fatigue and Fracture Branch: A compendium of recently completed and on-going research projects [NASA-TM-85825] p 811 N84-30331

METEOR TRAILS

Meteor scatter communication in an air-ground environment [RAE-TM-RAD-NAV-224] p 383 N84-18484

METEORITE COLLISIONS

The role of thermal motions of particles in gases of fireballs p 248 A84-19274

METEOROLOGICAL BALLOONS

Stratospheric hot-air balloon completes revolution around the globe p 1 A84-10621

METEOROLOGICAL FLIGHT

NASA B-57B Severe Storms Flight Program p 180 A84-16174

Correlated airborne and ground measurement of lightning p 248 A84-18513

Air-ice drag coefficients for first-year sea ice derived from aircraft measurements p 628 A84-34508

Meteorological feasibility of transpacific balloons and related problems p 670 A84-38292

Nighttime observations of thunderstorm electrical activity from a high altitude airplane [NASA-TM-86455] p 926 N84-31597

METEOROLOGICAL INSTRUMENTS

Automated measurements of atmospheric visibility p 78 A84-12196

Optimizing the use of surface sensors for wind shear detection - Experimental and analytical considerations [AIAA PAPER 84-0353] p 313 A84-21866

Facilities for meteorological research at NASA Goddard/Wallops Flight Facility [NASA-TM-84422] p 629 N84-25223

METEOROLOGICAL PARAMETERS

Effort and benefit connected with a bad weather landing p 282 A84-19573

Feasibility studies on trans-oceanic flights from Japan --- meteorological effects on balloons p 670 A84-38293

Longitudinal motion of aircraft in wind shears --- German thesis p 900 A84-45526

Multi-scale analyses of meteorological conditions affecting Pan American World Airways flight 759 [PB83-222562] p 28 N84-10040

The effects of weather on rapid runway repair, volume 2 [AD-A130350] p 73 N84-10105

Pilot controls and SPIRF flight p 136 N84-12038

Climatic publications p 390 N84-18816

Revised Uniform Summary of Surface Weather Observations (RUSSWO). Parts A-E: Clark AFB, Philippines [AD-A141228] p 731 N84-28342

Investigation of the detectability and lifetime of gust fronts and other weather hazards to aircraft [AD-A141552] p 812 N84-29404

METEOROLOGICAL RADAR

Detection of hazardous meteorological and clear-air phenomena with an air traffic control radar p 33 A84-10806

The Federal Aviation Administration weather radar research and development program p 81 A84-10818

Turbulence detection using weather radar p 283 A84-20083

Weather radar simulator p 466 A84-26787

New digital-RF technology aids airborne weather radar p 519 A84-31167

Recommendations for coping with microburst wind shear - An aviation hazard p 669 A84-36943

Modern meteorological radars for civil aviation p 856 A84-43499

The role of NEXRAD in aircraft navigation and flight safety enhancement p 932 A84-44150

The aviation weather system, present problems and future promises p 852 A84-44738

Experimentation for flight service systems p 852 A84-44740

Airliner office equipment p 824 A84-46197

Development and flight test of a weather radar precision approach concept p 882 A84-46349

Microburst wind structure and evaluation of Doppler radar for airport wind shear detection p 1012 A84-46821

Data acquisition for evaluation of an airborne lightning detection system [AD-A135318] p 281 A84-17153

Doppler weather radar applications to terminal and enroute air traffic control p 731 A84-28324

A four-dimensional thunderstorm model for flight simulators [AD-P003492] p 908 A84-32258

Thunderstorm impact on Denver air traffic control operations and the role of NEXRAD (Next Generation Weather Radar) [PB84-189729] p 863 A84-32374

METEOROLOGICAL RESEARCH AIRCRAFT

Operating safely in adverse weather environments p 108 A84-15203

Effects of icing on performance of a research airplane p 851 A84-44514

NASA B-57B severe storms flight program [NASA-TM-84921] p 183 A84-14129

Data acquisition for evaluation of an airborne lightning detection system [AD-A135318] p 281 A84-17153

METEOROLOGICAL SERVICES

General aviation meteorological requirements [AIAA PAPER 84-0115] p 247 A84-17890

A numerical weather prediction system designed to simulate atmospheric downburst phenomena [AIAA PAPER 84-0352] p 319 A84-21865

Sixth Annual Workshop on Meteorological and Environmental Inputs to Aviation Systems, 26-28 October 1982, Tullahoma, Tenn p 389 A84-23424

Air Force Air Weather Service's requirements for global meteorological data p 931 A84-43653

Cockpit weather dissemination system p 859 A84-44748

METHOD OF CHARACTERISTICS

Transonic turbulent separation on swept wings - A return to the direct formulation [AIAA PAPER 84-0265] p 163 A84-17984

Calculation of unsteady three-dimensional subsonic/transonic inviscid flowfields by the method of characteristics [AIAA PAPER 84-0440] p 168 A84-18095

The Shock and Vibration Bulletin. Part 2: Fluid-structure dynamics and dynamic analysis [AD-A134453] p 387 A84-19881

METHOD OF MOMENTS

Polygonal plate modeling of realistic structures -- for aircraft radar cross section calculation p 917 A84-43615

MICROCOMPUTERS

Microcomputer control applications in integrated flight/weapon control system p 188 A84-19124

Airline Maintenance Management System (AMMS) p 947 A84-46582

Joint University Program for Air Transportation Research, 1982 [NASA-CP-2285] p 4 N84-11099

RF front end interface and AGC modification p 43 N84-11102

Preliminary description of the area navigation software for a microcomputer-based Loran-C receiver p 43 N84-11103

A microcomputer program package of the USAF stability and control DATCOM [AD-A132143] p 138 N84-13199

Experimental investigation of dynamic stall [AD-A135846] p 336 N84-18172

Aircraft generation equipment emissions estimator (AGEEE) [AD-A136829] p 390 N84-20031

Placing hidden surface removal within the CORE graphics standard: An example [AD-A138239] p 493 N84-22266

The silicon AIDS (Airborne Integrated Data Systems) p 693 N84-26583

MICROCRACKS

Fatigue behavior of long and short cracks in wrought and powder aluminum alloys [AD-A142609] p 802 N84-30024

MICROELECTRONICS

A new and unique conductive element for aircraft transparencies [AD-P003188] p 685 N84-26601

PAVE PILLAR: A maturation process for an advanced avionics architecture [AD-P003568] p 884 N84-31173

MICROORGANISMS

Microbial deterioration of hydrocarbon fuels from oil shale, coal and petroleum. III: Inhibition of fungi by fuels from coal [AD-A137177] p 377 N84-19596

Degradation of jet fuel hydrocarbons by aquatic microbial communities [AD-A139791] p 616 N84-24822

MICROPHONES

Cockpit voice recorders - Which microphone? p 691 A84-39706

Multisensor speech input [AD-A140894] p 726 N84-26974

Noise path identification using face-to-face and side-by-side microphone arrangements [NASA-CR-173708] p 736 N84-28569

MICROPROCESSORS

Distributed asynchronous microprocessor architectures in fault tolerant integrated flight systems [AIAA PAPER 83-2342] p 54 A84-10017

Preliminary results from the NASA general aviation demonstration advanced avionics system program p 185 A84-15987

Implementing microprocessor technology in aircraft electrical power generating system control p 216 A84-16536

A distributed microprocessor system architecture for implementing maintenance trainers with 3-D simulation p 249 A84-18615

Microprocessors as emulators in a control system environment p 251 A84-19123

The use of high order languages in digital flight control systems p 489 A84-26725

Multi-Microprocessor Flight Control System, 1982 p 456 A84-26746

Redundant asynchronous microprocessor system for fault tolerant flight control and navigation p 442 A84-26798

Microprocessor adaptive control for aircraft ECS [SAE PAPER 831139] p 431 A84-29068

Application of microprocessors to aircraft fly-by-wire hydraulic actuation systems, SAE Committee A-6 1983 [SAE PAPER 831489] p 460 A84-29547

The status of microprocessor based generator control unit development -- for aircraft electric power systems p 532 A84-30116

Hardware and software structures for System 4000 navigation aids p 520 A84-32330

Real time study of a microprocessor based flight control system p 703 A84-38883

The application of microprocessor technology in flight simulation p 813 A84-40607

Using the STD bus for encoder/decoder systems aboard a high-altitude balloon platform p 970 A84-46670

Automatic microprocessor-based receivers for the Decca Navigator system p 970 A84-48538

Enhanced character sizes for the VDM-1 video display board p 57 N84-11101

A generalized computer code for developing dynamic gas turbine engine models (DIGTEM) [NASA-TM-83508] p 130 N84-12166

Implementing microprocessor technology in aircraft electrical power generating system control p 132 N84-12185

Airborne Intelligent Display (AID) phase 1 software development [ATC-123] p 127 N84-13181

A programmable voice processor for fighter aircraft applications [AD-A133780] p 242 N84-14393

An airborne programmable digital to video converter [AD-A134839] p 296 N84-17181

The development of an airborne instrumentation computer system for flight test [NASA-TM-86036] p 447 N84-20521

Modular strapdown guidance unit with embedded microprocessors p 594 N84-25697

MIL-STD-1750A microprocessor chip set development [AD-P003548] p 936 N84-31152

Options and opportunities for standards: A NATO/AGARD viewpoint [AD-P003577] p 925 N84-31182

Digital control loading: A microprocessor-based approach [AD-P003483] p 908 N84-32250

The development of an airborne instrumentation computer system for flight test p 980 N84-34421

MICROSTRIP TRANSMISSION LINES

An X-band microstrip phased-array antenna with electronic polarization control p 34 A84-10822

MICROSTRUCTURE

Fatigue behavior of long and short cracks in wrought and powder aluminum alloys [AD-A131324] p 81 N84-11517

Deformation and fatigue of aircraft structural alloys [AD-A133947] p 237 N84-14297

Processing and properties of airframe materials [AD-A140832] p 713 N84-26797

Effects of long-time elevated temperature exposures on hot-isostatically-pressed power-metallurgy Udimet 700 alloys with reduced cobalt contents [NASA-TM-83632] p 799 N84-28917

The use of novel processing procedures for improving the overall fatigue resistance of high strength aluminum alloys [AD-A141107] p 800 N84-28966

MICROWAVE ANTENNAS

An adaptive antenna for military aircraft communications p 592 A84-36292

Harmonic radar cross-section of bistatic nonlinear responder p 917 A84-43586

A physically small dual circular microstrip antenna -- for mounting in radome of target drone aircraft p 969 A84-46604

Proceedings of the Antenna Applications Symp., volume 2 [AD-A142754] p 925 N84-31467

MICROWAVE COUPLING

End effects in coupled rectangular resonators in unilateral fin line p 475 A84-27985

MICROWAVE EQUIPMENT

A review of United Kingdom airborne radar p 167 A84-16689

A small integrated J band altimeter p 600 A84-36261

A 60 GHz collision warning sensor for helicopters p 600 A84-36262

Inexpensive multipurpose airborne surveillance radar p 861 A84-45909

R-F anechoic chamber test facilities p 991 A84-46846

MICROWAVE FILTERS

End effects in coupled rectangular resonators in unilateral fin line p 475 A84-27985

MICROWAVE IMAGERY

New results of airborne measurements with a sensitive, high resolution 90 GHz radiometer - First results for an equivalent 140 GHz system p 600 A84-36287

MICROWAVE LANDING SYSTEMS

DME/P - The new international standard p 39 A84-12431

Fault tolerant navigation in a Microwave Landing System environment p 39 A84-12433

Development and flight test of an X-band precision approach concept for remote-area rotorcraft operations p 420 A84-26707

The MLS order - A vast market opens up, or does it? p 424 A84-26896

System considerations for the new DME/P international standard -- precision Distance Measuring Equipment p 425 A84-27944

Further development of the DPS technique for precision DME -- Double Pulse Shaping p 520 A84-32334

Precision distance measuring equipment for the microwave landing system p 521 A84-32340

Airborne systems requirements in the evolving National Airspace System p 858 A84-44736

Automatic helical rotorcraft descent and landing using a microwave landing system p 860 A84-45576

Precision DME - Distance measurement in the MLS p 970 A84-48124

Development and flight test of an X-band precision approach concept for remote-area rotorcraft operations [NASA-TM-84398] p 41 N84-10041

FINDS: A fault inferring nonlinear detection system. User's guide [NASA-CR-172199] p 44 N84-11156

Establishment and discontinuance criteria for precision landing systems [AD-A135606] p 345 N84-18185

NASA-FAA helicopter Microwave Landing System curved path flight test [NASA-TM-85933] p 523 N84-23617

Results of the Italian CNR project 'Navigation Aids and Air Traffic Control' p 111 A84-14306

NATURAL GAS

US energy: Aviation perspective [AD-A137766] p 715 A84-27910

NAVIER-STOKES EQUATION

Time-dependent finite-difference simulation of unsteady interactive flows p 4 A84-10077

A direct method for the solution of unsteady two-dimensional incompressible Navier-Stokes equations p 5 A84-10078

(Why?) A finite element algorithm for the parabolic Navier-Stokes equations p 5 A84-10085

Numerical simulation of turbulent trailing edge flows p 7 A84-10098

Navier-Stokes computational study of the influence of shell geometry on the Magnus effect at supersonic speeds p 9 A84-10107

Computer solutions of Navier-Stokes equations for shock wave turbulent boundary layer interactions far away from the leading edge p 88 A84-13266

Time-split finite element method for compressible aeroflow trailing-edge flows p 89 A84-13281

Global PNS solutions for subsonic strong interaction flow over a cone-cylinder-boattail configuration — Parabolized Navier-Stokes p 92 A84-14690

Transonic flow over a convex corner with a free streamline p 93 A84-14888

A theoretical and experimental investigation of a transonic projectile flowfield p 153 A84-17430

An incompressible Navier-Stokes flow solver in three-dimensional curvilinear coordinate systems using primitive variables [AIAA PAPER 84-0253] p 163 A84-17977

Calculation of steady and oscillating airfoil flow fields via the Navier Stokes equations [AIAA PAPER 84-0525] p 168 A84-18150

Numerical computation of base flow for a missile in the presence of a centered jet [AIAA PAPER 84-0527] p 168 A84-18151

The evolution of computational methods in aerodynamics p 263 A84-19987

A comparative study of the parabolized Navier-Stokes code using various grid-generation techniques [AIAA PAPER 84-0459] p 266 A84-21302

Numerical solution of hypersonic flow near leading edge of flat plate p 329 A84-23903

Fundamental solutions and numerical methods for flow problems p 475 A84-27423

Navier-Stokes solutions for two-dimensional subsonic base flow p 407 A84-29474

Demonstration of a new body-fitted coordinate code for modeling gas-turbine combustor flows [AIAA PAPER 84-1381] p 603 A84-35199

Transonic-flow computation using an explicit-implicit method p 578 A84-35325

On the use of several compact methods for the study of unsteady incompressible viscous flow for outer problems. II p 620 A84-35327

A composite velocity procedure for the incompressible Navier-Stokes equations p 620 A84-35341

Design study of an external compression supersonic inlet using a finite difference two-dimensional Navier-Stokes code [AIAA PAPER 84-1275] p 641 A84-37216

Efficient and accurate numerical solutions of the Euler and Navier-Stokes equations for turbomachinery applications [AIAA PAPER 84-1300] p 643 A84-37644

Theory of similarity and the profile of the mean density distribution of hypersonic boundary layer p 645 A84-37906

Simplified Navier-Stokes equations and their numerical solutions p 645 A84-37910

Parabolized Navier-Stokes analysis of three-dimensional supersonic and subsonic jet mixing problems [AIAA PAPER 84-1525] p 646 A84-37951

An assessment of numerical solutions of the compressible Navier-Stokes equations [AIAA PAPER 84-1549] p 719 A84-37966

A computational study of complex three-dimensional compressible turbulent flow fields [AIAA PAPER 84-1556] p 648 A84-37970

Dynamic response of shock waves in transonic diffuser and supersonic inlet - An analysis with the Navier-Stokes equations and adaptive grid [AIAA PAPER 84-1609] p 650 A84-38004

Subsonic/transonic, viscous/inviscid relaxation procedures for strong pressure interactions [AIAA PAPER 84-1627] p 651 A84-38016

Three-dimensional Navier-Stokes calculations of multiple interacting vortex rings [AIAA PAPER 84-1545] p 658 A84-39311

Optimum design in distributed parameter systems p 722 A84-39738

A numerical study of the two- and three-dimensional unsteady Navier-Stokes equations in velocity-vorticity variables using compact difference schemes p 741 A84-39970

A hybrid explicit-implicit numerical algorithm for the three-dimensional compressible Navier-Stokes equations p 743 A84-40831

Evaluation of a velocity-split solution of the Navier-Stokes equations for fighter forebodies [AIAA PAPER 84-2160] p 745 A84-41334

An evaluation of a parabolized Navier-Stokes (PNS) code for cone-cylinder-flared configurations [AIAA PAPER 84-2116] p 751 A84-42361

PNS computations for spinning and fin-stabilized projectiles at supersonic velocities [AIAA PAPER 84-2118] p 751 A84-42362

A kinematic approach to unsteady viscous flows p 833 A84-44983

Application of a new Navier-Stokes solver to three-dimensional jet flows p 963 A84-49113

Numerical computation of base flow for a projectile at transonic speeds [AD-A130293] p 18 A84-10027

Introduction to computational aerodynamics [AD-A130717] p 19 A84-10031

The use of an adaptive grid in a solution of the Navier-Stokes equations for incompressible flow p 20 A84-11139

On the generation of vortical flow at hypersonic speeds over elliptical cones p 101 A84-12114

Computations of projectile magnus effect at transonic velocities [AD-A133212] p 179 A84-15127

Numerical simulation of stalling flows by an integral equation method p 301 A84-16199

The effect of the artificial far field boundary on a finite different approximation of the Navier-Stokes equations for a compressible fluid [AD-A135152] p 317 A84-17536

Navier-Stokes computations of projectile base flow at transonic speeds with and without base injection [AD-A135783] p 337 A84-18176

Inlet flowfield investigation. Part 2: Computation of the flow about a supercruise forebody at supersonic speeds [NASA-CR-172315] p 413 A84-21516

La Recherche Aerospatiale, Bimonthly bulletin, number 1983-4, 215/July-August [ESA-TT-823] p 545 A84-22589

Navier-Stokes calculations for the vortex of a rotor in hover [NASA-TM-85894] p 581 A84-24540

Computational Fluid Dynamics, volume 2 [VKI-LS-1984-04-VOL-2] p 627 A84-25986

Application of supercomputers to computational aerodynamics [NASA-TM-85965] p 666 A84-27680

Numerical simulation of boundary-layer transition [NASA-TM-85984] p 756 A84-28746

Investigation of the mechanism of transonic shock wave/boundary layer interactions using a Navier-Stokes analysis [AD-A141551] p 757 A84-28752

Three-dimensional unsteady viscous flow analysis over airfoil sections [NASA-CR-172368] p 808 A84-29152

An efficient approximate factorization implicit scheme for the equations of gasdynamics [NASA-TM-85957] p 814 A84-29556

A fully vectorized numerical solution of the incompressible Navier-Stokes equations p 964 A84-33375

Application of computational fluid dynamics in aircraft design [AD-A144323] p 978 A84-34441

State of the art: Design for noise II

p 819 N84-29683

A designer's viewpoint: Requirements for reducing helicopter noise

p 819 N84-29684

General aviation aircraft interior noise problem: Some suggested solutions

[NASA-CR-173784] p 819 N84-29685

Propeller aircraft interior noise model

[NASA-CR-3813] p 819 N84-29687

Active attenuation of propeller blade passage noise

[NASA-CR-172388] p 820 N84-30886

Study of double wall panels for use in propeller driven aircraft

[NASA-CR-173847] p 941 N84-32118

Analytical investigation of synchrophasing as a means of reducing aircraft interior noise

[NASA-CR-3823] p 941 N84-32123

Application of stiffened cylinder analysis to ATP interior noise studies

[NASA-CR-172384] p 942 N84-33147

Experimental investigation of shock-cell noise reduction for single-stream nozzles in simulated flight, comprehensive data report. Volume 1: Test nozzles and acoustic data

[NASA-CR-168234-VOL-1] p 942 N84-33148

Supersonic jet shock noise reduction

[NASA-TM-83799] p 1017 N84-35085

NOISE SPECTRA

Acoustics of rotors utilizing circulation control

p 83 N84-11044

Effects of streamwise variations in noise levels and spectra on supersonic boundary-layer transition

[AIAA PAPER 84-0010] p 155 N84-17830

Some remarks on source coherence affecting jet noise

p 320 N84-21161

Multivariable analysis of obstacle noise

p 493 N84-28148

Noise intensity and spectrum in a turbulent boundary layer on a flat plate

p 494 N84-28806

The spectrum of spatial correlations of turbulent pressure pulsations at a wall at high Reynolds numbers

p 407 N84-28808

Recovery of burner acoustic source structure from far-field sound spectra

[AIAA PAPER 83-0763] p 566 N84-32609

Inverted velocity profile semi-annular nozzle jet exhaust noise experiments

[NASA-TM-83525] p 144 N84-13924

An experimental study of the properties of surface pressure fluctuations in strong adverse pressure gradient turbulent boundary layers

[NASA-CR-175410] p 410 N84-20488

Rotorcraft noise prediction

p 818 N84-29677

NOISE TOLERANCE

Unanswered questions from those affected by aircraft noise to science and regulation

p 815 N84-41039

Aircraft and background noise annoyance effects

[NASA-TM-85744] p 394 N84-19051

NONADIABATIC CONDITIONS

Nonadiabatic model wall effects on transonic airfoil performance in a cryogenic wind tunnel

p 562 N84-23578

NONDESTRUCTIVE TESTS

Acoustic emission in aircraft structural integrity and maintenance programs

p 238 N84-15928

Effect of crack presence on in-flight airframe noises in a wing attachment component

p 189 N84-15936

Technology advances in engineering and their impact on detection, diagnosis and prognosis methods; Proceedings of the Thirty-sixth Meeting, Scottsdale, AZ, December 6-10, 1982

p 240 N84-17531

Statistical methods for estimating crack detection probabilities

p 312 N84-21362

Nondestructive experimental method for determining critical loads of shell structures under external pressure

p 379 N84-23906

Voices in the air - The early days of aircraft NDT

p 379 N84-23922

The implementation of a computerized ultrasonic scan system

p 378 N84-23925

Industrial applications of holographic testing

p 476 N84-27997

Nondestructive evaluation of boron-carbide-coated, boron-fiber-reinforced titanium

p 470 N84-28240

Thermography - Applications to the manufacture and nondestructive characterization of composites

p 477 N84-28839

Trends in the development of eddy current equipment for aircraft maintenance

p 716 N84-36600

Development and applications of fast-sensitive magnetic rubber inspection formulations

p 720 N84-38111

High-temperature protective coatings; Proceedings of the Symposium, Atlanta, GA, March 7, 8, 1983

p 788 N84-42651

Nondestructive test method for determining the critical pressure on the inside panels of a fuselage fuel tank

p 917 N84-45001

A new method of modal analysis - Multiple input by uncorrelated signals

p 908 N84-45004

Application of pulsed laser holography to nondestructive testing of aircraft structures

p 919 N84-45497

Advanced ND techniques for composite primary structures

p 75 N84-10216

Recognizing defects in carbon-fiber reinforced plastics

[NASA-TM-76847] p 204 N84-15143

A review study of nondestructive test techniques for residual stresses in aircraft transparencies

[AD-A138930] p 528 N84-22555

Nondestructive Evaluation Technology Working Group report (IDA/OSD R and M (Institute for Defense Analyses/Office of the Secretary of Defense Reliability and Maintainability study)

[AD-A139484] p 563 N84-23919

Nondestructive testing of composite structures

[SNIAS-832-210-108] p 627 N84-26045

Flaw detection reliability criteria. Volume 1: Methods and results

[AD-A142001] p 811 N84-30320

Application of elastic wave scattering theory to the detection and characterization of flaws in structural materials

[DE84-013729] p 930 N84-32852

NONEQUILIBRIUM CONDITIONS

On the theory of thin airfoils in nonequilibrium ideal fluids

p 403 N84-26591

NONEQUILIBRIUM FLOW

Hypersonic nonequilibrium gas flow past a low-aspect-ratio wing

p 260 N84-19562

High altitude effects on three-dimensional nonequilibrium viscous shock-layer flows

[AIAA PAPER 84-0304] p 267 N84-21861

Weak nonlinear shock waves in steady two-dimensional flow of a non-equilibrium gas along a curved wall

p 504 N84-31117

Three-dimensional nonequilibrium viscous shock-layer flows over complex geometries

p 639 N84-36482

Problems of rate chemistry in the flight regimes of aerostated orbital transfer vehicles

[AIAA PAPER 84-1730] p 660 N84-39369

Numerical design of plane and axisymmetric supersonic nonequilibrium-flow channels for obtaining nonuniform output characteristics

p 742 N84-40799

Local viscous chemically nonequilibrium flows

p 752 N84-42533

Position of the center of pressure on a delta wing in nonequilibrium hypersonic air flow

p 959 N84-47081

Flow characteristics of a vibrationally relaxing gas in nozzles with a region of constant cross section in the throat area

p 961 N84-47484

Three-dimensional nonequilibrium viscous shock-layer flows over complex reentry vehicles

p 511 N84-22543

NONFERROUS METALS

Status of understanding for gear materials

p 623 N84-25061

NONFLAMMABLE MATERIALS

Fire resistant films for aircraft applications

p 140 N84-13375

NONISENTROPICITY

Conservative calculations of non-isentropic transonic flows

[AIAA PAPER 84-1182] p 643 N84-37630

NONLINEAR EQUATIONS

Numerical computations of turbulence amplification in shock-wave interactions

p 239 N84-17427

Nonlinear helicopter stability

p 303 N84-19639

Nonlinear computation of wing-body-vertical tail-wake flows at low supersonic speeds

[AIAA PAPER 84-0427] p 268 N84-21871

Solutions to nonlinear problems in the structural mechanics of aircraft

p 381 N84-25584

Analysis of a semi-levered suspension landing gear with some parametric study

p 974 N84-49187

Computational methods for subsonic and transonic aerodynamic design

p 95 N84-12074

Entropy condition satisfying approximations for the full potential equations of transonic flow

[NASA-TM-85751] p 410 N84-20485

Integrating multigrid relaxation into a robust fast-solver for transonic potential flows around lifting airfoils

[NLR-MP-83021-U] p 663 N84-26673

NONLINEAR FILTERS

Complex radio direction finder with electronic stabilization of the directivity diagram

p 676 N84-38756

Application of a probabilistic tracking filter: A first evaluation with emphasis on air traffic control. Part 1: Evaluation results

[NLR-TR-82088-U-PT-1] p 972 N84-33397

Application of a probabilistic tracking filter: A first evaluation with emphasis on air traffic control. Part 2: Live traffic samples

[NLR-TR-82088-U-PT-2] p 972 N84-33398

NONLINEAR PROGRAMMING

Optimization of propeller blade twist by an analytical method

p 297 N84-21514

Solving the optimal control problem using a nonlinear programming technique. II - Optimal Shuttle ascent trajectories

[AIAA PAPER 84-2038] p 909 N84-44222

Solving the optimal control problem using a nonlinear programming technique. III - Optimal Shuttle reentry trajectories

[AIAA PAPER 84-2039] p 910 N84-44223

Structural optimization with non linear constraints

p 918 N84-45057

Airport noise modelling and aircraft scheduling so as to minimize community annoyance

p 968 N84-48536

An application of nonlinear programming to the design of regulators of a linear-quadratic formulation

[NASA-CR-172253] p 143 N84-13380

NONLINEAR SYSTEMS

Analysis and testing of a nonlinear lateral fin servo

p 221 N84-15919

A mathematical model for efficient estimation of aircraft motions

p 226 N84-18614

Model reference adaptive control for linear time varying and nonlinear systems

p 251 N84-19085

Flutter analysis using nonlinear aerodynamic forces

p 268 N84-22170

A nonlinear structural concept for drag-reducing compliant walls

p 329 N84-23365

A case for nonlinear model simplification in the design of flight control systems

p 361 N84-25505

Application of nonlinear transformations to automatic flight control

p 456 N84-26891

Maximum-likelihood parameter estimation in nonlinear flight-mechanics systems

[DGLR PAPER 83-108] p 491 N84-29671

A strength analysis of aircraft designs by means of an incremental technique that uses the finite element method

p 553 N84-30410

- The calculation of thin-walled aircraft designs in a geometrically nonlinear formulation p 553 A84-30418

p 880 N84-32087
- Flow-field measurements on an airfoil with an oscillating trailing-edge using holographic interferometry
[NASA-CR-166604] p 967 N84-34430

OUTLET FLOW

- Contouring of two-dimensional and axisymmetric supersonic channels realizing discontinuous parameters at the outlet and flow leveling
p 753 A84-42536
- A study of the effect of transverse flow at the outlet of perforations on heat transfer inside the perforations
p 1007 A84-47578

OUTPUT

- Investigation and appreciation of optimal output feedback. Volume 1: A convergent algorithm for the stochastic infinite-time discrete optimal output feedback problem
[NASA-CR-3828] p 902 N84-31217

OV-1 AIRCRAFT

- An automated stall-speed warning system
[AIAA PAPER 83-2705] p 56 A84-12311
- An automated stall-speed warning system
[NASA-TM-84917] p 446 N84-20520

OXIDATION

- Analysis of the effect of oxygen addition on minimum ignition energy
p 373 A84-24057
- Comparison of JFTOT (Jet Fuel Thermal Oxidation Tester) and absorbance methods for determining jet fuel thermal stability
[AD-A138673] p 616 N84-24825
- Basic study of fuel storage stability
[AD-A142194] p 782 N84-28799

OXIDATION RESISTANCE

- Evaluation of thermal-oxidative stability of aviation oils on the OP-100 device
p 374 A84-25589
- Aircraft water-based solid film lubricants
[AD-A133732] p 237 N84-14328

OXIDE FILMS

- Improved thermal barrier coating system
[NASA-CASE-LEW-14057-1] p 998 N84-33595

OXIDES

- Oxide dispersion strengthened alloys
p 997 N84-33472

OXYGEN SUPPLY EQUIPMENT

- The new procurement concept at the USAF Aeronautical Systems Division on aircraft oxygen systems
p 83 A84-10711

OZONE

- Ozone survey of C-9A
[AD-A130632] p 51 N84-10052
- Facilities for meteorological research at NASA Goddard/Wallops Flight Facility
[NASA-TM-84422] p 629 N84-25223
- Climatology of ozone at altitudes from 19,000 to 59,000 feet based on combined GASP and ozonesonde data
[NASA-TP-2303] p 933 N84-31865

- The high altitude pollution program (1976 - 1982)
[AD-A144390] p 1012 N84-34800

OZONOMETRY

- A Lagrangian study of the boundary layer transport of pollutants in the Northeastern United States
p 487 A84-26688
- Simultaneous cabin and ambient ozone measurements on two Boeing 747 airplanes. Volume 2: January to October 1978
[NASA-TM-81733] p 498 N84-22488

P

P-1 ENGINE

- Analysis of particulates in the exhaust plume of a TF30 engine at military power
[AD-A142510] p 784 N84-29882

P-3 AIRCRAFT

- The feasibility, practicality and utility of P-3 inflight refueling
[AD-A143419] p 881 N84-32382
- Passive line-of-sight stabilization for an infrared sensor
[AD-A143305] p 929 N84-32792

P-531 HELICOPTER

- European ideas on scout helicopter
p 2 A84-11072
- Impact of flying qualities on mission effectiveness for helicopter air combat
[AIAA PAPER 84-2106] p 787 A84-42354

PACIFIC OCEAN

- Meteorological feasibility of transpacific balloons and related problems
p 670 A84-38292

PACKET SWITCHING

- A packet switched data link for aeronautical broadcast channels
p 112 A84-14312

PACKING

- Preliminary results of the effects of sewing, packing and parachute deployment on material strength
[DE84-006464] p 511 N84-22541

PACKINGS (SEALS)

- Status of understanding for seal materials
p 624 N84-25062

PAINTS

- Aircraft painting facility
p 148 A84-17167
- Polyurethane aircraft coatings for fuel savings
p 3 N84-11096
- Improved paint removal technique
[AD-A136671] p 376 N84-19580
- Cleaning compound efficiency; test method for aircraft surface cleaners
[AD-A138515] p 399 N84-21504
- Influence of the environment on the application and drying quality of organic paints — aircraft structures
[SNIAS-832-551-102] p 617 N84-25833

PANEL FLUTTER

- Unified aeroelastic flutter theory for very low aspect ratio panels
p 77 A84-10142
- Weight minimization of orthotropic rectangular flat panels subjected to a flutter speed constraint
p 918 A84-45060
- Nonlinear oscillations of a fluttering panel in a transonic airstream

[AD-A133804] p 242 N84-14355
- High-speed, low-altitude payload delivery using a single large ribbon parachute
[DE84-002731] p 179 N84-15128
- High altitude aerodynamic platform concept evaluation and prototype engine testing
[NASA-TM-58256] p 299 N84-16182
- ### PCM TELEMETRY
- Instrumentation and data processing for AFTI/F-16 flight testing
p 194 A84-16690
- ### PENALTIES
- Punitive damages in aviation cases - Solving the insurance coverage dilemma
p 324 A84-20455
- ### PERFORATED PLATES
- A study of the effect of transverse flow at the outlet of perforations on heat transfer inside the perforations
p 1007 A84-47578
- The effect of perforation on the aerodynamics of a spoiler
[BU-286] p 582 N84-24545
- Strains in an elastic plate containing an interference-fit bolt near a free edge
[AR-003-012] p 811 N84-30333
- ### PERFORMANCE
- The study of an idealized wing/body junction
[AD-A139933] p 583 N84-24559

SUBJECT INDEX

PERFORMANCE PREDICTION

- Secondary radar performance prediction p 32 A84-10788
- Analysis of an airplane windshield anti-icing system using hot air p 46 A84-11047
- A prediction method for characteristics of cooled transonic turbines with low aspect ratio and high load p 59 A84-12043
- A new approach using vortex point method for prediction of rotor performance in hover and forward flight [ONERA, TP NO. 1983-120] p 91 A84-13633
- Performance of a receive sidelobe suppression system for secondary surveillance radar p 112 A84-14310
- Transient flow analysis of an aircraft refueling system p 108 A84-14732
- Numerical predictions of residence times behind a rearward facing step with transverse injection p 94 A84-15202
- An automated technique for predicting and evaluating the performance of the improved AN/APG-66 Fire Control Radar p 186 A84-16588
- Throughflow analysis of axial flow turbines p 151 A84-16845
- Helicopter rotor performance degradation in natural icing encounter p 195 A84-17412
- A vortex-lattice method for calculating longitudinal dynamic stability derivatives of oscillating delta wings p 225 A84-17426
- A new bi-rotor helicopter configuration - Model development and performance predictions [AIAA PAPER 84-0385] p 197 A84-18054
- Aerodynamic design of high contraction ratio, subsonic wind tunnel inlets p 167 A84-18078
- PAN AIR prediction of NASA Ames 12-foot pressure wind-tunnel interference on a fighter configuration [AIAA PAPER 84-0219] p 173 A84-19243
- A performance monitoring system for helicopters p 295 A84-19614
- Performance analysis of monopulse receivers for secondary surveillance radar p 344 A84-23260
- Demonstrated performance capabilities of the Aerodynamic and Propulsion Test Unit (APTU) with a vitiated air heater p 366 A84-24192
- Thrust and drag of aircraft - Prediction and verification [AIAA PAPER 84-0611] p 348 A84-24197
- Scale effects on performance of ram air wings [AIAA PAPER 84-0783] p 400 A84-26554
- Improved prediction of parachute line sail during lines-first deployment p 400 A84-26556
- Experimental investigation of full-scale and model parachute opening [AIAA PAPER 84-0820] p 402 A84-26583
- Performance analysis of elevation map referenced navigation systems p 423 A84-26764
- Performance analysis of a target detection system using infrared imagery p 425 A84-27946
- Parachute life expectancy policy - It's time for a change [AIAA PAPER 84-0779] p 419 A84-29968
- Predicting changes in the reliability characteristics of gas turbine engines in use p 532 A84-30420
- The use of a panel method in the prediction of external store separation p 504 A84-30803
- Tunnel display for four-dimensional fixed-wing aircraft approaches p 531 A84-32716
- Performance prediction of high-inlet-blockage diffusers p 638 A84-36477
- Supersonic missile aerodynamic and performance relationships for long-range mission profiles p 677 A84-36554
- Comparison between measured turbine stage performance and the predicted performance using quasi-3D flow and boundary layer analyses [AIAA PAPER 84-1299] p 696 A84-36972
- Flush-mounted antennas yield high performance and clean design p 763 A84-40251
- Forecasting maximum speed of aeroplanes - A case study in technology forecasting p 813 A84-40766
- Numerical simulation of controlled flow tunnel for V/STOL testing [AIAA PAPER 84-2152] p 791 A84-41330

p 680 N84-31120
- MIL-STD-1553B validation testing
[AD-P003544] p 924 N84-31148
- PERIODIC FUNCTIONS**
A second variational theory for optimal periodic processes
p 491 A84-28864
- PERIODIC VARIATIONS**
Influence of a periodical fluctuation on a profile loss of a cascade. I - Determination of the total pressure loss coefficient. II - Behavior of a boundary layer
p 653 A84-38082
- PERIPHERAL VISION**
Using the Peripheral Vision Horizon Display
[SAE PAPER 831473] p 446 A84-29505
- PERMEABILITY**
Aircraft fuel tank inerting system
[AD-A141863] p 773 N84-28785
- PEROXIDES**
Electron spin resonance study of thermal instability reactions in jet fuels
[NASA-CR-168333] p 375 N84-18418
- PERSONAL COMPUTERS**
HP-85/Mini-Ranger navigation system
[AD-A142131] p 765 N84-28770
- PERSONNEL**
Photodigitizing procedures
[AD-A143589] p 929 N84-32793
- PERTURBATION**
A modified lifting line theory for wing-propeller interference
[NASA-CR-173324] p 336 N84-18171
- Development of MCAERO wing design panel method with interactive graphics module
[NAS 1.60:3775] p 529 N84-23623
- Robustness quantification for nonlinear sampled-data systems with dynamic multiplicative perturbations
p 630 N84-25871
- Aeroelastic effects in multi-rotor vehicles with application to a hybrid heavy lift system. Part 1: Formulation of equations of motion
[NASA-CR-3822] p 902 N84-31218
- Improvements in the accuracy and stability of algorithms for the small-disturbance and full-potential equations applied to transonic flows
[NASA-TM-85970] p 849 N84-32350
- Environment and receptivity
p 1010 N84-33780
- Periodic control of the individual-blade-control helicopter rotor
[NASA-CR-166607] p 1012 N84-34771
- PERTURBATION THEORY**
Digital flight control system design using singular perturbation methods
p 227 A84-19154
- An explicit feedback approximation for medium-range interceptions in a vertical plane
p 201 A84-19343
- Horizontal variable-speed interception game solved by forced singular perturbation technique
p 540 A84-31225
- An investigation of large amplitude wing-rock
p 542 A84-32788
- An adaptive array processor with a perturbation algorithm --- for aircraft radio navigation
p 592 A84-36291
- Evaluation of singularly perturbed pursuit-evasion games
p 935 A84-44940
- The use of the perturbation method for determining the optimum distribution of the load-bearing material in swept wings
p 920 A84-45725
- The perturbation method in the nonlinear problem of supersonic flow past delta wings
p 960 A84-47098
- Analysis of some acoustics-jet flow interaction problems
[NASA-CR-175340] p 322 N84-18944
- Design of a complete multivariable digital flight control system
[AFIT/GÉ/EE/82D-18] p 610 N84-24532
- Hypersonic Aerothermodynamics
[VKI-LS-1984-01] p 587 N84-25656
- Implementation of uniform perturbation method for potential flow past axisymmetric and two-dimensional bodies
[NASA-CR-173829] p 758 N84-29851
- PETROLEUM PRODUCTS**
Long term evaluation of the effects of shale oil produced JP-4 on aircraft construction materials
[AD-A131665] p 123 N84-12161

- Assessment of Alternative Aircraft Fuels
[NASA-CP-2307] p 538 N84-23630
- PHASE CHANGE MATERIALS**
Improved avionics reliability through phase change conductive cooling
p 142 A84-15653
- PHASE ERROR**
Single-pass fine-resolution SAR autofocus
p 186 A84-16586
- PHASE LOCKED SYSTEMS**
An experimental investigation of an underexpanded rectangular jet ejector
p 964 A84-33374
- PHASE MODULATION**
Analytical investigation of synchrophasing as a means of reducing aircraft interior noise
[NASA-CR-3823] p 941 N84-32123
- PHASE SHIFT KEYING**
A voice-compatible data link system on the aeronautical VHF band
p 112 A84-14313
- PHASE TRANSFORMATIONS**
Phase distributions in plasma-sprayed zirconia-yttria
p 236 A84-18948
- The filterability of T-6 fuel at low temperatures
p 374 A84-25590
- Overview of zirconia with respect to gas turbine applications
[NASA-TP-2286] p 473 N84-21740
- PHASE VELOCITY**
Experimental determination of the propagation velocity of VLF signals of the Omega navigation system on the basis of phase measurements
p 519 A84-32145
- PHASED ARRAYS**
Design and performance considerations in modern phased array radar
p 30 A84-10755
- An X-band microstrip phased-array antenna with electronic polarization control
p 34 A84-10822
- Measuring target position with a phased-array radar system
p 34 A84-10831
- Algorithm for the digital processing of signals of onboard receiving antenna arrays
p 284 A84-20555
- Proceedings of the Antenna Applications Symp., volume 2
[AD-A142754] p 925 N84-31487
- A conformal SHF phased array for aircraft satellite communication
[AD-P003509] p 925 N84-31477
- PHENOLS**
Thiocarbamide derivatives of 2,6-di-tert-butylphenol as jet fuel stabilizers
p 913 A84-43544
- PHOSPHINES**
Perfluoroalkylether substituted phenyl phosphines
[AD-D011122] p 915 N84-32529
- PHOTOCHEMICAL REACTIONS**
Effects of temperature and pressure on the photochemical reactivity of a representative aviation fuel
p 797 A84-40250
- Turbine engine exhaust hydrocarbon analysis, tasks 1 and 2
[AD-A131522] p 61 N84-10074
- PHOTOMETRIMETRY**
Multi-models to increase accuracy
p 629 N84-25154
- PHOTOGRAPHIC RECORDING**
Method for dynamically recording distortion in a transparency
[AD-D011209] p 1011 N84-34707
- PHOTOGRAPHY**
The use of oil for in-flight flow visualization
[NASA-TM-84915] p 175 N84-14122
- A new and unique conductive element for aircraft transparencies
[AD-P003188] p 685 N84-26601
- PHOTOMAPPING**
An optimally integrated track recovery system for aerial bathymetry
p 205 A84-16120
- PHOTORECONNAISSANCE**
Reconnaissance (RECCE) under control --- airborne photoreconnaissance control system
p 490 A84-27241
- PHYSIOLOGICAL TESTS**
Physiological acceptability tests of the modified SJU-5/A ejection seat for the F-18 aircraft

Predictions of air pollution from an offshore airport. III Analysis of dispersion process in internal boundary layer p 932 A84-44429

POLYAMIDE RESINS

- High temperature adhesives for structural applications: A review — aircraft engines [PNR-90171] p 551 N84-22767

POLYCARBONATES

- Testing polycarbonate for utilization in the production of transparent enclosures p 711 N84-26605
Degradation of the bird impact resistance of polycarbonate [AD-P003193] p 711 N84-26606
Service-life induced failure of bird impact resistant windshields [AD-P003195] p 672 N84-26608
New high performance windshield/canopy materials [AD-P003199] p 685 N84-26612
Heat resistant copolyester-carbonate transparent plastics [AD-P003205] p 712 N84-26618
Effects of surface flaws on impact resistance of uncoated polycarbonate [AD-A141364] p 800 N84-28998

POLYESTER RESINS

- New high performance windshield/canopy materials [AD-P003199] p 685 N84-26612
Heat resistant copolyester-carbonate transparent plastics [AD-P003205] p 712 N84-26618

POLYESTERS

- Interactions between F-111 fuselage fuel tank sealants. Part 1: Characterisation of polyester sealants and their hydrolytic degradation products [MRL-R-657-PT-1] p 617 N84-25828

POLYETHYLENES

- High wind balloon material test and launch concept description [AIAA PAPER 84-0789] p 415 A84-26558

POLYIMIDE RESINS

- Polymides for service at 700 F p 233 A84-17155

POLYIMIDES

- Rigid closed-cell polyimide foams for aircraft applications and foam-in-place technology [NASA-CR-171805] p 916 N84-32535

POLYMER CHEMISTRY

- Significant NASA inventions available for licensing in foreign countries [NASA-SP-7038(05)] p 395 N84-19133
Significant NASA inventions available for licensing in foreign countries [NASA-SP-7038(07)] p 396 N84-19134

POLYMERIZATION

- Electropositive bivalent metallic ion unsaturated polyester complexed polymer concrete [DE84-011080] p 802 N84-29979

POLYMERS

- Adhesion between metals and nonmetals - Long applied, but still not understood p 380 A84-24683
Methods for investigating polymer/metal bonded layers p 374 A84-24685

POLYMETHYL METHACRYLATE

- Service-life induced failure of bird impact resistant windshields [AD-P003195] p 672 N84-26608

- Kinetic-elastic approach for time-dependent rheological data on slurry fuels and polymers
[AD-A141210] p 715 N84-27911
- POLYNOMIALS**
Comparison of various drag coefficient expansions using polynomials and splines
[AIAA PAPER 84-2113] p 751 A84-42358
Fundamentals of mode S parity coding
[DOT/FAA/PM-83/6] p 483 N84-20736
- POLYSULFIDES**
Interactions between F-111 fuselage fuel tank sealants. Part 1: Characterisation of polyester sealants and their hydrolytic degradation products
[MRL-R-657-PT-1] p 617 N84-25828
- POLYURETHANE FOAM**
Optimization of aircraft seat cushion fire blocking layers
[NASA-TM-85430] p 28 N84-10037
- POLYURETHANE RESINS**
Windshield weight reduction through the use of high strength glass and polyurethane interlayers
[AD-P003186] p 684 N84-26599
The need for application of dynamic mechanical analysis in the evaluation of interlayer materials
[AD-P03211] p 723 N84-26624
Aircraft surface coatings
[NASA-CR-165928] p 772 N84-28778
- POROSITY**
The dynamical behaviour of externally pressurized gas-lubricated unloaded porous journal bearings
p 383 A84-26374
p 656 A84-38844
Porous airfoils in transonic flow
- POROUS BOUNDARY LAYER CONTROL**
Status of orifice induced pressure error studies
[AIAA PAPER 84-0245] p 163 A84-17973
Injection into a turbulent boundary layer through different porous surfaces p 715 A84-36499
Tests of wall blowing concepts for diffuser boundary layer control
[AIAA PAPER 84-1276] p 642 A84-37217
Porosity effect on supercritical airfoil drag reduction by shock wave/boundary layer control
[AIAA PAPER 84-1682] p 653 A84-38054
Heat transfer in a laminar boundary layer of an absorbing, emitting, and scattering medium on a permeable plate p 922 A84-46236
- POROUS MATERIALS**
Asymmetric blowing model design and testing
p 368 A84-25219
Effects of a porous plug on orifice induced static pressure error p 412 N84-21507
Evaluation of the pavement condition index for use on porous friction surfaces
[AD-A144521] p 994 N84-34453
- POROUS PLATES**
Hall effects on MHD free-convection flow past an accelerated vertical porous plate p 939 A84-45292
- POROUS WALLS**
Regular reflection of a weak shock wave from a rigid porous wall p 331 A84-24896
An experimental investigation of transonic wind tunnel wall interference effect on airfoil testing
p 369 A84-25997
Tests of wall blowing concepts for diffuser boundary layer control
[AIAA PAPER 84-1276] p 642 A84-37217
Transonic wind tunnel wall interference minimization p 905 A84-44512
Full coverage discrete hole wall cooling - Cooling effectiveness
[ASME PAPER 84-GT-212] p 1005 A84-47001
Selecting an optimum wall permeability for a transonic wind tunnel p 958 A84-47065
Prediction of resonance frequencies for ventilated wall wind tunnels p 567 N84-23580
- PORTABLE EQUIPMENT**
A portable x-ray analyzer for wearmetal particles in lubricants p 240 A84-17543
JDF-1 small light-weight electric eddy current oscillator
[AD-A137572] p 483 N84-20761
- POSITION (LOCATION)**
Measuring target position with a phased-array radar system p 34 A84-10831
A Kalman filter application for position estimation of an airborne relay vehicle in the precision location strike system p 208 A84-16564
Final results of Doppler point positioning at several timekeeping laboratories in Europe p 766 N84-29282
An extended real-time microwave airplane position system p 972 N84-34419
A digital linear position sensor for flight control actuation
[AD-A144283] p 991 N84-34446
- POSITION ERRORS**
Accuracy analysis in inertial navigation systems - German thesis p 37 A84-11984
- Offshore positioning with an integrated GPS/inertial navigation system p 188 A84-18318
Performance analysis of elevation map referenced navigation systems p 423 A84-26764
The probability of overlap in the vertical dimension --- for analyzing navigation errors p 424 A84-27940
Breaking the precision barrier for aircraft inertial systems p 521 A84-33022
- POSITION INDICATORS**
A fixed-beam multilateration radar system for weapon impact scoring p 30 A84-10772
A proposed electronic horizontal situation indicator for use in general-aviation aircraft p 40 A84-12449
Three-dimensional digitization of real world objects
[SAE PAPER 831521] p 426 A84-29513
Off-shore helicopter radio navigation using DME-based positioning system p 521 A84-32337
Digital moving map display p 775 A84-41065
Crash Position Indicator/Crash Survivable Flight Data Recorder ejectable versus nonejectable
[AD-A132329] p 127 N84-13184
Aircraft control position indicator
[NASA-CASE-LAR-12984-1] p 447 N84-20522
- POSITIONING**
A technique for determining the glide ratio of gliding parachutes using space positioning data
[AIAA PAPER 84-0792] p 415 A84-26560
Airborne real time multisensor navigation
[AD-8079957] p 428 N84-21534
Performance evaluation of a Magnavox GPS (Global Positioning System) Z-set
[AD-A138569] p 522 N84-22547
Doppler observation campaign, in the Ivory Coast: Reconnaissance, measuring, interpretation and experience p 766 N84-29289
- POSITIVE FEEDBACK**
Estimator synthesis for flutter control using positivity of transfer matrices p 703 A84-38884
Design of a flutter mode controller using positive real feedback
[AIAA PAPER 84-1869] p 895 A84-43427
- POSTFLIGHT ANALYSIS**
Structural flight load testing pre and post flight analysis
[AIAA PAPER 83-2763] p 50 A84-12349
- POTENTIAL FLOW**
A comparison between the predicted and experimental characteristics of a NACA 64(3)-418 airfoil at low Reynolds numbers p 6 A84-10090
A multigrid strongly implicit procedure for transonic potential flow problems p 9 A84-10126
Conservative full-potential calculations for axisymmetric, transonic flow p 10 A84-10129
Lifting airfoil calculation using the boundary element method p 12 A84-11174
Recent progress in the application of finite element methods to transonic flows p 15 A84-11856
Application of the quadrature formula of cubic splines to calculate potential flow past a system of aerodynamic profiles p 89 A84-13404
Thickness and camber effects in slender wing theory p 90 A84-13585
A subdomain decomposition technique as an alternative for transonic potential flow calculations around wing-fuselage configurations
[ONERA, TP NO. 1983-124] p 91 A84-13639
Computation of three-dimensional viscous flows on transonic wings by boundary layer-inviscid flow interaction p 95 A84-15854
Calculation of transonic flows around wing-fuselage combination by a subdomain decomposition approach p 95 A84-15855
Nonunique solutions to the transonic potential flow equation p 153 A84-17448
A finite volume method for two dimensional transonic potential flow through turbomachinery blade rows
[AIAA PAPER 84-0035] p 156 A84-17840
Vectorized schemes for conical potential flow using the artificial density method
[AIAA PAPER 84-0162] p 161 A84-17921
Second order composite velocity solution for large Reynolds number flows
[AIAA PAPER 84-0172] p 162 A84-17930
Numerical solutions of 2-D unsteady transonic flows using coupled potential-flow/boundary-layer methods
[AIAA PAPER 84-0268] p 164 A84-17987
Full-potential solutions for transonic flows about airfoils with oscillating flaps
[AIAA PAPER 84-0298] p 164 A84-18006
Transonic solutions for a multielement airfoil using the full-potential equation
[AIAA PAPER 84-0300] p 165 A84-18007
Second-order-accurate spatial differencing for the transonic small-disturbance equation
[AIAA PAPER 84-0091] p 172 A84-19230
- Improved finite difference schemes for transonic potential calculations
[AIAA PAPER 84-0092] p 173 A84-19231
Comparison of full-potential and Euler solution algorithms for transonic flowfield computations
[AIAA PAPER 84-0118] p 173 A84-19234
PAN AIR modeling studies. II - Sideslip option, network gaps, three-dimensional forebody flow, and thick-trailing-edge representation
[AIAA PAPER 84-0220] p 173 A84-19244
Shock fitting in conical supersonic full potential flows with entropy effects
[AIAA PAPER 84-0261] p 174 A84-19247
Implicit treatment of the unsteady full potential equation in conservation form
[AIAA PAPER 84-0262] p 313 A84-21857
Potential flow past axisymmetric bodies at angle of attack p 330 A84-24108
Extension of boundary elements to lifting compressible aerodynamics p 333 A84-25883
A numerical analysis of unsteady separated flow by vortex shedding model. I - Flow around a square prism p 403 A84-26948
Numerical calculation of unsteady transonic potential flow over three-dimensional wings with oscillating control surfaces p 405 A84-27132
Fundamental solutions and numerical methods for flow problems p 475 A84-27423
Calculation of potential flow past simple bodies using axial sources and a least-squares method p 575 A84-34464
Modelling of an airfoil empirical flow field below and through dynamic stall p 576 A84-34832
An approximate analytical solution of incompressible potential flow around a circular cylinder between two parallel flat plates p 576 A84-35023
A minimal residual method for transonic potential flows p 621 A84-35353
Conservative calculations of non-isentropic transonic flows
[AIAA PAPER 84-1182] p 643 A84-37630
Compressible potential flows in arbitrary two-dimensional and axially symmetric slender nozzles p 645 A84-37905
Unsteady aerodynamic modeling of a fighter wing in transonic flow
[AIAA PAPER 84-1566] p 649 A84-37975
Transonic full potential solutions by an integral equation method p 655 A84-38829
Axisymmetric nonconical supersonic potential flow with embedded subsonic regions p 656 A84-38848
Performance trades of two-surface and three-surface configurations
[AIAA PAPER 84-2221] p 684 A84-39277
Numerical studies of motion of vortex filaments - Implementing the asymptotic analysis
[AIAA PAPER 84-1542] p 658 A84-39313
Entropy corrections to supersonic conical nonlinear potential flows
[AIAA PAPER 84-1683] p 659 A84-39318
Certain exact solutions to problems concerning flow past a profile near a rectilinear boundary (quasi-theoretical profiles) p 742 A84-39997
A new consistent spatial differencing scheme for the transonic full-potential equation p 743 A84-40827
Numerical simulation of two-dimensional unsteady transonic flows using the full-potential equation p 743 A84-40828
Vortex-fitted potential solution compared with vortex-captured Euler solution for delta wing with leading-edge vortex separation
[AIAA PAPER 84-2144] p 829 A84-44200
A fast viscous correction method for full-potential transonic wing analysis p 831 A84-44946
Relaxation and approximate factorization methods for the unsteady full potential equation p 833 A84-44995
Propellers in compressible flow p 834 A84-45005
Computation of potential flow on S2 stream surface for a transonic axial-flow compressor rotor
[ASME PAPER 84-GT-30] p 951 A84-46894
Common misconceptions in the calculation of transonic full potential flows
[ASME PAPER 84-GT-211] p 955 A84-47000
Accuracy and convergence characteristics of steady transonic potential flow solutions
[ASME PAPER 84-GT-227] p 956 A84-47007
A finite element computer code to calculate full 3-D compressible potential flow in turbomachinery
[ASME PAPER 84-GT-238] p 956 A84-47016
A conformal mapping technique for nonsymmetric potential flows with separation p 20 N84-11138
The treatment of convected vortices in compressible potential flow p 102 N84-12121
The Tracked Wing In Ground-Effect (TWIG) p 122 N84-12155

POTENTIAL THEORY

- Development of a computer code for a three-dimensional higher order panel method for subsonic potential flow [FFA-138] p 106 N84-13155
- Calculation of transonic flow around two wing-fuselage combinations using a full potential equation method [FFA-137] p 179 N84-15132

The prediction of flow through leading edge holes in a film cooled airfoil with and without inserts
[ASME PAPER 84-GT-4] p 1000 A84-46876

An inviscid blade-to-blade prediction of a wake-generated unsteady flow
[ASME PAPER 84-GT-43] p 952 A84-46904

Prediction of stiffness and damping coefficients for centrifugal compressor labyrinth seals
[ASME PAPER 84-GT-86] p 1002 A84-46928

A study of the prediction of tip and seal clearances and their effects in gas turbine transients
[ASME PAPER 84-GT-245] p 984 A84-47022

An analysis of shock coalescence including three-dimensional effects with application to sonic boom prediction
p 83 N84-11890

Improved wave drag predictions using modified linear theory
[NASA-CR-174494] p 98 N84-12096

Development of the basic methods needed to predict the aeroelastic behavior of helicopters
p 142 N84-12811

A review of NASA combustor and turbine heat transfer research
[NASA-TM-83541] p 218 N84-14146

Powerplant selection for conceptual helicopter design
[AD-A132982] p 219 N84-14153

The effect of superposing ripple loading of maneuver load cycles
[AD-A132653] p 205 N84-15148

A viscous inviscid interaction procedure for two dimensional cascades
p 300 N84-16191

A study of prediction methods for the high angle-of-attack aerodynamics of straight wings and fighter aircraft
[NASA-CR-3764] p 273 N84-17131

Theoretical and experimental engine-inlet flow fields for fighter forebodies
[NASA-TP-2270] p 273 N84-17132

The cumulative exceedance distribution for accelerations due to turbulence encountered by a CT/4A air trainer
[AD-A135640] p 363 N84-18211

New analytical methods for the prediction of fatigue crack growth under realistic loading --- aircraft structures
[NLR-MP-82055-U] p 385 N84-18713

A study of the aerodynamic interference effects during aerial refueling
[AD-A136895] p 339 N84-19290

An investigation of new possibilities to simplify the standard supersonic area rule
[AD-A137018] p 341 N84-19297

Lecture notes on the principles and practice of airplane performance prediction. Part 1: Basic elements
[VTH-LR-385-VOL-1] p 353 N84-19345

Lecture notes on the principles and practice of airplane performance prediction. Part 2: Point-performance in steady symmetric and unsymmetric flight
[VTH-LR-385-VOL-2] p 353 N84-19346

Lecture notes on the principles and practice of airplane performance prediction. Part 3: Path performance in quasi steady and unsteady symmetric flight
[VTH-LR-385-VOL-3] p 353 N84-19347

Mixing 4D-equipped and unequipped aircraft in the terminal area
p 427 N84-20577

A computational method for predicting the effects of varying Reynolds number and dynamic pressure on flexible wings at transonic speeds
p 412 N84-21508

Mach number correlation for a two-dimensional helicopter rotor-blade analysis in the tip region
p 412 N84-21509

Exploration of dose-response techniques with some applications to a simulation problem
[AD-A138029] p 492 N84-22252

A Generalized Escape System Simulation (GESS) computer program: GESS user's guide, version 2, volume 1
[AD-A138844] p 518 N84-22545

The development of advanced specimen testing and analysis techniques applied to fracture mechanics lifting of gas turbine components
[PNR-90179] p 537 N84-22575

Mach number and density effects in the mixing of supersonic jets
p 512 N84-22628

Acoustic environmental accuracy requirements for response determination
[NASA-CR-171003] p 566 N84-23234

The transfer function model: A computer program for determination of jet engine test cell exhaust particulates and opacity
[AD-A139222] p 564 N84-24017

Doublet point method for calculations on oscillatory lifting surfaces. Part 2: Supersonic flow
[NAL-TR-785-PT-2] p 586 N84-25649

Surge prediction in industrial compressors
p 626 N84-25969

Advanced prediction technique for the low speed aerodynamics of V/STOL aircraft. Volume 1: Technical discussion
[NASA-CR-166442-VOL-1] p 662 N84-26662

Advanced prediction technique for the low speed aerodynamics of V/STOL aircraft. Volume 2: User's manual
[NASA-CR-166442-VOL-2] p 662 N84-26663

PAN AIR: A computer program for predicting subsonic or supersonic linear potential flows about arbitrary configurations using a high order panel method. Volume 2: User's manual (version 1.1)
[NASA-CR-3252] p 668 N84-27698

Development and evaluation of a performance modeling flight test approach based on quasi steady-state maneuvers
[NASA-CR-170414] p 689 N84-27724

Sensitivity analysis of predicted reacting flow characteristics in solid fuel ramjet combustors
[AD-A141279] p 701 N84-27740

Rotorcraft noise
[NASA-CP-2234] p 816 N84-29662

Role of empirical methods
p 817 N84-29670

Priority for empirical methods development
p 818 N84-29671

Facility requirements for helicopter noise research
p 818 N84-29672

Acoustic methodology review
p 818 N84-29674

Propeller aircraft interior noise model
[NASA-CR-3813] p 819 N84-29687

Evaluation of U.S. Coast Guard forward-looking airborne radars
[AD-A142417] p 809 N84-30156

The need for biaxial fatigue testing at A.R.L.
[AD-A143203] p 931 N84-32878

Application of advanced parameter identification methods for flight flutter data analysis with comparisons to current techniques
p 990 N84-34401

PREDICTIONS

Airborne infrared low level wind shear predictor
[AIAA PAPER 84-0356] p 210 A84-18043

The initial design of active control systems for a flexible aircraft
p 68 N84-11125

Improved wave drag predictions using modified linear theory
[NASA-CR-174494] p 98 N84-12096

Predicting aerodynamic characteristics of vortical flows on three-dimensional configurations using a surface-singularity panel method
p 100 N84-12112

Triservice program for extending missile aerodynamic data base and prediction program using rational modeling
[AD-A132455] p 107 N84-13166

PREWATE: An interactive preprocessing computer code to the Weight Analysis of Turbine Engines (WATE) computer code
[NASA-TM-83545] p 144 N84-13812

TAS: A Transonic Aircraft/Store flow field prediction code
[NASA-CR-3721] p 177 N84-15114

Special opportunities in helicopter aerodynamics
[NASA-TM-84396] p 270 N84-16138

A cost prediction model for electronic systems flight test costs
[AD-A135598] p 351 N84-18195

Preliminary method for estimating hinge moments of all-movable controls
[AD-A139726] p 611 N84-24597

An experimental and theoretical analysis of the aerodynamic characteristics of a biplane-winglet configuration
[NASA-TM-85815] p 772 N84-28779

A theoretical and experimental study of turbulent nonevaporating sprays
[NASA-CR-174668] p 783 N84-29877

An improved method for the prediction of centrifugal compressor rotational-tone noise
[DE84-013345] p 930 N84-32842

PREFLIGHT ANALYSIS

Structural flight load testing pre and post flight analysis
[AIAA PAPER 83-2763] p 50 A84-12349

Pre-flight transient dynamic analysis of B-52 carrying Space Shuttle solid rocket booster drop-test vehicle
[AIAA PAPER 83-2698] p 117 A84-13725

PREFLIGHT OPERATIONS

Operational awareness in future space transportation system concepts and technology selections
[AAS PAPER 83-382] p 547 A84-30574

PREMIXED FLAMES

Determination of the dependence of soot formation in a premixed fuel-air combustion chamber on the combustion process variables
p 358 A84-25573

Time-resolved density measurements in premixed turbulent flames
p 548 A84-32612

Aerodynamic features of flames in premixed gases
p 473 N84-20559

PREMIXING

Some practical aspects of staged premixed, low emissions combustion
[ASME PAPER 84-GT-88] p 981 A84-46930

Experimental study of the operating characteristics of premixing-prevaporizing fuel/air mixing passages
[NASA-CR-168279] p 218 N84-14143

Aerodynamic features of flames in premixed gases
p 473 N84-20559

PREPREGS

Processing characteristics of T300-6K/V378A graphite/bis-maleimide
p 233 A84-17148

New fireworthy composites for use in transportation vehicles
p 472 A84-28873

PREPROCESSING

The Grumman Advanced Telemetry Preprocessor
p 973 A84-46667

MAGNA (Materially And Geometrically Nonlinear Analysis). Part 2: Preprocessor manual
[AD-A129025] p 82 N84-10782

PRESIDENTIAL REPORTS

Aeronautics and space report of the President, 1982 activities
[NASA-TM-85454] p 84 N84-11093

Aeronautics and space report of the President, 1983 activities
[NASA-TM-85538] p 946 N84-33364

PRESSING (FORMING)

Large titanium disc manufactured under the 65,000 metric ton press
p 379 A84-23831

PRESSURE

Effects of JP-4 fuel on Graphite/Epoxy composites
[AD-A135416] p 310 N84-17296

PRESSURE BREATHING

Voice communication and positive pressure breathing in noise
[AD-A141303] p 728 N84-27965

PRESSURE CHAMBERS

An optimum gas ejector with an isobaric mixing chamber
p 840 A84-45724

PRESSURE DISTRIBUTION

Unsteady pressure on a cambered blade under periodic gusts (Comparison with the experiments)
p 12 A84-10899

Jet trajectories and surface pressures induced on a body of revolution with various dual jet configurations
p 12 A84-11049

Finite difference computation of wave drag and pressure on slender bodies of revolution at transonic speeds with zero-lift
p 15 A84-12037

Computations of unsteady transonic aerodynamics using prescribed steady pressures
[AIAA PAPER 82-0956] p 92 A84-14736

A new method for calculating the pressure distribution of supersonic thin wing
p 94 A84-15257

The engineering computational method for the pressure and heat transfer distribution of supersonic turbulent flow at a two-dimensional compression corner
p 94 A84-15259

An evaluation of flight test measurement techniques for obtaining airfoil pressure distributions and boundary layer transition locations
[AIAA PAPER 83-2689] p 169 A84-18249

An evaluation of NCOREL, PAN AIR and W12SC3 for the prediction of pressure on a supersonic maneuver wing --- nonlinear finite difference and panel computer programs for computational aerodynamics
[AIAA PAPER 84-0218] p 173 A84-19242

An investigation of the flow in turbine cascades with off-design inlet angles. The pulsation characteristics of the flow
p 268 A84-22001

An evaluation of the effect of the circumferential inhomogeneity of the total pressure field of the inlet flow on the parameters of an axial-flow compressor
p 332 A84-25565

An improved second-order shock-expansion method.
p 334 A84-25994

An experimental investigation of transonic wind tunnel wall interference effect on airfoil testing
p 369 A84-25997

A method for calculating the pressure field about a ribbon parachute canopy in steady descent
[AIAA PAPER 84-0794] p 400 A84-26562

Pressure distributions on parachute ribbon shapes
[AIAA PAPER 84-0815] p 402 A84-26579

A review of some recent research on time-dependent aerodynamics
p 406 A84-28015

Vibration of impellers. V - Measurement of resonant vibratory stresses of an impeller and pressure distribution due to aerodynamic excitation
p 558 A84-32764

Progress toward a model to describe jet/aerodynamic-surface interference effects
p 638 A84-36481

- First stage stator vane unsteady aerodynamic response in a multi-stage compressor [AIAA PAPER 84-1209] p 643 A84-37634
- Prediction of pressure distribution C_p on a long rectangular wing in transonic-supersonic flow p 644 A84-37756

SUBJECT INDEX

PRESSURE OSCILLATIONS

- Buzz in axisymmetric supersonic inlet and its control
p 16 A84-12042
- Propagation of unsteady perturbations in a boundary layer with self-induced pressure
p 93 A84-14930
- Pressure field induced on an airfoil by an unsteady flow
p 261 A84-19623
- Numerical calculations of pressure oscillations in a side-dump ramjet engine
[AIAA PAPER 84-0365] p 297 A84-21297
- Forced oscillation experiments in supercritical diffuser flows
p 405 A84-27130
- Triple correlation of the pressure fluctuations in a turbulent free jet --- German thesis
p 476 A84-28183
- The spectrum of spatial correlations of turbulent pressure pulsations at a wall at high Reynolds numbers
p 407 A84-28808
- Method for investigating unsteady aerodynamic pressure pulsations on rotating fan blades
p 495 A84-28819
- The effect of freestream turbulence on pressure fluctuations in transonic flow
[AIAA PAPER 84-1581] p 649 A84-37984
- A study of unsteady pressures near the tip of a transonic fan in unstalled supersonic flutter
p 780 A84-42420
- Similarity criteria for the spectra of wall pressure fluctuations in a turbulent boundary layer
p 921 A84-45983
- Interactions of unsteady acoustic and vortical oscillations in axisymmetric cylindrical cavity
[AIAA PAPER 84-1635] p 844 A84-46116
- Centrifugal compressor surge behaviour
[ASME PAPER 84-GT-91] p 1002 A84-46933
- Linear theory of pressure oscillations in liquid fueled Ramjet engines
[AD-A130882] p 60 A84-10071
- Linear theory of pressure oscillations in liquid-fueled ramjet engines
[AD-A131610] p 61 A84-10075
- Nonlinear oscillations of a fluttering panel in a transonic airstream
[AD-A133918] p 175 A84-14124
- Mechanisms of exciting pressure oscillations in ramjet engines
[AD-A133977] p 219 A84-14150
- Study of stator-vane fluctuating pressures in a turbofan engine for static and flight tests
[NASA-TP-2217] p 496 A84-22363
- Definition, sources and lowest possible levels of wind-tunnel turbulence
p 562 A84-23576
- An evaluation of factors affecting the flow quality in wind tunnels
p 562 A84-23577
- PRESSURE PULSES**
- Unstable interaction between an underexpanded supersonic jet and a cylindrical cavity
p 959 A84-47075
- PRESSURE RATIO**
- Design and test of two 8:1 pressure ratio single stage centrifugal compressors of different flow size
p 699 A84-38482
- Flow analysis in the exit plane of high turning angle turbine blades
p 655 A84-38485
- PRESSURE RECOVERY**
- A new concept for exhaust diffusers of altitude test cells
[AIAA PAPER 84-0634] p 367 A84-24210
- An experimental study of full pressure recovery in a hypersonic wind tunnel with conical and shaped nozzles
p 404 A84-27069
- Performance prediction of high-inlet-blockage diffusers
p 638 A84-36477
- Effects of small-scale, high intensity inlet turbulence on flow in a two-dimensional diffuser
p 654 A84-38360
- Static pressure recovery characteristics of some radial vaneless diffusers
p 720 A84-38484
- A new diffuser mapping technique
[ASME PAPER 84-GT-237] p 956 A84-47015
- PRESSURE REDUCTION**
- Effects of pin shape and array orientation on heat transfer and pressure loss in pin fin arrays
p 618 A84-33707
- Influence of a periodical fluctuation on a profile loss of a cascade. I - Determination of the total pressure loss coefficient. II - Behavior of a boundary layer
p 653 A84-38082
- Pressure losses in gas flows in cylindrical ducts with friction and heating
p 917 A84-43935
- A new diffuser mapping technique
[ASME PAPER 84-GT-237] p 956 A84-47015
- Secondary electric power generation with minimum engine bleed
p 79 A84-10059
- New TPS calibration bench, and ejector tests --- wind tunnel turbines and powered models
p 546 A84-23594
- Evaluation of a carbon dioxide scrubber in a 2-lock recompression chamber
[AD-A141052] p 793 A84-28816

PRESSURE REGULATORS

- Apparatus and method for jet noise suppression
[NASA-CASE-LAR-11903-2] p 254 A84-14873
- Laser beam duct pressure controller system
[AD-D011102] p 929 A84-32811
- PRESSURE SENSORS**
- Cockpit CRT display tyre pressure indicating system
p 56 A84-11625
- Airspeed measurements
p 206 A84-16552
- Airfoil probe for angle-of-attack measurement
p 210 A84-17414
- Optimizing the use of surface sensors for wind shear detection - Experimental and analytical considerations
[AIAA PAPER 84-0353] p 313 A84-21866
- Low pressure measurement techniques in a hypervelocity wind tunnel
p 367 A84-25213
- Test of a probe used to sense altitude through measurement of pressure
p 705 A84-36552
- Work done to determine the source of errors on conditioned pressure transducer signals in the J190-7F turbofan engines used on SAA Boeing 747 aircraft
[NAST-82/78] p 134 A84-13192
- Calibration of air-data systems and flow direction sensors. AGARD Flight Test Techniques Series, volume 1
[AGARD-AG-300-VOL-1] p 246 A84-15530
- Measurement of unsteady aerodynamic pressures
[DFVLR-MITT-83-08] p 272 A84-16155
- Application of the small body pressure transducer
[AD-P002687] p 484 A84-20822
- La Recherche Aerospaciale, Bimonthly Bulletin, no. 1983-6, 217/November-December
[ESA-TT-841] p 625 A84-25870
- Multisensor speech input
[AD-A140894] p 726 A84-26974
- Measurement of unsteady aerodynamic pressures
[ESA-TT-834] p 757 A84-28757
- PRESSURE SUITS**
- U-2, TR-1, SR-71 pressure suit open water survival training
p 25 A84-10749
- PRESSURIZED CABINS**
- Lufthansa German Airlines experience with cabin and cockpit windows of Boeing 707, 727, 737, 747, Douglas DC10 and Airbus A300
[AD-P003226] p 686 A84-26639
- Experimental modal analysis of a partial full-scale fuselage of turboprop aircraft --- vibration modes
p 690 A84-27732
- PREVAPORIZATION**
- Experimental study of the operating characteristics of premixing-prevaporizing fuel/air mixing passages
[NASA-CR-168279] p 218 A84-14143
- PRIMATES**
- A research study of the assessment of escape impairment by irritant combustion gases in postcrash aircraft fires
[FAA-CT-84-16] p 854 A84-32366
- PRIMITIVE EQUATIONS**
- An incompressible Navier-Stokes flow solver in three-dimensional curvilinear coordinate systems using primitive variables
[AIAA PAPER 84-0253] p 163 A84-17977
- PRINTED CIRCUITS**
- Advanced application of the printed circuit board testability design and rating system
[AD-A141147] p 728 A84-27989
- PRIORITIES**
- Federal Aviation Administration's system for prioritizing airport grants
[PB84-181650] p 795 A84-29893
- PROBABILITY DISTRIBUTION FUNCTIONS**
- A method for determining if unequal shape parameters are necessary in a bivariate gamma distribution
p 392 A84-20306
- PROBABILITY THEORY**
- Probability of pulse coincidence in a multiple radar environment --- at ECM aircraft position
p 29 A84-10524
- Probabilistic fracture mechanics and fatigue methods: Applications for structural design and maintenance
p 312 A84-21360
- Statistical methods for estimating crack detection probabilities
p 312 A84-21362
- Exploratory study of crack-growth-based inspection rationale
p 313 A84-21364
- Method for determining probability of structural failure from aircraft counting accelerometer tracking data
p 313 A84-21366
- Analysis of structural failure probability under spectrum loading conditions
p 313 A84-21367
- The probability of overlap in the vertical dimension --- for analyzing navigation errors
p 424 A84-27940
- Fatigue reliability of gas turbine engine components under scheduled inspection maintenance
[AIAA PAPER 84-0850] p 533 A84-31670

PRODUCT DEVELOPMENT

- Description and analysis of PACAM 5 (Piloted Air Combat Analysis Model) as a tactical decision aid with a user's guide for operation at NPS
[AD-A136793] p 393 A84-20313
- Development of probabilistic rigid pavement design methodologies for military airfields
[AD-A138212] p 485 A84-21760
- The effect of component redundancy upon aircraft combat survivability
[AD-A141815] p 773 A84-28784
- Flaw detection reliability criteria. Volume 1: Methods and results
[AD-A142001] p 811 A84-30320
- PROBES**
- New device for flow survey around models in large wind-tunnels
[ONERA, TP NO. 1983-128] p 139 A84-13643
- PROBLEM SOLVING**
- The NASTRAN theoretical manual
[NASA-SP-221(06)] p 384 A84-18677
- Strategies of cooperation in distributed problem solving
[AD-A136527] p 392 A84-18955

Coating with overlay metallic-cermet alloy systems [NASA-CASE-LEW-13639-2] p 714 N84-27855

Development of improved LACV-30 propeller blade coatings for protection against sand and rain erosion and marine environment corrosion [AD-A132999] p 727 N84-27914

Aircraft surface coatings [NASA-CR-165928] p 772 N84-28778

Improved thermal barrier coating system [NASA-CASE-LEW-14057-1] p 998 N84-33595

PROTOCOL (COMPUTERS)

Multibus Avionic Architecture Design Study (MAADS) [AD-A138226] p 448 N84-21546

Fault tolerant architectures for integrated aircraft electronics systems, task 2 [NASA-CR-172282] p 694 N84-27734

PROTOTYPES

The problems of type certification p 120 A84-15410

A numerical simulation of three-dimensional flow in an adaptive wall wind tunnel [NASA-TP-2351] p 756 N84-28750

PROTUBERANCES

Protuberance interference heating in high-speed flow [AIAA PAPER 84-1724] p 722 A84-39368

PROVING

MIL-STD-1553B validation testing [AD-P003544] p 924 N84-31148

Digital avionics design for validation [AD-P003571] p 884 N84-31176

PSYCHOACOUSTICS

The fallacy of using NII in analyzing aircraft operations --- Noise Impact Index p 280 A84-22176

Annoyance caused by propeller airplane flyover noise [NASA-TP-2356] p 942 N84-32124

PSYCHOLOGICAL EFFECTS

Definitions of noise and noise pollution p 816 N84-29466

PSYCHOLOGICAL FACTORS

Correlations between incidents during helicopter missions and background variables and moods [FOA-C-53017-H2] p 675 N84-27707

PUBLIC HEALTH

Guidelines for assessment and control of noise p 816 N84-29477

PUBLIC LAW

Transport infrastructure: Is planning still achievable --- airport planning p 343 N84-19310

Compilation of selected aviation laws [GPO-99-811] p 498 N84-21438

PULSE AMPLITUDE

Video processor for air traffic control beacon system [NASA-CASE-KSC-11155-1] p 244 N84-15395

PULSE COMMUNICATION

Validated results from an integrated communications modem --- for Naval aircraft p 422 A84-26755

PULSE DOPPLER RADAR

Instrumentation and analysis of airborne pulse-Doppler radar trials p 30 A84-10773

Air-to-air radar flight testing [AIAA PAPER 83-2768] p 38 A84-12353

Unambiguous range estimation in a pulse Doppler airborne radar p 519 A84-30521

The development of airborne pulse Doppler radar p 675 A84-36915

Simulation of airborne pulse Doppler radars, taking into consideration ground clutter p 762 A84-40011

Calculation of the detection range of pulse-Doppler airborne radar systems p 763 A84-40384

Detection range of an airborne pulse-Doppler radar using medium and high pulse frequencies p 860 A84-45134

PULSE DURATION

Steady-state response of vibrating systems to periodic pulse excitation p 917 A84-44650

PULSE GENERATORS

An experimental and theoretical investigation of an Nemp (nuclear electromagnetic pulse simulator) type fast rise lightning simulator [AD-A141283] p 731 N84-28346

Lightning simulator circuit parameters and performance for severe-threat, high-action-integral testing [DE84-009065] p 810 N84-30211

PULSE HEATING

Flight and wind tunnel tests of an electro-impulse de-icing system. [AIAA PAPER 84-2234] p 671 A84-39280

SP-100 program: Space reactor system and subsystem investigations [DE84-003217] p 323 N84-18045

PULSE MODULATION

All-purpose bidirectional four-quadrant controller p 60 N84-10070

PULSE RADAR

Probability of pulse coincidence in a multiple radar environment --- at ECM aircraft position p 29 A84-10524

Optimising the integration aperture for a high PRF CW surveillance radar --- Pulse Repetition Frequency p 31 A84-10776

Automatic detectors for frequency-agile radar p 34 A84-10832

Further development of the DPS technique for precision DME --- Double Pulse Shaping p 520 A84-32334

A 60 GHz obstruction warning radar for helicopters p 775 A84-40393

HP-85/Mini-Ranger navigation system [AD-A142131] p 765 N84-28770

A 60 GHz pulse radar for detection of high voltage power lines [BMFT-FB-W-84-013] p 807 N84-29077

PULSE REPETITION RATE

Optimising the integration aperture for a high PRF CW surveillance radar --- Pulse Repetition Frequency p 31 A84-10776

PULSED LASERS

Application of pulsed laser holography to nondestructive testing of aircraft structures p 919 A84-45497

PULSES

Energetics of vortex ring formation [AD-A138795] p 511 N84-22539

PULTRUSION

Pultrusion adaptation for helicopter component manufacture p 78 A84-12276

PUMPING

Determination of compressor in-stall characteristics from engine surge transients [AIAA PAPER 84-1206] p 696 A84-36959

Determination of compressor in-stall characteristics from engine surge transients [NASA-TM-83639] p 535 N84-22566

PUMPS

The use of tandem ejector pumps in an intermittent blowdown tunnel [ASME PAPER 84-GT-226] p 992 A84-47006

Stability of pumps and compressors p 625 N84-25963

The Shock and Vibration Digest, volume 16, no. 7 [AD-A143958] p 926 N84-31679

PURGING

Fuel system O-ring leaks on post P.D.M. (Programmed Depot Maintenance) C-5A aircraft [AD-A137885] p 438 N84-20519

PURSUIT TRACKING

Barriers and dispersal surfaces in minimum-time interception --- for optimizing aircraft flight paths p 457 A84-27395

Horizontal variable-speed interception game solved by forced singular perturbation technique p 540 A84-31225

Evaluation of singularly perturbed pursuit-evasion games p 935 A84-44940

Computation of optimal feedback strategies for interception in a horizontal plane p 824 A84-45613

An open loop missile evasion algorithm for fighters [AD-A136834] p 352 N84-19339

Development and flight test evaluation of an analytical model of the air-to-air tracking task [AD-A138058] p 464 N84-21555

PYLONS

Alpha jet pylon p 503 N84-23556

Flight test techniques used for proof of structural integrity of Tornado when carrying external stores p 977 N84-34413

PYRAMIDAL BODIES

The center of pressure of pyramidal bodies --- flight vehicle design p 90 A84-13405

PYROMETERS

The use of fibre optics in engine pyrometry p 480 A84-29283

PYROTECHNICS

Annual meeting of the Pyrotechnics and Explosives Applications Section on the American Defense Preparedness Association [AD-A143157] p 915 N84-31406

QUIET ENGINE PROGRAM

Q

QUADRATIC EQUATIONS

Application of the quadrature formula of cubic splines to calculate potential flow past a system of aerodynamic profiles p 89 A84-13404

QUADRATIC PROGRAMMING

Sequential quadratic programming approach in engineering structural optimization p 565 A84-31580

Sequential quadratic programming and dynamic optimal design of rotating blades p 717 A84-37161

La Recherche Aérospatiale, Bi-monthly Bulletin, no. 1982-4, 209/July-August 1982 [ESA-TT-781] p 88 N84-13141

QUALIFICATIONS

Economic cases of the Civil Aeronautics Board, Volume 101, April 1983 to May 1983 [PB84-127695] p 396 N84-19183

Economic cases of the Civil Aeronautics Board, Volume 102, June 1983 to July 1983 [PB84-127703] p 396 N84-19184

Development of accelerated fuel-engine qualification procedures [AD-A143845] p 976 N84-33406

QUALITY

Aircraft, ships, spacecraft, nuclear plants and quality [DE84-013262] p 943 N84-33166

QUALITY CONTROL

The fine art of accepting an airliner p 25 A84-11274

Voices in the air - The early days of aircraft NDT p 379 A84-23922

Methods for investigating polymer/metal bonded layers p 374 A84-24685

Production testing of electro-optical systems p 444 A84-27182

Near real-time automated inspection and evaluation system (AIES) --- of graphite structures in aircraft p 477 A84-28501

Thermography - Applications to the manufacture and nondestructive characterization of composites p 477 A84-28639

Automation of small-scale machine-shop production and the product quality --- Russian book p 717 A84-37523

Development and applications of fast-sensitive magnetic rubber inspection formulations p 720 A84-38111

Manufacturing procedures and their relation to failures in landing gear components p 804 A84-40804

Aviation product assessment as viewed by the aviation R&D command p 824 A84-46333

The Integrated Blade Inspection System (IBIS) - Program review and status p 922 A84-46345

Poor quality aircraft exterior surfaces cause greater fuel expenditures p 3 N84-11095

The avionics integrity program (AVIP) [AD-P002817] p 568 N84-23362

Assessment of the NASA Flight Assurance Review Program [NASA-CR-173418] p 569 N84-23401

Nondestructive Evaluation Technology Working Group report (IDA/OSD R. and M. (Institute for Defense Analyses/Office of the Secretary of Defense Reliability and Maintainability study) [AD-A139484] p 563 N84-23919

ICAM (Integrated Computer Aided Manufacturing) conceptual design for computer-integrated manufacturing. Volume 4, part 5, task D: Quality assurance/quality, control/technical requirement/tasks, quality assurance modeling and analysis, architecture for product assurance, (TTD) [AD-A144691] p 1015 N84-34999

QUANTITATIVE ANALYSIS

Simple method for analysis of benzo(a)pyrene in exhaust particles from jet engine by high-performance liquid chromatography using extralut extraction p 710 A84-38500

QUENCHING (COOLING)

Aircraft landing dynamics facility carriage weld test program [NASA-TM-85802] p 930 N84-32827

QUEUEING THEORY

In-trail dynamics of multiple CDTI-equipped aircraft queues [NASA-TM-85699] p 295 N84-16178

B-1B Avionics/Automatic test equipment: Maintenance queueing analysis [AD-A141175] p 694 N84-27736

QUIET ENGINE PROGRAM

NASA's OSRA plane uses upper surface blowing p 430 A84-27948

Dash 8 - de Havilland Canada's quiet performer p 588 A84-35361

- RADIATIVE HEAT TRANSFER**
Hypersonic flow past a planar body in the regime of intense radiative heat transfer p 93 A84-14887
Three-dimensional hypersonic flow of a radiating gas past a wing p 264 A84-21131
Radiative heat transfer in the shock layer in three-dimensional flow around blunt bodies p 504 A84-31015
Problems of rate chemistry in the flight regimes of aerostated orbital transfer vehicles
[AIAA PAPER 84-1730] p 660 A84-39369
- Radiative and convective heat transfer interactions in the three-dimensional compressible hypersonic turbulent layer on a sharp cone at an angle of attack p 744 A84-41165
Heat transfer in a laminar boundary layer of an absorbing, emitting, and scattering medium on a permeable plate p 922 A84-46236
A theoretical rationalization of an experimental study of the effect of radiation on free convection p 1007 A84-47573
Loads and aeroelasticity division research and technology accomplishments for FY 1982 and plans for FY 1983
[NASA-TM-84594] p 178 N84-15120
Hypersonic three-dimensional flow of radiating gas around wing p 848 N84-32062
- RADIATIVE TRANSFER**
Hypersonic three-dimensional flow of radiating gas around wing p 848 N84-32062
- RADIO ALTIMETERS**
The development of automatic altitude reporting for air traffic control p 29 A84-10525
Optimization of sounding signals for the measurement of distance to the earth's surface p 187 A84-17651
Synthesis of optimal signal-processing devices in a radio altimeter for low altitudes p 354 A84-25441
A small integrated J band altimeter p 600 A84-36261
Optimization of algorithms for data processing in a complex radio altimeter p 691 A84-38751
- RADIO ANTENNAS**
HF ground-air communications are still alive and well p 37 A84-12188
Antenna systems at civil-aviation airports --- Russian book p 284 A84-21571
In-flight accuracy and coverage tests of ESM- and ECM-systems p 1011 N84-34412
- RADIO BEACONS**
Development of satellite position location system for aircraft and boat distress beacons p 38 A84-12427
A compact flush-mounting antenna with direction finding and steerable cardioid pattern capability p 676 A84-38124
Technology and the future evolution of the ATC system p 114 N84-12148
- RADIO COMMUNICATION**
HF ground-air communications are still alive and well p 37 A84-12188
Problems regarding selective calling, giving particular attention to air-ground communication p 344 A84-24749
Design considerations and trade-offs in RPV communication links p 591 A84-36240
Oscar satellites, amateur radio in space p 995 A84-48416
Addressee errors in ATC communications: The call sign problem
[NASA-CR-166462] p 419 N84-20501
An experimental investigation of the improvement in the reception of TM (Transverse Magnetic)-polarized LF (Low-Frequency) waves with a two-element spaced array
[AD-A142478] p 809 N84-30159
- RADIO DIRECTION FINDERS**
Improvement of the accuracy of Doppler direction finders for general aviation by spectral signal analysis --- German thesis p 590 A84-35694
A compact flush-mounting antenna with direction finding and steerable cardioid pattern capability p 676 A84-38124
Complex radio direction finder with electronic stabilization of the directivity diagram p 676 A84-38756
Crash Position Indicator/Crash Survival Flight Data Recorder (CPI/CSFDR): Ejectable versus non-ejectable p 693 N84-26584
- RADIO ELECTRONICS**
The impact of digital signal processing on future radio systems p 422 A84-26754
- RADIO EQUIPMENT**
Utilizing basic ICNIA capabilities to improve mission availability and reduce pilot workload --- Integrated Communication, Navigation, Identification Avionics p 421 A84-26738
The impact of digital signal processing on future radio systems p 422 A84-26754
Ground-based air traffic control communication equipment p 520 A84-32328
Interface control document for RT-XXXX/ARC-164 UHF-AM radio
[AD-A136970] p 386 N84-19681
Minimum operational performance standards for airborne radio communications equipment operating within the radio frequency range 117.975 - 137.000 MGz [RTCA/DO-186] p 482 N84-20734
- RADIO FREQUENCIES**
Investigation of the RF properties of carbon fibre composite materials p 617 N84-25774
Radio frequency distribution assembly
[AD-A143575] p 928 N84-32658
High-power RF compressor p 928 N84-32664
Radio frequency distribution assembly, operations and maintenance manual
[AD-A143864] p 1009 N84-33649
- RADIO FREQUENCY INTERFERENCE**
RF production test facility for the LAMPS SH-60B Sea Hawk
[AIAA PAPER 83-2762] p 72 A84-12348
The impact of cross-rate interference on the acquisition and track modes of Loran-C receivers p 39 A84-12434
International Conference on Electromagnetic Compatibility, University of Surrey, Guildford, England, September 21-23, 1982, Proceedings p 141 A84-15385
Relative performance of a simple MTI canceller selection rule p 861 A84-45901
Expendable jammers prove indispensable p 970 A84-49194
Instrument landing system critical area studies
[AD-A138228] p 428 N84-21530
- RADIO NAVIGATION**
Navigation - An overview (Invited Paper) p 35 A84-10866
Current developments in Loran-C p 35 A84-10867
Omega (Invited Paper) --- global navigation system p 35 A84-10868
Radionavigation system integrity and reliability p 36 A84-10874
Advances related to radio navigation aids for civil aviation p 113 A84-15422
VLF data for aircraft navigation based on an extended Kalman filter design p 188 A84-18627
Antenna systems at civil-aviation airports --- Russian book p 284 A84-21571
Radio-navigation devices and systems in civil aviation --- Russian book p 284 A84-21578
System reconfiguration for functional fault tolerance in ICNIA --- Integrated Communication Navigation and Identification Avionics terminal p 421 A84-26740
Frequency domain processing for integrated CNI radios --- Communication, Navigation and Identification p 422 A84-26758
A GPS navigation set for commercial aviation applications
[SAE PAPER 831507] p 426 A84-29511
Civil navigation aids in ITT p 519 A84-32326
System 4000 navigation aids p 520 A84-32329
Off-shore helicopter radio navigation using DME-based positioning system p 521 A84-32337
Air navigation 1973-1983 p 590 A84-35590
Activities report on air traffic control in the Federal Republic of Germany p 345 N84-18182
Evaluation of radio navigation systems and their configuration with respect to minimum cost
[DFVLR-FB-83-32] p 347 N84-19329
Satellite aided navigation (INNAVSAT) p 765 N84-28772
[BMFT-FB-W-84-003] Development, set up and testing of a measuring system for components of the Derived Azimuth System (DAS) p 766 N84-28773
Investigation, development and application of optimal output feedback theory. Volume 2: Development of an optimal, limited state feedback outer-loop digital flight control system for 3-D terminal area operation
[NASA-CR-3829] p 902 N84-31218
- RADIO RECEIVERS**
The impact of cross-rate interference on the acquisition and track modes of Loran-C receivers p 39 A84-12434
Flight test results for an experimental GPS C/A-code receiver in a general aviation aircraft p 522 A84-33025
Design and performance evaluation of a five channel Navstar receiver p 591 A84-36264
Analysis and design considerations of hard limiters for LF and VLF navaid receivers p 675 A84-36914
Automatic microprocessor-based receivers for the Decca Navigator system p 970 A84-48538
Performance evaluation of a Magnavox GPS (Global Positioning System) Z-set
[AD-A138569] p 522 N84-22547
- RADIO RECEPTION**
An experimental investigation of the improvement in the reception of TM (Transverse Magnetic)-polarized LF (Low-Frequency) waves with a two-element spaced array
[AD-A142478] p 809 N84-30159

RADIO RELAY SYSTEMS

Design considerations and trade-offs in RPV communication links p 591 A84-36240
Development of relay balloon system p 670 A84-38289

RADIO SIGNALS

Frequency domain processing for integrated CNI radios --- Communication, Navigation and Identification p 422 A84-26758

RADIO TELEMETRY

Interfaces to telemetry systems --- for connection to digital multiplex data bus in avionics subsystems integration p 521 A84-32405
Microwave airborne telemetry - Unusual problems, unusual hardware p 970 A84-49193

RADIO TRACKING

The impact of cross-rate interference on the acquisition and track modes of Loran-C receivers p 39 A84-12434

The era of active RF missiles p 344 A84-23894
An application of DME for measuring real time field performance p 868 A84-44481

RADIO TRANSMISSION

East-West nonreciprocal propagation of Omega Navigational VLF waves on the low latitude and transequatorial paths p 590 A84-34648
Radomes for flight vehicles [AD-A140174] p 625 N84-25920

RADIO TRANSMITTERS

RF subsystems for precision DME p 520 A84-32335

RADIO WAVE REFRACTION

Evaluation of the ionospheric refraction correction algorithm for single-frequency Doppler navigation using TRANET-II data p 38 A84-12429

RADIOACTIVE ISOTOPES

Surface layer activation technique for monitoring and in-situ wear measurement of turbine components [AIAA PAPER 84-1410] p 698 A84-37652
Evaluation of arctic test of tritium radioluminescent lighting [AD-A139176] p 523 N84-23619

RADIOMETRIC RESOLUTION

The role of spatial, spectral and radiometric resolution on information content --- of aircraft scanners p 143 A84-13043
Millimeter wave radiometry p 477 A84-28446

RADOME MATERIALS

Northrop's lightning laboratory and test techniques on composites and radomes for an advanced fighter aircraft p 198 A84-18529
Supersonic radomes in composite materials p 550 A84-32980

RADOMES

Flashover voltage reduction by proximate conductors --- for aircraft protection against lightning strikes p 242 A84-18550
The calculation of diffraction effects of radome lightning protection strip p 242 A84-18551
Depolarisation properties of airborne radomes p 592 A84-36281
Radome induced miss distance in aerodynamically controlled homing missiles [AIAA PAPER 84-1845] p 855 A84-43412
Bank-to-turn guidance performance analysis with in-flight radome error compensation [AIAA PAPER 84-1889] p 855 A84-43480
E-2C Passive detection system (PDS) nose radome anti-icing demonstration test program p 868 A84-44480

Standard Engineering Installation Package. Ground control approach radar systems and radome(S) [AD-A130726] p 79 N84-10430

Radomes for flight vehicles [AD-A140174] p 625 N84-25920
Damaged radar radome repair device [AD-D011158] p 998 N84-33528

RAIL TRANSPORTATION

USSR report: Transportation, no. 126 [JPRS-84457] p 3 N84-10001
Effects on rail transport caused by air transport supply alternatives within the Federal Republic of Germany for the year 2000 [DFVLR-MITT-83-14] p 282 N84-17160
USSR report: Transportation [JPRS-UTR-84-016] p 638 N84-26652
USSR report: Transportation [JPRS-UTR-84-024] p 879 N84-31119
USSR report: Transportation [JPRS-UTR-84-026] p 948 N84-33368

RAILGUN ACCELERATORS

Development of a modular electromagnetic launcher system for the Air Force Armament Laboratory p 543 A84-30204

RAIN

The Air Force Flight Test Center artificial icing and rain testing capability [AIAA PAPER 83-2688] p 71 A84-12305
Numerical analysis of rain effects on an airfoil [AIAA PAPER 84-0539] p 169 A84-18158
Nozzle tests for simulating heavy rain in a wind tunnel [AD-A139566] p 546 N84-23657

RAIN EROSION

The effect of accelerated ultra violet weathering on the rain erosion resistance of coated aircraft transparencies [AD-P003194] p 711 N84-26607
The wiper abrasion and rain erosion resistance of transparent materials and coatings for aircraft glazing [AD-P003227] p 713 N84-26640

RAINDROPS

Visibility in heavy precipitation and its use in diagnosing high rainfall rates [AIAA PAPER 84-0541] p 319 A84-21879
Effect of geometry on airfoil icing characteristics p 670 A84-37935
Experimental and analytical investigations into airfoil icing p 852 A84-45054
Nozzle tests for simulating heavy rain in a wind tunnel [AD-A139566] p 546 N84-23657

RAINSTORMS

Aircraft accident report: Eastern Air Lines, Inc., Boeing 727-225, N883BE, Raleigh, North Carolina, November 12, 1975 [PB83-910406] p 419 N84-20500

RAMAN SPECTRA

Evaluation of turbulence induced noise in coherent anti-Stokes Raman scattering [NASA-CR-166544] p 322 N84-18015

RAMAN SPECTROSCOPY

Optical gas temperature measurement in gas turbines [PNR-90174] p 536 N84-22572

RAMJET ENGINES

Experiments and computation on two-dimensional turbulent flow over a backward facing step --- for solid-fueled ramjets [AIAA PAPER 84-0013] p 155 A84-17832
Numerical calculations of pressure oscillations in a side-dump ramjet engine [AIAA PAPER 84-0365] p 297 A84-21297
Forced oscillation experiments in supercritical diffuser flows p 405 A84-27130
Ramjet rumble - The low-frequency instability mechanism in coaxial dump combustors p 453 A84-29791

Comparison of combustion efficiencies for ramjet engines p 601 A84-34723
Numerical simulation of unsteady flow in a ramjet inlet p 836 A84-45038
Selecting air intake parameters without transition to sonic velocity p 961 A84-47565

Linear theory of pressure oscillations in liquid fueled Ramjet engines [AD-A130882] p 60 N84-10071

Linear theory of pressure oscillations in liquid-fueled ramjet engines [AD-A131610] p 61 N84-10075

Analytical design of a liquid hydrogen fueled turbofan-ramjet engine for flight Mach numbers zero to five p 133 N84-12187
Mechanisms of exciting pressure oscillations in ramjet engines [AD-A133977] p 219 N84-14150

Turbulent mixing and combustion of multi-phase reacting flows in ramjet and ducted rocket environment [AD-A133802] p 219 N84-14152

Particle sizing in a fuel-rich ramjet combustor [AD-A135632] p 359 N84-18204

Multi-ducted inlet combustor research and development [AD-A135906] p 359 N84-18205

Particle sizing in a fuel rich airbreathing engine combustor p 547 N84-22634

Mixing of swirling flows and behavior of wet flows [AD-A138697] p 559 N84-22915

Sensitivity analysis of predicted reacting flow characteristics in solid fuel ramjet combustors [AD-A141279] p 701 N84-27740

Aerodynamic and Propulsion Test Unit (APTU) performance with a vitiated air heater p 795 N84-29964

The annular flow electrothermal ramjet [NASA-CR-174704] p 911 N84-31275

Comparison of combustion efficiencies for ramjet engines [NASA-TM-77749] p 988 N84-33411

RAMJET MISSILES

Air intakes for a probative missile of rocket ramjet [NASA-TM-77407] p 336 N84-18170

RAMPS (STRUCTURES)

Conventional takeoff and landing (CTOL) airplane ski jump evaluation p 193 A84-16173
Supersonic compressive ramp without laminar boundary-layer separation p 153 A84-17429
Performance of fighter aircraft ramp take-off p 683 A84-38878

Calculation of vertical and ramp-assisted takeoffs for supersonic cruise fighters [NASA-TM-85818] p 662 N84-26668

RANDOM ERRORS

Narrowband (LPC-10) vocoder performance under combined effects of random bit errors and jet aircraft cabin noise [AD-A141333] p 728 N84-27967

RANDOM LOADS

Life distribution under various operating conditions of random cyclic loads --- fatigue strength of aircraft construction elements p 309 A84-22407
Suboptimal control of a class of stochastic systems with random, partially observable parameters p 392 A84-25539

Development of a stochastic model for fatigue cracks in aircraft structures p 922 A84-46337
Aeroelastic response of an aircraft wing to random loads [AD-A130476] p 18 N84-10028

RANDOM VIBRATION

Investigation of random vibrations of aircraft engine blades p 298 A84-22410
Estimation of vibrational stressed state for GTE blades under random vibrations p 619 A84-34133
Large deflection multimode response of clamped rectangular panels to acoustic excitation, volume 1 [AD-A139622] p 624 N84-25107
An assembly language program for calculating random decrement signatures [AD-A143908] p 1015 N84-34195

RANDOM WALK

The effect of gyro random walk on the navigation performance of a strapdown inertial navigator p 861 A84-45932

RANGE AND RANGE RATE TRACKING

Range tracking concept for use of GPS at Canadian Forces Base Cold Lake p 857 A84-44476

RANGE ERRORS

Recognition of measurement errors in DME by estimation of impulse parameters p 284 A84-22598
GPS/INS integration for range instrumentation p 969 A84-46642

RANGE FINDERS

GPS/INS integration for range instrumentation p 969 A84-46642

RANGEFINDING

A navigation algorithm using measurement-based extrapolation p 189 A84-19345
Unambiguous range estimation in a pulse Doppler airborne radar p 519 A84-30521

RANKINE CYCLE

Current status of an organic Rankine cycle engine development program p 731 N84-28230
Engineering research on positive displacement gas expanders, phase 1 [DE84-008977] p 811 N84-30310

RANKING

Quantification of subjective ratings through conjoint measurement analysis [AD-A138810] p 528 N84-22554

RAPID QUENCHING (METALLURGY)

Age hardening behavior of Al-Li-(Cu)-(Mg)-Zr P/M alloys p 549 A84-32858

RARE GASES

Aircraft fuel tank inerting system [AD-A141863] p 773 N84-28785

RAREFIED GAS DYNAMICS

A study of stresses on the surface of a plane obstacle in an underexpanded jet of a rarefied gas p 95 A84-15763

An evaluation of some collision models used for Monte Carlo calculations of diatomic rarefied hypersonic flows p 266 A84-21381

Aerodynamic calculation on the basis of the first three terms of the Rice series for the single reflection of rarefied-gas atoms from a rough surface p 406 A84-28286

Flow and heat transfer around a heated circular cylinder in a rarefied gas p 554 A84-31119

The aerodynamic and thermal characteristics of star-shaped bodies around which hypersonic rarefied gas flows at the angle of attack p 506 A84-31769

Investigation of hypersonic rarefied-gas flow past wings of infinite span p 753 A84-42535

RAREFIED GASES

Aerodynamic and thermal characteristics of 3-dimensional stellate bodies in rarefied gas p 663 N84-26915

- Interaction of jet discharged from container and opposing supersonic stream of rarefied gas p 664 N84-26917
- RAYLEIGH SCATTERING**
Time-resolved density measurements in premixed turbulent flames p 548 A84-32612
- RAYLEIGH WAVES**
A review study of nondestructive test techniques for residual stresses in aircraft transparencies [AD-A138930] p 528 N84-22555
- RCA SATCOM SATELLITES**
Electronically steerable SATCOM terminals for airborne use p 591 A84-36230
- REACTION KINETICS**
Turbulent combustion zone in a tubular reactor p 471 A84-28393
Problems of rate chemistry in the flight regimes of aerostated orbital transfer vehicles [AIAA PAPER 84-1730] p 660 A84-39369
Turbulent mixing and combustion of multi-phase reacting flows in ramjet and ducted rocket environment [AD-A133802] p 219 N84-14152
A model for reaction rates in turbulent reacting flows [NASA-TM-85746] p 540 N84-23650
A study of the fundamental problems of combustion in the combustion chambers of turbojets using a tubular reactor p 616 N84-24759
Sensitivity analysis of predicted reacting flow characteristics in solid fuel ramjet combustors [AD-A141279] p 701 N84-27740
Chemical mechanisms and reaction rates for the initiation of hot corrosion of IN-738 [NASA-TP-2319] p 799 N84-28958
- REACTIVITY**
Experimental studies on chemical reactivity and dimensional growth in machining of titanium alloys [ASME PAPER 84-GT-276] p 1006 A84-47038
- REACTOR DESIGN**
The Shock and Vibration Digest, volume 16, no. 7 [AD-A143958] p 926 N84-31679
- REACTOR SAFETY**
SP-100 program: Space reactor system and subsystem investigations [DE84-003217] p 323 N84-18045
- READ-ONLY MEMORY DEVICES**
The use of EEPROMs in embedded computers for avionics applications --- Electrically Erasable Programmable Read-Only Memory devices p 238 A84-16603
- READOUT**
Some aspects of the compatibility between strain gauge readout equipment and multi-component wind tunnel balances [ARL-AERO-NOTE-417] p 384 N84-18606
- REAL GASES**
Hypersonic Mach number and real gas effects on Space Shuttle Orbiter aerodynamics p 405 A84-27435
Numerical solution of Space Shuttle Orbiter flow field including real gas effects [AIAA PAPER 84-1747] p 659 A84-39367
- REAL TIME OPERATION**
Improved operational techniques in the simulation of a missile autopilot p 63 A84-10907
A distributed, real time, flight test system [AIAA PAPER 83-2732] p 71 A84-12325
Scientific data processor - Telemetry preprocessing in the real-time flight test environment [AIAA PAPER 83-2755] p 50 A84-12343
Telemetry ground station offers increased productivity in flight testing [AIAA PAPER 83-2759] p 72 A84-12345
Real-time pilot guidance system for improved flight-test maneuvers [AIAA PAPER 83-2747] p 113 A84-15188
CAML - Digital avionics in a real-time application --- Cargo Aircraft Mine Laying p 120 A84-15624
Distributed avionics processing using ADA p 250 A84-16647
Real-time Pegasus propulsion system model V/STOL-piloted simulation evaluation p 217 A84-17362
Integration of flight test data into a real-time simulation [AIAA PAPER 84-0552] p 306 A84-22924
Real-time engine testing [AIAA PAPER 84-0591] p 384 A84-24182
On-board near-optimal climb-dash energy management p 349 A84-25488
An approach to intercept on-board calculations p 345 A84-25508
Data flow for simulation and digital avionics p 488 A84-26716
A development methodology for real-time graphics --- software p 490 A84-26782
Implementing grads on a raster graphics device --- Graphics Real-time Application Display Support system for avionics p 490 A84-26783
- Piloted simulation of an onboard trajectory optimization algorithm p 521 A84-32714
Instantaneous flow field measurements of stalled regions on an oscillating airfoil [AIAA PAPER 84-1565] p 648 A84-37974
A real-time interferometer technique for compressible flow research [AIAA PAPER 84-1600] p 722 A84-39309
A piecewise linear state variable technique for real time propulsion system simulation p 779 A84-42378
An application of DME for measuring real time field performance p 868 A84-44481
Air traffic control in a zone of convergence - Assessment within Belgian airspace p 859 A84-45061
An on-line realization for precise wind vector measurements on board the DO 28 research aircraft p 932 A84-45065
Real time gyro error compensation in strapdown systems p 861 A84-45952
The Grumman Advanced Telemetry Preprocessor p 973 A84-46667
Symbolic verification study [AD-A131328] p 53 N84-11162
A generalized computer code for developing dynamic gas turbine engine models (DIGTEM) [NASA-TM-83508] p 130 N84-12166
A real-time implementation of an advanced sensor failure detection, isolation, and accommodation algorithm [NASA-TM-83553] p 88 N84-13140
On-board near-optimal climb-dash energy management p 291 N84-16116
Integration of flight test data into a real-time simulation p 370 N84-18216
Cost and performance analysis of visual and sensor simulation systems using Defense Mapping Agency data bases [AD-A135955] p 370 N84-18220
Interpretation of a SAR (Synthetic Aperture Radar) image of the Bay of Biscay [AD-A135981] p 383 N84-18517
Airborne real time multisensor navigation [AD-B079957] p 428 N84-21534
The use of a formal simulator to verify a simple real time control program p 630 N84-25322
HP-85/Mini-Ranger navigation system [AD-A142131] p 765 N84-28770
A data acquisition and real-time display system for testing a jet engine compressor [AD-A142696] p 811 N84-30301
Data base generation: Improving the state-of-the-art [AD-P003470] p 944 N84-32245
Array processor utilization in the computation of real-time images [ARL-SYS-TM-73] p 938 N84-33058
Flight Test Techniques [AGARD-CP-373] p 949 N84-34396
Flight testing and real time data processing for development and integration of weapon systems p 977 N84-34415
An extended real-time microwave airplane position system p 972 N84-34419
Autonomous surveillance in the visual spectral region p 1016 N84-34786
- REATTACHED FLOW**
Viscous/inviscid interaction analysis of asymmetric trailing-edge flows p 7 A84-10096
Measurements of attached and separated turbulent flows in the trailing-edge regions of airfoils p 7 A84-10097
Experimental investigation of curvature effects on ventilated wall jets p 10 A84-10131
Calculation of flow reattachment with vortex integral equations p 89 A84-13269
Nose shape effects on turbulence in the separated and reattached flow over blunt flat plates p 93 A84-14754
Subsonic turbulent flow over a rearward facing segmented step p 334 A84-26052
Turbulence measurements in a compressible reattaching shear layer p 656 A84-38830
Reattachment of a three-dimensional, incompressible jet to an adjacent axisymmetric inclined surface [AD-A136288] p 383 N84-18584
- RECEIVERS**
Investigation of air transportation technology at Ohio University, 1982 p 28 N84-11100
RF front end interface and AGC modification p 43 N84-11102
High dynamic global positioning system receiver [NASA-CASE-NPO-16171-1-CU] p 115 N84-12151
- RECEPTION DIVERSITY**
Environment and receptivity p 1010 N84-33760
- RECIPROCATION**
Instantaneous heat transfer during compression and expansion in reciprocating gas handling machinery p 553 A84-30074
- RECIRCULATIVE FLUID FLOW**
Numerical predictions of residence times behind a rearward facing step with transverse injection p 94 A84-15202
Velocity characteristics in the turbulent near wakes of confined axisymmetric bluff bodies p 403 A84-26883
Velocity characteristics of the flow around disks and cones [ASME PAPER 83-WA/FE-15] p 504 A84-30629
An aerodynamic study of combustion in the combustion chambers of turbomachines: Experimental and theoretical approaches p 608 N84-24764
Ground based testing without wind tunnels p 598 N84-25634
- RECLAMATION**
Turbine engine lubricant reclamation [AD-A135926] p 375 N84-18410
- RECONNAISSANCE AIRCRAFT**
The AHIP - Eyes and ears of the battlefield commander p 51 A84-12774
Reconnaissance (RECCE) under control --- airborne photoreconnaissance control system p 490 A84-27241
US military aircraft cost handbook [AD-A136035] p 328 N84-18158
- RECONSTRUCTION**
The reconstruction of the international airport at Prague-Ruzyně p 543 A84-31333
- RECOVERY PARACHUTES**
Recovery by ACES II --- ejection seat design and recovery parachute operation p 23 A84-10740
Adaptation of a 15-ft-dia ribbon parachute and a 73-ft cross main recovery parachute for cargo delivery from high altitude [AIAA PAPER 84-0790] p 415 A84-26559
Development of an 8-ft-dia ribbon parachute for recovery of a test device at transonic speeds [AIAA PAPER 84-0793] p 415 A84-26561
Vortex lattice theory applied to parachute canopy configurations [AIAA PAPER 84-0795] p 401 A84-26563
Terminal descent controlled vehicle recovery [AIAA PAPER 84-0801] p 415 A84-26567
The Naval Weapons Center's SQUAREX canopy design - A new parachute concept [AIAA PAPER 84-0806] p 416 A84-26571
New, high-performance rotating parachute --- for reentry vehicle recovery [AIAA PAPER 84-0808] p 402 A84-26573
Airdrop Controlled Exit System (ACES) [AIAA PAPER 84-0821] p 416 A84-26584
An experimental study of the performance of clustered parachutes in a low speed wind tunnel [AIAA PAPER 84-0822] p 402 A84-26585
Stability, Sequencing and Recovery (SSR) --- of flying ejection seats p 973 A84-47260
- RECTANGULAR PANELS**
Elastic behaviour of composite structures under low velocity impact p 798 A84-42210
Weight minimization of orthotropic rectangular flat panels subjected to a flutter speed constraint p 918 A84-45060
Large deflection multimode response of clamped rectangular panels to acoustic excitation, volume 1 [AD-A139622] p 624 N84-25107
- RECTANGULAR WINGS**
Cellular patterns in poststall flow over unswept wings p 90 A84-13586
Aerodynamics of very slender rectangular wing bodies to high incidence p 153 A84-17407
Trailing vortices in homogeneous and density-stratified media p 262 A84-19952
Effects of viscosity and modes on transonic aerodynamic and aeroelastic characteristics of wings [AIAA PAPER 84-0870] p 505 A84-31685
Prediction of pressure distribution C_p on a long rectangular wing in transonic-supersonic flow p 644 A84-37756
General equations of motion for an elastic wing and method of solution p 805 A84-40843
Inviscid transonic flow characteristics of sharp-edged rectangular wings [AIAA PAPER 84-2147] p 745 A84-41327
Transonic pressure distributions on a rectangular supercritical wing oscillating in pitch p 842 A84-45959
A study of prediction methods for the high angle-of-attack aerodynamics of straight wings and fighter aircraft [NASA-CR-3764] p 273 N84-17131
Wind tunnel investigation of the rolling moment of a rectangular wing with some winglets on the left upper tip [NAL-TR-788] p 586 N84-25650
Subsonic and transonic unsteady- and steady-pressure measurements on a rectangular supercritical wing oscillated in pitch --- wind tunnel tests [NASA-TM-85765] p 849 N84-32348

RECYCLING

Problems presented to engine builders by the recycling of metallic materials --- titanium and nickel alloys for aircraft engine parts p 997 N84-33482

REDUCED GRAVITY

Microgravity system by using stratospheric balloons p 636 A84-38288
Development of the sonic pump levitation [NASA-CR-161963] p 929 N84-32749

REDUNDANCY

AFTI/F-16 DFCS development summary - A report to industry redundancy management system design --- Digital Flight Control Systems p 222 A84-16666
Comparison of innovations-based analytical redundancy methods p 391 A84-25519
Redundancy in cockpit digital mode panels p 443 A84-26802

Design and development of the multifunction flight control reference system p 126 N84-12065
A diagnosis scheme for sensors of a flight control system using analytic redundancy p 126 N84-12067
Connecting aircraft and external loads p 202 N84-15046

Sensor failure detection for jet engines using analytical redundancy [NASA-TM-83695] p 606 N84-24585
Application of multifunction strapdown inertial system p 594 N84-25698

The effect of component redundancy upon aircraft combat survivability [AD-A141815] p 773 N84-28784
Fault-tolerant system considerations for a redundant strapdown inertial measurement unit [NASA-CR-172426] p 971 N84-33396

REDUNDANCY ENCODING

A real-time implementation of an advanced sensor failure detection, isolation, and accommodation algorithm [NASA-TM-83553] p 88 N84-13140

REDUNDANT COMPONENTS

The reliability analysis of a separated, dual fail operational redundant strapdown IMU --- inertial measurement unit p 207 A84-16558
AFTI/F-16 digital flight control computer design p 224 A84-16693
Back-up flight control system p 361 A84-25489
Redundant asynchronous microprocessor system for fault tolerant flight control and navigation p 442 A84-26798

REENTRY

Space shuttle descent flight control design requirements and experiments Learned, Pt. 1 p 617-628 p 74 N84-10142

REENTRY EFFECTS

Effect of vehicle dynamics on slender cone transition [AIAA PAPER 84-2124] p 752 A84-42365

REENTRY PHYSICS

High altitude effects on three-dimensional nonequilibrium viscous shock-layer flows [AIAA PAPER 84-0304] p 267 A84-21861
Extended capabilities for high altitude reentry simulation in the NSW hypervelocity wind tunnel [AIAA PAPER 84-0412] p 910 A84-46119

REENTRY TRAJECTORIES

Solving the optimal control problem using a nonlinear programming technique. III - Optimal Shuttle reentry trajectories [AIAA PAPER 84-2039] p 910 A84-44223

REENTRY VEHICLES

An experimental investigation of surface pressure measurements on an advanced winged entry vehicle at Mach 10 [AIAA PAPER 84-0308] p 165 A84-18012
Turbulent flow over vehicles at angle of attack p 328 A84-23351

The engineering numerical technique for the determination of the inviscid flow field and heating rate on ballistic re-entry vehicles p 645 A84-37907
Numerical techniques for high incidence reentry aerodynamics [AD-A134178] p 271 N84-16149

SP-100 program: Space reactor system and subsystem investigations [DE84-003217] p 323 N84-18045

Development of the parachute recovery system for the LBRV-2 reentry vehicle [DE84-001540] p 414 N84-21518

REFERENCE SYSTEMS

Design and development of the multifunction flight control reference system p 126 N84-12065
The aircraft infrared measurements guide [AD-A132598] p 254 N84-14905

REFINING

NASA broad-specification fuels combustion technology program p 551 N84-23637

Computer analysis of effects of altering jet fuel properties on refinery costs and yields [NASA-CR-174642] p 715 N84-27908

REFLECTION

Aerodynamic calculation on the basis of the first three terms of the Rice series for the single reflection of rarefied-gas atoms from a rough surface p 406 A84-28286

REFLECTORS

Proceedings of the Antenna Applications Symp., volume 2 [AD-A142754] p 925 N84-31467

REFRACTION

An experimental investigation of the effect of boundary layer refraction on the noise from a high-speed propeller [NASA-TM-83764] p 1016 N84-34230

REFRACTORY MATERIALS

Status of new aerothermodynamic analysis tool for high-temperature resistant transparencies [AD-P003236] p 724 N84-26649
Hot corrosion in aircraft engines [DFVLR-MITT-84-04] p 702 N84-27742
The nature and origin of refractory inclusions in the Allende meteorite p 945 N84-33318
Coating developments to restrict strategic materials usage p 997 N84-33483

REFRACTORY METAL ALLOYS

Ultrasonics assists tough material machining p 806 A84-41938

REFRIGERATING

Heat-powered environmental control systems for fighter aircraft [SAE PAPER 831104] p 430 A84-29039

REFRIGERATING MACHINERY

Analysis of a high-frequency Stirling Cycle compressor for cryogenic cooling in space [NASA-TM-85066] p 247 N84-15555

REFRIGERATORS

Research and development of energy-efficient appliance motor-compressors. Volume 4: Production demonstration and field test [DE84-005083] p 386 N84-19611

REFUELING

Dynamic stability analysis of hose/droge refueling system p 683 A84-38902
Electrostatic charging test for aviation fuel filters [AD-A136986] p 372 N84-19366
The feasibility, practicality and utility of P-3 inflight refueling [AD-A143419] p 881 N84-32382

REGENERATIVE COOLING

The increase in efficiency of high temperature gas turbine plants with cooled turbines p 314 A84-22002
Regenerative Intercooled Turbine Engine (RITE) study [AIAA PAPER 84-1267] p 602 A84-35153
Advanced turbofan concept with regenerator and inter-cooled compressor [AIAA PAPER 84-1270] p 602 A84-35154

REGENERATORS

Highly compact ceramic recuperator for engine applications [ASME PAPER 84-GT-50] p 1001 A84-46907

REGIONAL PLANNING

Developmental possibilities and restrictions in air transport --- conferences [ESA-TT-744] p 342 N84-19307
Transport infrastructure: Is planning still achievable --- airport planning p 343 N84-19310

REGRESSION ANALYSIS

On the determination of airplane model structure form flight data p 200 A84-18615
Development of empirical models on the basis of regression methods and their application in aviation p 813 A84-41658
The use of regression-analysis methods to form Coons patches p 813 A84-41660
Statistical models for estimating overhead costs [AD-A137351] p 396 N84-20444
Regression analysis technique for air data sensor calibration with an inertial navigation system [DFVLR-MITT-84-03] p 677 N84-27716

REGULATIONS

Regulations and the air ambulance p 395 A84-24961
Airworthiness directives - Recovering the cost of compliance p 395 A84-25032
Effects of FAR 25.1309 on airplane operation and maintenance [SAE PAPER 831405] p 397 A84-29626
The effect of regulation 25.1309 on aircraft design and maintenance [SAE PAPER 831406] p 397 A84-29627
Deregulation and commuter airline safety p 669 A84-36942

Develop a normative or descriptive model of the international/domestic civil aviation industry, volume 3 [AD-A131878] p 86 N84-12051

Develop a normative or descriptive model of the international/domestic civil aviation industry, volume 2 [AD-A131877] p 87 N84-12052

Develop a normative or descriptive model of the international/domestic civil aviation industry. Volume 1: Executive summary [AD-A131876] p 87 N84-12053

Integrated logistic supportability (Aviation materiel) [AD-A132367] p 88 N84-13146

Deregulating the airlines: An economic analysis (PB83-250019) p 145 N84-14070

Aircraft operations from airfields with special unconventional characteristics p 203 N84-15085
Transport infrastructure: Is planning still achievable --- airport planning p 343 N84-19310

Study of noise-certification standards for aircraft engines. Volume 3: Selection and evaluation of engine-noise-certification concept [AD-A137805] p 454 N84-20563

Safety study: Airport certification and operations [PB84-917002] p 760 N84-28761
Noise reduction techniques: Criteria and validation p 817 N84-29664

National Airspace Review: Implementation plan [AD-A145379] p 863 N84-31107

Legislation needed to clarify future of consumer protection and federal preemption after the Civil Aeronautics Board sunsets [PB84-210103] p 854 N84-32371

REGULATORS

Nonlinear systems approach to control system design p 462 N84-20585

REINFORCED PLASTICS

Towards minimum weight structures by the use of composites p 140 A84-13807

REINFORCED PLATES

Analysis of symmetric reinforcement of quasi-isotropic graphite-epoxy plates with a circular cutout under uniaxial tensile loading [AD-A139998] p 614 N84-24715

REINFORCED SHELLS

The calculation of thin-walled aircraft designs in a geometrically nonlinear formulation p 553 A84-30418
Singular propagation behavior of cracks in stiffened cylindrical shells p 558 A84-32624
The fracture of the binding rings of a reinforced cylindrical shell cyclically heated by internal gas flow p 887 A84-43921

REINFORCEMENT (STRUCTURES)

Experimental investigations of fiber composite reinforcement of cracked metallic structures p 470 A84-27361

Experimental evaluation of the F-4 transparency support structure interface p 683 A84-38896
Heat: Initiated furan resin for rapid runway repair [AD-A140902] p 707 N84-26713

REINFORCEMENT RINGS

The fracture of the binding rings of a reinforced cylindrical shell cyclically heated by internal gas flow p 887 A84-43921

REINFORCING MATERIALS

Ejection through a reinforced canopy transparency p 23 A84-10730
A principal rotor without joints and pillows, made of fiber materials, for dynamic systems of future helicopters [MBB-UD-384-83-O] p 628 N84-26440

RELAXATION (MECHANICS)

The effects of moisture on fracture toughness and thermal relaxation of stretched acrylic plastics [AD-P003197] p 723 N84-26610

RELAXATION METHOD (MATHEMATICS)

A multigrid strongly implicit procedure for transonic potential flow problems p 9 A84-10126
Conservative full-potential calculations for axisymmetric, transonic flow p 10 A84-10129
A minimal residual method for transonic potential flows p 621 A84-35353
Subsonic/transonic, viscous/inviscid relaxation procedures for strong pressure interactions [AIAA PAPER 84-1627] p 651 A84-38016
Relaxation and approximate factorization methods for the unsteady full potential equation p 833 A84-44995
Integrating multigrid relaxation into a robust fast-solver for transonic potential flows around lifting airfoils [NLR-MP-83021-U] p 663 N84-26673

RELEASING

The development and function of the three ring release and hand deployed pilot chute [AIAA PAPER 84-0829] p 416 A84-26588
Mechanical ice release processes. Part 1: Self-shedding from high-speed rotors [AD-A135369] p 351 N84-18198

RELIABILITY

[NASA-CR-3517] p 714 N84-27836

RICCATI EQUATION

- A second variational theory for optimal periodic processes p 491 A84-28864

RIDING QUALITY

- Selection of SAS' longitudinal feedback coefficients to improve riding qualities p 785 A84-41778
- Design of a digital ride quality augmentation system for a commuter aircraft
[AIAA PAPER 84-1958] p 896 A84-43486
- Flexible aircraft flying and ride qualities p 461 N84-20572

- Evolution of a heave control system for an amphibious hovercraft
[CAR-8401] p 624 N84-25864

RIEMANN WAVES

- Application of Riemann problem solvers to wave machine design p 721 A84-38853

RIGID ROTOR HELICOPTERS

- A time domain analysis of a rigid two-bladed fully gimbaled helicopter rotor with circulation control
[AD-A136947] p 340 N84-19296

RIGID ROTORS

- Fiber composite structures for military helicopters p 46 A84-11056
- Aeromechanical aspects in the design of hingeless/bearingless rotor systems
[MBB-UD-403-83-OE] p 525 A84-32471

- Structural and dynamic tailoring of hingeless/bearingless rotors
[MBB-UD-404-83-OE] p 525 A84-32474

- Stability of a rigid rotor supported by externally pressurized gas journal bearings with a circular slot restrictor p 558 A84-32765

- Theoretical and experimental investigations into helicopter air resonance p 876 A84-46343

- Progress in net shape fabrication of alpha sic turbine components
[ASME PAPER 84-GT-273] p 1006 A84-47036

- Aeromechanical stability of a hingeless rotor in hover and forward flight: Analysis and wind tunnel tests
[NASA-TM-85683] p 80 N84-10610

- Hover test of a full-scale hingeless helicopter rotor: Aeroelastic stability, performance and loads data - wind tunnel tests
[NASA-TM-85892] p 350 N84-18190

RIGID STRUCTURES

- Regular reflection of a weak shock wave from a rigid porous wall p 331 A84-24896

RIGID WINGS

- Finite element model adjustment using experimental vibration data
[ONERA; TP NO. 1984-1] p 803 A84-39975

- Parameters estimation of a nonstationary aerodynamics model for longitudinal motion of aeroplane from flight measurements p 898 A84-44948

- A comparison of the weight ratios of the airframe designs of aircraft with a cantilever wing and with a closed wing system p 973 A84-47076

RING LASERS

- Design of RLG inertial systems for high vibration - Ring Laser Gyros p 41 A84-12465

- Lasernav - inertial navigation system for business-aviation aircraft p 427 A84-29568

- Gyros in business aircraft p 971 A84-49357

- Flight test results of the strapdown ring laser gyro tetrad inertial navigation system
[NASA-TM-84358] p 44 N84-11157

RING STRUCTURES

- A guided projectile/mortar aerodynamic control concept - The trailing ring-tail p 157 A84-17864

- The buckling of honeycomb sandwich circular rings p 922 A84-46190

RIPPLES

- The effect of superposing ripple loading of maneuver load cycles
[AD-A132653] p 205 N84-15148

RISK

- Historical development of collision risk models for en-route air traffic p 425 A84-28254

RIVETING

- Economic riveting: Different bore qualities, fittings, connection elements p 561 N84-23560

RIVETS

- The use of adhesive-bonded rivets to lessen the reductions in fatigue life caused by rivet holes
[ARL-STRUC-REPT-399] p 999 N84-34617

ROADWAY POWERED VEHICLES

- The Tracked Wing In Ground-Effect (TWIG) p 122 N84-12155

ROBOTICS

- Artificial Intelligence-Robotics applications to Navy aircraft maintenance
[AD-A143219] p 826 N84-32345

ROBUSTNESS (MATHEMATICS)

- Application of MIMO phase and gain margins to the evaluation of a flight control system p 362 A84-25549

- Sampled-data control. Volume 1 - Analysis and synthesis. Volume 2 - Design of robust systems /2nd revised and enlarged edition/ - German book p 491 A84-28770

- Robustness against sensor failures - for flight control systems p 540 A84-30274

- Design of robust digital controllers for gas turbines with explicit actuator and sensor dynamics
[AIAA PAPER 84-1185] p 601 A84-35128

- A variable structure approach to robust control of VTOL aircraft p 900 A84-45612

- Performance and robustness aspects of digital control systems p 67 N84-10098

- Digital multivariable tracker control laws for the C-141-A Starlifter aircraft
[AFIT/GE/EE/82D-47] p 610 N84-24533

- Robustness quantification for nonlinear sampled-data systems with dynamic multiplicative perturbations p 630 N84-25871

- Interactive flight control system analysis program
[NASA-CR-172352] p 789 N84-28807

- Comparison of frequency-domain and time-domain rotorcraft vibration control methods
[NASA-CR-166570] p 967 N84-34431

ROCKET ENGINE DESIGN

- Development of a supersonic turbine stage for the HM60 engine - to improve Ariane Launch Vehicle performance
[AIAA PAPER 84-1464] p 709 A84-36984

- Reusable single-state-to-orbit vehicle concept utilizing composite engines
[AIAA PAPER 84-1498] p 709 A84-37663

- Air intakes for a probative missile of rocket ramjet
[NASA-TM-77407] p 336 N84-18170

ROCKET ENGINES

- Aerothermodynamics of gas turbine and rocket propulsion - Book p 721 A84-38720

- Speed-sensing seats - Martin-Baker adapts to stay ahead p 968 A84-48521

- High altitude maneuver control tests in the NSWC (Naval Surface Weapons Center) hypervelocity wind tunnel
[AD-A136105] p 337 N84-18178

- Diffuser/ejector system for a very high vacuum environment
[NASA-CASE-MRS-25791-1] p 708 N84-27749

- History of aircraft escape system propulsion p 761 N84-29941

- Propulsion in a life-saving role for ACES 2 p 762 N84-29942

- The Stencil S4S ejection seat: A study in new pyrotechnic developments p 762 N84-29943

- Crest: Crew escape technologies for the 1990's p 762 N84-29944

- Annual meeting of the Pyrotechnics and Explosives Applications Section on the American Defense Preparedness Association
[AD-A143157] p 915 N84-31406

ROCKET EXHAUST

- Aerodynamic balance for high altitude simulation chamber p 368 A84-25217

- Aircraft exhaust plume signature predictions for non-axisymmetric multiple engine installations p 537 N84-22627

- Mach number and density effects in the mixing of supersonic jets p 512 N84-22628

ROCKET LAUNCHING

- The annular flow electrothermal ramjet
[NASA-CR-174704] p 911 N84-31275

ROCKET NOSE CONES

- Heat transfer in the nose section of axisymmetric objects under conditions of nonseparated and separated flows p 845 A84-46237

ROCKET NOZZLES

- Internal pressure distributions for a two-dimensional thrust-reversing nozzle operating at a free-stream Mach number of zero
[NASA-TM-85655] p 107 N84-13161

- Three-dimensional, two-phase supersonic nozzle flows
[AD-A138649] p 510 N84-22538

ROCKET PROPELLANTS

- FY 1985 technical objective document
[AD-A140581] p 737 N84-27586

ROCKET THRUST

- Optimal catapult impulse shaping for ejection seats
[AIAA PAPER 84-1895] p 864 A84-43445

ROCKET VEHICLES

- Studies in the history and theory of the development of aviation and rocket and space science and technology. Number 2 - Russian p 325 A84-21574

ROCKS

- A study on the possibility of stone ingestion into the engine inlets of jet aircraft p 671 A84-38879

SUBJECT INDEX

Vortex lifted stone ingestion: The influence of stone diameter
[BAE-KRS-N-GEN-276] p 673 N84-26676

RODS
The 'close' problem method and its application to the St. Venant torsion problem for a rod p 1007 A84-47092
Potential flow through a cascade of alternately displaced circular bodies: The rod-wall wind tunnel boundary conditions
[NASA-TM-85750] p 410 N84-20487

ROLL
Lateral-directional stability - Theoretical analysis and flight test experience --- for helicopters
[MBB-UD-402-83-OE] p 541 A84-32472
Development of lateral-directional equivalent system models for selected U.S. Navy tactical aircraft
[AD-A141672] p 790 N84-28810

ROLL FORMING
Progress on isothermal shape rolling p 239 A84-17185
A theoretical and experimental investigation of the bending-rolling process applied to sheets to form conical aircraft parts p 553 A84-30416

ROLLER BEARINGS
Engine reliability through bearing condition monitoring --- aircraft engines
[PNR-90168] p 536 N84-22570
Thermal analysis of a planetary transmission with spherical roller bearings operating after complete loss of oil
[NASA-TP-2367] p 930 N84-32824

ROLLING
The stability boundaries of rapid-rolling aircraft with fuselage elasticity considered p 136 A84-15252

ROLLING CONTACT LOADS
Demonstration of the coast-down technique for determining train resistances
[NASA-CR-173468] p 413 N84-21515

ROLLING MOMENTS
A simple estimation procedure of roll-rate derivatives for finned vehicles p 702 A84-36567
Theoretical prediction of roll moment on wing-controlled missile
[AIAA PAPER 84-2148] p 745 A84-41328
Reynolds number effects on the aerodynamics of a body with square cross-section p 749 A84-42249
Minimal drag for wings with prescribed lift, roll moment and yaw moment
[AD-A134572] p 272 N84-16152
Wind tunnel investigation of the rolling moment of a rectangular wing with some winglets on the left upper tip
[NAL-TR-788] p 586 N84-25650

ROTARY ENGINES
Design of a high-performance rotary stratified-charge research aircraft engine
[AIAA PAPER 84-1395] p 603 A84-35204
A review of internal combustion engine combustion chamber process studies at NASA Lewis Research Center
[AIAA PAPER 84-1316] p 804 A84-40242
A review of internal combustion engine combustion chamber process studies at NASA Lewis Research Center
[NASA-TM-83666] p 623 N84-24999
An overview of the NASA rotary engine research program
[NASA-TM-83699] p 781 N84-28791

ROTARY GYROSCOPES
Analog fiber gyro with extended linear range
[AD-D011009] p 765 N84-28771

ROTARY STABILITY
Rotor dynamical instability; Proceedings of the Applied Mechanics, Bioengineering, and Fluids Engineering Conference, Houston, TX, June 20-22, 1983 p 141 A84-13226
A simple system for helicopter Individual-Blade-Control and its application to lag damping augmentation p 302 A84-19603
STAHR - A program for stability and trim analysis of helicopter rotors p 303 A84-19637
Unsteady aerodynamics in time and frequency domains for finite time arbitrary motion of rotary wings in hover and forward flight
[AIAA PAPER 84-0988] p 525 A84-31713
Stability of a rigid rotor supported by externally pressurized gas journal bearings with a circular slot restrictor p 558 A84-32765
Experimental verification of the Leonard's criterion of stability in rotor-dynamics p 805 A84-40922
Vibrational stabilization of the Lagrange top p 816 A84-42553
Family of airfoil shapes for rotating blades --- for increased power efficiency and blade stability
[NASA-CASE-LAR-12843-1] p 20 N84-11136

Effects of different rub models on simulated rotor dynamics
[NASA-TP-2220] p 318 N84-17590
Apparatus for and method of compensating dynamic unbalance
[NASA-CASE-GSC-12550-1] p 729 N84-28082

ROTARY WING AIRCRAFT
The challenges of maneuvering flight performance testing in modern rotary wing aircraft
[AIAA PAPER 83-2739] p 49 A84-12331
Trends for future rotary wing aircraft p 276 A84-19604
Canadair CL-227 remotely piloted vehicle p 429 A84-27249
Creating competitive rotorcraft noise technology p 435 A84-29570
Aeromechanical stability analysis of a multirotor vehicle model representing a hybrid heavy lift airship (HHLA)
[AIAA PAPER 84-0987] p 540 A84-31712
Studies of convertible turboshaft-turboprop engines for high speed rotorcraft
[AIAA PAPER 84-1268] p 709 A84-36967
Automatic helical rotorcraft descent and landing using a microwave landing system p 860 A84-45576
Convertible engines for Fold Tilt Rotor aircraft and ABC rotorcraft p 892 A84-46356
World and United States aviation and space records, as of June 1, 1983 p 3 N84-10009
Rotorcraft icing technology: An update p 203 N84-15084
Rotary wing aircraft and technical publications of NASA, 1970 - 1982 p 325 N84-18102
[NASA-TM-85521] p 325 N84-18102
Computer program for prediction of the deposition of material released from fixed and rotary wing aircraft
[NASA-CR-3780] p 409 N84-20482
Numerical studies of the deposition of material released from fixed and rotary wing aircraft p 410 N84-20491
Application of the small body pressure transducer
[AD-P002687] p 84 N84-20822
Variable stator radial turbine
[NASA-CR-174663] p 536 N84-22568
Comparison of frequency-domain and time-domain rotorcraft vibration control methods
[NASA-CR-166570] p 967 N84-34431

ROTARY WINGS
Theoretical and experimental dynamic stall investigations on a rotor blade tip p 8 A84-10100
Unsteady pressure on a cambered blade under periodic gusts (Comparison with the experiments) p 12 A84-10899
A fully automatic, temperature-regulated anticing device for rotor blades and engine intakes p 47 A84-11066
Application of optimization methods to rotor design problems p 47 A84-11272
Aerodynamic design of advanced rotors with new tip shapes
[ONERA, TP NO. 1983-119] p 91 A84-13632
Manufacture of a composite main rotor blade p 118 A84-13808
The challenges of maneuvering flight performance testing in modern rotary wing aircraft p 192 A84-16159
Calculation of trim settings for a helicopter rotor by an optimized automatic controller
[AD-A138529] p 225 A84-17363
Performance degradation of propeller systems due to rime ice accretion p 195 A84-17406
[AIAA PAPER 82-0286] p 195 A84-17412
Helicopter rotor performance degradation in natural icing encounter p 195 A84-17412
Experimental study of performance degradation of a model helicopter main rotor with simulated ice shapes
[AIAA PAPER 84-0184] p 196 A84-17937
Noise and performance characteristics of a model scale X-wing rotor system in hover p 197 A84-18030
[AIAA PAPER 84-0337] p 197 A84-18030
A new bi-rotor helicopter configuration - Model development and performance predictions p 197 A84-18054
[AIAA PAPER 84-0385] p 197 A84-18054
Design testing of composite main rotor blades for lightning protection p 198 A84-18530
On-line methods for rotorcraft aeroelastic mode identification p 200 A84-19177
A simple system for helicopter Individual-Blade-Control and its application to lag damping augmentation p 302 A84-19603
A digital system for higher harmonic control of a model rotor p 286 A84-19619
Fluctuating forces and rotor noise due to main rotor-tail rotor interaction p 319 A84-19622
Further application and development of strain pattern analysis p 311 A84-19632
Experimental modal analysis --- of helicopter structural vibrations p 286 A84-19633

ROTARY WINGS

Design and development of the Sea King composite main rotor blade p 286 A84-19636
STAHR - A program for stability and trim analysis of helicopter rotors p 303 A84-19637
Application of the local circulation method to the flutter analysis of rotary wings p 311 A84-19642
Ground flight tests of a passive rotor isolation system for helicopter vibration reduction p 287 A84-19643
New aspects on helicopter rotor dynamics p 287 A84-19650
The influence of different inflow models on the coupled flapping and torsion of helicopter rotor blades p 303 A84-19651
A lifting line theory for curved helicopter blades in hovering and axial flight p 261 A84-19655
Application of an analytic stall model to dynamic analysis of rotor blades p 262 A84-19665
Vibration damping for a hinged-blade helicopter rotor p 288 A84-19698
Applications of an analytic stall model to time-history and eigenvalue analysis of rotor blades p 262 A84-19743
Progress in rotor broadband noise research p 320 A84-19899
Optimal second harmonic pitch control for a two-bladed articulated rotor p 304 A84-19900
Observations on the highly coned propeller --- for helicopters p 296 A84-20025
Europeans pursue rotor development p 289 A84-20137
Separated flow past bodies with fixed separation sites p 263 A84-20178
On linear acoustic solutions of high speed helicopter impulsive noise problems p 320 A84-21212
Predicted electrothermal deicing of aircraft blades
[AIAA PAPER 84-0110] p 279 A84-21286
A vectored-thrust rotor for helicopter anti-torque applications p 291 A84-21799
Prediction of sources moving at high speed as applied to helicopter and propeller noise p 321 A84-21858
[AIAA PAPER 84-0251] p 321 A84-21858
Aerodynamic evaluation of a helicopter rotor blade with ice accretion in hover p 342 A84-24194
[AIAA PAPER 84-0608] p 342 A84-24194
Performance degradation of a model helicopter main rotor in hover and forward flight with a generic ice shape
[AIAA PAPER 84-0609] p 348 A84-24195
Rotors revolutionised p 350 A84-26320
A proposed whirl tower facility for the University of the Witwatersrand p 467 A84-26198
Coupling technique of rotor-fuselage dynamic analysis
[ASME PAPER 83-DET-25] p 431 A84-29107
Comparison of model helicopter rotor primary and secondary blade/vortex interaction blade slap p 566 A84-30809
Unsteady aerodynamics in time and frequency domains for finite time arbitrary motion of rotary wings in hover and forward flight p 525 A84-31713
[AIAA PAPER 84-0988] p 525 A84-31713
Structural and dynamic tailoring of hingeless/bearingless rotors p 525 A84-32474
[MBB-UD-404-83-OE] p 525 A84-32474
The mechanised laying of composite materials into curved mould tools --- for helicopter rotors p 558 A84-32997
Efficient method for calculating the axial velocities induced along rotating blades by trailing helical vortices p 574 A84-34462
Experimental study and modelling of the influence of a periodic wake on a lifting surface

- Centrifugal scaling laws for ground launch cruise missile shelter [AD-A141572] p 793 N84-28818

SCANNERS

- The application of a color, raster scan, programmable display generator in the generation of multiple cockpit display formats p 444 A84-26807
- Proceedings of the Antenna Applications Symp., volume 2 [AD-A142754] p 925 N84-31467

SCATTEROMETERS

- A user's manual for the NASA/JPL synthetic aperture radar and the NASA/JPL L and C band scatterometers [NASA-CR-173209] p 315 N84-16428

SCENE ANALYSIS

- Automated measurements of atmospheric visibility [AD-A136217] p 78 A84-12196
- Simulator scene display evaluation [NASA-CASE-ARC-11504-1] p 307 N84-16221

SCHEDULES

- Calendar of selected aeronautical and space meetings [AGARD-CAL-84/1] p 945 N84-32341

SCHEDULING

- FACSKED - A facility for scheduling p 823 A84-44750

- ICAM (Integrated Computer Aided Manufacturing) conceptual design for computer-integrated manufacturing. Volume 4, part 5, task D: Quality assurance/quality, control/technical requirement/tasks, quality assurance modeling and analysis, architecture for product assurance, (TTD) [AD-A144691] p 1015 N84-34999

SCHLIEREN PHOTOGRAPHY

- Excited annular jets of large inner diameter p 265 A84-21206
- Ignition of small particles behind shock waves p 471 A84-28378

SCHWARZ-CHRISTOFFEL TRANSFORMATION

- A conformal mapping technique for nonsymmetric potential flows with separation p 20 N84-11138

SCIENTISTS

- Designer, scientist on projected developments in aviation p 638 N84-27669

SCOUT LAUNCH VEHICLE

- The SCOUT system - A real time intelligence and surveillance system p 870 A84-44957

SCRAP

- Measures for materials conservation in aero-engine construction p 989 N84-33468
- Towards a cycle without loss: Cobalt in the aircraft industry p 996 N84-33469

SCREEN EFFECT

- Flow past rotating and stationary circular cylinders near a plane screen. II - Characteristics of flow past a stationary cylinder p 721 A84-38674

SCRUBBERS

- Evaluation of a carbon dioxide scrubber in a 2-lock recompression chamber [AD-A141052] p 793 N84-28816

SEA ICE

- Observations of longitudinal rolls in a near neutral atmosphere p 487 A84-27174

SEA LEVEL

- A technique for determining powered-lift STOL aircraft performance at sea level from flight data taken at altitude p 867 A84-44461
- Operational and Performance Measurement on Engines in Sea Level Test Facilities [AGARD-LS-132] p 612 N84-25723
- Operation and performance measurement on engines in sea-level test facilities: Introduction and general survey p 612 N84-25724
- Instrumentation techniques in sea level test facilities p 612 N84-25727
- Performance derivation of turbojets and turbofans from tests in sea-level test cells p 608 N84-25728

SEA WATER

- Problems of failure analysis, taking into account the example of a destroyed axial-flow compressor p 722 A84-39498

SEALERS

- Evaluation of the AF-10 adhesive sealing system for use on the C-130 aircraft p 234 A84-17171
- Interactions between F-111 fuselage fuel tank sealants. Part 1: Characterisation of polyester sealants and their hydrolytic degradation products [MRL-R-657-PT-1] p 617 N84-25828

SEALS (STOPPERS)

- Spraying for time - Abradable seals the key p 382 A84-26074
- Experimental observation of the dynamic behavior of noncontacting coned-face mechanical seals [ASLE PREPRINT 83-LC-3B-1] p 479 A84-28990
- Keeping the wet wing dry p 397 A84-29562
- Counter-rotating intershaft seals for advanced engines [AIAA PAPER 84-1216] p 619 A84-35135
- The role of magnetic fluid seals in modern machinery p 720 A84-38493
- Precision buildup method draws a bead on condemned jet engine parts p 804 A84-40682
- An experimental investigation of oil-buffered shaft seal flow rates [ASME PAPER 84-GT-9] p 1001 A84-46880
- Fiber metal abradable seals [ASME PAPER 84-GT-67] p 1001 A84-46914
- Seal oil degassing in gas turbine centrifugal compressors [ASME PAPER 84-GT-214] p 1005 A84-47002
- A study of the prediction of tip and seal clearances and their effects in gas turbine transients [ASME PAPER 84-GT-245] p 984 A84-47022
- Rotordynamic forces developed by labyrinth seals [AD-A136217] p 384 A84-18599
- Status of understanding for seal materials p 624 N84-25062

- Safety recommendation(s) A-84-10 and -11
p 589 N84-25676
- A comparison of experimental and theoretical results for leakage, pressure distribution, and rotodynamic coefficients for annular gas seals
[NASA-CR-174000] p 1011 N84-34765
- SEAPLANES**
World and United States aviation and space records, as of June 1, 1983 p 3 N84-10009
- SEARCH RADAR**
Probability of pulse coincidence in a multiple radar environment --- at ECM aircraft position p 29 A84-10524
A Kalman approach to improve angular resolution in search radars p 33 A84-10812
LAMPS AN/APS-124 radar simulator p 230 A84-16627
Inexpensive multipurpose airborne surveillance radar p 861 A84-45909
Evaluation of U.S. Coast Guard forward-looking airborne radars
[AD-A142417] p 809 N84-30156
- SEARCHING**
Evaluation of U.S. Coast Guard forward-looking airborne radars
[AD-A142417] p 809 N84-30156
- SEASAT SATELLITES**
Interpretation of a SAR (Synthetic Aperture Radar) image of the Bay of Biscay
[AD-A135981] p 383 N84-18517
- SEATS**
Nonlinear finite element method in crashworthiness analysis of aircraft seats p 670 A84-37936
Optimization of aircraft seat cushion fire blocking layers
[NASA-TM-85430] p 28 N84-10037
Correlation of laboratory-scale fire test methods for seat blocking layer materials with large-scale test results
[AD-A131686] p 109 N84-12138
Effects of motion base and g-seat cueing of simulator pilot performance
[NASA-TP-2247] p 350 N84-18189
Survey of NASA research on crash dynamics
[NASA-TP-2298] p 486 A84-21901
Decision analysis model for passenger-aircraft fire safety with application to fire-blocking of seats
[AD-A142477] p 761 N84-29859
Design and development of an automatically controlled variable-load energy absorber
[AD-A142683] p 774 N84-29868
Simulated crash decelerations in a light aircraft cabin
[AD-A142806] p 853 N84-31102
Fire blocking systems for aircraft seat cushions
[NASA-CASE-ARC-11423-1] p 968 N84-33394
- SECONDARY FLOW**
Comparison of experimental and computational compressible flow in a S-duct
[AIAA PAPER 84-0033] p 172 A84-19228
Influence of dihedral on the secondary flow in a two-dimensional compressor cascade
[ASME PAPER 83-GT-J-12] p 748 A84-41632
The effect of secondary flow taps on the characteristics of a two-stage section with partial stages p 921 A84-45821
Recent progress in the understanding of basic aspects of secondary flows in turbine blade passages
[ASME PAPER 84-GT-78] p 952 A84-46921
Computation of secondary flows in an axial flow compressor including inviscid and viscous flow computation
[ASME PAPER 84-GT-244] p 957 A84-47021
Secondary flows and losses in a turbine cascade p 301 N84-16203
Secondary flow spanwise deviation model for the stators of NASA middle compressor stages
[NASA-CR-173360] p 358 N84-18202
Secondary flows and endwall boundary layers in axial turbomachines --- conferences
[VKI-LS-1984-05] p 808 N84-29162
- SECONDARY RADAR**
Monopulse secondary surveillance radar - Principles and performance of a new generation SSR system p 31 A84-10784
Decoding-degarbling in monopulse secondary surveillance radar p 31 A84-10785
Evaluation of angular discrimination of monopulse SSR replies in garble condition p 31 A84-10786
Integral SSR antenna having independently optimized sum and difference beams p 32 A84-10787
Secondary radar performance prediction p 32 A84-10788
Secondary radar systems p 111 A84-14300
Reply processing in monopulse SSR system with improved degarbling capability p 112 A84-14309
Performance of a receive sidelobe suppression system for secondary surveillance radar p 112 A84-14310

- Angle estimation and discrimination of monopulse SSR replies in the presence of synchronous interference p 112 A84-14311
- Keeping the traffic flowing - Is monopulse SSR the next big market? p 284 A84-20600
Comparative assessment of a monopulse SSR system and conventional moving-window processing p 284 A84-22596
Performance analysis of monopulse receivers for secondary surveillance radar p 344 A84-23260
On the exploitation of the SSR mode S data link capabilities towards improving ATC tracker performance p 424 A84-26794
The evolution of secondary surveillance radar p 519 A84-30520
Mode S and T.CAS - The French design and program p 882 A84-43500
Monopulse SSR - The United Kingdom Civil Aviation Authority programme p 859 A84-44754
- SEDIMENTS**
Alternative fuel deposit formation p 615 N84-24735
- SELF ADAPTIVE CONTROL SYSTEMS**
Nonlinear self-tuning adaptive control of the T38 aircraft p 223 A84-16678
A general adaptive scheme p 175 A84-19335
- SELF FOCUSING**
Single-pass fine-resolution SAR autofocus p 186 A84-16586
- SELF INDUCED VIBRATION**
Dynamic load measurements with delta wings undergoing self-induced roll oscillations p 225 A84-17404
The coupled response of turbomachinery blading to aerodynamic excitations p 448 A84-26959
- SELF OSCILLATION**
Structure of self-excited oscillations in transonic diffuser flows
[AIAA PAPER 84-1636] p 651 A84-38023
- SELF REPAIRING DEVICES**
Self-repairing flight control systems - Overview p 223 A84-16674
- SELF SEALING**
Valve blocks - Crash fires p 481 A84-29582
Oxidizing seal for a turbine tip gas path
[NASA-CASE-LEW-14053-1] p 535 N84-22563
- SEMICONDUCTOR DEVICES**
Recent developments in the measurement of time-dependent pressures p 515 N84-23601
USSR report: Physics and mathematics
[JPRS-UPM-84-005] p 941 N84-32081
- SEMICONDUCTOR DIODES**
Airborne tunable diode laser system for trace gas measurements p 881 A84-43305
- SEMICONDUCTORS (MATERIALS)**
Silicon carbide, a high temperature semiconductor p 253 A84-17823
Cycloconverter on the all-electric airplane p 79 N84-10069
- SEMIEMPIRICAL EQUATIONS**
Aerodynamics of very slender rectangular wing bodies to high incidence p 153 A84-17407
Development of empirical models on the basis of regression methods and their application in aviation p 813 A84-41658
- SEMI SPAN MODELS**
Half-model testing in the NLR high speed wind tunnel (HST)
[NLR-TR-82123-U] p 794 N84-29891
- SENSITIVITY**
Electrofluidic angular rate sensor for ejection seat thrust vector control
[AD-A133233] p 185 N84-15137
Calibration of CT-4A fatigue test article, March 1983
[AD-A142880] p 879 N84-31115
- SENSORS**
A diagnosis scheme for sensors of a flight control system using analytic redundancy p 126 N84-12067
Evaluation of a total energy-rate sensor on a transport airplane
[NASA-TP-2212] p 126 N84-12164
Airborne Intelligent Display (AID) phase 1 software development p 127 N84-13181
Sensor failure detection for jet engines using analytical redundancy
[NASA-TM-83695] p 606 N84-24585
- SEPARATED FLOW**
A calculation method of leading edge separation bubbles
[ONERA, TP NO. 1983-10] p 7 A84-10093
Prediction of subsonic separation bubbles on airfoils by viscous-inviscid interaction p 7 A84-10094
Measurements of attached and separated turbulent flows in the trailing-edge regions of airfoils p 7 A84-10097

- Calculation of boundary layers and separation on a spheroid at incidence p 9 A84-10109
Numerical study of the turbulent flow past an airfoil with trailing edge separation p 10 A84-10134
Numerical simulation of flow around a three-dimensional turret p 10 A84-10135
Laser Doppler velocimeter measurements in unsteady, separated, transonic diffuser flows p 90 A84-13576
Cellular patterns in poststall flow over unswept wings p 90 A84-13586
Nose shape effects on turbulence in the separated and reattached flow over blunt flat plates p 93 A84-14754
Investigation of supersonic separated flow in a compression corner by laser Doppler anemometry p 94 A84-15080
Preliminary study of oil-flow technique and separated-flow in hypersonic shock tunnel p 94 A84-15255
A multi-vortex model of leading-edge vortex flows p 151 A84-16274
The modeling of stalled flows in the shock layer of obstacles in nonuniform flow p 152 A84-16916
An inverse coupling algorithm for modelling a shock wave-boundary layer interaction p 154 A84-17596
An unsteady separated flow of an incompressible fluid around an airfoil - Comparison between numerical and experimental results p 154 A84-17597
Characteristics of separated flow airfoil analysis methods
[AIAA PAPER 84-0048] p 156 A84-17845
Effects of local boundary layer suction on shock-boundary layer interaction and shock-induced separation
[AIAA PAPER 84-0098] p 159 A84-17880
Viscous/inviscid interaction analysis of separated trailing-edge flows
[AIAA PAPER 84-0266] p 164 A84-17985
Boundary layer transition effects on flow separation around V/STOL engine inlets at high incidence
[AIAA PAPER 84-0432] p 167 A84-18090
The structure of separated flow in the case of supersonic flow past blunt cones with a rear sting p 171 A84-19001
Two recent extensions of the vortex method
[AIAA PAPER 84-0343] p 174 A84-19249
Separated flow past bodies with fixed separation sites p 263 A84-20178
Separated flow noise of a flat plate at large attack angles p 321 A84-21221
A new turbulence closure model for boundary layer flows with strong adverse pressure gradients and separation
[AIAA PAPER 84-0175] p 313 A84-21854
Airfoil computation at high angles of attack, inviscid and viscous phenomena
[AIAA PAPER 84-0524] p 268 A84-21876
Computation of the flow around wings with rear separation p 268 A84-22168
Motion-induced aerial forces for detached flow and their application to the study of structural response --- German thesis p 268 A84-22249
Lateral aerodynamics of delta wings with leading-edge separation p 329 A84-23352
Flow improvements in the NASA Langley 4- by 7-meter tunnel circuit
[AIAA PAPER 84-0603] p 330 A84-24181
A numerical analysis of the flow around structures by the discrete vortex method p 381 A84-24976
Application of laser velocimetry to unsteady flows in large scale, high speed tunnels p 381 A84-25230
A study of an underexpanded sonic jet issuing from a slot along a solid surface p 332 A84-25576
A numerical analysis of unsteady separated flow by discrete vortex model using boundary element method p 382 A84-25882
Transonic flow of an elastic medium past a thin rigid body p 334 A84-26330
Evolution of the discontinuity of a vortex sheet p 334 A84-26333
A numerical analysis of unsteady separated flow by vortex shedding model. I - Flow around a square prism p 403 A84-26948
An asymptotic solution to the problem concerning flow of a viscous fluid near the axis of a vortex sheet p 404 A84-27056
Experimental studies of the separated flow over a NASA GA(W)-1 airfoil p 405 A84-27144
Fundamental solutions and numerical methods for flow problems p 475 A84-27423
Separated flow unsteady aerodynamics for propan applications
[AIAA PAPER 84-0874] p 505 A84-31687
Analysis of separated boundary-layer flows p 578 A84-35311
Euler solutions as limit of infinite Reynolds number for separation flows and flows with vortices p 579 A84-35344

SHOCK WAVE PROFILES

SUBJECT INDEX

Transonic shock interaction with a tangentially-injected turbulent boundary layer
[AIAA PAPER 84-0094] p 159 A84-17877

Effects of Mach number on upstream influence in sharp fin-induced shock wave turbulent boundary layer interaction
[AIAA PAPER 84-0095] p 159 A84-17878

Effects of local boundary layer suction on shock-boundary layer interaction and shock-induced separation
[AIAA PAPER 84-0098] p 159 A84-17880

Experimental studies on two dimensional shock boundary layer interactions
[AIAA PAPER 84-0099] p 159 A84-17881

Turbulence measurements in two shock-wave/shear-layer interactions
p 169 A84-18349

Two rapid distortions in supersonic flows - Turbulence-shock wave and turbulence-expansion
p 169 A84-18350

Flowfield scaling of a swept compression corner interaction A comparison of experiment and computation
[AIAA PAPER 84-0096] p 173 A84-19232

Geometric characteristics of the separation of a turbulent boundary layer during the interaction with a normal shock in conical flows
p 260 A84-19555

The transonic interaction of a normal shock with a mildly separated turbulent boundary layer
p 261 A84-19593

Disturbance of a planar turbulent wake by a compression shock
p 263 A84-20841

Simulation of blunt-fin-induced shock wave and turbulent boundary-layer interaction
[AIAA PAPER 84-0457] p 266 A84-21301

Cylindrical and conical flow regimes of three-dimensional shock/boundary-layer interactions
p 266 A84-21505

Regular reflection of a weak shock wave from a rigid porous wall
p 331 A84-24896

Oblique shock waves in two-phase flow
p 476 A84-28377

Ignition of small particles behind shock waves
p 471 A84-28378

Hot-wire investigation of an unseparated shock-wave/turbulent boundary-layer interaction
p 508 A84-32602

The active and passive influencing of shock boundary layer interference at supersonic aircraft wings
[DGLR PAPER 83-059] p 509 A84-33150

A survey of recent ONERA experimental studies on turbulent separated flows
[ONERA, TP NO. 1984-14] p 642 A84-37533

Numerical simulation of compressible, viscous flow using an implicit, bi-diagonal method
p 718 A84-37702

The Baldwin-Lomax turbulence model for two-dimensional shock-wave/boundary-layer interactions
p 656 A84-38834

Similarity conditions for conical shockwave turbulent boundary-layer interactions
[AIAA PAPER 84-1557] p 657 A84-39301

Numerical calculations of complex Mach reflection
[AIAA PAPER 84-1679] p 658 A84-39314

The asymptotic analysis of wave interactions and numerical calculations of transonic nozzle flow
p 742 A84-40775

A hybrid explicit-implicit numerical algorithm for the three-dimensional compressible Navier-Stokes equations
p 743 A84-40831

Interference effects between spherically blunted cylinders at $M = 2.5$ and 1.5
[AIAA PAPER 84-2098] p 750 A84-42349

The structure of turbulence in a supersonic shock-wave/boundary-layer interaction
p 830 A84-44635

Transonic shock-boundary layer interaction control
p 832 A84-44961

The interaction of a shock wave and a turbulent boundary layer and its control
[ONERA, TP NO. 1984-27] p 837 A84-45177

An investigation of a method for controlling a three-dimensional separation zone
p 841 A84-45730

Experimental studies of quasi-two-dimensional and three-dimensional viscous interaction regions induced by skewed-shock and swept-shock boundary layer interaction
[AIAA PAPER 84-1677] p 845 A84-46126

Interaction between a pseudo-shock and an obstacle
p 959 A84-47073

Gas flow and heat transfer in zones of shock wave-boundary layer interaction --- Russian book
p 961 A84-47631

Interaction between a shock-wave and a vortex flow
p 99 A84-12104

Three dimensional/boundary layer interaction: Laminar and turbulent behaviour
[AD-A137060] p 386 A84-19765

Mixing of swirling flows and behavior of wet flows
[AD-A138697] p 559 A84-22915

Investigation of the mechanism of transonic shock wave/boundary layer interactions using a Navier-Stokes analysis
[AD-A141551] p 757 N84-28752

SHOCK WAVE PROFILES

Stability of shock waves attached to wedges and cones
p 90 A84-13565

Second-order-accurate spatial differencing for the transonic small-disturbance equation
[AIAA PAPER 84-0091] p 172 A84-19230

Weak spherical shock-wave transitions of N-waves in air with vibrational excitation
p 379 A84-23871

An improved second-order shock-expansion method
p 334 A84-25994

Weak nonlinear shock waves in steady two-dimensional flow of a non-equilibrium gas along a curved wall
p 504 A84-31117

A numerical method for calculating supersonic flow past aircraft wings
p 741 A84-39872

SHOCK WAVE PROPAGATION

Measurement of air ionization behind intense shock waves
p 254 A84-18662

High speed interferometric method for density field investigation in a boundary layer behind the shock wave
p 919 A84-45491

Self-sustained oscillations of a shock wave interacting with a boundary layer on a supersonic airfoil
p 939 A84-45661

Numerical solution of the problem concerning the focusing of shock waves produced by a supersonic aircraft
p 1016 A84-47054

Self-sustained oscillations of a shock wave interacting with a boundary layer on a supersonic airfoil
[NASA-CR-175338] p 269 N84-16131

Numerical solutions of acoustic wave propagation problems using Euler computations
[NASA-CR-172434] p 938 N84-33112

SHOCK WAVES

Computation of supersonic inviscid flow around wings with a detached shock wave
p 151 A84-16854

Behavior of the flow through a numerically captured shock wave
p 153 A84-17451

Shock fitting in conical supersonic full potential flows with entropy effects
[AIAA PAPER 84-0261] p 174 A84-19247

On flows with vibrational relaxation behind an attached shock wave
p 403 A84-26844

Nose parts of bodies of revolution with a passage that is close to bodies of minimum wave resistance
p 404 A84-27063

Numerical simulation of flow through inlets/diffusers with terminal shocks
[AIAA PAPER 84-1362] p 577 A84-35192

Finite difference computation of pressure and wave-drag of slender bodies of revolution at transonic speeds with zero-lift
p 579 A84-35330

Numerical solution of the problem of supersonic flow past wings of arbitrary form with a detached shock wave
p 579 A84-35351

Numerical modelling of shockwaves and other discontinuities
p 640 A84-37058

Dynamic response of shock waves in transonic diffuser and supersonic inlet - An analysis with the Navier-Stokes equations and adaptive grid
[AIAA PAPER 84-1609] p 650 A84-38004

Porosity effect on supersonic airfoil drag reduction by shock wave/boundary layer control
[AIAA PAPER 84-1682] p 653 A84-38054

Axisymmetric nonconical supersonic potential flow with embedded subsonic regions
p 656 A84-38848

Shock shape over a sphere cone in hypersonic high enthalpy flow
p 657 A84-38852

Turbulent boundary layer behind constant velocity shock including wall blowing effects
p 805 A84-40829

A transonic wing-body flowfield calculation with improved grid topology and shock-point operators
[AIAA PAPER 84-2157] p 828 A84-44196

Acoustic near-field properties associated with broadband shock noise
p 938 A84-44628

Double shock wave almost halves drag
p 846 A84-46476

Transonic cascade flow solved by separate supersonic and subsonic computations with shock fitting
[ASME PAPER 84-GT-24] p 951 A84-46889

A study of transonic normal shock wave-turbulent boundary layer interactions in axisymmetric internal flow
p 16 N84-10015

Mach reflection flow fields associated with strong shocks
[AD-A131384] p 21 N84-11148

An analysis of shock coalescence including three-dimensional effects with application to sonic boom prediction
p 83 N84-11890

Investigation to optimize the passive shock wave-boundary layer control for supersonic airfoil drag reduction
[NASA-CR-173276] p 269 N84-16135

Delta wings with shock-free cross flow
[NASA-CR-172297] p 338 N84-19282

Two-dimensional wind tunnel
[NASA-TM-76963] p 468 N84-20602

An experimental and numerical study of weak spherical N-waves produced by exploding wires
[UTIAS-TECH-NOTE-248] p 483 N84-20779

Interaction of aerodynamic noise with laminar boundary layers in supersonic wind tunnels
[NASA-CR-3621] p 483 N84-20781

Exact solution to problem of interaction between wedge moving at supersonic velocity and interface of two gaseous media
p 512 N84-22790

An analysis of shock coalescence including three-dimensional effects with application to sonic boom extrapolation
[NASA-TP-2214] p 559 N84-22906

Experimental investigation of shock-cell noise reduction for dual-stream nozzles in simulated flight comprehensive data report. Volume 1: Test nozzles and acoustic data
[NASA-CR-168336-VOL-1] p 567 N84-24323

Experimental investigation of shock-cell noise reduction for dual-stream nozzles in simulated flight comprehensive data report. Volume 2: Laser velocimeter data, static pressures and shadowgraph photos
[NASA-CR-168336-VOL-2] p 567 N84-24324

Conical flows with leading edge vortices
p 623 N84-25013

Transonic panel method for the full potential equation applied to multi-component airfoils
[NLR-MP-83030-U] p 663 N84-26674

Response of a plaster-wood room subjected to simulated sonic booms
[UTIAS-276] p 927 N84-31701

SHORAN

Relative-datum Loran navigation
p 43 N84-11107

SHORT HAUL AIRCRAFT

The new Swedish JAS fighter programme - and its industrial background
p 2 A84-11969

The potential impact of technology on VTOL utilization (The Third Nikolsky Lecture)
p 257 A84-19741

NASA's QSRA plane uses upper surface blowing
p 430 A84-27948

Composite propeller blades for commuter aircraft
p 534 A84-32995

Forward swept wings and commuter airplanes
p 681 A84-38408

Design of a digital ride quality augmentation system for a commuter aircraft
[AIAA PAPER 84-1958] p 896 A84-43486

Advanced commuter aircraft - How to leapfrog the competition
p 871 A84-44986

Optimum design cruise speed for an efficient short haul airliner
p 873 A84-45033

Transonic flutter clearance for a supersonic transport aircraft in the preliminary stage
p 67 N84-11121

SHORT TAKEOFF AIRCRAFT

Trimming advanced fighters for STOL approaches
p 63 A84-11046

STOL flying qualities and the impact of control integration
p 224 A84-16691

Approach and landing aerodynamic technologies for advanced STOL fighter configurations
[AIAA PAPER 84-0334] p 197 A84-18027

Equivalent flap theory - A new look at the aerodynamics of jet-flapped aircraft
[AIAA PAPER 84-0335] p 165 A84-18028

The HIAM wing - Milestone in aeronautical engineering
[AIAA PAPER 84-0386] p 166 A84-18055

Incorporating STOL capability into tactical fighter aircraft concepts
[AIAA PAPER 84-0573] p 290 A84-21306

Circulation controlled STOL wing optimization
p 268 A84-22173

STOL and maneuver technology program
[SAE PAPER 831425] p 433 A84-29527

Design and experimental verification of the USB flap panel structure for NAL-STOL research aircraft
p 594 A84-34451

Thrust reverser exhaust plume reingestion model tests
p 601 A84-34457

Vectoring exhaust nozzle technology
[AIAA PAPER 84-1175] p 694 A84-36829

C-17 transport employs externally blown flap system
p 683 A84-38465

Supersonic STOVL ejector aircraft from a propulsion point of view
[AIAA PAPER 84-1401] p 778 A84-40246

Supersonic STOVL aircraft with turbine bypass/turbo-compressor engines
[AIAA PAPER 84-1403] p 778 A84-40247

SOLAR ELECTRIC PROPULSION

Survey of manufacturers of high-performance heat engines adaptable to solar applications
[NASA-CR-173911] p 933 N84-32919

SOLAR ELECTRIC PROPULSION

History of solar flight
[AIAA PAPER 84-1429] p 571 A84-35214
Structural sizing of a solar powered aircraft
[NASA-CR-172313] p 598 N84-25702

SOLAR ENERGY CONVERSION

Brayton module development overview
p 731 N84-28245
Near-term Brayton module status p 731 N84-28246
Subatmospheric Brayton-cycle engine program review
p 731 N84-28247
Survey of manufacturers of high-performance heat engines adaptable to solar applications
[NASA-CR-173911] p 933 N84-32919

SOLAR OBSERVATORIES

Problems of invariance and stability in the dynamics of stratospheric observatories p 48 A84-12111

SOLAR POWERED AIRCRAFT

History of solar flight
[AIAA PAPER 84-1429] p 571 A84-35214
Design of long-endurance unmanned airplanes incorporating solar and fuel cell propulsion
[AIAA PAPER 84-1430] p 595 A84-35215
Solar powered aircraft
[NASA-CASE-LAR-12615-1] p 122 N84-12154
A preliminary study of solar powered aircraft and associated power trains
[NASA-CR-3699] p 134 N84-13194
Solar-cell airplane Solair 1
[NASA-TM-77061] p 292 N84-16164
SUN WORSHIPPER: McCready's Solar Challenger flies over the English Channel
[NASA-TM-77327] p 292 N84-16166
Structural sizing of a solar powered aircraft
[NASA-CR-172313] p 598 N84-25702

SOLAR PROPULSION

Solar-cell airplane Solair 1
[NASA-TM-77061] p 292 N84-16164

SOLAR RADIATION

Flight-time extension in hot-air balloons by appropriate surface characteristics
[DGLR PAPER 83-086] p 398 A84-29655
SUN WORSHIPPER: McCready's Solar Challenger flies over the English Channel
[NASA-TM-77327] p 292 N84-16166

SOLENOIDS

Magnetic suspension and balance system study
[NASA-CR-3802] p 794 N84-29888

SOLID ELECTRODES

The development of the high energy surface discharge spark igniter
[ASME PAPER 84-GT-51] p 981 A84-46908

SOLID LUBRICANTS

Parametric evaluation of a solid-lubricated ball bearing
[ASLE PREPRINT 83-LC-1B-1] p 479 A84-28994
Aircraft water-based solid film lubricants
[AD-A133732] p 237 N84-14328

SOLID PHASES

Liquid and solid phase compositions in a partially frozen JP-5 fuel low in n-alkanes
[AD-A143390] p 916 N84-32553

SOLID PROPELLANT COMBUSTION

Surface layer destruction during combustion of homogeneous powders p 471 A84-28400

SOLID PROPELLANT ROCKET ENGINES

Residual thrust due to decomposition of insulator materials --- in solid propellant rocket engines
p 709 A84-38150

SOLID PROPELLANTS

Sensitivity analysis of predicted reacting flow characteristics in solid fuel ramjet combustors
[AD-A141279] p 701 N84-27740

SOLID ROCKET PROPELLANTS

La Recherche Aerospatiale, Bimonthly Bulletin, no. 1984-1, 218/ January - February
[ESA-TT-858] p 741 N84-29850

SOLID SOLUTIONS

A new gas turbine combustor alloy
[ASME PAPER 84-GT-70] p 995 A84-46917

SOLID STATE DEVICES

New digital-RF technology aids airborne weather radar
p 519 A84-31167
Solid state power controller fuse development program
[AD-A142118] p 807 N84-29118

SOLID SURFACES

Effect of boundary layers on solid walls in three-dimensional subsonic wind tunnels
p 329 A84-23359

SOLIDIFICATION

Electron-beam weld solidification structures and properties in Al-3Li-X alloys p 996 A84-48766

SOLIDS

A method for solving the unsteady heat transfer and ablation problem for a body p 716 A84-37067

SOLIDS FLOW

Review - Turbomachinery performance deterioration exposed to solid particulates environment
[AD-A146007] p 720 A84-38361

SOLITARY WAVES

Solitary waves - A low-level wind shear hazard to aviation p 81 A84-11619

SONIC BOOMS

Weak spherical shock-wave transitions of N-waves in air with vibrational excitation p 379 A84-23871
Numerical solution of the problem concerning the focusing of shock waves produced by a supersonic aircraft p 1016 A84-47054
An analysis of shock coalescence including three-dimensional effects with application to sonic boom prediction p 83 N84-11890
An experimental and numerical study of weak spherical N-waves produced by exploding wires
[UTIAS-TECH-NOTE-248] p 483 N84-20779
Studies to improve environmental assessments of sonic booms produced during air combat maneuvering
[AD-A138254] p 496 N84-22368
An analysis of shock coalescence including three-dimensional effects with application to sonic boom extrapolation
[NASA-TP-2214] p 559 N84-22906
Response of a plaster-wood room subjected to simulated sonic booms
[UTIAS-276] p 927 N84-31701

SONIC NOZZLES

The new calibration tank for engine simulators at DFVLR Goettingen p 546 N84-23593

SOOT

Effects of flame temperature and fuel composition on soot formation in gas turbine combustors p 298 A84-22747
Determination of the dependence of soot formation in a premixed fuel-air combustion chamber on the combustion process variables p 358 A84-25573
Correlations of soot formation in turbojet engines and in laboratory flames
[ASME PAPER 84-GT-108] p 995 A84-46945
Optical measurements of soot size and number density in a spray-atomized, swirl-stabilized combustor
[ASME PAPER 84-GT-153] p 995 A84-46962
An experimental investigation of soot behavior in a gas turbine combustor
[AD-A132210] p 140 N84-13202
Effects of broadened property fuels on radiant heat flux to gas turbine combustor liners
[NASA-TM-83537] p 315 N84-16494
Fuel effects on soot formation in turbojet engines
[AD-A141287] p 715 N84-27912

SOUND FIELDS

A flight study of tone radiation patterns generated by inlet rods in a small turbofan engine
[AIAA PAPER 84-0499] p 253 A84-18132
Some remarks on source coherence affecting jet noise p 320 A84-21161
Comparative study of the acoustic fields of air and helium jets at subsonic outflow speeds p 494 A84-28810
Sound emission from an unsteady boundary layer p 495 A84-28813
Investigation of the characteristics of the sound field of a moving source, with application to the analysis of aircraft noise p 495 A84-28814
Recovery of burner acoustic source structure from far-field sound spectra
[AIAA PAPER 83-0763] p 566 A84-32609
Sound generated aerodynamically revisited - Large-scale structures in a turbulent jet as a source of sound p 815 A84-40599
Acoustic near-field properties associated with broadband shock noise p 938 A84-44628
La Recherche Aerospatiale, Bimonthly Bulletin, no. 1983-6, 217/November-December
[ESA-TT-841] p 625 N84-25870
Multisensor speech input
[AD-A140894] p 726 N84-26974

SOUND GENERATORS

Comment on 'Derivation of the fundamental equation of sound generated by moving aerodynamic surfaces' p 815 A84-40852
Self-sustained oscillations of a shock wave interacting with a boundary layer on a supercritical airfoil p 939 A84-45661
Self-sustained oscillations of a shock wave interacting with a boundary layer on a supercritical airfoil
[NASA-CR-175338] p 269 N84-16131
Analysis of some acoustics-jet flow interaction problems
[NASA-CR-175340] p 322 N84-16944

SOUND INTENSITY

A comparison of measured take-off and flyover sound levels for several general aviation propeller-driven aircraft
[AD-A139901] p 631 N84-25429
Measurement of the absorption coefficient using the sound-intensity technique
[NASA-CR-173848] p 941 N84-32115

SOUND PRESSURE

Recovery of burner acoustic source structure from far-field sound spectra
[AIAA PAPER 83-0763] p 566 A84-32609
Acoustic measurements in high-speed subsonic jets p 735 A84-36483
Suppression of the acoustic environment in an irregularly shaped cavity with an opening exposed to subsonic flow p 735 A84-38882
Study of noise-certification standards for aircraft engines. Volume 2: Procedures for measuring far field sound pressure levels around an outdoor jet-engine test stand
[AD-A133408] p 221 N84-15158
Spinning mode acoustic radiation from the flight inlet
[NASA-CR-172273] p 255 N84-15896
Suppression of peak noise by reshaping coaxial flow circumferentially under static conditions p 394 N84-19053
National Aerospace Laboratory News (Japan)
[NASA-TM-76962] p 352 N84-19335

SOUND PROPAGATION

Sound emission during the scattering of Tollmein-Schlichting waves in a boundary layer on a nonuniform surface p 478 A84-28815
On the propagation of sound in nozzles of variable cross-section containing low Mach number mean flow p 630 A84-34718
Experiments on sound radiation from a duct with a circumferentially varying liner p 735 A84-36488
On the propagation of sound in nozzles of strongly varying cross-section p 939 A84-45034
Transonic noise generation by duct and profile flow
[AD-A129367] p 255 N84-15899
Initial experiments on profile vortex interaction --- helicopter noise
[MPIS-6/1983] p 414 N84-21520
Acoustic wave propagation through shear layer of the German-Dutch open jet wind tunnel (DNW)
[NLR-MP-83003-U] p 497 N84-22379
Prediction of light aircraft interior sound pressure level using the room equation
[NASA-CR-173840] p 941 N84-32117
Analysis of the effect on combustor noise measurements of acoustic waves reflected by the turbine and combustor inlet
[NASA-TM-83760] p 941 N84-32122

SOUND TRANSDUCERS

Estimation of the flight parameters of low flying aircraft using the radiated noise
[LFD-211] p 595 N84-24569
Development of the sonic pump levitation
[NASA-CR-161963] p 929 N84-32749

SOUND TRANSMISSION

Sound-absorbing composite structures for gas-turbine engines p 58 A84-11347
Field-incidence noise transmission loss of general aviation aircraft double wall configurations
[AIAA PAPER 84-0500] p 253 A84-18133
Comment on 'Noise transmission into semicylindrical enclosures through discretely stiffened curved panels' p 393 A84-24570
Light aircraft sound transmission study
[NASA-CR-173175] p 321 N84-16941
Experimental study using Nearfield Acoustical Holography of sound transmission fuselage sidewall structures
[NASA-CR-173639] p 726 N84-27024
Measurement of the absorption coefficient using the sound-intensity technique
[NASA-CR-173848] p 941 N84-32115

SOUND WAVES

Acoustic resonances and blade vibration in axial flow compressors p 356 A84-24565
A wave envelope finite element scheme for acoustical radiation p 394 A84-25863
Acoustic emission of structures excited by a turbulent boundary layer - Influence of excitation-field modeling p 494 A84-28150
Propagation and radiation of sound from flanged circular ducts with circumferentially varying wall admittances. I. Semi-infinite ducts. II - Finite ducts with sources p 631 A84-34746
Experiments on sound radiation from a duct with a circumferentially varying liner p 735 A84-36488
Linear theory of pressure oscillations in liquid-fueled ramjet engines
[AD-A131610] p 61 N84-10075

SUBJECT INDEX

- Spinning mode acoustic radiation from the flight inlet
[NASA-CR-172273] p 255 N84-15896
- The effect on acoustic radiation of mutual interaction between a line vortex and an airfoil
[FFA-TN-1983-45] p 395 N84-19058
- Computation of noise radiating from a free jet perpendicular to its axis via laser anemometry measurements
[ONERA-NT-1983-6] p 632 N84-26387
- Response of a plaster-wood room subjected to simulated sonic booms
[UTIAS-276] p 927 N84-31701
- Analysis of the effect on combustor noise measurements of acoustic waves reflected by the turbine and combustor inlet
[NASA-TM-83760] p 941 N84-32122
- Numerical solutions of acoustic wave propagation problems using Euler computations
[NASA-CR-172434] p 938 N84-33112
- SOUNDING ROCKETS**
- Heat transfer on the Oblako meteorological rocket in the presence of boundary layer separation
p 655 A84-38672
- Heat transfer in the nose section of axisymmetric objects under conditions of nonseparated and separated flows
p 845 A84-46237
- Investigation into the internal aerodynamic design and associated errors in a fast descent ducted sonde for the measurement of atmospheric pressure and temperature (AMPARS phase 2)
[AD-A143189] p 933 N84-32969
- SOUTH KOREA**
- The destruction of Korean Air Lines Boeing 747 over the Sea of Japan, 31 August 1983 - A break-down of the international legal order?
p 737 A84-39702
- SOYUZ SPACECRAFT**
- Night landing of 'Soyuz-23' cosmonauts in Lake Tengiz recounted

An investigation into the probabilistic combination of quasi-static and random accelerations [AIAA PAPER 84-0908] p 555 A84-31646
Survey lecture and special experiences in FRG --- carbon fiber composite structures for aerospace application [MBB-UD-410-83-OE] p 614 A84-35920
An investigation into the probabilistic combination of quasi-static and random accelerations [NASA-TM-82584] p 729 N84-28111
Graduate engineering research participation in aeronautics [NASA-CR-173849] p 944 N84-32220
- SPACELAB**
NASA Ames summary high school apprenticeship research program, 1983 research papers [NASA-TM-85931] p 946 N84-33365
- SPACELAB PAYLOADS**
Spacelab 4: Primate experiment support hardware p 624 N84-25092
- SPACERS**
An explanation of spin-up instabilities for a 155mm binary projectile [AD-A141534] p 808 N84-29173
- SPALLATION**
Program for development of strain tolerant thermal barrier coating system [NASA-CR-173214] p 309 N84-16337
- SPANWISE BLOWING**
Approach and landing aerodynamic technologies for advanced STOL fighter configurations [AIAA PAPER 84-0334] p 197 A84-18027
Close-coupled canard-wing vortex interaction p 268 A84-22169
Experimental investigation of the aerodynamic effects of distributed spanwise blowing on a fighter configuration [AIAA PAPER 84-2195] p 747 A84-41347
A more accurate calculation of the induced drag of a wing in subsonic flow using the method of discrete vortices p 958 A84-47069
Augmentation of fighter-aircraft performance by spanwise blowing over the wing leading edge p 104 N84-12133
Investigation of trailing-edge-flap, spanwise-blowing concepts on an advanced fighter configuration [NASA-TP-2250] p 335 N84-18164
Experimental investigation of tangential blowing applied to a subsonic V/STOL inlet [NASA-TP-2297] p 411 N84-20493
- SPARE PARTS**
Integrated logistic supportability (Aviation materiel) [AD-A132367] p 88 N84-13146
The aircraft availability model: Conceptual framework and mathematics [AD-A132927] p 150 N84-14115
Justification of estimates for fiscal year 1985 submitted to Congress February 1984. Aircraft procurement, Air Force [AD-A140837] p 737 N84-27610
Aircraft Spare Stockage Methodology (aircraft spares) study [AD-A142259] p 740 N84-28730
- SPARK GAPS**
Low speed closed circuit high pressure tunnel for gas flow spark gap studies [AIAA PAPER 84-1596] p 705 A84-37995
- SPARK IGNITION**
Detection of sparks in fuel system tests p 182 A84-18536
High energy igniters - The development of materials suitable for continuous ignition p 296 A84-20108
Preliminary correlation of fuel effects on ignitability for gas turbine engines [ASME PAPER 83-JPGC-GT-8] p 450 A84-28981
The development of the high energy surface discharge spark igniter [ASME PAPER 84-GT-51] p 981 A84-46908

- SPARK MACHINING**
EDM in the aircraft industry --- Electrical Discharge Machining p 618 A84-33829
Multi-small hole drilling by EDM --- electrodischarge machining (EDM) [PNR-90184] p 559 N84-22813
- SPARROW 3 MISSILE**
Aerodynamic characteristics of a Sparrow 3 missile model in the flow field of a generalized parent body at Mach 2.86 [NASA-TM-85713] p 273 N84-17134
- SPATIAL FILTERING**
Two-dimensional spatial filtering for terrain correlation enhancement [AIAA PAPER 84-1884] p 855 A84-43437
- SPATIAL MARCHING**
Computation of supersonic flow around bodies [AIAA PAPER 84-0259] p 163 A84-17981
Computation of three-dimensional viscous flows using a space-marching method [AIAA PAPER 84-1298] p 639 A84-36971
A marching method for calculating viscous gas flows in ducts p 803 A84-39874
Random-choice solutions for two-dimensional and axisymmetric supersonic flows p 759 N84-30115
- SPATIAL RESOLUTION**
The role of spatial, spectral and radiometric resolution on information content --- of aircraft scanners p 143 A84-13043
- SPECIFICATIONS**
Proposed revisions to MIL-F-8785C related to flight safety of augmented aircraft. Volume 1. Section 1 - 7 [AD-A131414] p 29 N84-11153
Proposed revisions to MIL-F-8785C related to flight safety of augmented aircraft. Volume 2. Appendices A - F [AD-A131415] p 29 N84-11154
Proposed revisions to MIL-F-8785C related to flight safety of augmented aircraft. Volume 3. Appendix G. Pilot comments [AD-A131416] p 29 N84-11155
A balloon design for 9000 pounds at 90,000 feet: Recommendations based on heavy-load balloon history [AD-A131987] p 97 N84-12093
Information needs and system specifications for the B-1B executive information system [AD-A134424] p 324 N84-17054

SUBJECT INDEX

Proceedings of the 2nd AFSC (Air Force Systems Command) Avionics Standardization Conference. Volume 9: Tutorial: Navy case study implementation of military standards
[AD-A142784] p 886 N84-31207

STANDARDS

DME/P - The new international standard p 39 A84-12431
A new approach to recording MIL Standard 1553B aircraft bus data p 110 A84-13388
[AIAA PAPER 83-2792] p 110 A84-13388
New video standards --- for aircraft applications p 207 A84-16562
Status of the flying qualities MIL Standard p 224 A84-16679
Fuels for testing aircraft gas turbine engines p 374 A84-25591
Evolution of the digital avionics bus p 440 A84-26733
System considerations for the new DME/P international standard --- precision Distance Measuring Equipment p 425 A84-27944
Historical development of collision risk models for en-route air traffic p 425 A84-28254
How aerospace ISO standards will impact new designs - SC-1 electrical requirements p 481 A84-29638
[SAE PAPER 831513] p 481 A84-29638
Interfaces to telemetry systems --- for connection to digital multiplex data bus in avionics subsystems integration p 521 A84-32405
Aircraft maintenance and fire p 4 N84-11112
[GPO-24-247] p 4 N84-11112
Tentative STOL (short-takeoff-and-landing) flying qualities criteria for MIL standard and handbook [AD-A132857] p 201 N84-14138
Research towards and development of aerospace vehicle noise certification with emphasis on propeller aircraft and helicopters p 150 N84-15026
DEF STAN 00-18: A family of compatible digital interface standards p 202 N84-15049
Helix and Felix: Loading standards for use in the fatigue evaluation of helicopter rotor components [NLR-MP-82041-U] p 205 N84-15149
Study of noise-certification standards for aircraft engines. Volume 2: Procedures for measuring far field sound pressure levels around an outdoor jet-engine test stand [AD-A133408] p 221 N84-15158
Economic cases of the Civil Aeronautics Board, Volume 101, April 1983 to May 1983 p 396 N84-19183
[PB84-127695] p 396 N84-19183
Economic cases of the Civil Aeronautics Board, Volume 102, June 1983 to July 1983 p 396 N84-19184
[PB84-127703] p 396 N84-19184
Study of noise-certification standards for aircraft engines. Volume 3: Selection and evaluation of engine-noise-certification concept [AD-A137805] p 454 N84-20563
Minimum operational performance standards for airborne radio communications equipment operating within the radio frequency range 117.975 - 137.000 MHz [RTCA/DO-186] p 482 N84-20734
Safety standards on small passenger aircraft with nine or fewer seats are significantly less stringent than on larger aircraft [PB84-142033] p 420 N84-21526
The avionics integrity program (AVIP) [AD-P002817] p 568 N84-23362
Upgraded aircraft accident recorder standards p 692 N84-26574
Deficiencies of current flight data recorders in accidents investigation p 692 N84-26575
Noise reduction techniques: Criteria and validation p 817 N84-29664
Management overview of the benefits of efficient JOVIAL J73/1750A software tools [AD-P003519] p 936 N84-31123
MIL-STD-1760 development program [AD-P003526] p 883 N84-31130
MIL-STD-1750A microprocessor chip set development [AD-P003548] p 936 N84-31152
Standards and integrated avionics digital system architecture [AD-P003561] p 936 N84-31166
Achieving the benefits of modular avionics design [AD-P003562] p 884 N84-31167
An introduction to the avionics integrity program [AD-P003565] p 884 N84-31170
Elements for successful implementation of computing standards [AD-P003566] p 884 N84-31171
The application of standards to the TDY-750 (TIGERSHARK) mission computer [AD-P003567] p 936 N84-31172

Defense industry attitudes about AF interface standards report of an electronics industries association survey [AD-P003570] p 937 N84-31175
Westinghouse uses USAF-developed standards [AD-P003572] p 924 N84-31177
Options and opportunities for standards: A NATO/AGARD viewpoint [AD-P003577] p 925 N84-31182
Proposed MIL-STD for avionics installation interfaces [AD-P003578] p 885 N84-31183
Proceedings of the 2nd AFSC (Air Force Systems Command) Avionics Standardization Conference. Volume 9: Tutorial: Navy case study implementation of military standards [AD-A142784] p 886 N84-31207

STANDING WAVES

Supersonic jet screech tone cancellation p 82 A84-10136
Nonperiodic fluctuations induced by stationary surface waviness on a semi-infinite plate [AD-A130820] p 21 N84-11146
Vibration and flutter of mistuned bladed-disk assemblies [NASA-TM-83634] p 563 N84-23923
Flutter and forced response of mistuned rotors using standing wave analysis [NASA-CR-173555] p 606 N84-24586
Refined methods of aeroelastic analysis and optimization --- swept wings, propeller theory, and subsonic flutter [NASA-CR-173967] p 1010 N84-33835

STARTING

Investigations of transonic Ludwig tubes. II - Starting process in the case of a downstream valve p 466 A84-26949
The investigation of engines feed systems dynamic characteristics by hydrodynamic modelling method p 709 A84-38151
Auxiliary power systems with gas turbines p 130 N84-12170
Effect of control logic modifications on airstart performance of F100 engine model derivative engines in an F-15 airplane [NASA-TM-85900] p 783 N84-29879

STATE VECTORS

Comparison of innovations-based analytical redundancy methods p 391 A84-25519
Two-dimensional flight-path reconstruction by means of spline approximation [NLR-TR-82075-U] p 439 N84-21541

STATIC AERODYNAMIC CHARACTERISTICS

Analytic extrapolation to full-scale aircraft dynamics p 347 A84-24110
Equations of motion of an elastic flight vehicle utilizing static aeroelastic characteristics of the restrained vehicle [AIAA PAPER 84-0986] p 556 A84-31711
The effect of the nonsymmetry of a plane supersonic flow of a nonviscous gas on the characteristics of a plane nozzle under static conditions p 960 A84-47083

STATIC CHARACTERISTICS

Static internal performance evaluation of several thrust reversing concepts for 2D-CD nozzles [AIAA PAPER 84-1174] p 697 A84-37628
The Shock and Vibration Digest, volume 16, no. 7 [AD-A143958] p 926 N84-31679

STATIC ELECTRICITY

International Aerospace Conference on Lightning and Static Electricity, Oxford University, Oxford, England, March 23-25, 1982, Proceedings. Volumes 1 & 2 p 149 A84-18508
Static charging by collisions with ice particles p 241 A84-18537
A systematic characterization of the effects of atmospheric electricity on the operational conditions of aircraft p 228 N84-15086
Spacecraft-aided aerial studies of atmosphere's electrostatic zones p 731 N84-28184

STATIC LOADS

Steady state stresses in ribbon parachute canopies [AIAA PAPER 84-0816] p 416 A84-26580
The effect of superposing ripple loading of maneuver load cycles [AD-A132653] p 205 N84-15148
Static and dynamic structural-sensitivity derivative calculations in the finite-element-based Engineering Analysis Language (EAL) system [NASA-TM-85743] p 485 N84-20880
Results of the first complete static calibration of the RSRA rotor-load-measurement system [NASA-TP-2327] p 679 N84-31111

STATIC PRESSURE

Status of orifice induced pressure error studies [AIAA PAPER 84-0245] p 163 A84-17973
Test of a probe used to sense altitude through measurement of pressure p 705 A84-36552

STATISTICAL ANALYSIS

An experimental and analytical study of flow through a supersonic open channel with contoured floor [AIAA PAPER 84-1179] p 643 A84-37629
Static pressure recovery characteristics of some radial vaneless diffusers p 720 A84-38484
Surface static pressures in an inlet vortex flow field [ASME PAPER 84-GT-201] p 955 A84-46996
A new diffuser mapping technique [ASME PAPER 84-GT-237] p 956 A84-47015
Apparatus and method for jet noise suppression [NASA-CASE-LAR-11903-2] p 254 N84-14873
Hot-flow tests of a series of 10-percent-scale turbofan forced mixing nozzles [NASA-TP-2268] p 317 N84-17525
Effects of a porous plug on orifice induced static pressure error p 412 N84-21507
Experimental investigation of shock-cell noise reduction for dual-stream nozzles in simulated flight comprehensive data report. Volume 2: Laser velocimeter data, static pressures and shadowgraph photos [NASA-CR-168336-VOL-2] p 567 N84-24324
The boundary layer on compressor cascade blades [NASA-CR-173514] p 623 N84-25001
Theory of rotating stall of multistage axial compressors p 625 N84-25964
Aerodynamic characteristics of 2 NASA supercritical airfoils with different maximum thickness [NASA-TM-X-2532] p 638 N84-27667
On the evaluation of boundary layer measurements on boattail bodies of revolution in axisymmetric compressible subsonic flow [DFVLR-FB-84-09] p 728 N84-28010

STATIC STABILITY

Investigations of the flight characteristics of airliners with reduced static longitudinal stability [DGLR PAPER 82-091] p 62 A84-10566
An analytical study of the induced drag of canard-wing-tail aircraft configurations with various levels of static stability p 63 A84-11170
Some effects of high-rate springs in elevator control systems p 64 A84-12492
Free flight method in hypersonic impulse type tunnels for static and dynamic stability study p 369 A84-25996
Toward static stability in gliders and light aircraft [DGLR PAPER 83-112] p 460 A84-29675
Landing approach handling qualities of transport aircraft with relaxed static stability p 899 A84-44978
Investigation of flow in the wake of a high-aspect-ratio wing and the nonlinear moment characteristics of a wing-fuselage model at large angles of attack p 840 A84-45719
Proposed revisions to MIL-F-8785C related to flight safety of augmented aircraft. Volume 1. Section 1 - 7 [AD-A131414] p 29 N84-11153
Proposed revisions to MIL-F-8785C related to flight safety of augmented aircraft. Volume 2. Appendices A - F [AD-A131415] p 29 N84-11154
Proposed revisions to MIL-F-8785C related to flight safety of augmented aircraft. Volume 3. Appendix G. Pilot comments [AD-A131416] p 29 N84-11155
Control definition study for advanced vehicles [NASA-CR-3738] p 304 N84-16212
L-1011 testing with relaxed static stability p 463 N84-20591
Low-speed wind-tunnel study of the high-angle-of-attack stability and control characteristics of a cranked-arrow-wing fighter configuration [NASA-TM-85776] p 543 N84-23654
In-flight investigation of landing approach flying qualities of transport aircraft with relaxed static stability [DFVLR-FB-84-11] p 704 N84-26706

STATIC TESTS

Effect of moisture on static and fatigue behavior of aramid composites p 374 A84-25193
Relationship between static, flight, and simulated flight jet noise measurements p 493 A84-27129
Flight effects on fan noise with static and wind-tunnel comparisons p 699 A84-37928
Testing structural integrity and service life p 706 A84-38618
Effect of defects on aircraft composite structures p 75 N84-10221
Test-engine and inlet performance of an aircraft used for investigating flight effects on fan noise [NASA-TP-2254] p 495 N84-21277

STATISTICAL ANALYSIS

Statistical methods for estimating crack detection probabilities p 312 A84-21362
Reliability analysis for paired main wing components p 347 A84-23905
Model development and statistical investigation of turbine blade mistuning p 533 A84-31905

- Statistics of crack growth of a superalloy under sustained load p 614 A84-36175
- Improved statistical analysis method for prediction of maximum inlet distortion p 639 A84-36968 [AIAA PAPER 84-1274]
- Applications of probit and logit analysis to the prediction of the probability of an abort in the AEP model --- Avionics Evaluation Program p 732 A84-38894
- A procedure for the adjustment of the endurance limit of a component to account for a reduction in the number of fatigue test specimens p 922 A84-46338

STIFFNESS

- Aeroelastic flutter and divergence of stiffness coupled, graphite/epoxy cantilevered plates p 239 A84-17410
 Prediction of stiffness and damping coefficients for centrifugal compressor labyrinth seals [ASME PAPER 84-GT-86] p 1002 A84-46928
 Interactive aircraft flight control and aeroelastic stabilization [NASA-CR-173866] p 902 N84-31214

STIFFNESS MATRIX

- Calculation of the optimal design parameters of a stiffened panel by means of mathematical programming p 805 A84-41656

STIRLING CYCLE

- Stirling engine - Availability criteria --- optimum temperature ratio for waste heat recovery systems or without recuperators p 565 A84-30082
 Highly compact ceramic recuperator for engine applications [ASME PAPER 84-GT-50] p 1001 A84-46907
 Analysis of a high-frequency Stirling Cycle compressor for cryogenic cooling in space [NASA-TM-85066] p 247 N84-15555
 Overview of advanced Stirling and gas turbine engine development programs and implications for solar thermal electrical applications p 729 N84-28231

STOCHASTIC PROCESSES

- The use of the optimal output feedback algorithm in integrated control system design p 250 A84-18669
 Fixed gain controller and filter design for stochastic systems with application to aircraft p 251 A84-18600
 Formulation of a practical algorithm for parameter estimation with process and measurement noise p 251 A84-18611
 Suboptimal control of a class of stochastic systems with random, partially observable parameters p 392 A84-25539
 Stochastic versus deterministic approach to the design of the control law of moving flight simulators p 813 A84-40767
 Reliability and maintainability assessment factors for reliable fault-tolerant systems p 482 N84-20574
 Algorithms for output feedback, multiple-model, and decentralized control problems p 462 N84-20583
 Investigation and appreciation of optimal output feedback. Volume 1: A convergent algorithm for the stochastic infinite-time discrete optimal output feedback problem [NASA-CR-3828] p 902 N84-31217
 Investigation, development and application of optimal output feedback theory. Volume 2: Development of an optimal, limited state feedback outer-loop digital flight control system for 3-D terminal area operation [NASA-CR-3829] p 902 N84-31218

STOICHIOMETRY

- Analytical fuel property effects: Small combustors p 539 N84-23639

STORAGE STABILITY

- Characterization of MY 720 IV --- Tetraglycidylated Methylene Diamine p 912 A84-42778
 Research on aviation fuel instability p 552 N84-23642
 Basic study of fuel storage stability [AD-A142194] p 782 N84-28799

STORMS (METEOROLOGY)

- Convective violence and humility --- aircraft accidents caused by meteorological conditions p 26 A84-11615
 NASA B-57B Severe Storms Flight Program p 180 A84-16174
 A numerical weather prediction system designed to simulate atmospheric downburst phenomena [AIAA PAPER 84-0352] p 319 A84-21865
 NASA B-57B severe storms flight program [NASA-TM-84921] p 183 N84-14129
 Facilities for meteorological research at NASA Goddard/Wallops Flight Facility [NASA-TM-84422] p 629 N84-25223
 Severe storm electricity p 1013 N84-34851
 Investigation of arc cloud lines p 1013 N84-34885

STRAIN ENERGY METHODS

- Strain-energy-release rate analysis of delamination around an open hole in composite laminates [AIAA PAPER 84-0961] p 556 A84-31681
 A method for calculating stress intensity factors in structural elements with curvilinear cracks p 921 A84-45727

STRAIN GAGE BALANCES

- A strain-gage aerodynamic balance --- TENSOMETERS p 306 A84-22325
 Some aspects of the compatibility between strain gauge readout equipment and multi-component wind tunnel balances [ARL-AERO-NOTE-417] p 384 N84-18806
 The 6M x 8M low speed wind tunnel p 907 N84-31221

STRAIN GAGES

- Further application and development of strain pattern analysis p 311 A84-19632
 F-15 inflight wing loads calibration p 867 A84-44462
 Application of FRACTOMAT/KRAK GAGES to crack growth measurements in structural components [AD-A130945] p 80 N84-10620
 Aerodynamic force measurements with a strain-gage balance in a cryogenic wind tunnel [NASA-TP-2251] p 107 N84-13162
 Calibration of CT-4A fatigue test article, March 1983 [AD-A142880] p 879 N84-31115

STRAIN RATE

- Environmental and high strain rate effects on composites for engine applications p 236 A84-17444
 Aeroflow-vortex in a rotational and strained field p 267 A84-21700
 Strain-energy-release rate analysis of delamination around an open hole in composite laminates [AIAA PAPER 84-0961] p 556 A84-31681
 Estimation of deformation kinetics of GTE blades in conditions of low-frequency temperature and high-frequency mechanical loads p 717 A84-37369
 Physical aspects of computing the flow of a viscous fluid [NASA-TM-85893] p 516 N84-23605
 Material characterization by strain rate controlled low cycle fatigue tests and by crack propagation velocity: Summary of test number M3 430300 [IMI-679] p 714 N84-27878

STRAKES

- High angle-of-attack aerodynamics of a strake-canard-wing V/STOL fighter configuration [AIAA PAPER 83-2510] p 12 A84-10574
 A comparison of the aerodynamic characteristics of swept forward and swept back wings including the effect of strakes p 655 A84-38420
 Effect of nose/wing strake vortex on directional stability characteristics p 836 A84-45043
 A wind tunnel investigation to determine dominant forebody strake design characteristics for an F-15 equipped with conformal fuel tanks [AD-A136912] p 340 N84-19292
 Flight mechanical analysis of dynamic derivatives of the Donier variation wind tunnel model [DFVLR-FM-83-38] p 581 N84-24541
 Helicopter anti-torque system using strakes [NASA-CASE-LAR-13233-1] p 975 N84-33400

STRAPDOWN INERTIAL GUIDANCE

- Accuracy analysis in inertial navigation systems --- German thesis p 37 A84-11984
 Development of an Air Force RLG strapdown standard navigator p 41 A84-12464
 Design of RLG inertial systems for high vibration --- Ring Laser Gyros p 41 A84-12465
 Strapdown inertial-navigation systems p 111 A84-14282
 Application of VLSI to strapdown p 207 A84-16557
 The reliability analysis of a separated, dual fail operational redundant strapdown IMU --- inertial measurement unit p 207 A84-16558
 Strapdown inertial navigation systems for helicopters p 283 A84-19618
 Calculation for attitude angles of an all attitude airplane strapdown system p 360 A84-23910
 Application of laser inertial technology to commercial airplanes p 424 A84-26801
 The effect of gyro random walk on the navigation performance of a strapdown inertial navigator p 861 A84-45932
 Application of estimation techniques for the evaluation of sensor errors from flight tests with the experimental strapdown system of DFVLR p 861 A84-45951
 Real time gyro error compensation in strapdown systems p 861 A84-45952
 From autopilot to strapdown - Electrotechnology in inertial guidance and control p 1017 A84-47690
 Flight test results of the strapdown ring laser gyro tetrad inertial navigation system [NASA-TM-84358] p 44 N84-11157
 Flight tests for a strapdown system (MSS): The results of a special flight test [ESA-TT-818] p 115 N84-12153
 Acta Aeronautica et Astronautica Sinica (selected articles) [AD-A137150] p 399 N84-20475
 Advances in Strapdown Inertial Systems [AGARD-LS-133] p 593 N84-25691
 Advances in strapdown inertial systems: Introduction and overview p 593 N84-25692
 Advances in strapdown sensors p 593 N84-25693
 Requirements, applications, and results of strapdown inertial technology to commercial airplanes p 593 N84-25695

Strapdown inertial systems for tactical missiles using mass unbalanced two-axis rate gyros p 594 N84-25696

- Modular strapdown guidance unit with embedded microprocessors p 594 N84-25697
 Application of multifunction strapdown inertial system p 594 N84-25698
 Initial alignment and augmentation of the ARINC 705 strapdown AHRS LTR-81 p 594 N84-25699
 Fault-tolerant system considerations for a redundant strapdown inertial measurement unit [NASA-CR-172426] p 971 N84-33396

STRATEGIC MATERIALS

- Manufacturing developments to reduce strategic materials usage p 1008 A84-33475
 Coating developments to restrict strategic materials usage p 997 N84-33483

STRATEGY

- Approaches to automatic strategy analysis and synthesis [AD-A137067] p 393 N84-20312
 Near-optimal finite solutions to the 3 and 4 step discrete evasion games [AD-A136811] p 393 N84-20314
 Distributed problem solving for air fleet control: Framework and implementations [AD-A143168] p 863 N84-31108

STRATIFIED FLOW

- Trailing vortices in homogeneous and density-stratified media p 262 A84-19952

STRATOSPHERE

- Stratospheric hot-air balloon completes revolution around the globe p 1 A84-10621
 Problems of invariance and stability in the dynamics of stratospheric observatories p 48 A84-12111
 Microgravity system by using stratospheric balloons p 636 A84-38288
 The high altitude pollution program (1976 - 1982) [AD-A144390] p 1012 N84-34800

STREAM FUNCTIONS (FLUIDS)

- Throughflow analysis of axial flow turbines p 151 A84-16845
 A mixed finite element method for solving transonic flow equations p 152 A84-16863
 The stream-line iteration method for computing the two-dimensional transonic flow in orthogonal stream-line coordinates p 334 A84-25990
 Solution of transonic S1 surface flow by successively reversing the direction of integration of the stream function equation [ASME PAPER 84-GT-23] p 950 A84-46888
 The break-up mechanism of a streamwise directed vortex p 102 N84-12123
 Viscous effects and heat transfer in a calculation method for axisymmetric flow in multistage turbomachines using the stream function p 301 N84-16201
 A fundamental study of relation between the velocity fields far upstream of, at and far downstream of a rotor disk in a shear flow --- wind turbine flow [FFA-136] p 726 N84-27006

STREAMLINED BODIES

- Conservative streamtube solution of steady-state Euler equations [AIAA PAPER 84-1643] p 719 A84-38030
 Experience with an integrated centrifugal compressor design procedure [ASME PAPER 84-GT-249] p 957 A84-47025
 Design of single component airfoils using an inverse boundary element method [REPT-83-A2-SER-A] p 413 N84-21512
 Study of large-scale mixing in developing wakes behind streamlined bodies [NASA-CR-173478] p 413 N84-21517
 The design and operational development of self-streamlining 2-dimensional flexible walled test sections [NASA-CR-172328] p 510 N84-22534

STREAMLINING

- Flow past axisymmetric bodies with three constant-velocity regions p 10 A84-10181
 The status of analytical preparation for 2-dimensional testing at high transonic speeds in the University of Southampton transonic self-streamlining wind tunnel [NASA-CR-3785] p 411 N84-20494

STREAMS

- Multiple ducted streams with a periodic or a steady supersonic driver flow [AIAA PAPER 84-0350] p 166 A84-18042

STRESS ANALYSIS

- Experimental stress analysis of a thin walled pressurized torus loaded by contact with a plane --- dynamic response of aircraft tires p 239 A84-17443
 Steady state stresses in ribbon parachute canopies [AIAA PAPER 84-0816] p 416 A84-26580
 Stress singularities in swept cantilever plates p 475 A84-27937

SUBSONIC FLUTTER

Linear problem of a vibrator oscillating harmonically at supercritical frequencies in a subsonic boundary layer
p 579 A84-35497

Some recent advances in the understanding and prediction of turbomachine subsonic stall flutter
[ASME PAPER 84-GT-151] p 1003 A84-46961

Generalization of the subsonic kernel function in the s-plane, with applications to flutter analysis
[NASA-TP-2292] p 409 A84-20480

Note on an accident to the Boulton Paul 120 VT 951 delta aircraft
[RAE-STRUCT-ACC-248] p 674 A84-26677

Experimental investigation of elastic mode control on a model of a transport aircraft
[NASA-CR-3472] p 688 A84-27721

Subsonic/transonic stall flutter investigation of a rotating rig
[NASA-CR-174625] p 989 A84-33417

Refined methods of aeroelastic analysis and optimization --- swept wings, propeller theory, and subsonic flutter
[NASA-CR-173967] p 1010 A84-33835

SUBSONIC SPEED

Flow visualization and interpretation of visualization data for deflected thrust V/STOL nozzles
[AIAA PAPER 84-0102] p 297 A84-21852

Experimental study of hinge moment in the subsonic and transonic speed range
p 348 A84-25176

The aerodynamic optimization of wings in the subsonic speed range and the influence of the design of the wing tips --- German thesis
p 639 A84-36992

Numerical optimization of circulation control airfoil at high subsonic speed
[AIAA PAPER 84-2162] p 828 A84-44198

An experimental documentation of trailing-edge flows at high Reynolds number
[NASA-TM-84375] p 79 A84-10498

Flow visualization and interpretation of visualization data for deflected thrust V/STOL nozzles
[NASA-TM-83554] p 219 A84-14147

Lecture notes on the principles and practice of airplane performance prediction. Part 1: Basic elements
[VTH-LR-385-VOL-1] p 353 A84-19345

Lecture notes on the principles and practice of airplane performance prediction. Part 2: Point-performance in steady symmetric and unsymmetric flight
[VTH-LR-385-VOL-2] p 353 A84-19346

Lecture notes on the principles and practice of airplane performance prediction. Part 3: Path performance in quasi steady and unsteady symmetric flight
[VTH-LR-385-VOL-3] p 353 A84-19347

Integrated Application of Active Controls (IAAC) technology to an advanced subsonic transport project: Current and advanced act control system definition study
[NASA-CR-3545] p 704 A84-27744

Integrated Application of Active Controls (IAAC) technology to an advanced subsonic transport project: Current and advanced act control system definition study. Volume 2: Appendices
[NASA-CR-165631-VOL-2] p 789 A84-28803

SUBSONIC WIND TUNNELS

Aerodynamic design of high contraction ratio, subsonic wind tunnel inlets
[AIAA PAPER 84-0416] p 167 A84-18078

The F2 wind-tunnel at Fauga-Mauzac
[ONERA, TP NO. 1983-139] p 306 A84-19928

Formation of coherent structures in a turbulent wake under acoustic excitation
p 378 A84-23319

Effect of boundary layers on solid walls in three-dimensional subsonic wind tunnels
p 329 A84-23359

An experimental study of high contraction ratio, subsonic wind tunnel inlets
[AIAA PAPER 84-0618] p 366 A84-24199

Application of the adaptive wall to high-lift subsonic aerodynamic testing - An engineering evaluation
[AIAA PAPER 84-0626] p 366 A84-24204

High-average-power exciplex laser system
p 557 A84-32346

Sidewall boundary layer corrections in subsonic, two-dimensional airfoil/hydrofoil testing
[AIAA PAPER 84-1366] p 620 A84-35195

Experimental study of the behavior of 3D-turbulent boundary layer in a simplified wing/body junction
[AIAA PAPER 84-1529] p 647 A84-37954

An experimental study of a vortex/mixing-layer interaction
[AIAA PAPER 84-1543] p 660 A84-39425

Theoretical and experimental studies of gas flow in collectors (nozzles), at low subsonic velocities
p 960 A84-47082

Performance degradation of a model helicopter rotor with a generic ice shape
p 974 A84-49096

Report of tests of a compressor configuration of DCA blading
[AD-A133350] p 316 A84-16501

Remarks on the layout of the subsonic free jet wind tunnels
[NASA-TM-77326] p 370 A84-18214

Acoustic wave propagation through shear layer of the German-Dutch open jet wind tunnel (DNW)
[NLR-MP-83003-U] p 497 A84-22379

An experimental and analytic study of the flow subsonic wind tunnel inlets
[AD-A138865] p 511 A84-22540

Low-speed investigation of effects of wing leading- and trailing-edge flap deflections and canard incidence on a fighter configuration equipped with a forward-swept wing
[NASA-TM-85795] p 662 A84-26667

The F2 wind tunnel at Fauga-Mauzac
[NASA-TM-77482] p 792 A84-28814

Compendium of US incompressible flow facilities
[AD-A136550] p 993 A84-33424

SUBSTITUTES

Materials Substitution and Recycling
[AGARD-CP-356] p 996 A84-33465

Understanding the roles of the strategic element cobalt in nickel base superalloys
p 997 A84-33471

Substitution and conservation technology for chromium
p 997 A84-33473

SUBSTRATES

Kevlar epoxy substrate for interconnecting leadless chip carrier
p 912 A84-42776

Coating with overlay metallic-cermet alloy systems
[NASA-CASE-LEW-13639-2] p 714 A84-27855

SUCTION

Effects of local boundary layer suction on shock-boundary layer interaction and shock-induced separation
[AIAA PAPER 84-0098] p 159 A84-17880

Effect of sidewall suction on flow in two-dimensional wind tunnels
[AIAA PAPER 84-0242] p 162 A84-17970

Instability of compressible boundary layers along curved walls with suction or cooling
p 266 A84-21507

Analytical study of suction boundary layer control for subsonic V/STOL inlets
[AIAA PAPER 84-1399] p 827 A84-44187

Effect of suction on the wake structure of a three-dimensional turret
[AD-A135897] p 337 A84-18174

Stall delay by boundary layer blowing and/or suction
p 846 A84-31086

Supersonic flows around a circular cone with or without blowing on the surface
[AD-A143258] p 851 A84-32362

VORCAM: A computer program for calculating vortex lift effect of cambered wings by the suction analogy
[NASA-CR-165800] p 966 A84-33387

A new method of evaluating the side wall interference effect on airfoil angle of attack by suction from the side walls
[NASA-TM-77722] p 967 N84-34432

SULFUR

The effect of property changes on jet fuel producibility and cost p 551 N84-23632

SUPERCHARGERS

Study of supercharger turbocompressors --- French thesis p 1000 A84-46759

Advanced turbocharger design study program
[NASA-CR-174633] p 486 N84-21879

An overview of the NASA rotary engine research program
[NASA-TM-83699] p 781 N84-28791

Diesel engine catalytic combustor system --- aircraft engines
[NASA-CASE-LEW-12995-1] p 1010 N84-33808

SUPERCONDUCTING MAGNETS

Magnetic suspension and balance system study
[NASA-CR-3802] p 794 N84-29888

SUPERCOOLING

A new characterization of supercooled cloud design criteria for aircraft ice protection systems below 10,000 feet AGL

[AIAA PAPER 84-0182] p 247 A84-17935

SUPERCritical AIRFOILS

Redesign and cascade tests of a supercritical controlled diffusion stator blade-section
[AIAA PAPER 84-1207] p 639 A84-36960

Transonic shock-boundary layer interaction control
p 832 A84-44961

Redesign and cascade tests of a supercritical controlled diffusion stator blade-section
[NASA-TM-83635] p 510 N84-22533

Wind tunnel investigations on thin supercritical airfoils in the high subsonic flow regime
[ESA-TT-774] p 586 N84-25652

Transonic aeroelastic stability and response of conventional and supercritical airfoils including active controls
p 661 N84-26655

Aerodynamic characteristics of 2 NASA supercritical airfoils with different maximum thickness
[NASA-TM-X-2532] p 638 N84-27667

High Reynolds number tests of a Boeing BAC 1 airfoil in the Langley 0.3-meter transonic cryogenic tunnel
[NASA-TM-81922] p 666 N84-27684

High Reynolds number tests of the cast 10-2/DOA 2 airfoil in the Langley 0.3-meter transonic cryogenic tunnel, phase 2
[NASA-TM-86273] p 965 N84-33382

SUPERCritical FLOW

Linear problem of a vibrator oscillating harmonically at supercritical frequencies in a subsonic boundary layer
p 579 A84-35497

An asymptotic theory for the interaction between a supercritical boundary layer and a hypersonic gas flow
p 841 A84-45737

Transonic airfoil development
p 95 N84-12076

The status of analytical preparation for 2-dimensional testing at high transonic speeds in the University of Southampton transonic self-streamlining wind tunnel
[NASA-CR-3785] p 411 N84-20494

SUPERCritical WINGS

Effect of edge-tone noise on supercritical airfoil data
p 82 A84-10145

Comparison of measured and calculated airloads on an energy efficient transport wing model equipped with oscillating control surfaces
[AIAA PAPER 84-0301] p 165 A84-18008

A multi-grid method for transonic wing analysis and design
p 268 A84-22175

Supercritical airfoil and wing design
p 269 A84-22587

Integrating a propfan into a supercritical wing
p 434 A84-29553

Unsteady aerodynamics of rapidly moving flaps and spoilers for the active-control reduction of gust and maneuver loads
[DGLR PAPER 83-107] p 408 A84-29670

Application of laser velocimetry to the study of the flow behind a spoiler
[AAAF PAPER NT 83-21] p 508 A84-32489

The active and passive influencing of shock boundary layer interference at supercritical aircraft wings
[DGLR PAPER 83-059] p 509 A84-33150

Detailed study of the flow around a profile with high-lift devices - Comparison with calculations
[ONERA, TP NO. 1984-17] p 643 A84-37536

Three-dimensional unsteady Euler equations solution using flux vector splitting
[AIAA PAPER 84-1552] p 647 A84-37968

Porosity effect on supercritical airfoil drag reduction by shock wave/boundary layer control
[AIAA PAPER 84-1682] p 653 A84-38054

Aspects of the aerodynamic design of a thin supercritical, forward swept wing for a combat aircraft
p 654 A84-38414

Improved design of subcritical and supercritical cascades using complex characteristics and boundary-layer correction
p 656 A84-38839

Porous airfoils in transonic flow
p 656 A84-38844

Prediction of the flow over supercritical high-lift configurations by a multigrid algorithm
[AIAA PAPER 84-1664] p 659 A84-39317

Numerical simulation of two-dimensional unsteady transonic flows using the full-potential equation
p 743 A84-40828

Three-dimensional computational methods applied to aerodynamic analysis of transonic flows past a wing-body configuration
[ONERA, TP NO. 1984-92] p 831 A84-44944

Flutter calculation on a supercritical wing in the transonic range - Comparison theory-experiment
[ONERA, TP NO. 1984-108] p 872 A84-45010

Transonic pressure distributions on a rectangular supercritical wing oscillating in pitch
p 842 A84-45959

An experimental study of a supercritical trailing-edge flow
[AIAA PAPER 84-2187] p 843 A84-46105

Double shock wave almost halves drag
p 846 A84-46476

Numerical calculation of the transonic potential flow past a cranked wing
[NASA-TM-84391] p 51 N84-10049

Transonic flutter clearance for a supercritical transport aircraft in the preliminary stage
p 67 N84-11121

Transonic airfoil development
p 95 N84-12076

Transonic empirical configuration design process
p 121 N84-12079

Analysis of pressure distributions on a wing with an oscillating trailing edge flap in subsonic and transonic flow
p 104 N84-13145

Investigation to optimize the passive shock wave-boundary layer control for supercritical airfoil drag reduction
[NASA-CR-173276] p 269 N84-16135

An experimental investigation of nacelle-pylon installation on an unswept wing at subsonic and transonic speeds
[NASA-TP-2246] p 335 N84-18162

Measured transonic unsteady pressures on an energy efficient transport wing with oscillating control surfaces
p 665 N84-27663

Langley high-lift research on a high-aspect-ratio supercritical wing configuration
p 665 N84-27665

Selected advanced aerodynamic and active control concepts development
[NASA-CR-3469] p 666 N84-27683

Configuration design studies and wind tunnel tests of an energy efficient transport with a high-aspect-ratio supercritical wing
[NASA-CR-3524] p 740 N84-28727

Results of design studies and wind tunnel tests of high-aspect-ratio supercritical wings for an energy efficient transport
[NASA-CR-159332] p 754 N84-28735

Pressure distribution data from tests of 2.29-meter (7.5-ft) span EET high-lift research model in Langley 4-by-7-meter tunnel
[NASA-TM-83111] p 754 N84-28739

Wind tunnel tests of high-lift systems for advanced transports using high-aspect-ratio supercritical wings
[NASA-CR-3523] p 755 N84-28742

Subsonic and transonic unsteady- and steady-pressure measurements on a rectangular supercritical wing oscillated in pitch --- wind tunnel tests
[NASA-TM-85765] p 849 N84-32348

Experience with transonic unsteady aerodynamic calculations
[NASA-TM-86278] p 849 N84-32353

Results of design studies and wind tunnel tests of an advanced high lift system for an Energy Efficient Transport
[NASA-CR-159389] p 976 N84-33403

SUPERHIGH FREQUENCIES
An X-band microstrip phased-array antenna with electronic polarization control
p 34 A84-10822

An X-band array signal processing radar for tracking targets at low elevation angles
p 34 A84-10829

Development and flight test of an X-band precision approach concept for remote-area rotorcraft operations
p 420 A84-26707

On the exploitation of the SSR mode S data link capabilities towards improving ATC tracker performance
p 424 A84-26794

Development and flight test of an X-band precision approach concept for remote-area rotorcraft operations
[NASA-TM-84398] p 41 N84-10041

A conformal SHF phased array for aircraft satellite communication
[AD-P003509] p 925 N84-31477

SUPERPLASTICITY

Recent developments in titanium superplastic forming/diffusion bonding
p 234 A84-17181

Superplastic forming, an economical sheet-forming process
[MBB-BB-555-83-OE] p 314 A84-22851

Structural potential of superplastic formed aluminum
[AIAA PAPER 84-0935] p 548 A84-31678

Superplastic forming of structural alloys; Proceedings of the Symposium, San Diego, CA, June 21-24, 1982
p 549 A84-32676

Concurrent superplastic forming/diffusion bonding of titanium
p 549 A84-32684

Aerospace applications of SPF and SPF/DB --- superplastic forming with concurrent diffusion bonding
p 501 A84-32685

Deformation and fatigue of aircraft structural alloys
[AD-A133947] p 237 N84-14297

Superplastic transformation and diffusion welding of titanium alloys
p 561 N84-23562

SPF/DB primary structure for supersonic aircraft (T-38 horizontal stabilizer)
[NASA-CR-163114] p 714 N84-27860

SUPERSONIC AIRCRAFT

Aerodynamical design considerations for future supersonic aircraft - Advantages and limitations of the unstable design of military aircraft
p 44 A84-10565

An evaluation of supersonic STOVL technology
[AIAA PAPER 83-2493] p 117 A84-13392

Synthesis and performance of an Air-TurboRamjet-propelled supersonic target vehicle
[AIAA PAPER 84-0075] p 195 A84-17862

A study of supersonic aerodynamics of aircraft with the aid of the computer --- Russian book
p 330 A84-23967

V/STOL propulsion control technology
p 356 A84-24986

Vortex flaps - Advanced control devices for supersonic fighters
p 435 A84-29559

The suitability of a propulsion system without afterburner for future fighter aircraft
[DGLR PAPER 83-97] p 453 A84-29661

Flow-field investigation of a supersonic fighter model
[AIAA PAPER 84-1331] p 576 A84-35175

Aerodynamic performance of acoustically suppressed exhaust nozzles
[AIAA PAPER 84-1173] p 696 A84-36954

The M.88 - A fighter aircraft engine in the year 2000
p 697 A84-37029

Toward a supersonic vertical take-off and landing aircraft
p 679 A84-37030

Comparative stability analysis of a conventional and swept forward wing aircraft at high angles of attack and sideslip
p 703 A84-38417

Supersonic STOVL ejector aircraft from a propulsion point of view
[AIAA PAPER 84-1401] p 778 A84-40246

Effect of adverse environment on composites
p 797 A84-40913

Impact of fuselage incidence on the supersonic aerodynamics of two fighter configurations
[AIAA PAPER 84-2193] p 747 A84-41345

Design, wind tunnel testing and rational analysis of a ventral pitot-type air intake
[AIAA PAPER 84-2202] p 747 A84-41350

Handling qualities related to stall/spin accidents of supersonic fighter aircraft
[AIAA PAPER 84-2093] p 787 A84-42346

Subsonic/supersonic aerodynamic characteristics for a tactical supercruiser
[AIAA PAPER 84-2192] p 828 A84-44195

AV-8B flight test program overview - 20 October 1982
p 867 A84-44454

Weight minimization of orthotropic rectangular flat panels subjected to a flutter speed constraint
p 918 A84-45060

Determination of creep deformations under unsteady heating and loading
p 920 A84-45718

Numerical solution of the problem concerning the focusing of shock waves produced by a supersonic aircraft
p 1016 A84-47054

Power for the ATF - GE and P&W prepare for battle
p 948 A84-48516

Status review of a supersonically biased fighter wing design study
p 974 A84-49087

Supersonic V/STOL ready for technology push
p 987 A84-49353

B-1B program continues two and one-half months ahead of schedule
p 975 A84-49387

Control definition study for advanced vehicles
[NASA-CR-3738] p 304 N84-16212

- Calculation of vertical and ramp-assisted takeoffs for supersonic cruise fighters
[NASA-TM-85818] p 662 N84-26668

cockpit pressure and thermal loads using MAGNA
(Materially and Geometrically Nonlinear Analysis)
[AD-P003231] p 733 N84-26644
- Parametric studies of the T-38 student windshield using
the finite element of code MAGNA (Materially and
Geometrically Nonlinear Analysis) p 723 N84-26645
- [AD-P003232] p 723 N84-26645
- SPF/DB primary structure for supersonic aircraft (T-38
horizontal stabilizer)
[NASA-CR-163114] p 714 N84-27860

T-53 ENGINE

- Power reduction gear development for Lycoming T53
turboprop engines
[AIAA PAPER 84-1382] p 698 A84-37650

T-56 ENGINE

- A new generation T56 turboprop engine
[ASME PAPER 84-GT-210] p 983 A84-46999

TABS (CONTROL SURFACES)

- An investigation of the tabbed vortex flap
[AIAA PAPER 84-2173] p 828 A84-44197
- Note on an accident to the Boulton Paul 120 VT 951
delta aircraft
[RAE-STRUCT-ACC-248] p 674 N84-26677

TABULATION PROCESSES

- Heat transfer and thermal stability of alternative aircraft
fuels. Volume 2: Appendices
[AD-A137405] p 377 N84-19598

TACAN

- A navigation algorithm using measurement-based
extrapolation p 189 A84-19345
- Second generation Vortac equipment
p 519 A84-32327
- New family of Tacan and DME equipment
p 520 A84-32331
- Civil use of Tacan p 520 A84-32332
- Sensor noise and Kalman filter for aided inertial
navigation system
[AD-A143360] p 863 N84-32372

TACHOMETERS

- Orientation and calibration of three-dimensional
tachometer with aid of available angle data
p 725 N84-26954

TACT PROGRAM

- F-111 TACT natural laminar flow glove flight results
p 687 N84-27662

TACTICS

- Critical factors and operational research in tactical fighter
avionics system development p 214 N84-15062
- The Multiple System OFF Support (MSOS) system, a
Pre-PMRT capability for evaluating tactical software
[AD-P003524] p 883 N84-31128

TAIL ASSEMBLIES

- Pressure measurements on twin vertical tails in buffeting
flow p 46 A84-11041
- NOTAR - NO Tail Rotor (circulation control tail boom)
p 191 A84-15995
- A guided projectile/mortar aerodynamic control concept
- The trailing ring-tail
[AIAA PAPER 84-0077] p 157 A84-17864
- Wind tunnel testing and analysis relating to the
spinning of light aircraft
[AIAA PAPER 84-0558] p 226 A84-18163
- A reconsideration of the tail-wheel in an actively
controlled, undercarriage management system
p 290 A84-21798
- A mathematical model for performance comparisons of
different types of tail units p 361 A84-25191
- Thermoelastic limit cycling of zippered cross section
spacecraft booms
[AIAA PAPER 84-1065] p 613 A84-34915
- An evaluation of the relative merits of wing-canard,
wing-tail, and tailless arrangements for advanced fighter
applications p 872 A84-45013
- Suppression of interference flutter by composite
tailoring p 228 N84-14155
- Determination of elevator and rudder hinge forces on
the Learjet model 55 aircraft p 247 N84-15604
- Testing for severe aerodynamically induced vibration
environments p 342 N84-19905

SUBJECT INDEX

TEMPERATURE CONTROL

- Thermal characteristics of standardized Air Force avionics enclosures p 479 A84-29038
[SAE PAPER 831103]
Heat exchanger modeling accounting for condensation and temperature pinch --- in aircraft environmental control systems p 430 A84-29041
[SAE PAPER 831106]
A systems approach - Minimizing avionics life cycle cost p 431 A84-29042
[SAE PAPER 831107]
Microprocessor adaptive control for aircraft ECS p 431 A84-29068
[SAE PAPER 831139]
Measurement of convective heat transfer to solid cylinders inside ventilated shrouds p 921 A84-46129
[AIAA PAPER 84-1725]
Full load operation of a gas turbine combustor with acoustically controlled dilution-air mixing p 982 A84-46944
[ASME PAPER 84-GT-106]
Thermal control of tethered satellite in a very low altitude aerodynamic mission p 373 N84-19444
A thermal cycling test for the screening of space materials and processes p 627 N84-26044
[ESA-PSS-01-704-ISSUE-1]

TEMPERATURE DISTRIBUTION

- Experimental heating distributions for biconics at incidence in Mach 10 air and comparison to prediction p 751 A84-42363
[AIAA PAPER 84-2119]
A study of leeside flow field heat transfer on Shuttle Orbiter configuration p 911 N84-32410
[NASA-CR-172362]
Temperature and heat-flux distributions in a strip-heated composite slab p 998 N84-33529
[DE84-006016]
A theoretical model for the cross spectra between pressure and temperature downstream of a combustor p 1016 N84-34231
[NASA-TM-83671]

TEMPERATURE EFFECTS

- The effect of surface temperature on coefficients of energy and momentum exchange p 406 A84-28284
Influence of hygrothermal conditioning on the compressive buckling of graphite/epoxy composite structures p 710 A84-38522
Effects of temperature and pressure on the photochemical reactivity of a representative aviation fuel p 797 A84-40250
Off-optimum cure conditions for structural adhesives - Some effects on performance p 797 A84-41854
Effects of long-time elevated temperature exposures on hot-isostatically-pressed power-metallurgy Udimet 700 alloys with reduced cobalt contents p 799 N84-28917
[NASA-TM-83632]
Low temperature evaluation of advanced technology hydraulic system (8,000 psi) p 903 N84-32396
[AD-A143389]
Investigation of thermal coking rates of Air Force jet fuels p 999 N84-34631
[AD-A144421]

TEMPERATURE GRADIENTS

- A study of dynamic measurements made in the settling chamber of the Langley 0.3-meter transonic cryogenic tunnel p 365 A84-24186
[AIAA PAPER 84-0596]
Heat exchanger modeling accounting for condensation and temperature pinch --- in aircraft environmental control systems p 430 A84-29041
[SAE PAPER 831106]
Aerothermal modeling, phase 1. Volume 2: Experimental data p 220 N84-15156
[NASA-CR-168296-VOL-2]

TEMPERATURE MEASUREMENT

- The use of fibre optics in engine pyrometry p 480 A84-29283
Measuring turbine engine inlet total temperature problems and solutions p 604 A84-35222
[AIAA PAPER 84-1457]
Aerothermal modeling. Executive summary p 220 N84-15152
[NASA-CR-168330]
Determination of the static performance of a Cuyuna cc model UL-430RR engine p 299 N84-18179
[NASA-CR-175354]
Dynamic gas temperature measurement system, volume 1 p 316 N84-16529
[NASA-CR-168267-VOL-1]
Experimental results for the rapid determination of the freezing point of fuels p 375 N84-18419
[NASA-CR-168305]
Optical gas temperature measurement in gas turbines p 536 N84-22572
[PNR-90174]
In-flight atmospheric and fuel tank temperature measurements p 552 N84-23643
Dilution jets in accelerated cross flows p 782 N84-28794
[NASA-CR-174717]

TEMPERATURE MEASURING INSTRUMENTS

- Incorporating geometric and radiative effects into infrared scanning computer analysis p 469 A84-28641
An experimental verification of heat flux measurements using two-layer thermoindicating coatings p 1006 A84-47071
[NASA-TM-83655]

TEMPERATURE PROFILES

- Performance of a high-work low aspect ratio turbine tested with a realistic inlet radial temperature profile p 777 A84-40239
[AIAA PAPER 84-1161]
Performance of a high-work low aspect ratio turbine tested with a realistic inlet radial temperature profile p 607 N84-24589
[NASA-TM-83655]

TEMPERING

- Aircraft landing dynamics facility carriage weld test program p 930 N84-32827
[NASA-TM-85802]

TENSILE PROPERTIES

- Effects of JP-4 fuel on Graphite/Epoxy composites p 310 N84-17296
[AD-A135416]

TENSILE STRENGTH

- Effects of 50,000 h of thermal aging on graphite/epoxy and graphite/polyimide composites p 236 A84-17439
Off-optimum cure conditions for structural adhesives - Some effects on performance p 797 A84-41854
Effects of metal flow on fatigue strength and mechanical properties of ZK60A magnesium alloy forging p 913 A84-44173
Effects of fuels on the physical properties of nitrile rubber O-rings p 377 N84-19599
[AD-A136647]
Analysis of symmetric reinforcement of quasi-isotropic graphite-epoxy plates with a circular cutout under uniaxial tensile loading p 614 N84-24715
[AD-A139998]
Effects of long-time elevated temperature exposures on hot-isostatically-pressed power-metallurgy Udimet 700 alloys with reduced cobalt contents p 799 N84-28917
[NASA-TM-83632]
Synthesis and toughness properties of resins and composites p 802 N84-29973
Materials for Advanced Turbine Engines (MATE): Project 3: Design, fabrication and evaluation of an oxide dispersion strengthened sheet alloy combustor liner, volume 1 p 915 N84-32504
[NASA-CR-174691]

TENSILE STRESS

- Sail theory p 152 A84-18928
Method for determining stress intensity factors in blades of gas turbine engines p 619 A84-34129

TENSILE TESTS

- Structural potential of superplastic formed aluminum p 548 A84-31878
[AIAA PAPER 84-0935]
Aircraft transparency testing methodology and evaluation criteria. Part 1: Test methods and information analysis p 122 N84-12158
[AD-A131927]
Statistical and vibratory fatigue limit characteristics of aluminum cast alloys p 581 N84-23558

TENSORS

- An application of tensor ideas to nonlinear modeling of a turbofan jet engine p 780 A84-42382

TERMINAL BALLISTICS

- Influence of adiabatic shear bands on the fatigue strength of a titanium alloy p 914 A84-46513

TERMINAL CONFIGURED VEHICLE PROGRAM

- Fault tolerant navigation in a Microwave Landing System environment p 39 A84-12433
FINDS: A fault inferring nonlinear detection system. User's guide p 44 N84-11156
[NASA-CR-172199]

TERMINAL FACILITIES

- A Canadian Airport Traffic Analysis Model p 732 A84-38550
Terminal 1 opened at LAX p 904 A84-43622
Mountains cut down, land created to build new St. Thomas runway p 904 A84-43623
Air transport recovering - Ben Gurion Airport to be improved p 904 A84-43624
Future air traffic requirements p 857 A84-44727
Simulation analysis of future terminal procedures with respect to the required navigation accuracy p 860 A84-45062

TERMINAL GUIDANCE

- Terminal descent controlled vehicle recovery p 415 A84-26567
[AIAA PAPER 84-0801]
CONTRAN-UNIT - The elimination of conflicting and unintentional transmissions p 426 A84-28260
Active-passive terminal guidance simulators for millimeter wave systems p 467 A84-28441
Machine-oriented method for the synthesis of optimal controls p 564 A84-30447
Systems of terminal control --- Russian book p 935 A84-45647

TEST FACILITIES

- Conceptual design and simulator implementation of an automatic terminal approach system p 305 N84-16215
[NASA-TM-85667]
Suboptimal missile evasion through a sensitivity analysis of proportional guidance to target evasion maneuvers p 352 N84-19338
[AD-A136803]

TERRAIN ANALYSIS

- A novel 35 GHz 3-D radar for flight assistance p 34 A84-10833
A terrain-aided navigation system p 344 A84-23909
A digital terrain correlation system for tactical aircraft p 423 A84-26759
Route finding using digital terrain data p 423 A84-26762
Two-dimensional spatial filtering for terrain correlation enhancement p 855 A84-43437
[AIAA PAPER 84-1884]
Terrain analysis procedural guide for built-up areas (report no. 13 in the ETL (Engineer Topographic Laboratories) series on guides for Army terrain analysts) p 932 N84-31768
[AD-A142918]

TERRAIN FOLLOWING AIRCRAFT

- Flight testing of the autopilot and terrain following radar system in the Tornado aircraft p 38 A84-12354
[AIAA PAPER 83-2770]
Terrain following development testing on the Tornado aircraft p 191 A84-15988
The simulation of terrain-following targets p 250 A84-16636
The trajectory generator for tactical flight management p 224 A84-16683
A new generation air defense radar p 344 A84-23900
A digital terrain correlation system for tactical aircraft p 423 A84-26759
Optimal TF/TA route planning using digital terrain elevation data --- terrain following/terrain avoidance p 423 A84-26761

TEST CHAMBERS

- Aerodynamic balance for high altitude simulation chamber p 368 A84-25217
The extension of the Stuttgart altitude-test chamber for an enlarged flow rate p 468 A84-29663
[DGLR PAPER 83-099]

TEST EQUIPMENT

- Air Force Flight Test Instrumentation System p 72 A84-12329
[AIAA PAPER 83-2736]
Lockheed Airborne Data System advances test technology p 210 A84-18698
Mathematical model for predicting manhours savings from on-board diagnostics and BIT/BITE p 148 A84-17537
Lightning tests of aircraft fuel tank details p 199 A84-18535
A ground test instrumentation data system for EW Systems flight testing p 905 A84-44477
Evaluation of instrument landing system DDM (Difference in Depth of Modulation) calibration accuracies p 428 N84-21533
[AD-A138301]
Operational and Performance Measurement on Engines in Sea Level Test Facilities p 612 N84-25723
[AGARD-LS-132]
Operation and performance measurement on engines in sea-level test facilities: Introduction and general survey p 612 N84-25724
Aero/thermodynamic and acoustic considerations in the design of test-beds for turbojets and turbofans p 612 N84-25725
Performance derivation of turbojets and turbofans from tests in sea-level test cells p 608 N84-25728
Testing of turboshaft engines p 612 N84-25729

TEST FACILITIES

- Future parachute test and evaluation capability at the Naval Weapons Center p 24 A84-10746
Gulf Range test capabilities p 71 A84-12313
[AIAA PAPER 83-2707]
Gruzman's automated test system past, present and future p 72 A84-12346
[AIAA PAPER 83-2760]
RF production test facility for the LAMPS SH-60B Sea Hawk p 72 A84-12348
[AIAA PAPER 83-2762]
The Air Force Flight Test Center - Cradle of postwar aviation p 147 A84-16172
EME susceptibility testing of aircraft --- ElectroMagnetic Environment p 206 A84-16540
Design and operation of a coordinated multisite test environment p 230 A84-16638
Recent experimental work on lightning attachment-point-location tests p 231 A84-18531
Studies of lightning-attachment testing using aircraft models p 198 A84-18532
Detailed flow direction measurements in a transonic test section p 364 A84-24179
[AIAA PAPER 84-0587]

- The Aeropropulsion Systems Test Facility - An opportunity for improvements in aircraft propulsion development
[AIAA PAPER 84-0590] p 364 A84-24181
A new concept for exhaust diffusers of altitude test cells
[AIAA PAPER 84-0634] p 367 A84-24210
Integration facility for avionic systems testing p 466 A84-26780
A proposed whirl tower facility for the University of Witwatersrand p 467 A84-28198
Digital flight control system EM/EMP testing-lessons learned p 468 A84-29628
[SAE PAPER 831411] p 468 A84-29628
The experimental cockpit of the DFVLR flight-test vehicle p 446 A84-29692
Cryogenic wind tunnels for high Reynolds number testing p 904 A84-42900
Flight testing - On track p 906 A84-45161
Convertible fan/shaft engine demonstration p 892 A84-46357
R-F anechoic chamber test facilities p 991 A84-46846
The MIT blowdown turbine facility
[ASME PAPER 84-GT-116] p 992 A84-46950
The role of computational fluid dynamics in aeropropulsion ground testing p 992 A84-49084
An experimental investigation of soot behavior in a gas turbine combustor
[AD-A132210] p 140 N84-13202
Capabilities of the NRCC/NAE flight impact simulator facility
[AD-A130849] p 185 N84-15136
Electro-Magnetic Compatibility Test Facility, Bristol [BAE-BT-10658] p 544 N84-22586
Operational and Performance Measurement on Engines in Sea Level Test Facilities
[AGARD-LS-132] p 612 N84-25723
Operation and performance measurement on engines in sea-level test facilities: Introduction and general survey p 612 N84-25724
Aero/thermodynamic and acoustic considerations in the design of test-beds for turbojets and turbofans p 612 N84-25725
Instrumentation techniques in sea level test facilities p 612 N84-25727
Performance derivation of turbojets and turbopumps in tests in sea-level test cells p 608 N84-25728
Testing of turboshaft engines p 612 N84-25729
Facility requirements for helicopter noise research p 818 N84-29672
A survey of biodynamic test devices and methods
[AD-A142467] p 795 N84-29894
MIL-STD-1553B validation testing
[AD-P003544] p 924 N84-31148
The need for biaxial fatigue testing at A.R.L.
[AD-A143203] p 931 N84-32878
Compendium of US incompressible flow facilities
[AD-A143650] p 993 N84-33424
The Lincoln Laboratory-Aerospace Medical Research Laboratory digital speech test facility
[AD-A144303] p 1011 N84-34662
- TEST PILOTS**
Advanced flight control instruction at the Air Force Test Pilot School p 221 A84-15996
- TEST RANGES**
Gulf Range test capabilities
[AIAA PAPER 83-2707] p 71 A84-12313
Experimental evaluation of the spherical near field test range --- for high gain aircraft antennas p 856 A84-43617
Advanced medium range air-to-air missile flight test program overview p 866 A84-44453
Application of GPS to national test ranges p 969 A84-46640
GPS translator application considerations for test ranges p 991 A84-46641
- TEST VEHICLES**
Flight testing the Rotor Systems Research Aircraft (RSRA) p 222 A84-15997
Vehicle test results for the Garrett GT601 gas turbine engine p 240 A84-17544
Development of an 8-ft-dia ribbon parachute for recovery of a test device at transonic speeds
[AIAA PAPER 84-0793] p 415 A84-26561
- TETHERED SATELLITES**
Thermal control of tethered satellite in a very low altitude aerodynamic mission p 373 N84-19444
- TETHERLINES**
Improved prediction of parachute line sail during lines-first deployment
[AIAA PAPER 84-0786] p 400 A84-26556
Tether guides helicopter to landing on tossing ship p 419 A84-29571

TEXTBOOKS

- Aerothermodynamics of gas turbine and rocket propulsion --- Book p 721 A84-38720
Educational aids in aircraft combat survivability
[AD-A139090] p 528 N84-22556

TEXTILES

- Preliminary results of the effects of sewing, packing and parachute deployment on material strength
[DE84-006464] p 511 N84-22541

TF-34 ENGINE

- Evaluation of benefits of the A-10/TF34 Turbine Engine Monitoring System Squadron Integration Program
[AIAA PAPER 84-1414] p 603 A84-35208

THEMATIC MAPPING

- Terrain analysis procedural guide for built-up areas (report no. 13 in the ETL (Engineer Topographic Laboratories) series on guides for Army terrain analysts)
[AD-A142918] p 932 N84-31768

THEODORSEN TRANSFORMATION

- Optimum propeller wind turbines p 389 A84-24055
Finite element approximation to Theodorsen's solution for non-steady aerodynamics of an airfoil section
[AIAA PAPER 84-1640] p 651 A84-38027

THEORETICAL PHYSICS

- USSR report: Physics and mathematics
[JPRS-UPM-84-005] p 941 N84-32081

THERMAL ANALYSIS

- The effect of the setting angle of jet-cooling nozzles on the temperature and stressed state of a turbine disk p 357 A84-25572
Thermal characteristics of standardized Air Force avionic enclosures
[SAE PAPER 831103] p 479 A84-29038
Aircraft de-icing performance analysis by an adapted temperature field analyzer program
[SAE PAPER 831141] p 431 A84-29069
The boundary element method in an industrial environment p 564 A84-30701
Cooled blades of gas turbines / Thermal design and profiling / --- Russian book p 554 A84-30997
Analytical study of the thermal and fluid mechanical evolution of a cooling film injected from a single line of inclined round holes p 554 A84-31315
Computer-aided generation of detailed thermal structural models
[AIAA PAPER 84-1766] p 732 A84-37492
Thermal response of Space Shuttle wing during reentry heating
[AIAA PAPER 84-1761] p 742 A84-40813
Thermal analysis of a high-pressure compressor rotor of an aero-engine - Venting as a means for life improvement p 893 A84-46502
Status of new aerothermodynamic analysis tool for high-temperature resistant transparencies
[AD-P003236] p 724 N84-26649
Thermal analysis of a planetary transmission with spherical roller bearings operating after complete loss of oil
[NASA-TP-2367] p 930 N84-32824

THERMAL BOUNDARY LAYER

- Condition of a priori monotonicity of heat flux at a boundary p 381 A84-24744

THERMAL CONDUCTIVITY

- Program for development of strain tolerant thermal barrier coating system
[NASA-CR-173214] p 309 N84-16337
Applications of photoacoustic techniques to the study of jet fuel residue
[NASA-CR-173322] p 375 N84-18420
Ceramic coatings for heat engine materials: Status and future needs
[DE84-003401] p 377 N84-19590
Overview of zirconia with respect to gas turbine applications
[NASA-TP-2286] p 473 N84-21740
A new and unique conductive element for aircraft transparencies
[AD-P003188] p 685 N84-26601
Temperature and heat-flux distributions in a strip-heated composite slab
[DE84-006016] p 998 N84-33529

THERMAL CONTROL COATINGS

- Phase distributions in plasma-sprayed zirconia-yttria p 236 A84-18948
Phase analysis of plasma-sprayed zirconia-yttria coatings p 308 A84-19781
Mechanical and physical properties of plasma-sprayed stabilized zirconia p 308 A84-19786
On the development of plasma-sprayed thermal barrier coatings --- for gas turbine engine metals p 374 A84-25019
A study of the fatigue strength of heat-resistant nickel alloys with coatings p 711 A84-39497
High-temperature protective coatings; Proceedings of the Symposium, Atlanta, GA, March 7, 8, 1983 p 798 A84-42651

- Electron Beam Physical Vapor Deposition process for coating gas turbine airfoils p 798 A84-42652
Oxidation of CoCrAlY and Y-implanted CoCrAl alloys p 798 A84-42659
Evaluation of the high temperature corrosion resistance of some commercial coatings and new duplex coatings for gas turbines p 798 A84-42662
Microstructural characterization of service exposed CoCrAlY overlay coating p 798 A84-42663
Case study of corrosion failure of an aluminide coating in a gas turbine p 799 A84-42664
Degradation mechanisms of ceramic thermal barrier coatings in corrosive environments p 799 A84-42668
High performance ceramics for heat engine applications p 995 A84-46934
[ASME PAPER 84-GT-92] p 995 A84-46934
An experimental verification of heat flux measurements using two-layer thermoindicating coatings p 1006 A84-47071
Industrial application of plasma sprayed thermal barrier coatings and high temperature corrosion protective coatings p 1007 A84-49082
Development of strain tolerant thermal barrier coating systems, tasks 1 - 3
[NASA-CR-168251] p 140 N84-12312
Program for development of strain tolerant thermal barrier coating system
[NASA-CR-173214] p 309 N84-16337
- THERMAL CYCLING TESTS**
Investigation of the thermocyclic life of ZrS₆U alloy in the nonuniform thermostressed state p 309 A84-22406
Simplified analytical procedures for representing material cyclic response --- for high temperature gas turbine engine analysis p 298 A84-22877
Strength, quality, and lifetime in the case of hot engine components p 380 A84-24714
Kevlar epoxy substrate for interconnecting leadless chip carrier p 912 A84-42776
A thermal cycling test for the screening of space materials and processes
[ESA-PSS-01-704-ISSUE-1] p 627 N84-26044
- THERMAL DECOMPOSITION**
Residual thrust due to decomposition of insulator materials --- in solid propellant rocket engines p 709 A84-38150
- THERMAL DEGRADATION**
Effects of 50,000 h of thermal aging on graphite/epoxy and graphite/polyimide composites p 236 A84-17439
Thermal problems in nickel cadmium aircraft batteries p 449 A84-28200
Degradation mechanisms of ceramic thermal barrier coatings in corrosive environments p 799 A84-42668
Flightline thermal environment testing of F-111 transparencies
[AD-A131642] p 123 N84-12163
Research on aviation fuel instability p 615 A84-24734
Characterization and degradation studies on synthetic polymers for aerospace application
[NASA-CR-166597] p 914 N84-31284
- THERMAL DIFFUSION**
The effect of hydrodynamics on the thermal diffusion process of gas mixture separation p 716 A84-37077
- THERMAL ENERGY**
Thermal energy recovery in gas turbine engine test cells
[AD-A139457] p 564 N84-24009
- THERMAL ENVIRONMENTS**
Thermal environment of missiles in captive flight
[AIAA PAPER 83-2764] p 16 A84-12350
Flightline thermal environment testing of F-111 transparencies
[AD-A131642] p 123 N84-12163
- THERMAL EXPANSION**
Program for development of strain tolerant thermal barrier coating system
[NASA-CR-173214] p 309 N84-16337
- THERMAL FATIGUE**
Investigation of the thermocyclic life of ZrS₆U alloy in the nonuniform thermostressed state p 309 A84-22406
A unit for AGTE shaft strength testing under cyclic torque and axial thrust loading p 298 A84-22415
Simplified analytical procedures for representing material cyclic response --- for high temperature gas turbine engine analysis p 298 A84-22877
Engine cyclic durability by analysis and material testing
[NASA-TM-83577] p 385 N84-18683
Estimating thermal fatigue strength of prototype blades in gas turbine engine p 701 N84-26906
- THERMAL INSULATION**
Residual thrust due to decomposition of insulator materials --- in solid propellant rocket engines p 709 A84-38150

THERMAL NOISE

La Recherche Aerospatiale, Bimonthly bulletin, number 1983-4, 215/July-August [ESA-TT-823] p 545 N84-22589

THERMAL PROTECTION

Aerothermal loads analysis for high speed flow over a quilted surface configuration — metallic Thermal Protection System panels simulation for Space Shuttle [AIAA PAPER 84-1630] p 651 A84-38019
Aerothermodynamic environment and thermal protection for a Titan aerocapture vehicle — Saturn satellite atmospheric entry [AIAA PAPER 84-1714] p 660 A84-39371
Thermal response of Space Shuttle wing during reentry heating [AIAA PAPER 84-1761] p 742 A84-40813
Film cooling from two rows of holes inclined in the streamwise and spanwise directions [ASME PAPER 84-GT-286] p 1006 A84-47044
Low cost thermal protection system processing [AD-D01142] p 915 N84-32434
Improved thermal barrier coating system [NASA-CASE-LEW-14057-1] p 998 N84-33595

THERMAL RADIATION

Investigation of transition from laminar to turbulent boundary layer flow by means of a thermal imaging system p 581 A84-36460

THERMAL RESISTANCE

Joining and coating of oxide dispersion strengthened superalloys p 471 A84-28333
Heat resistant copolyester-carbonate transparent plastics [AD-P003205] p 712 N84-26618

THERMAL STABILITY

Polymides for service at 700 F p 233 A84-17155
Evaluation of thermal-oxidative stability of aviation oils on the OP-100 device p 374 A84-25589
The thermal stability of aviation fuel [ASME PAPER 84-GT-69] p 995 A84-46916
An assessment of the use of antimisting fuel in turbofan engines [NASA-CR-168081] p 76 N84-10332
Electron spin resonance study of thermal instability reactions in jet fuels [NASA-CR-168333] p 375 N84-18418
Fire-retardant decorative inks for aircraft interiors [NASA-TM-85876] p 376 N84-19475
Heat transfer and thermal stability of alternative aircraft fuels, volume 1 [AD-A137404] p 377 N84-19597
Heat transfer and thermal stability of alternative aircraft fuels, Volume 2: Appendices [AD-A137405] p 377 N84-19598
Research on aviation fuel instability p 552 N84-23642
Research on aviation fuel instability p 615 N84-24734
Comparison of JFTOT (Jet Fuel Thermal Oxidation Tester) and absorbance methods for determining jet fuel thermal stability [AD-A138673] p 616 N84-24825
New high performance windshield/canopy materials [AD-P003199] p 685 N84-26612
FTIR analysis of aviation fuel deposits [NASA-TM-83773] p 998 N84-33608

THERMAL STRESSES

A strength analysis of a fan-shaped wing with an allowance made for temperature deformations and creep deformations p 523 A84-30424
Estimation of deformation kinetics of GTE blades in conditions of low-frequency temperature and high-frequency mechanical loads p 717 A84-37369
Degradation mechanisms of ceramic thermal barrier coatings in corrosive environments p 799 A84-42668
Experimental studies involving sweptback corner configurations in longitudinal flow of the hypersonic range — German thesis p 838 A84-45524
A criterion for comparing materials for a 'hot' structure p 1006 A84-47084
Derating requirements and application rules for electronic components [ESA-PSS-01-301-1SSUE-1] p 625 N84-25930
Simulation of T-38 aircraft student canopy response to cockpit pressure and thermal loads using MAGNA (Materially and Geometrically Nonlinear Analysis) [AD-P003231] p 733 N84-26644
Status of new aerothermodynamic analysis tool for high-temperature resistant transparencies [AD-P003236] p 724 N84-26649

THERMODYNAMIC CYCLES
Instantaneous heat transfer during compression and expansion in reciprocating gas handling machinery p 553 A84-30074
Analysis of a topping-cycle, aircraft, gas-turbine-engine system which uses cryogenic fuel [NASA-TP-2294] p 455 N84-21549

THERMODYNAMIC EFFICIENCY

The increase in efficiency of high temperature gas turbine plants with cooled turbines p 314 A84-22002
Twin airfoil blade in double circulating gas turbine processes p 553 A84-30055
Test results of a steam injected gas turbine to increase power and thermal efficiency p 553 A84-30064
Stirling engine - Availability criteria — optimum temperature ratio for waste heat recovery systems or without recuperators p 565 A84-30082
A comparative study of the influence of different means of turbine cooling on gas turbine performance p 923 A84-46413
Cooling characteristics of film-cooled turbine blades [ASME PAPER 84-GT-73] p 1002 A84-46918
The Britalus Brayton cycle engine [ASME PAPER 84-GT-258] p 1015 A84-47031
Comparison of a propfan/turbofan engine by thermodynamic cycle calculation [ESA-TT-820] p 608 N84-25715

THERMODYNAMIC PROPERTIES

Flight-time extension in hot-air balloons by appropriate surface characteristics [DGLR PAPER 83-086] p 398 A84-29655
Stirling engine - Availability criteria — optimum temperature ratio for waste heat recovery systems or without recuperators p 565 A84-30082
The aerodynamic and thermal characteristics of star-shaped bodies around which hypersonic rarefied gas flows at the angle of attack p 506 A84-31769
Advanced turbofan concept with regenerator and inter-cooled compressor [AIAA PAPER 84-1270] p 602 A84-35154
Transactions of the Japan Society for Aeronautical and Space Sciences, vol. 26, no. 73, November 1983 [ISSN-0549-3811] p 315 N84-16374
Heat transfer and thermal stability of alternative aircraft fuels, volume 1 [AD-A137404] p 377 N84-19597
Heat transfer and thermal stability of alternative aircraft fuels, Volume 2: Appendices [AD-A137405] p 377 N84-19598
Hypersonic flow around flat body in case of intense radiative heat exchange p 513 N84-22795
Combustion gas properties of various fuels of interest to gas turbine engines [NASA-TM-83682] p 606 N84-24584
Uninstalled aero engine testing in operation in the Royal Air Force p 612 N84-25731
A thermal cycling test for the screening of space materials and processes [ESA-PSS-01-704-1SSUE-1] p 627 N84-26044

THERMOELASTICITY

Thermoelastic limit cycling of zippered cross section spacecraft booms [AIAA PAPER 84-1065] p 613 A84-34915

THERMOGRAPHY

Thermography - Applications to the manufacture and nondestructive characterization of composites p 477 A84-28639
Modern developments in flow visualization [AIAA PAPER 84-1599] p 722 A84-39302

THERMOHYDRAULICS

Thermal study of a wall jet p 92 A84-14386

THERMOPHYSICAL PROPERTIES

Highly compact ceramic recuperator for engine applications [ASME PAPER 84-GT-50] p 1001 A84-46907
GTE sintered silicon nitride — for advanced heat engines [ASME PAPER 84-GT-228] p 998 A84-47008
Journal of Engineering Thermophysics (selected articles) [AD-A129432] p 61 N84-11172

THERMOPLASTICITY

Simplified analytical procedures for representing material cyclic response — for high temperature gas turbine engine analysis p 298 A84-22877

THERMOVISCOELASTICITY

Research and development program for the development of advanced time-temperature dependent constitutive relationships. Volume 2: Programming manual [NASA-CR-168191-VOL-2] p 80 N84-10614

THICK WALLS

Investigation of parameters influencing the deflection of a thick wall jet by a thin wall jet coflowing over a rounded corner [AD-A142773] p 848 N84-31099

THICKNESS

A method for computing the leading-edge suction in a higher-order panel method [NASA-CR-3730] p 409 N84-20479
Unsteady Flow in Turbomachines, volume 1 [VKI-LS-1984-02-VOL-1] p 625 N84-25960

THICKNESS RATIO

A general iterative method to design Karman-Trefftz and Joukowski airfoils p 826 A84-43339
Aerodynamic characteristics of 2 NASA supercritical airfoils with different maximum thickness [NASA-TM-X-2532] p 638 N84-27667

THIN AIRFOILS

Viscous/inviscid interaction analysis of asymmetric trailing-edge flows p 7 A84-10096
A limiting case of a hypersonic flow of an ideal gas past a thin tapered airfoil p 92 A84-14273
Low-frequency transonic flows past a thin airfoil p 92 A84-14388
Quasi-doublet-lattice method for oscillating thin airfoils in subsonic flow p 151 A84-16054
Thin turbomachinery blade design using a finite-volume method [AIAA PAPER 84-0438] p 217 A84-18093
Invariance groups and reduction of the unsteady transonic small disturbance equation p 263 A84-20215

On the theory of thin airfoils in nonequilibrium ideal fluids p 403 A84-26591
Indicial and gust response of an unstaggered thin-airfoil cascade [AIAA PAPER 84-0912] p 555 A84-31675
The Sears problem for a lifting airfoil revisited - New results p 575 A84-34691
Steady and unsteady separated flow computations for transonic airfoils [AIAA PAPER 84-1618] p 650 A84-38011
The effects of gusts on the fluctuating airloads of airfoils in transonic flow [AIAA PAPER 84-1580] p 659 A84-39315
Calculations of viscous supersonic flow over finned bodies using a 'thin-fin' approximation [AIAA PAPER 84-2114] p 751 A84-42359

THIN BODIES

Nonlinear bending and collapse of long, thin, open section beams and corrugated panels [ASME PAPER 84-APM-4] p 622 A84-36160
Hypersonic air flow past low-aspect-ratio wings and thin bodies p 841 A84-45733
Interaction between a boundary layer and an external flow in flows over thin axisymmetric bodies p 960 A84-47087

THIN FILMS

Fire resistant films for aircraft applications p 140 A84-13375

THIN PLATES

Formation of coherent structures in a turbulent wake under acoustic excitation p 378 A84-23319
Fatigue crack growth in aluminum alloy sheet material under constant amplitude and simplified flight simulation loading [VTH-LR-381] p 376 N84-19561

THIN WALLED SHELLS
The calculation of thin-walled aircraft designs in a geometrically nonlinear formulation p 553 A84-30418
Thin-walled structures in aerospace design p 720 A84-38110

THIN WALLS

Plastic forming of thin-walled aircraft parts (Theory and computation) — Russian book p 78 A84-10466
Experimental stress analysis of a thin walled pressurized torus loaded by contact with a plane — dynamic response of aircraft tires p 239 A84-17443
Radomes for flight vehicles [AD-A140174] p 625 N84-25920
Investigation of parameters influencing the deflection of a thick wall jet by a thin wall jet coflowing over a rounded corner [AD-A142773] p 848 N84-31099
Oscillations of elastic airplane due to wind gust p 880 N84-32087

THIN WINGS

A new method for calculating the pressure distribution of supersonic thin wing p 94 A84-15257
The effect of a slipstream on the lift and drag characteristics of a wing of finite span p 152 A84-16917
Finite element method applied to solving the transonic integral equations of three dimensional thin wings p 333 A84-25862
Theory of a thin wing with a circular mean line p 574 A84-34342
Engineering analysis of drooped leading-edge wings near stall p 575 A84-34468
A calculation method for propeller-wing interferences p 845 A84-37911
Numerical simulation of leading-edge vortex flows [AIAA PAPER 84-1544] p 847 A84-37962
Aspects of the aerodynamic design of a thin supercritical, forward swept wing for a combat aircraft p 654 A84-38414
Flow past wing-body junctions p 843 A84-46023

THREAT EVALUATION

An application of a gradient method to the minimization of the drag of slender wings in supersonic flow p 958 A84-47064

The method of separation of variables in a problem concerning three-dimensional flow of an ideal fluid near a sharp corner of a thin wing p 959 A84-47080

Doublet point method for calculations on oscillatory lifting surfaces. Part 1: Subsonic flow [NAL-TR-781-PT-1] p 336 N84-18168

Vortex flap system for thin wings [MBB-FE-122/S/PUB/102] p 587 N84-26435

THREAT EVALUATION

Characteristics of lightning strikes to aircraft p 181 A84-18512

Lightning strikes to aircraft - An analytical study p 182 A84-18518

THREE DIMENSIONAL BOUNDARY LAYER

Development of boundary layers and separation patterns on a body of revolution at incidence p 9 A84-10108

Calculation of boundary layers and separation on a spheroid at incidence p 9 A84-10109

Excitation and growth of instabilities in three-dimensional stationary boundary layers p 11 A84-10184

Computation of three-dimensional boundary layers on fuselages p 153 A84-17403

Three-dimensional turbulent boundary-layer development on a fan rotor blade p 153 A84-17437

A method for designing three dimensional configurations with prescribed skin friction p 174 A84-19257

The calculation of the laminar boundary layer on a wing-like ellipsoid with incidence p 263 A84-20840

Excitation of Tollmien-Schlichting waves in the boundary layer on the vibrating surface of a swept wing of infinite span p 264 A84-21117

Separation criteria for three-dimensional boundary-layer calculations p 474 A84-27145

The effect of the degree of turbulence of the approach flow on a three-dimensional boundary layer p 406 A84-27471

Supersonic separated flow past a cylindrical obstacle on a flat plate p 508 A84-32606

Tests of wall blowing concepts for diffuser boundary layer control p 642 A84-37217

Numerical simulation of 3-D shock-turbulent boundary layer interaction generated by a sharp fin p 648 A84-37971

The three-dimensional turbulence transport properties in the boundary layers of conical body configurations at Mach 3 p 743 A84-40815

Three-dimensional computational methods applied to aerodynamic analysis of transonic flows past a wing-body configuration [ONERA, TP NO. 1984-92] p 831 A84-44944

Calculation of a three-dimensional boundary layer in the vicinity of an isolated critical point p 958 A84-47055

Three-dimensional effects on airfoils [NASA-TM-77025] p 177 N84-15118

Computations of projectile magnus effect at transonic velocities [AD-A133212] p 179 N84-15127

Computing the three dimensional boundary layer in a compressor p 301 N84-16200

Experimental and theoretical studies of parietal viscous boundaries in a single stage transonic compressor p 301 N84-16206

Three dimensional/boundary layer interaction: Laminar and turbulent behaviour [AD-A137060] p 386 N84-19765

Excitation of Tollmien-Schlichting waves in boundary layer at vibrating surface of infinite-span sweptback wing p 513 N84-22792

Method of calculating strong viscous interaction at delta wing p 664 N84-26918

COSAL: A black-box compressible stability analysis code for transition prediction in three-dimensional boundary layers [NASA-CR-165925] p 728 N84-28002

THREE DIMENSIONAL COMPOSITES

Optimization of large composite structures with strength and local stability restrictions p 621 A84-35535

THREE DIMENSIONAL FLOW

Three-dimensional wake of a swept wing [ONERA, TP NO. 1983-9] p 8 A84-10102

Stern boundary-layer flow on two three-dimensional bodies having elliptical transverse cross-sections p 9 A84-10110

Computation of the asymmetric vortex pattern for bodies of revolution p 10 A84-10130

Numerical simulation of flow around a three-dimensional turret p 10 A84-10135

An orthogonal coordinate grid following the three-dimensional viscous flow over a concave surface p 14 A84-11598

Numerical methods for three-dimensional inviscid flow computations p 15 A84-11857

Three-dimensional flowfield inside a low-speed axial flow compressor rotor p 90 A84-13574

Computation of three-dimensional transonic inviscid flows on a wing by pseudo-unsteady resolution of the Euler equations [ONERA, TP NO. 1983-125] p 91 A84-13640

Two types of swirling gas flows p 93 A84-14929

Computation of three-dimensional viscous flows on transonic wings by boundary layer-inviscid flow interaction p 95 A84-15854

Certain problems of three-dimensional hypersonic flow p 152 A84-16918

Computations and aeroelastic applications of unsteady transonic aerodynamics about wings p 153 A84-17405

A block-structured finite element grid generation scheme for the analysis of three-dimensional transonic flows [AIAA PAPER 84-0004] p 155 A84-17827

Flow field studies of a transport airplane [AIAA PAPER 84-0012] p 155 A84-17831

Application of a full potential method for computation of three-dimensional supersonic flows [AIAA PAPER 84-0139] p 161 A84-17907

A natural formulation for numerical solution of the Euler equations [AIAA PAPER 84-0163] p 241 A84-17922

Three-dimensional flow analysis of turboprop inlet and nacelle configurations [AIAA PAPER 84-0193] p 162 A84-17943

An incompressible Navier-Stokes flow solver in three-dimensional curvilinear coordinate systems using primitive variables [AIAA PAPER 84-0253] p 163 A84-17977

The computation of rotational conical flows [AIAA PAPER 84-0258] p 163 A84-17980

Computation of supersonic flow around bodies [AIAA PAPER 84-0259] p 163 A84-17981

Computational analysis of the flow field in an engine test cell [AIAA PAPER 84-0285] p 217 A84-17999

Application of the Green's function method for 2- and 3-dimensional steady transonic flows [AIAA PAPER 84-0425] p 167 A84-18085

Calculation of unsteady three-dimensional subsonic/transonic inviscid flowfields by the method of characteristics [AIAA PAPER 84-0440] p 168 A84-18095

Flowfield scaling of a swept compression corner interaction: A comparison of experiment and computation [AIAA PAPER 84-0096] p 173 A84-19232

Nonlinear aerodynamic effects on bodies in supersonic flow [AIAA PAPER 84-0231] p 174 A84-19245

Hypersonic nonequilibrium gas flow past a low-aspect-ratio wing p 260 A84-19562

Theory of hypersonic three-dimensional flow around a slender wing of arbitrary aspect ratio by an unsteady stream of relaxing gas p 264 A84-21120

Three-dimensional hypersonic flow of a radiating gas past a wing p 264 A84-21131

Viscous hypersonic flow over complex bodies at high angles of attack [AIAA PAPER 84-0015] p 265 A84-21279

Three-dimensional viscous design methodology for advanced technology aircraft supersonic inlet systems [AIAA PAPER 84-0194] p 265 A84-21290

High altitude effects on three-dimensional nonequilibrium viscous shock-layer flows [AIAA PAPER 84-0304] p 267 A84-21861

Three-dimensional grid generation using elliptic equations with direct grid distribution control p 378 A84-23358

Effect of boundary layers on solid walls in three-dimensional subsonic wind tunnels p 329 A84-23359

An investigation of civil transport aft body drag using a three-dimensional wake survey method [AIAA PAPER 84-0614] p 331 A84-24198

Three-dimensional testing in a flexible-wall wind tunnel [AIAA PAPER 84-0623] p 366 A84-24203

Status of three-dimensional adaptive-wall test section development at AEDC [AIAA PAPER 84-0624] p 369 A84-25733

Finite element method applied to solving the transonic integral equations of three dimensional thin wings p 333 A84-25862

Numerical calculation of unsteady transonic potential flow over three-dimensional wings with oscillating control surfaces p 405 A84-27132

Radiative heat transfer in the shock layer in three-dimensional flow around blunt bodies p 504 A84-31015

The validity conditions in three-dimensional supersonic linear aerodynamics p 505 A84-31122

Unsteady Newton-Busemann flow theory. IV - Three dimensional p 508 A84-32601

On vortex shedding from circular cylinder with step p 509 A84-32756

Numerical solution of transonic shear flows past thin bodies p 578 A84-35326

Noniterative grid generation using parabolic difference equations for fuselage-wing flow calculations p 579 A84-35334

Solution of three-dimensional time-dependent viscous flows p 621 A84-35352

Boundary-layer calculations in the inverse mode for incompressible flows over infinite swept wings p 638 A84-36476

Three-dimensional nonequilibrium viscous shock-layer flows over complex geometries p 639 A84-36482

Computation of three-dimensional viscous flows using a space-marching method [AIAA PAPER 84-1298] p 639 A84-36971

Application of 2D and 3D criteria to the calculation of the transition and the boundary layer of sweptback wings [ONERA, TP NO. 1984-16] p 642 A84-37535

A boundary element technique in transonic flow p 644 A84-37901

Visualization of three dimensional separated flows using the smoke wire technique p 645 A84-37908

Simplified Navier-Stokes equations and their numerical solutions p 645 A84-37910

Compressibility correction for flow about wing surfaces p 645 A84-37926

Parabolized Navier-Stokes analysis of three-dimensional supersonic and subsonic jet mixing problems [AIAA PAPER 84-1525] p 646 A84-37951

Experimental study of the behavior of 3D-turbulent boundary layer in a simplified wing/body junction [AIAA PAPER 84-1529] p 647 A84-37954

Numerical simulation of the viscous flow fields over three-dimensional complicated geometries [AIAA PAPER 84-1550] p 647 A84-37967

Three-dimensional unsteady Euler equations solution using flux vector splitting [AIAA PAPER 84-1552] p 647 A84-37968

A computational study of complex three-dimensional compressible turbulent flow fields [AIAA PAPER 84-1556] p 648 A84-37970

Flow visualization studies of a 3-D shock/boundary layer interaction in the presence of a non-uniform approach boundary layer [AIAA PAPER 84-1560] p 648 A84-37972

Unsteady aerodynamic modeling of a fighter wing in transonic flow [AIAA PAPER 84-1566] p 649 A84-37975

Three-dimensional simulation of muzzle brake flowfields [AIAA PAPER 84-1641] p 719 A84-38028

Three-dimensional flow simulations for supersonic mixed-compression inlets at incidence p 655 A84-38828

Three-dimensional Navier-Stokes calculations of multiple interacting vortex rings [AIAA PAPER 84-1545] p 658 A84-39311

A numerical study of the two- and three-dimensional unsteady Navier-Stokes equations in velocity-vorticity variables using compact difference schemes p 741 A84-39970

A hybrid explicit-implicit numerical algorithm for the three-dimensional compressible Navier-Stokes equations p 743 A84-40831

An iterative procedure for three-dimensional transonic wing design by the integral equation method [AIAA PAPER 84-2155] p 745 A84-41332

Three-dimensional structure and decay of vortices behind an axial flow rotating blade row [ASME PAPER 83-GTJ-21] p 748 A84-41631

A horseshoe vortex in a duct [ASME PAPER 84-GT-202] p 748 A84-41638

Turbulent mixer nozzle flow field - A benchmark experimental study p 779 A84-41641

A simple method for solving three-dimensional inverse problems of turbomachines flow and annular constraint condition p 827 A84-43346

Application of a quasi-3D inviscid flow and boundary layer analysis to the hub-shroud contouring of a radial turbine [AIAA PAPER 84-1297] p 827 A84-44177

Flow simulations for nacelle-propeller configurations using Euler equations [AIAA PAPER 84-2143] p 827 A84-44192

Numerical solutions of the Euler equations governing axisymmetric and three-dimensional transonic flow p 832 A84-44959

Three-dimensional hypersonic flow past a wing with a low aspect ratio p 838 A84-45702

An investigation of a method for controlling a three-dimensional separation zone p 841 A84-45730

A study of the spatial flow and aerodynamic characteristics of two-dimensional intakes with various inlet shapes and lateral surface dimensions p 842 A84-45745

Flow past wing-body junctions p 843 A84-46023

A combined direct/inverse three-dimensional transonic wing design method for vector computers [AIAA PAPER 84-2156] p 843 A84-46102

LDV measurements of three-dimensional flow development in a curved rectangular duct with inlet shear profile [AIAA PAPER 84-1601] p 844 A84-46114

Quasi-three-dimensional flow of a gas in the blade ring of a turbomachine p 950 A84-46850

Numerical flow analysis of fully three-dimensional turbine cascades [ASME PAPER 84-GT-19] p 950 A84-46886

A quasi-three-dimensional turbomachinery blade design system. I - Throughflow analysis [ASME PAPER 84-GT-26] p 951 A84-46891

A quasi-three-dimensional turbomachinery blade design system. II - Computerized system [ASME PAPER 84-GT-27] p 951 A84-46892

A numerical study of three-dimensional flow separation and wake development in an axial compressor rotor [ASME PAPER 84-GT-34] p 951 A84-46898

Calculation of the three-dimensional, steady, inviscid flow in a transonic axial turbine stage [ASME PAPER 84-GT-76] p 952 A84-46920

A three-dimensional Euler solver for turbomachinery blade rows [ASME PAPER 84-GT-79] p 952 A84-46922

Flow in a centrifugal fan impeller at off-design conditions [ASME PAPER 84-GT-182] p 1005 A84-46983

Quasi-three-dimensional and full three-dimensional rotational flow calculations in turbomachines [ASME PAPER 84-GT-185] p 954 A84-46986

A simple method for solving three-dimensional inverse problems of turbomachine flow and the annular constraint condition [ASME PAPER 84-GT-198] p 954 A84-46994

Investigation of the three-dimensional flow field within a transonic fan rotor - Experiment and analysis [ASME PAPER 84-GT-200] p 955 A84-46995

Surface static pressures in an inlet vortex flow field [ASME PAPER 84-GT-201] p 955 A84-46996

A finite element computer code to calculate full 3-D compressible potential flow in turbomachinery [ASME PAPER 84-GT-238] p 956 A84-47016

Calculation of horseshoe vortex flow without numerical mixing [ASME PAPER 84-GT-241] p 956 A84-47018

An analysis of three-dimensional flow past a plane supersonic air intake in a configuration with a delta wing p 958 A84-47053

A linear problem concerning three-dimensional supersonic and hypersonic flows over a wing at angles of attack and sideslip p 959 A84-47070

The method of separation of variables in a problem concerning three-dimensional flow of an ideal fluid near a sharp corner of a thin wing p 959 A84-47080

Calculation of three-dimensional turbulent jet propagation from a lobe nozzle in a slipstream p 961 A84-47554

Nonlinear aerodynamic effects on bodies in supersonic flow p 963 A84-49094

Application of a new Navier-Stokes solver to three-dimensional jet flows p 963 A84-49113

LANN (Lockheed, AFWAL, NASA-Langley and NLR) wing test program: Acquisition and application of unsteady transonic data for evaluation of three-dimensional computational methods [NASA-CR-174466] p 19 N84-10032

An experimental investigation of separated three dimensional flow on general aviation twin-engine aircraft p 96 N84-12087

Aerodynamics of Vortical Type Flows in Three Dimensions [AGARD-CP-342] p 98 N84-12099

On issues concerning flow separation and vortical flows in three dimensions p 98 N84-12100

The vortex skeleton model for three-dimensional steady flows p 98 N84-12101

Visualization of vortical type flows in three dimensions p 99 N84-12107

Viscous three-dimensional flow separations from high-wing propeller-turbine nacelle models p 101 N84-12115

Theoretical modelling of three-dimensional vortex flows in aerodynamics p 101 N84-12116

Development of a computer code for a three-dimensional higher order panel method for subsonic potential flow [FFA-138] p 106 N84-13155

A computer program for the calculation of three-dimensional transonic nacelle/inlet flowfields [NASA-CR-166528] p 106 N84-13159

Three-dimensional viscous design methodology for advanced technology aircraft supersonic inlet systems [NASA-TM-83558] p 134 N84-13190

Three-dimensional wake of a swept wing p 245 N84-15458

A method of calculating fully three dimensional inviscid flow through any type of turbomachine blade row p 245 N84-15479

Three-dimensional flow calculations on a hypothetical steam turbine last stage p 246 N84-15481

Comparison of calculated and measured pressures on straight and swept-tip model rotor blades [NASA-TM-85872] p 270 N84-16143

Flow measurements in the stator row of a single-stage transonic axial-flow compressor with controlled diffusion stator blades p 302 N84-16209

Numerical simulation of transonic flutter of a high-aspect-ratio transport wing [NAL-TR-776T] p 362 N84-18208

Reattachment of a three-dimensional, incompressible jet to an adjacent axisymmetric inclined surface [AD-A136286] p 383 N84-18584

On the stability of an infinite swept attachment line boundary layer [NASA-CR-172300] p 339 N84-19285

Development of a wind tunnel test section with adaptive flexible walls for three-dimensional flow [BMFT-FB-W-83-026] p 387 N84-19776

The present calculation method of adhering layers on aircraft wings [AD-A137585] p 411 N84-20496

Three-dimensional, two-phase supersonic nozzle flows [AD-A138649] p 510 N84-22538

An experimental and analytic study of the flow subsonic wind tunnel inlets [AD-A138865] p 511 N84-22540

Aircraft exhaust plume signature predictions for non-axisymmetric multiple engine installations p 537 N84-22627

Theory of hypersonic three-dimensional flow of nonsteady gas stream with relaxation past thin wing with arbitrary aspect ratio p 512 N84-22791

Interaction of unsteady spatial boundary layer with hypersonic flow near rapidly heated portion of surface p 513 N84-22794

INTFL-8401 computer tomography for interferometric aerodynamic measurements [AD-A139591] p 517 N84-23611

A spatial model of wind shear and turbulence for flight simulation [NASA-TP-2313] p 564 N84-24044

Application of a quasi-3D inviscid flow and boundary layer analysis to the hub-shroud contouring of a radial turbine [NASA-TM-83669] p 585 N84-25647

A numerical study of the controlled flow tunnel for a high lift model p 611 N84-25721

Numerical computation of vortical flows about wings p 587 N84-25987

Multi-length scale turbulence models [AD-A140527] p 627 N84-25997

Solution of 3-dimensional time-dependent viscous flows. Part 2: Development of the computer code [NASA-CR-166565-PT-2] p 726 N84-27002

Theoretical modelling of three-dimensional vortex flows in aerodynamics [AD-A134966] p 726 N84-27007

Solution of 3-dimensional time-dependent viscous flows. Part 1: Investigation of candidate algorithms [NASA-CR-166565-PT-1] p 733 N84-27503

A three-dimensional transonic, potential flow computer program, its conversion to IBM FORTRAN and utilization [AD-A140936] p 734 N84-28521

A numerical simulation of three-dimensional flow in an adaptive wall wind tunnel [NASA-TP-2351] p 756 N84-28750

Unsteady transonic aerodynamic and aeroelastic calculations about airfoils and wings [NASA-TM-85986] p 847 N84-31092

Hypersonic three-dimensional flow of radiating gas around wing p 848 N84-32062

Analysis of three-dimensional transonic compressors [NASA-CR-166580] p 850 N84-32356

Special Course on Stability and Transition of Laminar Flow [AGARD-R-709] p 1009 N84-33757

Boundary-layer linear stability theory p 1009 N84-33759

THREE DIMENSIONAL MOTION

Calculation of three-dimensional flying object in shockless transonic flow [NAL-TR-782] p 336 N84-18167

Further development of XTRAN3S computer program [NASA-CR-172335] p 516 N84-23608

THROTTLING

Analysis of aircraft control strategies for microburst encounter - low altitude wind shear [AIAA PAPER 84-0238] p 226 A84-17967

Influence of a closely-coupled throttle on the stalling behavior of a radial compressor stage [ASME PAPER 84-GT-190] p 982 A84-46989

Interaction between a pseudo-shock and an obstacle p 959 A84-47073

THRUST

Thrust and drag of aircraft - Prediction and verification [AIAA PAPER 84-0611] p 348 A84-24197

A simulation investigation of the effects of engine-and thrust-response characteristics on helicopter handling qualities [NASA-TM-85849] p 27 N84-10034

Determination of the static performance of a Cuyuna cc model UL-430RR engine [NASA-CR-175354] p 299 N84-16179

Investigation of a pneumatic thrust deflector based on circulation control technology [AD-A128950] p 484 N84-20784

THRUST AUGMENTATION

A simple viscous-inviscid aerodynamic analysis of two-dimensional ejectors [AIAA PAPER 84-0281] p 164 A84-17995

Selecting exhaust mixers for turbofan engines p 358 A84-25579

An investigation of the effects of a thrust augmenting ejector on the performance and handling qualities of an upper surface blown research aircraft p 867 A84-44460

A feasibility study of open-type ejector thrust augmenters p 891 A84-45715

Research on nonsteady flow induction [AD-A133894] p 243 N84-14468

Thrust augmentation study of high performance ejectors [AD-A142650] p 759 N84-29856

Axisymmetric thrust augmenting ejector with discrete primary air slot nozzles [AD-D011129] p 893 N84-32386

THRUST BEARINGS

Numerical analysis and experimental verification of elastomeric bearings p 311 A84-19635

THRUST CONTROL

V/STOL propulsion control technology p 356 A84-24986

Numerical analysis of a variable camber rotor blade as a lift control device [NASA-CR-173452] p 439 N84-21538

Ground based testing without wind tunnels p 598 N84-25634

Optimizing the thrust deflecting surface for the pneumatic thrust deflector [AD-A140612] p 700 N84-26703

THRUST DISTRIBUTION

Wing design with attainable thrust considerations [AIAA PAPER 84-2194] p 769 A84-41346

THRUST LOADS

A unit for AGTE shaft strength testing under cyclic torque and axial thrust loading p 298 A84-22415

F-14 high angle of attack investigation with asymmetric thrust and external stores p 867 A84-44465

THRUST MEASUREMENT

The M.C.A.-method, a flight test technique to determine thrust of jet aircraft in flight - Mass Consumption-Acceleration [AIAA PAPER 83-2749] p 49 A84-12337

Thrust modeling - A simplified in-flight thrust and airflow prediction technique for flight test performance measurements [AIAA PAPER 83-2751] p 49 A84-12339

Uncertainty methodology for in-flight thrust determination [SAE PAPER 831438] p 431 A84-29452

Application of in-flight thrust determination uncertainty [SAE PAPER 831439] p 432 A84-29453

High pressure ratio testing with a nozzle driven ejector [AIAA PAPER 84-1488] p 705 A84-36986

Direct measurement of in-flight thrust for aircraft engines p 889 A84-44457

A technique to determine lift and drag polars in flight p 966 A84-34402

THRUST REVERSAL

Development of the Tornado thrust reverser p 57 A84-10295

In-flight short field landing investigations on a combat aircraft with thrust reverser [AIAA PAPER 83-2693] p 48 A84-12306

A method for prediction of jet-induced loads on thrust-reversing aircraft [AIAA PAPER 84-0222] p 196 A84-17954

- Approach and landing aerodynamic technologies for advanced STOL fighter configurations [AIAA PAPER 84-0334] p 197 A84-18027
- An experimental study of the aerodynamic shielding of the air intake of a turbojet engine from the exhaust gases p 357 A84-25567
- Thrust reverser exhaust plume reingestion model tests p 601 A84-34457
- Axisymmetric approach and landing thrust reverser concepts In-ground effects wind tunnel test results [AIAA PAPER 84-1215] p 601 A84-35134
- Axisymmetric approach and landing thrust reversers for single engine fighters [AIAA PAPER 84-1214] p 604 A84-35652
- Axisymmetric approach and landing thrust reverser concepts Hot flow test results [AIAA PAPER 84-1178] p 696 A84-36955
- Performance investigation of a fan thrust reverser for a high by-pass turbofan engine [AIAA PAPER 84-1178] p 696 A84-36956
- Static internal performance evaluation of several thrust reversing concepts for 2D-CD nozzles [AIAA PAPER 84-1174] p 697 A84-37628
- Internal pressure distributions for a two-dimensional thrust-reversing nozzle operating at a free-stream Mach number of zero [NASA-TM-85655] p 107 N84-13161
- Effect of thrust reverser operation on the lateral-directional characteristics of a three-surface F-15 model at transonic speeds [NASA-TP-2234] p 107 N84-13165
- Reattachment of a three-dimensional, incompressible jet to an adjacent axisymmetric inclined surface [AD-A136288] p 383 N84-18584
- Test techniques for jet effects on fighter aircraft, p 528 N84-23589
- Aeropropulsive characteristics of nonaxisymmetric-nozzle thrust reversers at Mach numbers from 0 to 1.20 [NASA-TP-2306] p 581 N84-24538

SUBJECT INDEX

- Fabrication of titanium and its alloys for aircraft components p 378 A84-23829
Large titanium disc manufactured under the 65,000 metric ton press p 379 A84-23831
The role of titanium alloys in the history of jet engines p 373 A84-23832
- Recent development in titanium alloys p 373 A84-23833
- Machining of component parts of aircraft jet engine p 379 A84-23834
- The application of titanium alloys in jet engine components p 373 A84-23835
Concurrent superplastic forming/diffusion bonding of titanium p 549 A84-32684
Aerospace applications of SPF and SPF/DB --- superplastic forming with concurrent diffusion bonding p 501 A84-32685
- The mechanical properties of titanium P/M parts produced from superclean powders p 549 A84-32859
Influence of adiabatic shear bands on the fatigue strength of a titanium alloy p 914 A84-46513
Experimental studies on chemical reactivity and dimensional growth in machining of titanium alloys [ASME PAPER 84-GT-276] p 1006 A84-47038
Deformation and fatigue of aircraft structural alloys [AD-A133947] p 237 A84-14297
Effect of creep in titanium alloy Ti-6Al-4V at elevated temperature on aircraft design and flight test [NASA-TM-86033] p 385 A84-18685
The future for titanium and superalloys --- in aircraft engines [PNR-90175] p 550 A84-22742
Additionally compressed titanium fine cast components p 551 A84-23559
Superplastic transformation and diffusion welding of titanium alloys p 561 A84-23562
Journal of aeronautical materials (selected articles) [AD-A140181] p 572 A84-25611
Material characterization by strain rate controlled low cycle fatigue tests and by crack propagation velocity: Summary of test number M3 430300 [IMI-679] p 714 A84-27878
Stress-corrosion crack-growth study of titanium alloy Ti-6Al-4V exposed to Freon PCA and nitrogen tetroxide MON-1 p 801 A84-29923
Problems presented to engine builders by the recycling of metallic materials --- titanium and nickel alloys for aircraft engine parts p 997 A84-33482
Powder metallurgy for the economical manufacture of aeronautical components in titanium alloy [AD-B076255] p 998 A84-33562
- TOLERANCES (MECHANICS)**
Optimum estimation for accuracy of distance between mounting holes for aircraft equipment by Kalman filtering theory p 82 A84-12040
A probability study of the fatigue life of the compressor blades of gas-turbine engines p 216 A84-16964
Fracture, longevity, and damage tolerance of graphite/epoxy filamentary composite material p 236 A84-17411
The damage tolerance approach to the Canadair CL-600 p 288 A84-19672
Improved damage-tolerance analysis methodology p 917 A84-44516
Damage tolerance evaluation of aircraft components under spectrum loading p 873 A84-45029
- TOLERANCES (PHYSIOLOGY)**
Definitions of noise and noise pollution p 816 A84-29466
Annoyance caused by propeller airplane flyover noise [NASA-TP-2356] p 942 A84-32124
- TOLLMEIN-SCHLICHTING WAVES**
Excitation and growth of instabilities in three-dimensional stationary boundary layers p 11 A84-10184
Experimental studies of spontaneous and forced transition on an axisymmetric body [AIAA PAPER 84-0088] p 155 A84-17829
Excitation of Tollmein-Schlichting waves in the boundary layer on the vibrating surface of a swept wing of infinite span p 264 A84-21117
Sound emission during the scattering of Tollmein-Schlichting waves in a boundary layer on a nonuniform surface p 478 A84-28815
Wave interactions in swept-wing flows [AIAA PAPER 84-1678] p 659 A84-39320
Excitation of Tollmein-Schlichting waves in boundary layer at vibrating surface of infinite-span sweptback wing p 513 A84-22792
An analysis of wave interactions in swept-wing flows [NASA-CR-173723] p 666 A84-27681
- TOMAHAWK MISSILES**
Tomahawk test program [AIAA PAPER 83-2683] p 48 A84-12302

Terrain analysis procedure guide for built-up areas (report no. 13 in the ETL (Engineer Topographic Laboratories) series on guides for Army terrain analysts) [AD-A142918] p 932 A84-31768

TOPOLOGY

- Flow visualization and interpretation of visualization data for deflected thrust V/STOL nozzles [AIAA PAPER 84-0102] p 297 A84-21852
An automation of the topological description of the schematic arrangements of load-bearing structures p 920 A84-45717
Flow visualization and interpretation of visualization data for deflected thrust V/STOL nozzles [NASA-TM-83554] p 219 A84-14147

TORNADOES

- An aircraft encounter with a tornado p 487 A84-28251
Aeroelastic problems caused by tornadoes and their successful treatment with technologies that result from experiences of precedent intensive technologic modernizing [MBB-FE-294/S/PUB/110] p 809 A84-29253

TORQUE

- Flight measurements of hinged-plate wing-spoiler hinge moments --- dhc-6 Twin Otter series 100 aircraft [NASA-TM-84343] p 17 A84-10021
Application of advanced materials to rotating machines p 60 A84-10063
Determination of the static performance of a Cuyuna cc model UL-430RR engine [NASA-CR-175354] p 299 A84-16179
Preliminary method for estimating hinge moments of all-movable controls [AD-A139726] p 611 A84-24597
Helicopter anti-torque system using strakes [NASA-CASE-LAR-13233-1] p 975 A84-33400

TORQUE CONVERTERS

- All-purpose bidirectional four-quadrant controller p 60 A84-10070

TORQUEMETERS

- Improved accuracy magnetostrictive torquemeter [AIAA PAPER 84-1280] p 717 A84-37642
A quasi-phase torque meter p 920 A84-45700

TORSION

- The influence of different inflow models on the coupled flapping and torsion of helicopter rotor blades p 303 A84-19651
Flap-lag damping of an elastic rotor blade with torsion and dynamic inflow in hover from symbolically generated equations [AIAA PAPER 84-0989] p 619 A84-34909
The 'close' problem method and its application to the St. Venant torsion problem for a rod p 1007 A84-47092
Fuselage torsion of a CT4 aircraft [AD-A142753] p 879 A84-31114
Oscillations of elastic airplane due to wind gust p 880 A84-32087

TORSIONAL VIBRATION

- Frequency determination techniques for cantilevered plates with bending-torsion coupling p 378 A84-23368
Hub loads reduction by modification of blade torsional response p 876 A84-46342
Investigation of the effect of blade sweep on rotor vibratory loads [NASA-CR-166526] p 351 A84-18196
Fuselage torsion of a CT4 aircraft [AD-A142753] p 879 A84-31114
- TORUSES**
Experimental stress analysis of a thin walled pressurized torus loaded by contact with a plane --- dynamic response of aircraft tires p 239 A84-17443
Load deflection characteristics of inflated structures [NASA-CR-174585] p 86 A84-12028
High-power RF compressor [DE84-013118] p 928 A84-32664

TOUCHDOWN

- Ship motion pattern directed VTOL letdown guidance p 344 A84-25453

TRACKING PROBLEM

TOUGHNESS

- Comparison of toughened composite laminates using NASA standard damage tolerance tests p 802 A84-29972
Synthesis and toughness properties of resins and composites p 802 A84-29973

TOWED BODIES

- Optimal guidance for airborne cable pickup system --- for payload retrieval from hostile environment by use for aircraft-pulled towed vehicle [AIAA PAPER 84-1893] p 851 A84-43443

TOWERS

- A proposed whirl tower facility for the University of the Witwatersrand p 467 A84-28198
Establishment and discontinuance criteria for airport traffic control towers [AD-A133461] p 189 A84-15141

TOXIC HAZARDS

- Surviving airliner crashes - The record improves, but more research is needed p 517 A84-30949
Evaluation and prognosis of the toxicity of aeronautical materials at the time of fires p 548 A84-31200
Ozone survey of C-9A [AD-A130632] p 51 A84-10052

TOXICITY

- Aircraft maintenance and fire [GPO-24-247] p 4 A84-11112

TOXICOLOGY

- Statistical review of alcohol-involved aviation accidents [NTSB-SS-84-03] p 589 A84-25681

TRACE ELEMENTS

- Airborne tunable diode laser system for trace gas measurements p 881 A84-43305

TRACKING (POSITION)

- Concepts for beyond-visual-range engagement of multiple targets p 186 A84-16578
Kalman filter applications in highly maneuverable, intelligent target tracking p 238 A84-16579
Analysis and design considerations of hard limiters for LF and VLF navaid receivers p 675 A84-36914
Robust missile autopilot design using generalized singular optimal control technique [AIAA PAPER 84-1847] p 894 A84-43414
Range tracking concept for use of GPS at Canadian Forces Base Cold Lake p 857 A84-44476
Distributed sensor network [AD-A133250] p 255 A84-15903
Frequency encoded auditory display of the critical tracking task [NASA-TM-85869] p 531 A84-22558
Digital multivariable tracker control laws for the C-141-A Starlifter aircraft [AFIT/GE/EE/82D-47] p 610 A84-24533
In-flight accuracy and coverage tests of ESM- and ECM-systems p 1011 A84-34412

TRACKING FILTERS

- An X-band array signal processing radar for tracking targets at low elevation angles p 34 A84-10829
A Kalman filter application for position estimation of an airborne relay vehicle in the precision location strike system p 208 A84-16564
Maneuvering target tracking using bearing measurements p 186 A84-16580
Algorithm for the tracking of a maneuvering target in the case of measurement uncertainty p 425 A84-28061

- Position, velocity and acceleration estimates from the noisy radar measurements p 476 A84-28159
An optimal proportional-plus-integral/tracking control law for aircraft applications p 935 A84-44793
Application of a probabilistic tracking filter: A first evaluation with emphasis on air traffic control. Part 1: Evaluation results [NLR-TR-82088-U-PT-1] p 972 A84-33397
Application of a probabilistic tracking filter: A first evaluation with emphasis on air traffic control. Part 2: Live traffic samples [NLR-TR-82088-U-PT-2] p 972 A84-33398

TRACKING NETWORKS

- GPS translator application considerations for test ranges p 991 A84-46641
Distributed sensor network [AD-A133250] p 255 A84-15903

TRACKING PROBLEM

- The effect of design parameters on the tracking performance of high-gain error-actuated controllers p 252 A84-19153
A track correlation algorithm for multi-sensor integration p 421 A84-26741
Stochastic versus deterministic approach to the design of the control law of moving flight simulators p 813 A84-40767
Time-delay compensation in active control algorithms p 935 A84-44941

TRACKING RADAR

- Proceedings of the Workshop on Multivariable Control Systems
[AD-A139050] p 571 N84-24529
Multivariable control law theory p 609 N84-24530

TRACKING RADAR

Feasibility studies on trans-oceanic flights from Japan --- meteorological effects on balloons p 670 A84-38293

TRANSOCEANIC SYSTEMS

- Navigation - An overview (Invited Paper) p 35 A84-10866
Omega (Invited Paper) --- global navigation system p 35 A84-10868

TRANSONIC COMPRESSORS

- Experimental investigation of a simulated compressor airfoil trailing edge flowfield
[AIAA PAPER 84-0101] p 159 A84-17883
Unsteady losses in transonic compressors
[ASME PAPER 84-GT-183] p 954 A84-46984
Flow mechanism and experimental investigation of a rotating stall in transonic compressors
[NASA-TM-77373] p 178 N84-15122
Application of an inviscid-viscous interaction method to transonic compressor cascades p 300 N84-16190
Design of transonic compressor cascades for minimal shock losses and comparison with test results p 300 N84-16192
Experimental and theoretical studies of parietal viscous boundaries in a single stage transonic compressor p 301 N84-16206
The method of complex characteristics for design of transonic compressors p 661 N84-26659
Analysis of three-dimensional transonic compressors
[NASA-CR-166580] p 850 N84-32356

TRANSONIC FLIGHT

- The performance of a subsonic combat aircraft with transonic wing and maneuver flaps
[DGLR PAPER 82-101] p 45 A84-10570
Free-flight and wind-tunnel data for a generic fighter configuration p 152 A84-17401
Aeroelastic tailoring of high-aspect-ratio composite wings in the transonic regime p 52 N84-11119
Transonic configuration design p 121 N84-12081
Transonic configuration design (fighter) p 122 N84-12082
Computational procedures in transonic aerodynamic design
[NLR-MP-82020-U] p 179 N84-15131
Wave drag as the objective function in transonic fighter wing optimization
[NASA-TP-2265] p 272 N84-17127
Transonic equivalence rule with lift
[AD-A143591] p 966 N84-33389

TRANSONIC FLOW

- Unsteady viscous transonic flow computations using the LTRAN2-NLR code coupled with Green's lag-entrainment method p 7 A84-10095
Numerical simulation of turbulent trailing edge flows p 7 A84-10098
Transonic small disturbance calculations including entropy corrections p 8 A84-10103
The efficient solution of transonic wing flow fields p 8 A84-10104
Transonic flowfield computation using a modified shock-point operator p 8 A84-10105
A multigrid strongly implicit procedure for transonic potential flow problems p 9 A84-10126
Conservative full-potential calculations for axisymmetric, transonic flow p 10 A84-10129
Application of a finite element algorithm to the solution of steady transonic Euler equations p 10 A84-10133
Implicit, nonswitching, vector-oriented algorithm for steady transonic flow p 10 A84-10147
Analytical and experimental study of axisymmetric underexpanded jets p 11 A84-10504
Transonic flow around a profile with heat input via condensation p 11 A84-10562
Numerical design of a shockless transonic quasi-aircraft p 12 A84-11107
Adaptive grid relocation algorithms for transonic full potential calculations using one-dimensional or two-dimensional diffusion equation p 13 A84-11581
The use of computational fluid dynamics in the solution of a number of aerodynamic transonic flow problems p 15 A84-11855
Recent progress in the application of finite element methods to transonic flows p 15 A84-11856
Finite difference computation of wave drag and pressure on slender bodies of revolution at transonic speeds with zero-lift p 15 A84-12037
A prediction method for characteristics of cooled transonic turbines with low aspect ratio and high load p 59 A84-12043
Laser Doppler velocimeter measurements in unsteady, separated, transonic diffuser flows p 90 A84-13576
Transient decay times and mean values of unsteady oscillations in transonic flow p 90 A84-13589
Inlet flow distortion in turbomachinery - Comparison of theory and experiment in a transonic fan stage p 90 A84-13592
A subdomain decomposition technique as an alternative for transonic potential flow calculations around wing-fuselage configurations
[ONERA, TP NO. 1983-124] p 91 A84-13639

SUBJECT INDEX

- Computation of three-dimensional transonic inviscid flows on a wing by pseudo-unsteady resolution of the Euler equations
[ONERA, TP NO. 1983-125] p 91 A84-13640
A second-order Lagrangian-Eulerian method for computation of two-dimensional unsteady transonic flows
[ONERA, TP NO. 1983-126] p 91 A84-13641
Low-frequency transonic flows past a thin airfoil p 92 A84-14388
Computations of unsteady transonic aerodynamics using prescribed steady pressures
[AIAA PAPER 82-0956] p 92 A84-14736
Transonic flow over a convex corner with a free streamline p 93 A84-14888
Calculations of two-dimensional unsteady transonic flows over aerofoils p 94 A84-15260
Computation of three-dimensional viscous flows on transonic wings by boundary layer-inviscid flow interaction p 95 A84-15854
Calculation of transonic flows around wing-fuselage combination by a subdomain decomposition approach p 95 A84-15855
Mixed finite difference computation of external and internal transonic flow field of inlets p 150 A84-15914
Finite difference computation of the aerodynamic interference of wing-pylon-store combinations at transonic speeds p 151 A84-16839
Numerical computation of transonic flows over airfoils and cascades p 151 A84-16849
A mixed finite element method for solving transonic flow equations p 152 A84-16863
A theoretical and experimental investigation of a transonic projectile flowfield p 153 A84-17430
Nonunique solutions to the transonic potential flow equation p 153 A84-17448
Behavior of the flow through a numerically captured shock wave p 153 A84-17451
A block-structured finite element grid generation scheme for the analysis of three-dimensional transonic flows
[AIAA PAPER 84-0004] p 155 A84-17827
A finite volume method for two dimensional transonic potential flow through turbomachinery blade rows
[AIAA PAPER 84-0035] p 156 A84-17840
Numerical solution of the Euler equations for flow past an airfoil in ground effect p 156 A84-17847
Improvements in techniques for the numerical simulation of steady transonic flows
[AIAA PAPER 84-0089] p 158 A84-17874
Transonic flow calculations using a flux vector splitting method for the Euler equations
[AIAA PAPER 84-0090] p 158 A84-17875
Transonic shock interaction with a tangentially-injected turbulent boundary layer p 159 A84-17877
Subsonic/transonic prediction capabilities for nozzle/afterbody configurations p 162 A84-17942
Transonic turbulent separation on swept wings - A return to the direct formulation p 163 A84-17984
Numerical solutions of 2-D unsteady transonic flows using coupled potential-flow/boundary-layer methods
[AIAA PAPER 84-0268] p 164 A84-17987
Full-potential solutions for transonic flows about airfoils with oscillating flaps p 164 A84-18006
Transonic solutions for a multielement airfoil using the full-potential equation
[AIAA PAPER 84-0300] p 165 A84-18007
Transonic analysis of canted winglets
[AIAA PAPER 84-0302] p 165 A84-18009
Transonic CFD applications to engine/airframe integration p 197 A84-18052
Application of the Green's function method for 2- and 3-dimensional steady transonic flows
[AIAA PAPER 84-0425] p 167 A84-18085
A method for calculating subsonic and transonic flows over wings or wing-fuselage combinations with an allowance for viscous effects p 167 A84-18087
Calculation of unsteady three-dimensional subsonic/transonic inviscid flowfields by the method of characteristics
[AIAA PAPER 84-0440] p 168 A84-18095
Numerical simulation of the tip vortex off a low-aspect-ratio wing at transonic speed
[AIAA PAPER 84-0522] p 168 A84-18149
Second-order-accurate spatial differencing for the transonic small-disturbance equation
[AIAA PAPER 84-0091] p 172 A84-19230
Improved finite difference schemes for transonic potential calculations
[AIAA PAPER 84-0092] p 173 A84-19231

[ASME PAPER 84-GT-242] p 956 A84-47019
Evaluation of turbulence induced noise in coherent anti-Stokes Raman scattering
[NASA-CR-166544] p 322 N84-18015
Report by the Chairman of the Fluid Dynamics Panel
p 485 N84-21499

TURBULENCE METERS

- Clear air turbulence avoidance using an airborne microwave radiometer
[AIAA PAPER 84-0273] p 210 A84-17991
Unsteady hot-X-wire measurements in a schematic air intake
[AAAF PAPER NT 83-17] p 507 A84-32485

TURBULENT BOUNDARY LAYER

- The boundary layer on an axisymmetric body with and without spin
p 9 A84-10128
Computer solutions of Navier-Stokes equations for shock wave turbulent boundary layer interactions far away from the leading edge
p 88 A84-13266
Calculation of the boundary layer of profiles for flows with laminar and turbulent zones
p 92 A84-14264
Numerical computations of turbulence amplification in shock-wave interactions
p 239 A84-17427
Unsteady turbulent boundary layers in adverse pressure gradients
p 153 A84-17428
A theoretical and experimental investigation of a transonic projectile flowfield
p 153 A84-17430
Three-dimensional turbulent boundary-layer development on a fan rotor blade
p 153 A84-17437
Transonic shock interaction with a tangentially-injected turbulent boundary layer
[AIAA PAPER 84-0094] p 159 A84-17877
Effects of Mach number on upstream influence in sharp fin-induced shock wave turbulent boundary layer interaction
[AIAA PAPER 84-0095] p 159 A84-17878
Experimental studies on two dimensional shock boundary layer interactions
[AIAA PAPER 84-0099] p 159 A84-17881
The effect of a short region of concave curvature on a supersonic turbulent boundary layer
[AIAA PAPER 84-0169] p 161 A84-17927
Transonic turbulent separation on swept wings - A return to the direct formulation
[AIAA PAPER 84-0265] p 163 A84-17984
Performance of large-eddy breakup devices at post-transitional Reynolds numbers
[AIAA PAPER 84-0345] p 241 A84-18037
Optimization and application of riblets for turbulent drag reduction
[AIAA PAPER 84-0347] p 166 A84-18039
On the breakdown of the Crocco temperature-velocity relationship and the law of the wall in compressible two-dimensional turbulent boundary layers
p 170 A84-18351
Flowfield scaling of a swept compression corner interaction: A comparison of experiment and computation
[AIAA PAPER 84-0096] p 173 A84-19232
Turbulent flow near the trailing edge of a plate at zero angle of attack
p 260 A84-19553
Geometric characteristics of the separation of a turbulent boundary layer during the interaction with a normal shock in conical flows
p 260 A84-19555
The transonic interaction of a normal shock with a mildly separated turbulent boundary layer
p 261 A84-19593
Interaction between a turbulent planar plate boundary layer and a planar cylinder wake
p 264 A84-20843
Simulation of blunt-fin-induced shock wave and turbulent boundary-layer interaction
[AIAA PAPER 84-0457] p 266 A84-21301
Cylindrical and conical flow regimes of three-dimensional shock/boundary-layer interactions
p 266 A84-21505
A new turbulence closure model for boundary layer flows with strong adverse pressure gradients and separation
[AIAA PAPER 84-0175] p 313 A84-21854
Design of high-Reynolds-number flat-plate experiments in the NTF
[AIAA PAPER 84-0588] p 368 A84-25726
Separation criteria for three-dimensional boundary-layer calculations
p 474 A84-27145
Acoustic emission of structures excited by a turbulent boundary layer - Influence of excitation-field modeling
p 494 A84-28150
Noise intensity and spectrum in a turbulent boundary layer on a flat plate
p 494 A84-28806
The spectrum of spatial correlations of turbulent pressure pulsations at a wall at high Reynolds numbers
p 407 A84-28808
Shear-stress pulsations on a plate surface
p 478 A84-28809
Hot-wire investigation of an unseparated shock-wave/turbulent boundary-layer interaction
p 508 A84-32602

- Friction and heat transfer in laminar and turbulent boundary layers in the case of nonuniform supersonic flow past axisymmetric bodies
p 580 A84-35730
Injection into a turbulent boundary layer through different porous surfaces
p 715 A84-36499
A method for measuring skin friction drag on a flat plate in contaminated gas flows
p 646 A84-37943
Experimental study of the behavior of 3D-turbulent boundary layer in a simplified wing/body junction
[AIAA PAPER 84-1529] p 647 A84-37954
Numerical simulation of 3-D shock-turbulent boundary layer interaction generated by a sharp fin
[AIAA PAPER 84-1559] p 648 A84-37971
Flow visualization studies of a 3-D shock/boundary layer interaction in the presence of a non-uniform approach boundary layer
[AIAA PAPER 84-1560] p 648 A84-37972
Experimental and computational study of roughness effects at $M = 6$
[AIAA PAPER 84-1681] p 653 A84-38053
Turbulent boundary-layer relaxation with application to skin-friction drag reduction
p 655 A84-38827
The Baldwin-Lomax turbulence model for two-dimensional shock-wave/boundary-layer interactions
p 656 A84-38834
Similarity conditions for conical shockwave turbulent boundary-layer interactions
[AIAA PAPER 84-1557] p 657 A84-39301
The three-dimensional turbulence transport properties in the boundary layers of conical body configurations at Mach 3
[AIAA PAPER 84-1528] p 743 A84-40815
Turbulent boundary layer behind constant velocity shock including wall blowing effects
p 805 A84-40829
A hybrid explicit-implicit numerical algorithm for the three-dimensional compressible Navier-Stokes equations
p 743 A84-40831
The influence of surface compliance on the production of sound by a turbulent boundary layer
p 816 A84-41130
Radiative and convective heat transfer interactions in the three-dimensional compressible hypersonic turbulent layer on a sharp cone at an angle of attack
p 744 A84-41165
Structure of a high-Reynolds-number turbulent wake in supersonic flow
p 749 A84-41806
Determination of the parameters of a boundary layer on a rotating axisymmetric cone
p 752 A84-42526
The structure of turbulence in a supersonic shock-wave/boundary-layer interaction
p 830 A84-44635
New drag reduction methods for transport aircraft
p 833 A84-44974
Numerical simulation of unsteady flow in a ramjet inlet
p 836 A84-45038
Effect of Reynolds number on upper cowl flow separation
p 837 A84-45051
The interaction of a shock wave and a turbulent boundary layer and its control
[ONERA, TP NO. 1984-27] p 837 A84-45177
Similarity criteria for the spectra of wall pressure fluctuations in a turbulent boundary layer
p 921 A84-45983
Two dimensional turbulent boundary layers over rigid and moving swept wavy surfaces
[AIAA PAPER 84-1530] p 843 A84-46110
Experimental studies of quasi-two-dimensional and three-dimensional viscous interaction regions induced by skewed-shock and swept-shock boundary layer interaction
[AIAA PAPER 84-1677] p 845 A84-46126
An experimental study of the compressor rotor blade boundary layer
[ASME PAPER 84-GT-193] p 954 A84-46991
The effects of freestream turbulence on the profile boundary layer and losses in a compressor cascade
[ASME PAPER 84-GT-242] p 956 A84-47019
Airfoil heat transfer calculation using a low Reynolds number version of a two-equation turbulence model
[ASME PAPER 84-GT-261] p 1005 A84-47032
A study of transonic normal shock wave-turbulent boundary layer interactions in axisymmetric internal flow
p 16 N84-10015
Transonic airfoil development
p 95 N84-12076
A theoretical and experimental investigation of a transonic projectile flow field
[AD-A131938] p 97 N84-12094
Study of turbulent flow in a wing-fuselage type juncture
p 176 N84-14128
A model of the trailing edge separation on an airfoil
[AD-A126703] p 179 N84-15125
Turbulent shear flows --- conferences
[VKI-LS-1983-03] p 245 N84-15448
Doppler lidar signal and turbulence study
[NASA-CR-170976] p 318 N84-17574

- An experimental study of the properties of surface pressure fluctuations in strong adverse pressure gradient turbulent boundary layers
[NASA-CR-175410] p 410 N84-20488
The present calculation method of adhering layers on aircraft wings
[AD-A137585] p 411 N84-20496
Aerodynamic sound generation by turbulent boundary layer flow along solid and compliant walls
[MPIS-116/1983] p 566 N84-23239
Nonadiabatic model wall effects on transonic airfoil performance in a cryogenic wind tunnel
p 562 N84-23579
The generation of higher levels of turbulence in the test section of the high speed cascade wind tunnel at Brunswick for simulation of turbomachinery conditions
[ESA-TT-815] p 586 N84-25654
Three-dimensional turbulent boundary layers at bielliptical bodies in stream of compressible gas at some angle of attack
p 725 N84-26936
On the evaluation of boundary layer measurements on boat-tailed bodies of revolution in axisymmetric compressible subsonic flow
[DFVLR-FB-84-09] p 728 N84-28010
Experimental studies of flow separation of three airfoils at low speeds
[NASA-CR-3530] p 754 N84-28736
Numerical simulation of boundary-layer transition
[NASA-TM-85984] p 756 N84-28746
Three-dimensional unsteady viscous flow analysis over airfoil sections
[NASA-CR-172368] p 808 N84-29152
Interference drag in a simulated wing-fuselage juncture
[NASA-CR-38111] p 758 N84-29853
Calculation of boundary layers of oscillating airfoils
[NASA-TM-85943] p 926 N84-31554
Aerodynamic heating computations for projectiles. Volume 2: Swept wing calculations using the planar version of the ABRES shape change code (PLNRASCC)
[AD-A143253] p 850 N84-32360
- TURBULENT FLOW**
Measurements of attached and separated turbulent flows in the trailing-edge regions of airfoils
p 7 A84-10097
Numerical simulation of turbulent trailing edge flows
p 7 A84-10098
Numerical study of the turbulent flow past an airfoil with trailing edge separation
p 10 A84-10134
Applicability of the independence principle to subsonic turbulent flow over a swept rearward-facing step
p 10 A84-10148
Nose shape effects on turbulence in the separated and reattached flow over blunt flat plates
p 93 A84-14754
The engineering computational method for the pressure and heat transfer distribution of supersonic turbulent flow at a two-dimensional compression corner
p 94 A84-15259
Experiments and computation on two-dimensional turbulent flow over a backward facing step --- for solid-fueled ramjets
[AIAA PAPER 84-0013] p 155 A84-17832
Calculation of steady and oscillating airfoil flow fields via the Navier Stokes equations

TURBULENT MIXING

Investigation of mixing in a turbofan exhaust duct. I
Analysis and computational procedure

p 329 A84-23361

An experimental study of a vortex/mixing-layer
interaction

[AIAA PAPER 84-1543] p 660 A84-39425

Shear layer mixing for low emission gas turbine primary
zones

[ASME PAPER 84-GT-13] p 980 A84-46883

Investigation of axisymmetric confined turbulent jet
mixing in the near region with adverse pressure gradient

p 104 N84-13148

Mach number and density effects in the mixing of
supersonic jets

p 512 N84-22628

A study of the fundamental problems of combustion in
the combustion chambers of turbojets using a tubular
reactor

p 616 N84-24759

An experimental investigation of gas jets in confined
swirling air flow

[NASA-CR-3832] p 988 N84-33412

TURBULENT WAKES

Three-dimensional wake of a swept wing

[ONERA, TP NO. 1983-9] p 8 A84-10102

The structure of a two-dimensional, supersonic, high
Reynolds number turbulent wake

p 170 A84-18352

The turbulent wake behind an axisymmetric body and
its interaction with the external turbulence

p 170 A84-18358

Turbulent flow near the trailing edge of a plate at zero
angle of attack

p 260 A84-19553

Disturbance of a planar turbulent wake by a compression
shock

p 263 A84-20841

Periodic vortex shedding in the supersonic wake of a
planar plate

p 263 A84-20842

The structure of the large eddies in fully developed
turbulent shear flows. II - The plane wake

p 266 A84-21393

Formation of coherent structures in a turbulent wake
under acoustic excitation

p 378 A84-23319

Velocity characteristics in the turbulent near wakes of
confined axisymmetric bluff bodies

p 403 A84-26883

Pressure and velocity fields induced by vortex shedding
in a turbulent wake

p 406 A84-28147

A conditional-sampling study of the interaction of two
turbulent wakes

p 557 A84-32600

First experimental evidence of vortex splitting

p 580 A84-35876

Measurements of the 3D turbulent flow behind a
propeller in a shear flow

[AIAA PAPER 84-1676] p 653 A84-38052

Numerical simulation of axisymmetric base flow on
tactical missiles with propulsive jet

[AIAA PAPER 84-1658] p 658 A84-39307

Jet, wake and wall jet similarity solutions using a
k-epsilon turbulence model

[AIAA PAPER 84-1523] p 659 A84-39319

Structure of a high-Reynolds-number turbulent wake in
supersonic flow

p 749 A84-41806

Unsteady vortical wakes over a prolate spheroid

[AIAA PAPER 84-0419] p 845 A84-46120

Experimental research on helicopter fuselage and rotor
hub wake turbulence

p 846 A84-46384

Acoustic streaming as a mechanism of the
Ranque-Hilsch effect

p 96 N84-12088

Three-dimensional wake of a swept wing

p 245 N84-15458

TURNING FLIGHT

Flight dynamics of rotorcraft in steep high-g turns

p 225 A84-17402

Bank-to-turn guidance performance analysis with
in-flight radome error compensation

[AIAA PAPER 84-1889] p 855 A84-43480

Suboptimal missile evasion through a sensitivity analysis
of proportional guidance to target evasion maneuvers

[AD-A136803] p 352 N84-19338

Minimum time turns with direct sideforce

[AD-A136958] p 352 N84-19342

Lecture notes on the principles and practice of airplane
performance prediction. Part 2: Point-performance in
steady symmetric and unsymmetric flight

[VTH-LR-385-VOL-2] p 353 N84-19346

TURRET

A formulation and analysis of combat games

[NASA-TM-85927] p 542 N84-22585

TWISTED WINGS

Design of a forward swept wing fighter aircraft

p 681 A84-38407

Automated coordinate measuring machine to measure
twist and contour of main rotor blades at Bell Helicopter
Textron

p 923 A84-46347

TWISTING

An analysis of rotor blade twist variables associated with
different Euler sequences and pre-twist treatments

[NASA-TM-84394] p 686 N84-26693

TWO BODY PROBLEM

Ballistic orbital motion in a rotating atmosphere

[AAS PAPER 83-416] p 547 A84-30593

TWO DIMENSIONAL BODIES

Well posedness of a certain formulation of the problem
of contouring a Laval nozzle

p 641 A84-37089

The minimum induced drag, longitudinal trim and static
longitudinal stability of two-surface and three-surface
airplanes

[AIAA PAPER 84-2164] p 785 A84-41337

On the aerodynamic characteristics of two- and
three-dimensional concave bodies

p 838 A84-45534

The effect of the nonsymmetry of a plane supersonic
flow of a nonviscous gas on the characteristics of a plane
nozzle under static conditions

p 960 A84-47083

The design and operational development of
self-streamlining 2-dimensional flexible walled test
sections

[NASA-CR-172328] p 510 N84-22534

TWO DIMENSIONAL BOUNDARY LAYER

Supersonic compressive ramp without laminar
boundary-layer separation

p 153 A84-17429

The effect of a short region of concave curvature on a
supersonic turbulent boundary layer

[AIAA PAPER 84-0169] p 161 A84-17927

On the breakdown of the Crocco temperature-velocity
relationship and the law of the wall in compressible
two-dimensional turbulent boundary layers

p 170 A84-18351

Decreasing the side wall contamination in wind
tunnels

p 306 A84-20043

A new turbulence closure model for boundary layer flows
with strong adverse pressure gradients and separation

[AIAA PAPER 84-0175] p 313 A84-21854

Two dimensional turbulent boundary layers over rigid
and moving swept wavy surfaces

[AIAA PAPER 84-1530] p 843 A84-46110

The boundary layer on compressor cascade blades

[NASA-CR-173514] p 623 N84-25001

Solution of 3-dimensional time-dependent viscous flows.
Part 3: Application to turbulent and unsteady flows

[NASA-CR-166565-PT-3] p 726 N84-27003

TWO DIMENSIONAL FLOW

A direct method for the solution of unsteady
two-dimensional incompressible Navier-Stokes equations

p 5 A84-10078

A multigrid strongly implicit procedure for transonic
potential flow problems

p 9 A84-10126

Adaptive grid relocation algorithms for transonic full
potential calculations using one-dimensional or
two-dimensional diffusion equation

p 13 A84-11581

A second-order Lagrangian-Eulerian method for
computation of two-dimensional unsteady transonic
flows

[ONERA, TP NO. 1983-126] p 91 A84-13841

Calculations of two-dimensional unsteady transonic
flows over aerofoils

p 94 A84-15260

Sail theory

p 152 A84-16928

Rule of forbidden signals in a two-dimensional
supersonic compressor cascade

p 154 A84-17455

Experiments and computation on two-dimensional
turbulent flow over a backward facing step -- for
solid-fueled ramjets

[AIAA PAPER 84-0013] p 155 A84-17832

A finite volume method for two dimensional transonic
potential flow through turbomachinery blade rows

[AIAA PAPER 84-0035] p 156 A84-17840

Experimental studies on two dimensional shock
boundary layer interactions

[AIAA PAPER 84-0099] p 159 A84-17881

Effect of sidewall suction on flow in two-dimensional
wind tunnels

[AIAA PAPER 84-0242] p 162 A84-17970

Application of the Green's function method for 2- and
3-dimensional steady transonic flows

[AIAA PAPER 84-0425] p 167 A84-18085

The structure of a two-dimensional, supersonic, high
Reynolds number turbulent wake

p 170 A84-18352

Nonlinear aerodynamic effects on bodies in supersonic
flow

[AIAA PAPER 84-0231] p 174 A84-19245

The inverse problem for supersonic airfoils

p 267 A84-21520

Computational models of the interaction between
vortices and the permeable boundary of a subsonic flow
region

p 267 A84-21732

Implicit treatment of the unsteady full potential equation
in conservation form

[AIAA PAPER 84-0262] p 313 A84-21857

Airfoil computation at high angles of attack, inviscid and
viscous phenomena

[AIAA PAPER 84-0524] p 268 A84-21876

Numerical solution of hypersonic flow near leading edge
of flat plate

p 329 A84-23903

Two-dimensional wake characteristics of inlet vanes for
open-circuit wind tunnels

[AIAA PAPER 84-0604] p 369 A84-25729

The stream-line iteration method for computing the
two-dimensional transonic flow in orthogonal stream-line
coordinates

p 334 A84-25990

The boundary layer induced by a convected
two-dimensional vortex

p 403 A84-26876

Numerical simulation of two-dimensional inlet
flowfields

p 404 A84-26954

Navier-Stokes solutions for two-dimensional subsonic
base flow

p 407 A84-29474

Two-dimensional wind-tunnel interference from
measurements on two contours

p 574 A84-34459

Experimental investigation of wall interference and
two-dimensionality of the flow in a transonic airfoil wind
tunnel

p 576 A84-35017

Sidewall boundary layer corrections in subsonic,
two-dimensional airfoil/hydrofoil testing

[AIAA PAPER 84-1366] p 620 A84-35195

A new and improved computational technique for
two-dimensional, unsteady, compressible flows

p 639 A84-36484

Application of 2D and 3D criteria to the calculation of
the transition and the boundary layer of sweptback
wings

[ONERA, TP NO. 1984-16] p 642 A84-37535

Compressible potential flows in arbitrary
two-dimensional and axially symmetric slender nozzles

p 645 A84-37905

An adaptive grid scheme applied to two-dimensional
airfoil problems

[AIAA PAPER 84-1608] p 649 A84-38003

An analytical model for the vorticity associated with a
transverse jet

[AIAA PAPER 84-1662] p 652 A84-38042

Compressor cascade optimization based on inverse
boundary layer method and inverse cascade method. I -
An inverse cascade method for incompressible
two-dimensional potential flow

p 653 A84-38081

Effects of small-scale, high intensity inlet turbulence on
flow in a two-dimensional diffuser

p 654 A84-38360

Flow analysis in the exit plane of high turning angle
turbine blades

p 655 A84-38485

The effects of gusts on the fluctuating airloads of airfoils
in transonic flow

[AIAA PAPER 84-1580] p 659 A84-39315

A numerical study of the two- and three-dimensional
unsteady Navier-Stokes equations in velocity-vorticity
variables using compact difference schemes

p 741 A84-39970

Numerical simulation of two-dimensional unsteady
transonic flows using the full-potential equation

p 743 A84-40828

Separation model for two-dimensional airfoils in
transonic flow

p 743 A84-40832

Effect of upstream parallel flow on two-dimensional
wind-tunnel tests

[AIAA PAPER 84-2153] p 745 A84-41331

Unsteady aerodynamics of articulate lifting bodies

[AIAA PAPER 84-2184] p 746 A84-41343

Contouring of two-dimensional and axisymmetric
supersonic channels realizing discontinuous parameters
at the outlet and flow leveling

p 753 A84-42536

Vortex induced lift on two dimensional low speed
wings

[AD-A146318] p 827 A84-44133

Aerodynamic characteristics of a two-dimensional
moving spoiler in subsonic and transonic flow

p 829 A84-44511

Numerical simulation of unsteady flow in a ramjet inlet

p 836 A84-45038

Characteristics of flow past an air intake with a sharp
cowl edge at Mach less than 1

p 839 A84-45705

Transonic cascade flow analysis using viscous/inviscid
coupling concepts

[AIAA PAPER 84-2159] p 843 A84-46103

A method for the experimental investigation of plane
and axisymmetric nonswirling flows by means of a
cylindrical pressure head over a wide range of Mach
numbers

p 958 A84-47058

Two-dimensional gas-particle flow past thin bodies

p 962 A84-47777

Nonlinear aerodynamic effects on bodies in supersonic
flow

p 963 A84-49094

A new method of estimating wind tunnel wall interference
in the unsteady two-dimensional flow

[AD-A130475] p 19 N84-10029

Numerical modeling of turbulent flow in a channel

[NASA-CR-168278] p 133 N84-13189

Flow mechanism and experimental investigation of a
rotating stall in transonic compressors

[NASA-TM-77373] p 178 N84-15122

Ice formation in aircraft

p 179 N84-15130

Compressor rotor aerodynamics

p 302 N84-16210

[NASA-CR-166491] p 18 A84-10024
V/STOL (Vertical/Short Takeoff and Landing) low speed and transition equivalent systems analysis
[AD-A131955] p 122 A84-12156
Flow visualization and interpretation of visualization data for deflected thrust V/STOL nozzles
[NASA-TM-83554] p 219 A84-14147
Analytical study of blowing boundary-layer control for subsonic V/STOL inlets
[NASA-TM-83576] p 270 A84-16141
A lifting surface computer code with jet-in-crossflow interference effects. Volume 1: Theoretical description
[NASA-CR-166524] p 271 A84-16147
An investigation of turbulence mechanisms in V/STOL upwash flow fields
[AD-A137775] p 411 A84-20498
V/STOL concepts in the United States: Past, present, and future
[NASA-TM-85938] p 509 A84-22532
Assessment of aerodynamic performance of V/STOL and STOVL fighter aircraft
[NASA-TM-85937] p 510 A84-22536
V/STOL maneuverability and control
[NASA-TM-85939] p 542 A84-22584
Use of helicopters to develop operational concepts for V/STOL (vertical and short takeoff and landing) aircraft in naval missions
[AD-A139354] p 529 A84-23624
V/STOL model fan stage rig design report
[NASA-CR-174688] p 538 A84-23629
High performance composites and adhesives for V/STOL aircraft
[AD-A139168] p 552 A84-23702
V/STOL wind-tunnel testing
[NASA-TM-85936] p 571 A84-24528
Tandem fan applications in advanced STOVL fighter configurations
[NASA-TM-83689] p 605 A84-24579
Supersonic STOVL aircraft with turbine bypass/turbo-compressor engines
[NASA-TM-83686] p 606 A84-24582
Special Course on V/STOL Aerodynamics
[AGARD-R-710] p 573 A84-25625
The influence of V/STOL on wing design and tailplane design
p 597 A84-25627
V/STOL concepts in the United States: Past, present, and future
p 597 A84-25628
V/STOL propulsion system aerodynamics
p 608 A84-25630
Jet flowfields
p 583 A84-25631
V/STOL maneuverability and control
p 611 A84-25632
V/STOL wind-tunnel testing
p 583 A84-25633
Ground based testing without wind tunnels
p 598 A84-25634
Aerodynamics of V/STOL aircraft: Performance assessment
p 584 A84-25635
Assessment of aerodynamic performance of V/STOL and STOVL fighter aircraft
p 584 A84-25636
- Notes on special flight aspects, such as STO, ski-jump and ODM
p 598 A84-25637
A numerical study of the controlled flow tunnel for a high lift model
p 611 A84-25721
Advanced prediction technique for the low speed aerodynamics of V/STOL aircraft. Volume 1: Technical discussion
[NASA-CR-166442-VOL-1] p 662 A84-26662
Study of aerodynamic technology for single-cruise-engine VSTOL fighter/attack aircraft, phase 1
[NASA-CR-166268] p 668 A84-27693
Study of aerodynamic technology for single-cruise engine V/STOL fighter/attack aircraft
[NASA-CR-166271] p 754 A84-28737
Study of aerodynamic technology for single-cruise-engine V/STOL fighter/attack aircraft
[NASA-CR-166270] p 754 A84-28738
Study of aerodynamic technology for single-cruise-engine V/STOL fighter/attack aircraft
[NASA-CR-166269] p 765 A84-28767
- VACUUM EFFECTS**
The density distribution of a supersonic jet issuing into a vacuum from a nozzle with a beveled exit section
p 261 A84-19571
- VALIDITY**
The validity conditions in three-dimensional supersonic linear aerodynamics
p 505 A84-31122
- VALVES**
Investigations of transonic Ludwig tubes. II - Starting process in the case of a downstream valve
p 466 A84-26949
Valve losses - Crash fires
p 481 A84-29582
- VANELESS DIFFUSERS**
Experimental study of centrifugal impeller discharge flow in vaneless and vaned diffusers
p 505 A84-31290
Static pressure recovery characteristics of some radial vaneless diffusers
p 720 A84-38484
A theoretical model for rotating stall in the vaneless diffuser of a centrifugal compressor
[ASME PAPER 84-GT-204] p 955 A84-46997
A new diffuser mapping technique
[ASME PAPER 84-GT-237] p 956 A84-47015
- VANES**
Two-dimensional wake characteristics of inlet vanes for open-circuit wind tunnels
[AIAA PAPER 84-0604] p 369 A84-25729
Oxide dispersion strengthened materials in advanced gas turbine engines - Inconel alloy MA 754 vanes
p 471 A84-28338
Ceramic application in gas turbine engines
[SAE PAPER 831520] p 451 A84-29463
First stage stator vane unsteady aerodynamic response in a multi-stage compressor
[AIAA PAPER 84-1209] p 643 A84-37634
The effect of blade tip vanes on helicopter rotor performance
p 657 A84-38899
Vane stagger angle and camber effects in fan noise generation
p 779 A84-40833
A computer aided design method for vaned diffusers in centrifugal compressors
[ASME PAPER 84-GT-83] p 1002 A84-46925
Turbine heat flux measurements - Influence of slot injection on vane trailing edge heat transfer and influence of rotor on vane heat transfer
[ASME PAPER 84-GT-175] p 1004 A84-46977
Hot gas APU starter for advanced aircraft applications
p 131 A84-12178
Study of stator-vane fluctuating pressures in a turbofan engine for static and flight tests
[NASA-TP-2217] p 496 A84-22363
Investigation of the effects of pressure gradient, temperature and wall temperature ratio on the stagnation point heat transfer for circular cylinders and gas turbine vanes
[NASA-CR-174667] p 539 A84-23649
Deposition of Na₂SO₄ from salt-seeded combustion gases of a high velocity burner rig
[NASA-TM-83751] p 926 A84-31558
Nonlinear analysis for high-temperature composites: Turbine blades/vanes
p 927 A84-31699
- VAPOR DEPOSITION**
Electron Beam Physical Vapor Deposition process for coating gas turbine airfoils
p 798 A84-42652
Materials research for advanced inertial instrumentation. Task 2: Gas bearing material development
[AD-A130471] p 42 A84-10044
Deposition of Na₂SO₄ from salt-seeded combustion gases of a high velocity burner rig
[NASA-TM-83751] p 926 A84-31558
- VAPOR PHASES**
Vapor phase aluminizing to protect turbine airfoils
p 798 A84-42653
- VARIABLE CYCLE ENGINES**
Backup control for variable cycle engine
[SAE PAPER 831475] p 450 A84-29454
The hybrid fan vectored thrust engine
[SAE PAPER 831496] p 452 A84-29534
Convertible fan/shaft engine demonstration
p 892 A84-46357
- VARIABLE GEOMETRY STRUCTURES**
Variable geometry airfoils using inflatable surfaces
[AIAA PAPER 84-0072] p 157 A84-17860
Axial feedback in supersonic compressor stages with constant and variable impeller geometry
[DGLR PAPER 83-151] p 408 A84-29688
Design and performance evaluation of a two-position variable geometry turbofan combustor
[AIAA PAPER 84-1171] p 695 A84-36953
Laminar interaction processes at variable-geometry wings in supersonic flow
p 644 A84-37751
Variable wing camber control for civil transport aircraft
p 869 A84-44955
Design parameters and performance of two-dimensional, asymmetric, 'sliding block', variable Mach number, supersonic nozzles
p 845 A84-46192
Variable stator radial turbine
[NASA-CR-174663] p 536 A84-22568
- VARIABLE SWEEP WINGS**
Applying slender wing benefits to military aircraft
p 842 A84-45956
Application of near-term technology to a Mach 2.0 variable-sweep-wing, supersonic-cruise executive jet
[NASA-CR-172321] p 529 A84-23621
- VARIATIONAL PRINCIPLES**
A second variational theory for optimal periodic processes
p 491 A84-28864
- VAX-11 SERIES COMPUTERS**
Development of real-time ATC simulation facility
p 73 A84-11106
- VECTOR ANALYSIS**
A vectorized solution for incompressible flow
[AIAA PAPER 84-1534] p 718 A84-37956
Implementation and performance of algorithms on a vector calculator
[SNIAS-832-111-104] p 734 A84-28519
- VECTORS (MATHEMATICS)**
Implicit, nonswitching, vector-oriented algorithm for steady transonic flow
p 10 A84-10147
Systematic computer aided control design
p 67 A84-10100
- VELOCITY**
Calculation of the pressure distribution on a pitching airfoil with application to the Darrieus rotor
[DE84-013571] p 851 A84-32363
Constant speed drive with compensation using differential gears
[AD-D011156] p 1010 A84-33812
- VELOCITY DISTRIBUTION**
Three-dimensional turbulent boundary-layer development on a fan rotor blade
p 153 A84-17437
Structure of self-excited oscillations in transonic diffuser flows
[AIAA PAPER 84-1636] p 651 A84-38023
Preliminary study on forward loaded cascades designed with inverse method for low pressure turbine
[ASME PAPER 84-GT-65] p 952 A84-46912
Experience with an integrated centrifugal compressor design procedure
[ASME PAPER 84-GT-249] p 957 A84-47025
The break-up mechanism of a streamwise directed vortex
p 102 A84-12123
Design procedures for compressor blades
[NASA-TM-77085] p 246 A84-15552
Remarks on the layout of the subsonic free jet wind tunnels
[NASA-TM-77326] p 370 A84-18214
Definition, sources and lowest possible levels of wind-tunnel turbulence
p 562 A84-23576
Natural laminar flow experiments on modern airplane surfaces
p 662 A84-26660
[NASA-TP-2256] p 662 A84-26660
A fundamental study of relation between the velocity fields far upstream of, at and far downstream of a rotor disk in a shear flow --- wind turbine flow
[FFA-136] p 726 A84-27006
Wake profile measurements of fixed and oscillating flaps
[NASA-CR-166602] p 967 A84-34428
Laser velocimeter measurements of dynamic stall --- conducted in the Ames two foot wind tunnel
[NASA-CR-166603] p 967 A84-34429
- VELOCITY MEASUREMENT**
Airspeed measurements
p 206 A84-16552
Flow improvements in the NASA Langley 4- by 7-meter tunnel circuit
[AIAA PAPER 84-0603] p 330 A84-24191

- Velocity characteristics in the turbulent near wakes of confined axisymmetric bluff bodies p 403 A84-26883
Compact, pulsed LDA for airborne and windtunnel applications p 478 A84-28730
Profile drag from laser-Doppler velocimeter measurement p 575 A84-34467
Infra-red laser velocimetry p 600 A84-36299
Laser Doppler velocimeter measurement in the tip region of a compressor rotor
[AIAA PAPER 84-1602] p 658 A84-39304
LDV measurements of three-dimensional flow development in a curved rectangular duct with inlet shear profile
[AIAA PAPER 84-1601] p 844 A84-46114
Flow in the inducer of a centrifugal compressor measured with a laser velocimeter
[ASME PAPER 84-GT-74] p 1002 A84-46919
Flow improvements in the circuit of the Langley 4- by 7-meter tunnel
[NASA-TM-85662] p 177 A84-15117
A laser velocimeter system for large-scale aerodynamic testing
[NASA-TM-84393] p 270 A84-16144
Computer programs for helicopter high speed flight analysis
[AD-A136376] p 350 A84-18191
Application of laser velocimetry to unsteady flows in large scale high speed tunnels
[NASA-CR-166575] p 412 A84-21511
Particle sizing in a fuel rich airbreathing engine combustor p 547 A84-22634
Experimental investigation of shock-cell noise reduction for dual-stream nozzles in simulated flight comprehensive data report. Volume 2: Laser velocimeter data, static pressures and shadowgraph photos
[NASA-CR-168336-VOL-2] p 567 A84-24324
An experimental and theoretical analysis of the aerodynamic characteristics of a biplane-winglet configuration
[NASA-TM-85815] p 772 A84-28779
An experimental and theoretical investigation of deposition patterns from an agricultural airplane
[NASA-TP-2348] p 965 A84-33379
Wake profile measurements of fixed and oscillating flaps
[NASA-CR-166602] p 967 A84-34428
- VENTILATION**
Experimental investigation of curvature effects on ventilated wall jets p 10 A84-10131
Experimental performance evaluation of ventilated mixers - A new mixer concept for high-bypass turbofan engines p 891 A84-45958
Effects of ventilation and panel properties on temperature rise from aircraft fires
[DOT/FAA/CT-TN83/63] p 280 A84-16157
Prediction of resonance frequencies for ventilated wall wind tunnels p 567 A84-23580
- VERTEBRAL COLUMN**
Design and development of an automatically controlled variable-load energy absorber
[AD-A142683] p 774 A84-29868
- VERTICAL AIR CURRENTS**
Analysis of aircraft control strategies for microburst encounter --- low altitude wind shear
[AIAA PAPER 84-0238] p 226 A84-17967
The numerical computation of airplane response to arbitrary vertical gust distributions
[AIAA PAPER 84-2075] p 786 A84-42331
- VERTICAL FLIGHT**
Airspeed measurements p 206 A84-16552
A lifting line theory for curved helicopter blades in hovering and axial flight p 261 A84-19655
Generation and evaluation of near-optimum vertical flight profiles p 348 A84-25485
Operational aspects of the integrated vertical flight path and speed control system
[SAE PAPER 831420] p 458 A84-29483
Optimal symmetric flight with an intermediate vehicle model p 291 A84-16117
Optimal symmetric flight with an intermediate vehicle model
[NASA-CR-173181] p 292 A84-16167
- VERTICAL LANDING**
The anelastic compliant rotor - An analytic and experimental investigation p 287 A84-19652
- VERTICAL MOTION**
System modeling and identification of equivalent systems with and without compensating time delay for control-augmented aircraft
[DFVLR-FB-83-36] p 596 A84-24570
- VERTICAL ORIENTATION**
Time controlled descent guidance algorithm for simulation of advanced ATC systems
[NASA-TM-84373] p 42 A84-10043
- Utilization of double integration methodology to determine an aircraft's vertical displacement
[AD-P002681] p 447 A84-20818
- VERTICAL TAKEOFF**
The anelastic compliant rotor - An analytic and experimental investigation p 287 A84-19652
Aerodynamics of V/STOL aircraft: Performance assessment p 584 A84-25635
Calculation of vertical and ramp-assisted takeoffs for supersonic cruise fighters
[NASA-TM-85818] p 662 A84-26668
- VERTICAL TAKEOFF AIRCRAFT**
Jet trajectories and surface pressures induced on a body of revolution with various dual jet configurations p 12 A84-11049
The potential impact of technology on VTOL utilization (The Third Nikolsky Lecture) p 257 A84-19741
Ship motion pattern directed VTOL landing guidance p 344 A84-25453
VTOL controls for shipboard operations
[SAE PAPER 831428] p 458 A84-29530
The Joint Services Advanced Vertical Lift Aircraft (JVX) propulsion system p 452 A84-29535
Research-technology needs for civil helicopters
[SAE PAPER 831557] p 436 A84-29642
VTOL aircraft control output tracking sensitivity design p 541 A84-32291
An experimental investigation of VTOL flying qualities requirements in shipboard landings p 609 A84-34453
Perturbation analysis of optimal integral controls p 629 A84-36131
Surface pressures on a flat plate with dual jet configurations p 646 A84-37932
Ground-simulation investigation of VTOL instrument flight rules airworthiness criteria
[AIAA PAPER 84-2105] p 760 A84-42353
The design of a turbofan VTOL aircraft for military applications p 865 A84-43891
A variable structure approach to robust control of VTOL aircraft p 900 A84-45612
The role of human factors in VTOL aircraft display technology p 979 A84-48720
Nonlinear control of mismatched uncertain linear systems and application to control of aircraft p 989 A84-49186
The integration of flight and engine control for VSTOL aircraft p 137 A84-12070
Assessment of aerodynamic performance of V/STOL and STOVL fighter aircraft
[NASA-TM-85837] p 510 A84-22536
Independent cost estimates: A case study joint vertical lift aircraft (JVX) program
[AD-P002797] p 568 A84-23343
Axisymmetric thrust augmenting ejector with discrete primary air slot nozzles
[AD-D011129] p 893 A84-32386
- VERTIGO**
Using the Peripheral Vision Horizon Display
[SAE PAPER 831473] p 446 A84-29505
- VERY HIGH FREQUENCIES**
A voice-compatible data link system on the aeronautical VHF band p 112 A84-14313
Expendable jammers prove indispensable p 970 A84-49194
- VERY HIGH FREQUENCY RADIO EQUIPMENT**
Interface control document for AN/ARC-186 VHF-AM/FM radio
[AD-A136939] p 386 A84-19679
- VERY LARGE SCALE INTEGRATION**
Application of VLSI to strapdown p 207 A84-16557
New technologies and their logistics effects on integrated CNI avionics --- Communication Navigation Identification p 187 A84-16581
Algorithm implementation in a tactical communication brassboard processor p 421 A84-26742
Directions in avionic data distribution systems p 441 A84-26753
- VERY LOW FREQUENCIES**
Omega (Invited Paper) --- global navigation system p 35 A84-10868
VLF data for aircraft navigation based on an extended Kalman filter design p 188 A84-18627
Experimental determination of the propagation velocity of VLF signals of the Omega navigation system on the basis of phase measurements p 519 A84-32145
East-West nonreciprocal propagation of Omega Navigational VLF waves on the low latitude and transequatorial paths p 590 A84-34648
CONUS (Continental United States) Omega/VLF data collection: Flight test
[AD-A140252] p 593 A84-25688
- VESTS**
Position and restraint system for aircrewman
[AD-D011058] p 853 A84-32364
- VHF OMNIRANGE NAVIGATION**
Feeding and decoupling of antenna elements in DVOR navigation equipment p 111 A84-14302
Second generation Vortac equipment p 519 A84-32327
System 4000 navigation aids p 520 A84-32329
Hardware and software structures for System 4000 navigation aids p 520 A84-32330
Evaluation of radio navigation systems and their configuration with respect to minimum cost
[DFVLR-FB-83-32] p 347 A84-19329
- VHSIC (CIRCUITS)**
New technologies and their logistics effects on integrated CNI avionics --- Communication Navigation Identification p 187 A84-16581
VHSIC in midcourse p 716 A84-36794
- VIBRATION**
Vibration analysis of turbomachinery blades by shell theory p 59 A84-10053
Low temperature behavior of fuels in simulated aircraft tanks
[AD-A130267] p 76 A84-10336
Development and flight test of an active flutter suppression system for the F-4F with stores. Part 3. Flight demonstration of the active flutter suppression system
[AD-A131972] p 137 A84-12191
Effect of blade structural parameters on helicopter vibrational characteristics
[AD-A134547] p 293 A84-16174
The Shock and Vibration Bulletin. Part 2: Fluid-structure dynamics and dynamic analysis
[AD-A134453] p 387 A84-19881
A study of helicopter gust response alleviation by automatic control
[NASA-TM-85970] p 543 A84-23655
Lewis Research Center spin rig and its use in vibration analysis of rotating systems
[NASA-TP-2304] p 605 A84-24578
Subharmonic vibrations of rotor mounted in rolling bearings p 725 A84-26943
Analysis of lateral and torsional vibration characteristics of beams and shafts with end located rotational masses
[NASA-TM-84593] p 727 A84-27065
Activities report of the Institute of Sound and Vibration Research p 820 A84-29693
Improved methods of vibration analysis of pretwisted, airfoil blades
[NASA-TM-83735] p 811 A84-30329
The Shock and Vibration Digest, volume 16, no. 7
[AD-A143958] p 926 A84-31679
Passive line-of-sight stabilization for an infrared sensor
[AD-A143305] p 929 A84-32792
Refinement and evaluation of helicopter real-time self-adaptive active vibration controller algorithms
[NASA-CR-3821] p 964 A84-33378
A formulation of rotor-airframe coupling for design analysis of vibrations of helicopter airframes
[NASA-RP-1089] p 1010 A84-33832
Comparison of frequency-domain and time-domain rotorcraft vibration control methods
[NASA-CR-166570] p 967 A84-34431
- VIBRATION DAMPING**
Optimal frequency response modification by added passive structures --- for helicopter design p 46 A84-11037
Control of aeroelastic divergence p 135 A84-14728
The synthesis of an active flutter suppression law based on an energy criterion p 222 A84-16523
Adaptive flutter suppression as a complement to LQG based aircraft control --- Linear Quadratic Gaussian p 227 A84-18628
A method for the design of the controller for active flutter-suppression systems p 302 A84-19594
Vibration damping for a hinged-blade helicopter rotor p 288 A84-19698
Investigation of random vibrations of aircraft engine blades p 298 A84-22410
Active suppression of aeroelastic instabilities on a forward-swept wing p 360 A84-24106
Active vibration control of a single mass rotor on flexible supports p 382 A84-26247
Shock-induced dynamic stall p 504 A84-30804
The modal approach to structural modification p 524 A84-31308
Structures, Structural Dynamics and Materials Conference, 25th, Palm Springs, CA, May 14-16, 1984, and AIAA Dynamics Specialists Conference, Palm Springs, CA, May 17, 18, 1984, Technical Papers, Part 2 p 556 A84-31684
Limit cycle oscillations of a nonlinear rotorcraft model
[AIAA PAPER 84-0923] p 525 A84-31695
A rapid approach for calculating the damped eigenvalues of a gas turbine on a minicomputer: Theory
[ASME PAPER 83-DET-83] p 533 A84-31908

Compendium of US incompressible flow facilities [AD-A143650] p 993 N84-33424
- WATER IMMERSION**
U-2, TR-1, SR-71 pressure suit open water survival training p 25 A84-10749
- WATER INJECTION**
NO(x) abatement via water injection in aircraft-derivative turbine engines [ASME PAPER 84-GT-103] p 981 A84-46941
Rotorcraft contingency power study [NASA-CR-174675] p 605 N84-24580
- WATER LANDING**
Development of helicopter underwater escape training for aircrew and passengers p 23 A84-10720

WATER RUNOFF

- Analytical and experimental study of grooved pavement runoff [AD-A141021] p 708 N84-27752
- WATER TUNNEL TESTS**
Trailing vortices in homogeneous and density-stratified media p 262 A84-19952
Control of the forebody vortex orientation by asymmetric air injection. Part A: Application to enhance departure/spin recovery of fighter aircraft and Part B: Details of the flow structure p 65 N84-10088
Multi-ducted inlet combustor research and development [AD-A135906] p 359 N84-18205
Visualisation of the vortex dominated flow around a delta wing-body combination using a water tunnel [BAE-821/RES/6631] p 559 N84-22904
A flow visualisation study of tip vortex formation [ARL-AERO-NOTE-421] p 515 N84-23603
Water-tunnel study of transition flow around circular cylinders [NASA-TM-85879] p 516 N84-23606
- WAVE AMPLIFICATION**
Numerical computations of turbulence amplification in shock-wave interactions p 239 A84-17427
- WAVE DRAG**
Finite difference computation of wave drag and pressure on slender bodies of revolution at transonic speeds with zero-lift p 15 A84-12037
The wave drag of elongated star-shaped bodies at moderate supersonic flight velocities p 93 A84-14889
Finite difference computation of pressure and wave-drag of slender bodies of revolution at transonic speeds with zero-lift p 579 A84-35330
Bodies of revolution with minimum wave resistance in sonic gas flow p 959 A84-40709
Improved wave drag predictions using modified linear theory [NASA-CR-174494] p 98 N84-12096
Wave drag as the objective function in transonic fighter wing optimization [NASA-TP-2285] p 272 N84-17127
Wave drag of elongated astroid bodies at moderate supersonic flight velocities p 513 N84-22797
XSECT: A computer code for generating fuselage cross sections - user's manual [NASA-TM-83218] p 668 N84-27696
- WAVE EQUATIONS**
Solution of the wave equation for open surfaces involving a line integral over the edge -- for supersonic propeller noise prediction p 940 A84-45664
Improved wave drag predictions using modified linear theory [NASA-CR-174494] p 98 N84-12096
An integral equation for the solution of nonlinear wave equations p 849 N84-32347
- WAVE EXCITATION**
Excitation and growth of instabilities in three-dimensional stationary boundary layers p 11 A84-10184
- WAVE INTERACTION**
On the method of pseudo compressibility for numerically solving incompressible flows [AIAA PAPER 84-0252] p 262 A84-19889
Wave interactions in swept-wing flows [AIAA PAPER 84-1678] p 659 A84-39320
An analysis of wave interactions in swept-wing flows [NASA-CR-173723] p 666 N84-27681
- WAVE PACKETS**
The development of a three-dimensional wave packet in a boundary layer p 240 A84-17704
- WAVE PROPAGATION**
Gas and wave dynamics -- Russian book p 171 A84-18749
Experimental determination of the propagation velocity of VLF signals of the Omega navigation system on the basis of phase measurements p 519 A84-32145
East-West nonreciprocal propagation of Omega Navigational VLF waves on the low latitude and transequatorial paths p 590 A84-34648
Propagation and radiation of sound from flanged circular ducts with circumferentially varying wall admittances. I Semi-infinite ducts. II - Finite ducts with sources p 631 A84-34746
Application of Riemann problem solvers to wave machine design p 721 A84-38853
AGARD Bulletin, technical programme, 1984 [AGARD-BUL-83/2] p 3 N84-10010
Vortex stability and breakdown p 102 N84-12122
Evaluation of turbulence induced noise in coherent anti-Stokes Raman scattering [NASA-CR-166544] p 322 N84-18015
On the stability of an infinite swept attachment line boundary layer [NASA-CR-172300] p 339 N84-19285

WAVE REFLECTION

- Interaction of aerodynamic noise with laminar boundary layers in supersonic wind tunnels
[NASA-CR-3621] p 483 N84-20781
- Wave propagation from moving singularities and a unified exposition of the linearized theory for aerodynamics and acoustics
[DFVLR-FB-84-17] p 807 N84-29080
- Feedback in separated flows over symmetric airfoils
[NASA-TM-83758] p 847 N84-31091

WAVE REFLECTION

- Supersonic jet screech tone cancellation
p 82 A84-10136
- Regular reflection of a weak shock wave from a rigid porous wall
p 331 A84-24896

WAVE RESISTANCE

- Nose parts of bodies of revolution with a passage that is close to bodies of minimum wave resistance
p 404 A84-27063

WAVE SCATTERING

- Millimeter radar reflective range system
p 467 A84-28442
- Sound emission during the scattering of Tollmein-Schlichting waves in a boundary layer on a nonuniform surface
p 478 A84-28815
- Application of elastic wave scattering theory to the detection and characterization of flaws in structural materials
[DE84-013729] p 930 N84-32852

WAVEFORMS

- The impact of waveform bandwidth upon tactical radar design
p 32 A84-10798

WAVEGUIDES

- Preliminary evaluation of waveguide vibration absorbers
[AD-A140743] p 727 N84-27070

WAVELENGTH DIVISION MULTIPLEXING

- Definition, analysis and development of an optical data distribution network for integrated avionics and control systems. Part 2: Component development and system integration
[NASA-CR-172429] p 943 N84-33181

WEAPON SYSTEMS

- The modern weapon systems BO 105M and BO 105P
p 47 A84-11068
- A high performance aeroscout target acquisition and designation system
p 2 A84-11071

- Corrosion in large aircraft: Management of the problem
p 473 N84-20666
- VTOL shipboard letdown guidance system analysis
[NASA-CR-166519] p 611 N84-25716

SUBJECT INDEX

Revised Uniform Summary of Surface Weather Observations (RUSSWO). Parts A-E: Clark AFB, Philippines
[AD-A141228] p 731 N84-28342

Comparison of airborne turbulence-indicating doppler radar systems with ground-based doppler radar systems [AD-A141474] p 807 N84-29043

WEATHER FORECASTING

The analysis and prediction of clear air turbulence at Western Airlines
[AIAA PAPER 84-0269] p 248 A84-17988

Air Force Air Weather Service's requirements for global meteorological data p 931 A84-43653

The aviation weather system, present problems and future promises p 852 A84-44738

Benign IMC p 852 A84-44739

Experimentation for flight service systems p 852 A84-44740

A summary and integration of research concerning single pilot IFR operational problems p 109 N84-12034

NASA B-57B severe storms flight program [NASA-TM-84921] p 183 N84-14129

Current procedures for forecasting aviation icing: A review [AD-A136152] p 390 N84-18818

Analysis of AFGL aircraft icing data [AD-A137197] p 390 N84-20087

Status, future plans for Aeroflot's meteorological support p 730 N84-27711

Investigation of the detectability and lifetime of gust fronts and other weather hazards to aircraft [AD-A141552] p 812 N84-29404

WEATHER STATIONS

Climatic publications [AD-A136021] p 390 N84-18818

WEATHERING

How well do composite propellers weather? p 778 A84-40782

The effect of accelerated ultra violet weathering on the rain erosion resistance of coated aircraft transparencies [AD-P003194] p 711 N84-26607

Artificial aging of transparent aerospace materials [AD-P003210] p 713 N84-26623

Simulation of exposure of aircraft transparencies to flight line environment [AD-P003212] p 685 N84-26625

Natural weathering of selected organic matrix composites [AD-A144091] p 997 N84-33527

Evaluation of the pavement condition index for use on porous friction surfaces [AD-A144521] p 994 N84-34453

WEDGE FLOW

Stability of shock waves attached to wedges and cones p 90 A84-13565

An exact solution for the problem of the interaction of a wedge moving at supersonic velocity with the interface of two gases p 264 A84-21121

Evolution of the discontinuity of a vortex sheet p 334 A84-26333

On flows with vibrational relaxation behind an attached shock wave p 403 A84-26844

Hypersonic interactions with surface mass transfer. I - Steady flow. II - Unsteady flow p 405 A84-27126

Dusty hypersonic flow past thick wedges p 508 A84-32620

Hypersonic large-deflection similitude for quasi-wedges and quasi-cones p 509 A84-32790

Transonic supersonic flow from a wedge p 644 A84-37746

Supersonic flow in the corner formed by two intersecting wedges with slip p 840 A84-45722

Magnetohydrodynamic flow past nonconducting wedge p 736 N84-26931

WEDGES

An experimental investigation of the aerodynamic effects of forward facing wedges on the upper surface and leading edge of an aerofoil, with emphasis on high angles of attack [ARL-AERO-TECH-MEMO-356] p 408 N84-20477

Exact solution to problem of interaction between wedge moving at supersonic velocity and interface of two gaseous media p 512 N84-22790

An experimental investigation of the aerodynamic effects of forward facing wedges on the upper surface and leading edge of an aerofoil, with emphasis at high angles of attack [AD-A142053] p 757 N84-28755

WEIBULL DENSITY FUNCTIONS

Weibull/Weibayes analysis of hydraulic pump malfunction data [SAE PAPER 831542] p 481 A84-29467

WEIGHT (MASS)

A flutter optimization program for complete aircraft structural design p 68 N84-11134

PREWATE: An interactive preprocessing computer code to the Weight Analysis of Turbine Engines (WATE) computer code [NASA-TM-83545] p 144 N84-13812

Weight and balance for the airmass incorporated sunburst model C ultralight [NASA-CR-175356] p 292 N84-16163

Stores weight and inertia system update: Cable attachment redesign, flexible length parameter calibration, data sheet revision [AD-A141087] p 773 N84-28781

System for indicating fuel-efficient aircraft altitude [NASA-CASE-NPO-15351-2] p 980 N84-34443

WEIGHT ANALYSIS

Application of the clearways concept to the determination of the maximum take-off weight p 767 A84-40047

Soviet vs. U.S. helicopter weight-prediction methods p 877 A84-46373

A comparison of the weight ratios of the airframe designs of aircraft with a cantilever wing and with a closed wing system p 973 A84-47076

WEIGHT INDICATORS

Progress towards large wind tunnel magnetic suspension and balance systems [AIAA PAPER 84-0413] p 231 A84-18075

Multivariable frequency domain controller for magnetic suspension and balance systems --- for wind tunnel aircraft models p 232 A84-19138

A significant improvement of an air supply/balance cross-over system --- for V/STOL wind tunnel model [AIAA PAPER 84-0600] p 365 A84-24189

Some aspects of the compatibility between strain gauge readout equipment and multi-component wind tunnel balances [ARL-AERO-NOTE-417] p 384 N84-18606

WEIGHT REDUCTION

Towards minimum weight structures by the use of composites p 140 A84-13807

Advanced electrical power system technology for the all electric aircraft p 215 A84-16528

Frenzied pace for ultralight design p 434 A84-29558

Solar array power to weight performance of 1- to 10-kilowatt, flat-folded flexible wings p 547 A84-30146

Optimization of large composite structures with strength and local stability restrictions p 621 A84-35535

Lightweight aluminum-lithium alloys poised for takeoff p 710 A84-36800

Advanced aircraft electric system p 695 A84-36905

Flight service of composite structure on McDonnell Douglas commercial airplanes p 683 A84-39030

Composite helicopter weighs in one-quarter lighter p 767 A84-40571

Lighter aluminum alloy development progresses p 797 A84-40791

Structural certification of Airbus fin box in composite fibre construction p 871 A84-44976

Composite elements in structural optimization-investigations on optimality criteria and mathematical methods p 918 A84-45059

Weight minimization of orthotropic rectangular flat panels subjected to a flutter speed constraint p 918 A84-45060

Certain cases of wing planform optimization on the basis of strength conditions p 920 A84-45707

The use of the perturbation method for determining the optimum distribution of the load-bearing material in swept wings p 920 A84-45725

Aircraft structural design --- Russian book p 874 A84-46047

Optimum distribution of the load-bearing material in a swept wing with a strut p 1006 A84-47091

The 400-Hz aircraft power-generation systems: Advancing the baseline p 79 N84-10056

Some trends in airship technology developments [AGARD-R-717] p 86 N84-12050

Development and demonstration of economic production systems in airframe construction. Part 2: Technological phase. Part 6: Review p 503 N84-23555

Windshield weight reduction through the use of high strength glass and polyurethane interlayers [AD-P003186] p 684 N84-26599

Development of an advanced composite aileron for the L-1011 transport aircraft [NASA-CR-3517] p 714 N84-27836

WELDED JOINTS

Aircraft landing dynamics facility carriage weld test program [NASA-TM-85802] p 930 N84-32827

WELDED STRUCTURES

Weldbond production process technology p 916 A84-42761

WIND MEASUREMENT

WELDING

Joining and coating of oxide dispersion strengthened superalloys p 471 A84-28333

Aircraft landing dynamics facility carriage weld test program [NASA-TM-85802] p 930 N84-32827

WELDING MACHINES

Automated jet engine turbine blade repair p 217 A84-17110

WEST GERMANY

The Prandtl Hergesell project of a National Research Establishment for Aeronautics [DFVLR-MITT-83-10] p 260 N84-17123

Modern helicopter development in Germany [MBB-UD-395-83-O] p 530 N84-23627

WESTLAND AIRCRAFT

Health monitoring of helicopter gearboxes p 257 A84-19631

Development of the Westland 30 p 288 A84-19663

Advanced gearbox health monitoring techniques p 531 A84-31310

The new Westland on the move p 825 A84-46522

WHITE NOISE

Research on boundary feedback and control theories, 1978 - 1983 [AD-A136531] p 392 N84-18987

WIDEBAND COMMUNICATION

Broad-band half-wave dipole p 676 A84-38123

WIND (METEOROLOGY)

Analysis of wind gust data p 393 N84-20308

Facilities for meteorological research at NASA Goddard/Wallops Flight Facility [NASA-TM-84422] p 629 N84-25223

Effects of aircraft and flight parameters on energy-efficient profile descents in time-based metered traffic [NASA-CR-172338] p 676 N84-26685

WIND DIRECTION

Directional extreme wind speed data for the design of buildings and other structures [PB84-178847] p 809 N84-30139

WIND EFFECTS

Flail, tumble and windblast --- during ejection p 24 A84-10741

The correlation and description of windfall injury mechanisms in the windblast environment p 25 A84-10748

A procedure for determining flight path wind component during takeoff and landing tests [AIAA PAPER 83-2741] p 49 A84-12333

Effects of wind on turbofan engines in outdoor static test stands [AIAA PAPER 83-2766] p 129 A84-15204

Incorporation of wind shear terms into the governing equations of aircraft motion [AIAA PAPER 84-0275] p 304 A84-21860

The oscillations of a flexible aircraft when acted upon by a gust of wind p 382 A84-25623

Wind tunnel tests on a model of a semisubmersible platform and comparison of the results with full-scale data [NLR-MP-82014-U] p 176 N84-15113

Aerodynamic instability of cable-stayed bridges: Theoretical experimental study of stall flutter p 669 N84-27700

Oscillations of elastic airplane due to wind gust p 880 N84-32087

Aircraft lifter [NASA-CASE-LAR-12518-1] p 887 N84-32383

WIND MEASUREMENT

Identification of vortex-induced clear-air turbulence using airline flight records [AIAA PAPER 84-0270] p 248 A84-17989

A case study illustrating time scales and operational responses for a wind shear episode during the JAWS project --- Joint Airport Weather Studies Project [AIAA PAPER 84-0351] p 318 A84-21864

Optimizing the use of surface sensors for wind shear detection - Experimental and analytical considerations [AIAA PAPER 84-0353] p 313 A84-21866

Microburst wind structure and evaluation of Doppler radar for airport wind shear detection p 1012 A84-46821

Comparison of low-altitude wind-shear statistics derived from measured and proposed standard wind profiles [NASA-TM-85866] p 123 N84-13172

Worldwide experience of wind shear during 1981-1982 p 249 N84-15087

Regression analysis technique for air data sensor calibration with an inertial navigation system [DFVLR-MITT-84-03] p 877 N84-27716

Doppler weather radar applications to terminal and enroute air traffic control p 731 N84-28324

Using an airborne CO2 CW laser for free stream airspeed and windshear measurements p 1011 N84-34417

Reconfigurable multivariable control law for commercial airplane using a direct digital output feedback design [NASA-TM-85759] p 362 N84-18206

Aircraft accident report: Eastern Air Lines, Inc., Boeing 727-225, N8838E, Raleigh, North Carolina, November 12, 1975 [PB83-910406] p 419 N84-20500

A spatial model of wind shear and turbulence for flight simulation [NASA-TP-2313] p 564 N84-24044

Pilot-aircraft interaction concerning a wind shear indication system p 693 N84-26586

Doppler weather radar applications to terminal and enroute air traffic control p 731 N84-28324

Design of wind shear filters [NASA-TM-77460] p 790 N84-28808

A method for three-dimensional modeling of wind-shear environments for flight simulator applications [NASA-TM-85969] p 761 N84-29857

Aircraft lifter [NASA-CASE-LAR-12518-1] p 687 N84-32383

Using an airborne CO2 CW laser for free stream airspeed and windshear measurements p 1011 N84-34417

WIND TUNNEL APPARATUS

A new bench for calibration of nacelles equipped for blowing turbines (TPS) and ejector trials [ONERA, TP NO. 1983-118] p 138 A84-13631

New device for flow survey around models in large wind-tunnels [ONERA, TP NO. 1983-128] p 139 A84-13643

Excitation system for wind-tunnel unsteady tests on half-wing models p 139 A84-15859

Progress towards large wind tunnel magnetic suspension and balance systems [AIAA PAPER 84-0413] p 231 A84-18075

Multivariable frequency domain controller for magnetic suspension and balance systems - for wind tunnel aircraft models p 232 A84-19138

An application of a finite spectrum assignment technique to the design of control laws for a wind tunnel p 251 A84-19143

The F2 wind-tunnel at Fauga-Mauzac [ONERA, TP NO. 1983-139] p 306 A84-19928

A strain-gage aerodynamic balance - TENSOMETERS p 306 A84-22325

A significant improvement of an air supply/balance cross-over system - for V/STOL wind tunnel model [AIAA PAPER 84-0600] p 365 A84-24189

An experimental study of high contraction ratio, subsonic wind tunnel inlets [AIAA PAPER 84-0618] p 366 A84-24199

A distributed computer system for control, data acquisition and processing in a blowdown wind tunnel p 367 A84-25212

Application of laser velocimetry to unsteady flows in large scale, high speed tunnels p 381 A84-25230

Determination of the absolute humidity of air using a Laval nozzle p 369 A84-26370

Nd:YAG holographic interferometer for aerodynamic research p 476 A84-28000

Remotely controlled models slash tunnel time p 467 A84-29576

Modernization of the Breguet low-speed wind tunnel at Velizy [AAAF PAPER NT 83-11] p 544 A84-32481

Calibration and use of an ONERA miniature five hole probe [ONERA, TP NO. 1984-2] p 803 A84-39973

Extended capabilities for high altitude reentry simulation in the NSWC hypervelocity wind tunnel [AIAA PAPER 84-0412] p 910 A84-46119

Developments in research stimulated by cryogenic wind tunnel construction planning and projects p 991 A84-46764

The MIT blowdown turbine facility [ASME PAPER 84-GT-116] p 992 A84-46950

The use of tandem ejector pumps in an intermittent blowdown tunnel [ASME PAPER 84-GT-226] p 992 A84-47006

Engine/airframe interference drag at cruise conditions, using propulsion simulation [NLR-TR-82012-U] p 98 N84-12098

Some aspects of the compatibility between strain gauge readout equipment and multi-component wind tunnel balances [ARL-AERO-NOTE-417] p 384 N84-18606

Two-dimensional wind tunnel [NASA-TM-76963] p 468 N84-20602

Vortical flow exploration methods developed for the F1 wind tunnel p 563 N84-23598

The wind tunnel S2MA of the aerodynamic testing plant in Modene-Arvieux, France [ONERA-NT-1983-5] p 613 N84-25735

Design study for a low density wind tunnel [INPE-3072-TDL/160] p 706 N84-26707

Recent modifications and calibration of the Langley low-turbulence pressure tunnel [NASA-TP-2328] p 665 N84-27675

The F2 wind tunnel at Fauga-Mauzac [NASA-TM-77482] p 792 N84-28814

A new method of evaluating the side wall interference effect on airfoil angle of attack by suction from the side walls [NASA-TM-77722] p 967 N84-34432

WIND TUNNEL CALIBRATION

Flow quality in wind tunnels; Meeting, Bremen, West Germany, September 9, 10, 1982, Reports p 69 A84-10551

Calibration of the test section flow in the German-Dutch wind tunnel p 70 A84-10552

Improving the flow quality in an open wind tunnel p 70 A84-10554

Flow quality in the ETW rig p 70 A84-10556

Investigation of transonic test sections with comparison of perforated and slotted walls p 70 A84-10557

Effects of wind tunnel turbulence on test results. I. Problematic, planned investigations, turbulence in level flow: Discussion issue p 70 A84-10558

Effect of wind tunnel turbulence on model test results. II Comparative tests in German 3-m wind tunnels p 70 A84-10559

Effect of increased turbulence on the flow around a transonic profile p 11 A84-10560

A new bench for calibration of nacelles equipped for blowing turbines (TPS) and ejector trials [ONERA, TP NO. 1983-118] p 138 A84-13631

Experimental design for calibration of wind tunnel balances p 367 A84-25215

Calibration and use of an ONERA miniature five hole probe [ONERA, TP NO. 1984-2] p 803 A84-39973

Operational experience with the National Transonic Facility p 545 N84-23565

Recent modifications and calibration of the Langley low-turbulence pressure tunnel [NASA-TP-2328] p 665 N84-27675

WIND TUNNEL DRIVES

A quasi-continuous transonic wind tunnel for cryogenic operation [ROLLAB-MEMO-RM-096] p 232 N84-15161

The 6M x 8M low speed wind tunnel p 907 N84-31221

WIND TUNNEL MODELS

A new bench for calibration of nacelles equipped for blowing turbines (TPS) and ejector trials [ONERA, TP NO. 1983-118] p 138 A84-13631

A parachute opening theory with allowance for flow past the parachute and its permeability p 152 A84-16951

The wind tunnel simulation of propulsion jets and their modeling by congruent plumes including limits of applicability [AIAA PAPER 84-0232] p 231 A84-17962

The structure of separated flow in the case of supersonic flow past blunt cones with a rear sting p 171 A84-19001

Multivariable frequency domain controller for magnetic suspension and balance systems - for wind tunnel aircraft models p 232 A84-19138

A study of the gas dynamics of a model with combustion in a pulsed wind tunnel p 264 A84-21129

Cryogenic wind-tunnel model technology development activities at the NASA Langley Research Center [AIAA PAPER 84-0586] p 364 A84-24178

Load-dependent deformations of windtunnel models - for wing aerelasticity [AIAA PAPER 84-0589] p 348 A84-24180

Investigation of sidewall boundary layer removal effects on two different chord airfoil models in the Langley 0.3-meter Transonic Cryogenic Tunnel [AIAA PAPER 84-0598] p 365 A84-24187

A significant improvement of an air supply/balance cross-over system - for V/STOL wind tunnel model [AIAA PAPER 84-0600] p 365 A84-24189

Aerodynamic evaluation of a helicopter rotor blade with ice accretion in hover [AIAA PAPER 84-0608] p 342 A84-24194

Determination of non-linear loads on oscillating models in wind tunnels p 368 A84-25218

Asymmetric blowing model design and testing p 368 A84-25219

Two-dimensional wake characteristics of inlet vanes for open-circuit wind tunnels [AIAA PAPER 84-0604] p 369 A84-25729

Remotely controlled models slash tunnel time p 467 A84-29576

Predicting dynamic instability boundaries using lattice filters - for wind tunnel flutter models [SAE PAPER 831432] p 468 A84-29630

Two-dimensional wind-tunnel interference from measurements on two contours p 574 A84-34459

The aeroballistic characteristics of a slotted-square parachute
[AIAA PAPER 84-0791] p 408 A84-29970

Wind tunnel correlation study of aerodynamic modeling for F/A-18 wing-store tip-missile flutter
p 524 A84-30806

Comparison of model helicopter rotor primary and secondary blade/vortex interaction blade slap
p 566 A84-30809

Cryogenic methods in wind tunnels
[AAAF PAPER NT 83-08] p 544 A84-32479

Unsteady aerodynamic characterization of a military aircraft in vertical gusts
[AAAF PAPER NT 83-16] p 507 A84-32484

Unsteady hot-X-wire measurements in a schematic air intake
[AAAF PAPER NT 83-17] p 507 A84-32485

Analysis of the apex vortex on a sweptback wing
[AAAF PAPER NT 83-20] p 507 A84-32488

Application of laser velocimetry to the study of the flow behind a spoiler
[AAAF PAPER NT 83-21] p 508 A84-32489

Ground-effect measurements at the CEAT aerohydrodynamic tunnel
[AAAF PAPER NT 83-24] p 544 A84-32491

The active and passive influencing of shock boundary layer interference at supercritical aircraft wings
[DGLR PAPER 83-059] p 509 A84-33150

An advanced aerospoke to minimize nose drag
p 573 A84-33849

Measurements of ground effect for delta wings
p 575 A84-34466

Experimental investigation of wall interference and two-dimensionality of the flow in a transonic airfoil wind tunnel
p 576 A84-35017

Flow-field investigation of a supercruise fighter model
[AIAA PAPER 84-1331] p 576 A84-35175

Hysteresis of supersonic separated flows
p 580 A84-35734

Wind tunnel test of a soft/stiff inplane bearingless rotor
p 677 A84-36524

Test of a probe used to sense altitude through measurement of pressure
p 705 A84-36552

Effect of variable inlet guide vanes on operating characteristics of a tilt nacelle inlet/powered fan model
[AIAA PAPER 84-1398] p 697 A84-36975

Detailed study of the flow around a profile with high-lift devices - Comparison with calculations
[ONERA, TP NO. 1984-17] p 643 A84-37536

Significant drag reduction results for twinpack turbofan nacelle installations using combination of wind tunnel force balance, flow visualization, and three dimensional computational methods
[AIAA PAPER 84-1328] p 680 A84-37646

Flight effects on fan noise with static and wind-tunnel comparisons
p 699 A84-37928

Analysis of vortex development from visualization of accelerating flow around an airfoil, starting from rest
[AIAA PAPER 84-1568] p 649 A84-37977

Measurements of the 3D turbulent flow behind a propeller in a shear flow
[AIAA PAPER 84-1676] p 653 A84-38052

Experimental and computational study of roughness effects at $M = 6$
[AIAA PAPER 84-1681] p 653 A84-38053

Why credible propeller noise measurements are possible in the acoustically untreated NASA Lewis 8 ft by 6 ft wind tunnel
p 735 A84-38091

Blade bending flutter in started supersonic flow
p 720 A84-38095

Experimental investigation into forward swept wings for a light-weight combat aircraft
p 681 A84-38406

Methodological aspects of the testing of aerodynamic models with combustion in high-enthalpy blowdown wind tunnels
p 655 A84-38673

A summary overview of work on dynamic stall
p 657 A84-38880

Flight and wind tunnel tests of an electro-impulse de-icing system
[AIAA PAPER 84-2234] p 671 A84-39280

An asymptotic theory of wind tunnel wall interference on subsonic slender bodies
[AIAA PAPER 84-1625] p 706 A84-39303

Calibration and use of an ONERA miniature five hole probe
[ONERA, TP NO. 1984-2] p 803 A84-39973

Effects of nozzle design parameters on the extent of quiet test flow at Mach 3.5
p 742 A84-40025

Numerical simulation of controlled flow tunnel for V/STOL testing
[AIAA PAPER 84-2152] p 791 A84-41330

Effect of upstream parallel flow on two-dimensional wind-tunnel tests
[AIAA PAPER 84-2153] p 745 A84-41331

Reynolds number effect on the aerodynamic characteristics of an ogive-cylinder at high angles of attack
[AIAA PAPER 84-2176] p 746 A84-41341

Impact of fuselage incidence on the supersonic aerodynamics of two fighter configurations
[AIAA PAPER 84-2193] p 747 A84-41345

Experimental investigation of the aerodynamic effects of distributed spanwise blowing on a fighter configuration
[AIAA PAPER 84-2195] p 747 A84-41347

Design, wind tunnel testing and rational analysis of a ventral pitot-type air intake
[AIAA PAPER 84-2202] p 747 A84-41350

Reynolds number effects on the aerodynamics of a body with square cross-section
p 749 A84-42249

Flight characteristics of a manned, low-speed, controlled deep stall vehicle
[AIAA PAPER 84-2074] p 786 A84-42330

Transient aerodynamic characteristics of a two-dimensional low-speed wing at several angles of attack
[AIAA PAPER 84-2076] p 749 A84-42332

An experimental investigation of the aerodynamic characteristics of bodies having square cross-section at transonic speeds
[AIAA PAPER 84-2091] p 750 A84-42344

Active control of asymmetric vortex effects in circular cylinder
[AIAA PAPER 84-2101] p 751 A84-42351

Experimental heating distributions for biconics at incidence in Mach 10 air and comparison to prediction
[AIAA PAPER 84-2119] p 751 A84-42363

Cryogenic wind tunnels for high Reynolds number testing
p 904 A84-42900

Aerodynamic characteristics of two general aviation canard configurations at high angles of attack
[AIAA PAPER 84-2198] p 866 A84-44190

Validation of a wall-interference assessment/correction procedure for airfoil tests in the Langley 0.3-meter Transonic Cryogenic Tunnel
[AIAA PAPER 84-2151] p 905 A84-44191

Subsonic/supersonic aerodynamic characteristics for a tactical supercruiser
[AIAA PAPER 84-2192] p 828 A84-44195

An investigation of the tabbed vortex flap
[AIAA PAPER 84-2173] p 828 A84-44197

F-14 high angle of attack investigation with asymmetric thrust and external stores
p 867 A84-44465

Boundary layer characteristics of the Milroy airfoil at low Reynolds numbers
p 829 A84-44507

Recent developments in the F-16 flutter suppression with active control program
[AIAA PAPER 83-0995] p 897 A84-44515

Design and operation of TU-Berlin wind tunnel with adaptable walls
p 905 A84-44933

Deformable adaptive wall test section for three-dimensional wind tunnel testing
p 905 A84-44934

Wind tunnel wall influence considering 2D high lift configurations
p 905 A84-44935

Efficiency of a top-mounted inlet system at transonic/supersonic speeds
p 833 A84-44980

Design study of short range transport wing
p 834 A84-44997

Wind tunnel test of a twin, rear propeller transport aircraft configuration at low speeds
p 871 A84-44999

An evaluation of the relative merits of wing-canard, wing-tail, and tailless arrangements for advanced fighter applications
p 872 A84-45013

Estimated low-speed aerodynamic parameters of an advanced fighter from flight and wind tunnel data
p 906 A84-45042

Effect of Reynolds number on upper cowl flow separation
p 837 A84-45051

The effect of air condensation on heat transfer and certain characteristics of flow in a wind tunnel
p 839 A84-45714

Similarity criteria for the spectra of wall pressure fluctuations in a turbulent boundary layer
p 921 A84-45983

Unsteady wake measurements of an oscillating flap at transonic speeds
[AIAA PAPER 84-1563] p 844 A84-46112

Considerations in the estimation of full-scale rotor performance from model rotor test data
p 875 A84-46329

High speed ice accretion on rotorcraft airfoils
p 853 A84-46330

Measured and calculated inplane stability characteristics for an advanced bearingless main rotor
p 875 A84-46341

Helicopter individual-blade-control and its applications
p 901 A84-46376

A study of the aerodynamic interaction between a main rotor and a fuselage
p 846 A84-46381

An investigation of the aerodynamics of an RAE swept tip using a model rotor
p 846 A84-46382

First cryogenic tests of an airfoil in ONERA/CERT T2 wind tunnel
p 949 A84-46767

Surface static pressures in an inlet vortex flow field
[ASME PAPER 84-GT-201] p 955 A84-46996

An experimental study of the conditions leading to the generation of a vortex at the air intake of a gas-turbine engine and vortex-induced perturbations
p 985 A84-47066

A new aircraft design tool - Computational fluid dynamics
p 963 A84-49389

Experimental studies of boundary layer transition on a spinning and non-spinning axisymmetric body
p 16 N84-10014

LANN (Lockheed, AFWL, NASA-Langley and NLR) wing test program: Acquisition and application of unsteady transonic data for evaluation of three-dimensional computational methods
[NASA-CR-174466] p 19 N84-10032

Experimental methods to determine control effectiveness in wind tunnels
p 65 N84-10087

Control of the forebody vortex orientation by asymmetric air injection. Part A: Application to enhance departure/spin recovery of fighter aircraft and Part B: Details of the flow structure
p 65 N84-10088

An experimental documentation of trailing-edge flows at high Reynolds number
[NASA-TM-84375] p 79 N84-10498

Parametric tip effects for conformable rotor applications
[NASA-TM-85682] p 80 N84-10609

Fast flutter clearance by parameter variation
p 68 N84-11135

Reynolds number tests of an NPL 9510 airfoil in the Langley 0.3-meter transonic cryogenic tunnel
[NASA-TM-85663] p 20 N84-11141

Airloads on bluff bodies, with application to the rotor-induced downloads on tilt-rotor aircraft
[NASA-TM-84401] p 20 N84-11142

Rotor/body aerodynamic interactions
[NASA-TM-85844] p 21 N84-11143

Subsonic/Transonic Aerodynamic Interference for Aircraft: Introductory remarks
p 95 N84-12073

Engine/airframe interference drag at cruise conditions, using propulsion simulation
[NLR-TR-82012-U] p 98 N84-12098

An experimental investigation of the vortex flow over delta and double-delta wings at low speed
p 99 N84-12106

Recent studies at NASA-Langley of vortical flows interacting with neighboring surfaces
p 100 N84-12109

Tabulation of data from tests of an NPL 9510 airfoil in the Langley 0.3-meter transonic cryogenic tunnel
[NASA-TM-84579] p 105 N84-13151

An approximate method of estimating the aerodynamic interference between two parallel bodies (normal force and side force)
[NAL-TR-752] p 105 N84-13154

Flight testing the Rotor Systems Research Aircraft (RSRA)
[NASA-TM-85852] p 124 N84-13177

Effects of wall interference on unsteady transonic flows
p 176 N84-15105

An experimental study of airfoil-spoiler aerodynamics
p 180 N84-15133

Noise of the SR-6 propeller model at 2 deg and 4 deg angles of attack
[NASA-TM-83515] p 322 N84-16946

Tests on a CAST 7 two-dimensional airfoil in a streamlining test section
[NASA-CR-172291] p 274 N84-17136

IRAAM wind tunnel test, task 3
[AD-A135256] p 275 N84-17148

Airloads research study. Volume 2: Airload coefficients derived from wind tunnel data

Aircraft liftemeter [NASA-CASE-LAR-12518-1] p 887 N84-32383

WIND VELOCITY MEASUREMENT

The Joint Airport Weather Studies Project - Current analysis highlights in the aviation safety context [AIAA PAPER 84-0111] p 247 A84-17887

NASA's B-57B Gust Gradient Program [AIAA PAPER 83-0208] p 342 A84-24103

An airborne wind shear detection system [AIAA PAPER 84-1918] p 882 A84-43454

An on-line realization for precise wind vector measurements on board the DO 28 research aircraft p 932 A84-45065

Doppler lidar signal and turbulence study [NASA-CR-170976] p 318 N84-17574

Aircraft liftemeter [NASA-CASE-LAR-12518-1] p 887 N84-32383

Air data position-error calibration using state reconstruction techniques [NASA-TM-86029] p 887 N84-32384

WINDING

A mathematical model for the doubly-fed wound rotor generator, part 2 [NASA-TM-83581] p 317 N84-17479

WINDOWS

Polycrystalline MgAl₂O₄ spinel for high performance windows [AD-P003202] p 712 N84-26615

Specialty coatings for increased service life of acrylic aircraft transparencies, part 2 [AD-P003206] p 713 N84-26619

WINDOWS (APERTURES)

Study of noise transmission through double wall aircraft windows [NASA-CR-172182] p 83 N84-11884

Some crazing experiments on As-cast acrylic to MIL-P-8184 [AD-P003196] p 712 N84-26609

NASTRAN analysis of nuclear effects on helicopter transparencies [AD-P003234] p 724 N84-26647

Evaluation of an improved flame resistant aircraft window system [FAA-CT-83-10] p 674 N84-26680

Field repair of AH-16 helicopter window cutting assemblies [NASA-TM-85831] p 774 N84-29864

WINDPOWER UTILIZATION

Status of wind-turbine wakes research in the federal wind energy program [DE83-013828] p 19 N84-10033

Rotating-boom facility for evaluation of wind characteristics approaching a wind-turbine blade [DE83-013117] p 73 N84-10107

WINDPOWERED GENERATORS

Aerodynamic characteristics of NACA 0012 aircraft in relation to wind generators p 508 A84-32650

WINDSHIELDS

Analysis of an airplane windshield anti-icing system using hot air p 46 A84-11047
 Development of a bird impact resistant T-38 instructor's windshield p 975 A84-49579
 Aircraft transparency testing methodology and evaluation criteria. Part 2: Methodology development for improved durability [AD-A131928] p 122 N84-12157
 Aircraft transparency testing methodology and evaluation criteria. Part 1: Test methods and information analysis [AD-A131927] p 122 N84-12158
 Alternate T-38 transparency development. Part 4: Parametric studies [AD-A131904] p 122 N84-12159
 Optical interactions of aircraft windcreens and HUDs (Head-Up Displays) producing diplopia [AD-P003159] p 736 N84-26590
 Conference on Aerospace Transparent Materials and Enclosures [AD-A140701] p 637 N84-26596
 Pyrotechnic clear path egress system for the T-38 trainer aircraft [AD-P003184] p 672 N84-26597
 Windshield weight reduction through the use of high strength glass and polyurethane interlayers [AD-P003186] p 684 N84-26599
 New aircraft windshield applications using ion exchange glass [AD-P003187] p 711 N84-26600
 A new and unique conductive element for aircraft transparencies [AD-P003188] p 685 N84-26601
 T-38 student windshield birdproofing efforts utilizing metal and composite materials for aft arch reinforcement [AD-P003189] p 672 N84-26602
 Development of lightweight commercial aircraft windshields with new high strength glasses [AD-P003190] p 685 N84-26603
 Transparency technology needs for military aircraft [AD-P003181] p 685 N84-26604
 Testing polycarbonate for utilization in the production of transparent enclosures [AD-P003192] p 711 N84-26605
 Degradation of the bird impact resistance of polycarbonate [AD-P003193] p 711 N84-26606
 The effect of accelerated ultra violet weathering on the rain erosion resistance of coated aircraft transparencies [AD-P003194] p 711 N84-26607
 Some crazing experiments on As-cast acrylic to MIL-P-8184 [AD-P003196] p 712 N84-26609
 New high performance windshield/canopy materials [AD-P003199] p 685 N84-26612
 An industry test program for interlayer equivalency [AD-P003200] p 723 N84-26613
 Civil aircraft windscreen damage due to birdstrikes [AD-P003214] p 673 N84-26627
 USAF aircraft windshield/canopy bird strikes [AD-P003215] p 673 N84-26628
 Investigations concerning improvements of the SAAB 37 windshield birdstrike resistance [AD-P003217] p 673 N84-26630
 Bird impact evaluation of the F/RF-4 transparency system [AD-P003218] p 673 N84-26631
 Alternate T-38 transparency development [AD-P003219] p 686 N84-26632
 Lufthansa German Airlines experience with cabin and cockpit windows of Boeing 707, 727, 737, 747, Douglas DC10 and Airbus A300 [AD-P003226] p 686 N84-26639
 The wiper abrasion and rain erosion resistance of transparent materials and coatings for aircraft glazing [AD-P003227] p 713 N84-26640
 Windshield problems on UK operated transport sized jet aircraft 1976 to 1982 [AD-P003228] p 686 N84-26641
 Validation of the MAGNA (Materially and Geometrically Nonlinear Analysis) computer program for nonlinear finite element analysis of aircraft transparency bird impact [AD-P003229] p 723 N84-26642
 MAGNA (Materially and Geometrically Nonlinear Analysis) computer simulation of bird impact on the F-15 aircraft canopy [AD-P003230] p 733 N84-26643
 Simulation of T-38 aircraft student canopy response to cockpit pressure and thermal loads using MAGNA (Materially and Geometrically Nonlinear Analysis) [AD-P003231] p 733 N84-26644

Parametric studies of the T-38 student windshield using the finite element of code MAGNA (Materially and Geometrically Nonlinear Analysis) p 723 N84-26645
 [AD-P003232] p 723 N84-26645
 Current problems and progress in transparency impact analysis [AD-P003233] p 724 N84-26646
 Theoretical evaluation of the structural performance of Swedish fighter aircraft windshields subjected to bird impact [AD-P003235] p 673 N84-26648
 Status of new aerothermodynamic analysis tool for high-temperature resistant transparencies [AD-P003236] p 724 N84-26649
 Improving the birdstrike resistance and durability of aircraft windshield systems: Program technical summary [AD-A143712] p 968 N84-33395
 Method for dynamically recording distortion in a transparency [AD-D011209] p 1011 N84-34707
WING CAMBER
 Change regarding the camber of the wing of the Airbus A300-600 p 11 A84-10563
 Thickness and camber effects in slender wing theory p 90 A84-13585
 Automatic camber flap adjustment in gliders [DGLR PAPER 83-113] p 436 A84-29676
 Variable wing camber control for civil transport aircraft p 869 A84-44955
 The Concorde and aeronautical research [NASA-TM-76973] p 328 N84-18153
 Slotted variable camber flap [NASA-CASE-LAR-12541-1] p 527 N84-22551
WING FLAPS
 Theoretical and experimental investigations concerning the ground effect on wings with flaps --- German thesis p 15 A84-11980
 The effect of a slipstream on the lift and drag characteristics of a wing of finite span p 152 A84-16917
 Automatic camber flap adjustment in gliders [DGLR PAPER 83-113] p 436 A84-29676
 Problems in the longitudinal dynamics of a flight vehicle in a bounded flow p 702 A84-37234
 An investigation of the tabbed vortex flap [AIAA PAPER 84-2173] p 828 A84-44197
 A numerical solution to the problem of flow past a plate with a jet flap of finite width for various Bernoulli numbers p 840 A84-45728
 Civil component program Integrated Wing-Engine-System (IFAS), phase 1 --- computational methods [BMFT-FB-W-83-018] p 353 N84-19343
 Slotted variable camber flap [NASA-CASE-LAR-12541-1] p 527 N84-22551
WING FLOW METHOD TESTS
 Theory of hypersonic three-dimensional flow around a slender wing of arbitrary aspect ratio by an unsteady stream of relaxing gas p 264 A84-21120
 Transonic oblique-wing flow computation p 331 A84-24893
 Experimental study of hinge moment in the subsonic and transonic speed range p 348 A84-25176
 Investigation of transition from laminar to turbulent boundary layer flow by means of a thermal imaging system p 581 A84-36460
 Euler solutions of transonic vortex flows around the Dillier wing - Compared and analyzed [AIAA PAPER 84-2142] p 829 A84-44201
 Leedside flows over delta wings at supersonic speeds p 829 A84-44510
 Separation jump and sudden stall over an ellipsoidal wing at incidence p 830 A84-44647
 New investigation of short wings with lateral jets [NASA-TM-77347] p 178 N84-15124
 Calculation of transonic flow around two wing-fuselage combinations using a full potential equation method [FFA-137] p 179 N84-15132
 Theory of hypersonic three-dimensional flow of nonsteady gas stream with relaxation past thin wing with arbitrary aspect ratio p 512 N84-22791
WING LOADING
 A method for predicting wing response to buffet loads p 195 A84-17413
 The influence of leading-edge load alleviation on supersonic wing design [AIAA PAPER 84-0138] p 160 A84-17906
 A method for modeling finite-core vortices in wake-flow calculations [AIAA PAPER 84-0417] p 167 A84-18079
 Assessment of certain merits of FSW and effect of the sign of the sweep angle on the stressing of a wing structure p 290 A84-21797
 A fatigue life tracking program for an aluminum wing p 347 A84-23504

Load-depending deformations of windtunnel models --- for wing aerolasticity [AIAA PAPER 84-0589] p 348 A84-24180
 Scale effects on performance of ram air wings [AIAA PAPER 84-0783] p 400 A84-26554
 Ram air parachute design considerations and applications [AIAA PAPER 84-0826] p 416 A84-26587
 Aerodynamics of wings in supersonic shear flow p 405 A84-27127
 Numerical calculation of unsteady transonic potential flow over three-dimensional wings with oscillating control surfaces p 405 A84-27132
 A strength analysis of a fan-shaped wing with an allowance made for temperature deformations and creep deformations p 523 A84-30424
 The performance of man-powered aircraft p 502 A84-32789
 Divergence boundary prediction from random responses - NAL's method --- aeroelastic instability boundary estimation for subcritical divergence cantilever wing model test p 619 A84-34463
 Crack resistance of pressed and rolled semilinished products from aluminum alloys used in load-bearing units in aircraft wings p 614 A84-35724
 Active effect on the aeroelasticity of a lifting surface p 785 A84-41650
 Solution to the problem of the dynamic response of a wing by direct integration p 770 A84-41653
 Application of panel method to wake vortex/wing interaction and comparison with experiment [AIAA PAPER 84-2182] p 827 A84-44194
 F-15 inflight wing loads calibration p 867 A84-44462
 A fast viscous correction method for full-potential transonic wing analysis p 831 A84-44946
 Experimental validation by flight measurement of the pressure distribution computed on Pilatus PC-7 wing using a three dimensional aerodynamic panel program p 869 A84-44949
 Comparison of discrete and continuous gust methods for the determination of airplane design loads p 870 A84-44967
 Multivariate optimisation as applied to aircraft project design p 873 A84-45032
 A panel method for calculating loads on the surface of a wing of finite thickness vibrating harmonically in a subsonic flow p 838 A84-45701
 A calculation of load distribution in wings in a supersonic flow p 839 A84-45711
 The use of the perturbation method for determining the optimum distribution of the load-bearing material in swept wings p 920 A84-45725
 Position of the center of pressure on a delta wing in nonequilibrium hypersonic air flow p 959 A84-47081
 An approximate determination of the critical Mach number from the calculated pressure distribution p 960 A84-47086
 Optimum distribution of the load-bearing material in a swept wing with a strut p 1006 A84-47091
 Structure of lift-generated rolled-up vortices p 962 A84-49083
 Aeroelastic response of an aircraft wing to random loads [AD-A130476] p 18 N84-10028
 Doublet point method for calculations on oscillatory lifting surfaces. Part 1: Subsonic flow [NAL-TR-781-PT-1] p 336 N84-18168
 Comparative force measurements on half and whole models of a heavy lift wing in the large wind tunnel Emmen [F/W-50-1596] p 341 N84-19301
 Calculation of transonic potential flow past wing-tail-fuselage configurations using the multigrid method p 661 N84-26657
 A flight-test and simulation evaluation of the longitudinal final approach and landing performance of an automatic system for a light wing loading STOL aircraft equipped with wing spoilers [NASA-TM-85873] p 903 N84-32393
WING NACELLE CONFIGURATIONS
 Analytical and experimental studies on natural laminar flow nacelles [AIAA PAPER 84-0034] p 156 A84-17839
 Computational requirements for efficient engine installation [AIAA PAPER 84-0120] p 196 A84-17893
 Transonic CFD applications to engine/airframe integration [AIAA PAPER 84-0381] p 197 A84-18052

[ASME PAPER 83-HT-102] p 479 A84-29095
Damage tolerant design demonstration -- of transport aircraft for full scale wing boxes
[AIAA PAPER 84-0847] p 555 A84-31628

WING TIP VORTICES

- Theoretical and experimental dynamic stall investigations on a rotor blade tip p 8 A84-10100
A method for modeling finite-core vortices in wake-flow calculations
[AIAA PAPER 84-0417] p 167 A84-18079
Flowfield and vorticity distribution near wing trailing edges
[AIAA PAPER 84-0421] p 167 A84-18082
Numerical simulation of the tip vortex off a low-aspect-ratio wing at transonic speed
[AIAA PAPER 84-0522] p 168 A84-18149
Fluctuating forces and rotor noise due to main rotor-tail rotor interaction p 319 A84-18622
Close-coupled canard-wing vortex interaction p 268 A84-22169
Analysis of the apex vortex on a sweptback wing
[AAAF PAPER NT 83-20] p 507 A84-32488
Aerodynamic interactions of wingtip flow with discrete wingtip jets
[AIAA PAPER 84-2206] p 747 A84-41351
Application of panel method to wake vortex/wing interaction and comparison with experiment
[AIAA PAPER 84-2182] p 827 A84-44194
Computer simulation of non-potential flows around wings p 845 A84-46189
A more accurate calculation of the induced drag of a wing in subsonic flow using the method of discrete vortices p 958 A84-47069
Experimental vortex analyzer
[NLR-MP-82006-U] p 22 N84-11151
Helicopter blade tips
[NASA-TM-77370] p 178 N84-15119
Wake characteristics and interactions of the Canard/wing lifting surface configuration of the X-29 forward-swept wing flight demonstrator
[AD-A133188] p 179 N84-15126
Helicopter rotor wake geometry and its influence in forward flight. Volume 1: Generalized wake geometry and wake effect on rotor airloads and performance
[NASA-CR-3726] p 275 N84-17149
An investigation of the effects of discrete wing tip jets on wake vortex roll up
[AD-A135872] p 336 N84-18173
The effect on acoustic radiation of mutual interaction between a line vortex and an airfoil
[FFA-TN-1983-45] p 395 N84-19058
Wingtip vortex propeller
[NASA-CASE-LAR-13019-1] p 411 N84-20495
Computational vortex flow aerodynamics
[NLR-MP-83017-U] p 414 N84-21522
Comparative measurements of the unsteady pressures on three oscillating wing-tip models
[DFVLR-FB-84-07] p 758 N84-28758
Graduate engineering research participation in aeronautics
[NASA-CR-173849] p 944 N84-32220
Radar cross section measurements of wingtip vortices p 1012 N84-33934

- WING TIPS
The aerodynamic optimization of wings in the subsonic speed range and the influence of the design of the wing tips -- German thesis p 839 A84-36992
Development of advanced circulation control wing high-lift airfoils p 646 A84-37931
Passive divergence control with free-floating wing tips p 703 A84-38425
Induced drag reduction with wing tip mounted propellers
[AIAA PAPER 84-2149] p 769 A84-41329
Predicting aerodynamic characteristics of vortical flows on three-dimensional configurations using a surface-singularity panel method p 100 N84-12112
The effects of wing tip devices on the performance of the BAe Jetstream p 103 N84-12130
The effect of wing tip devices on the far-field wake of a Paris Aircraft p 103 N84-12131
Analysis of nonplanar wing-tip mounted lifting surfaces on low-speed airplanes p 204 N84-15142

- Effects of blowing spanwise from the tips of low-aspect ratio wings of varying taper ratio, with application to improving STOL capability of fighter aircraft
[AD-A135888] p 337 N84-18175
International aviation (selected articles)
[AD-A140895] p 663 N84-26671
Comparative measurements of the unsteady pressures on three oscillating wing-tip models
[DFVLR-FB-84-07] p 758 N84-28758

WING-FUSELAGE STORES

- Finite difference computation of the aerodynamic interference of wing-pylon-store combinations at transonic speeds p 151 A84-16839
A method for calculating subsonic and transonic flows over wings or wing-fuselage combinations with an allowance for viscous effects
[AIAA PAPER 84-0428] p 167 A84-18087
Control of forward swept wing configurations dominated by flight-dynamic/aeroelastic interactions
[AIAA PAPER 84-1866] p 894 A84-43424
Divergence/flutter suppression system for a forward swept-wing configuration with wing-mounted stores p 901 A84-45967

WINGED VEHICLES

- An overview of some monoplanar missile programs p 739 A84-42280

WINGLETS

- Transonic analysis of canted winglets
[AIAA PAPER 84-0302] p 165 A84-18009
Winglet effects on the flutter of twin-engine-transport type wing
[AIAA PAPER 84-0905] p 594 A84-34907
DC-10-10 winglet flight test program management p 866 A84-44452
Improving the efficiency of smaller transport aircraft p 869 A84-44928
Wind tunnel investigation of the rolling moment of a rectangular wing with some winglets on the left upper tip
[NAL-TR-788] p 586 N84-25650
KC-135 Winglet Program Review
[NASA-CP-2211] p 667 N84-27686
KC-135 winglet program overview p 667 N84-27687
KC-135 wing and winglet flight pressure distributions, loads, and wing deflection results with some wind tunnel comparisons p 667 N84-27688
In-flight lift and drag measurements on a first generation jet transport equipped with winglets p 667 N84-27689
Measurements of the fuel mileage of a KC-135 aircraft with and without winglets p 687 N84-27690
Comparison of flight measured, predicted and wind tunnel measured winglet characteristics on a KC-135 aircraft p 667 N84-27691
KC-135A winglet flight flutter program p 668 N84-27692
Improving the efficiency of smaller transport aircraft
[NASA-TM-85992] p 772 N84-28780

WINGS

- Wing design and analysis - Your job p 6 A84-10086
The efficient solution of transonic wing flow fields p 8 A84-10104
Wing contamination - Threat to safe flight p 25 A84-10893
Experiences in the use of composite material for a wing skin p 46 A84-11040
Computation of three-dimensional transonic inviscid flows on a wing by pseudo-unsteady resolution of the Euler equations
[ONERA, TP NO. 1983-125] p 91 A84-13640
Excitation system for wind-tunnel unsteady tests on half-wing models p 139 A84-15859
Evaluation of the AF-10 adhesive sealing system for use on the C-130 aircraft p 234 A84-17171
The HIAM wing - Milestone in aeronautical engineering
[AIAA PAPER 84-0388] p 166 A84-18055
Aerodynamic canard/wing parametric analysis for general aviation applications
[AIAA PAPER 84-0560] p 169 A84-18164
Electro-impulse deicing - Concept and electrodynamic studies
[AIAA PAPER 84-0021] p 288 A84-19885
Computation of the flow around wings with rear separation p 268 A84-22168
Analytical comparison of two wing structures for Mach 5 cruise airplanes p 429 A84-26958
A new approach to wing design for subsonic aircraft p 430 A84-28197
Keeping the wet wing dry p 397 A84-29562
Fresh attack on laminar flow p 407 A84-29577
Noniterative grid generation using parabolic difference equations for fuselage-wing flow calculations p 579 A84-35334
Wing design for spin resistance
[AIAA PAPER 84-2223] p 684 A84-39278
Wings or not for a missile? p 767 A84-40570

- BGRID: A block-structured grid generation code for wing sections
[NASA-CR-166317] p 1014 N84-34187
- Wake profile measurements of fixed and oscillating flaps
[NASA-CR-166602] p 967 N84-34428
- Pivotal mono wing cruise missile with wing deployment and fastener mechanism
[AD-D011192] p 977 N84-34436

WIRING

- Assessment of lightning simulation test techniques
p 199 A84-18533
- Electricad/Electricam - A phased approach to automated aircraft loom manufacture
p 476 A84-28019

WOOD

- Response of a plaster-wood room subjected to simulated sonic booms
[UTIAS-276] p 927 N84-31701

WORD PROCESSING

- Implementation of broadcast messages and acyclic data transfer techniques in a multibus based avionics system
p 187 A84-16605

WORKLOADS (PSYCHOPHYSIOLOGY)

- F-15 dual role fighter cockpit integration
[SAE PAPER 831472] p 432 A84-29504
- Development of speech input/output interfaces for tactical aircraft
[AD-A136485] p 350 N84-18193
- Automated en route air traffic control algorithmic specifications. Volume 4: Sector workload probe
[AD-A136796] p 346 N84-19320

WRINKLING

- The buckling of honeycomb sandwich circular rings
p 922 A84-46190

WROUGHT ALLOYS

- A new gas turbine combustor alloy
[ASME PAPER 84-GT-70] p 995 A84-46917
- Fatigue behavior of long and short cracks in wrought and powder aluminum alloys
[AD-A142609] p 802 N84-30024
- Gas turbine engine design considerations as related to alloys of high critical element content
p 989 N84-33470

X

X RAY ANALYSIS

- A portable x-ray analyzer for wearmetal particles in lubricants
p 240 A84-17543
- CXR testing of box IEMP effects due to charge transfer
--- Continuous X-Ray Internal Electromagnetic Pulse
p 312 A84-20725

X RAY FLUORESCENCE

- X-ray wear metal monitor
[AD-A131251] p 61 N84-10076

X RAY INSPECTION

- Cost-effectiveness of the passenger security screening system
p 182 A84-18694
- Advanced ND techniques for composite, primary structures
p 75 N84-10216

X WING ROTORS

- Acoustics of rotors utilizing circulation control
p 83 A84-11044
- Noise and performance characteristics of a model scale X-wing rotor system in hover
[AIAA PAPER 84-0337] p 197 A84-18030
- A model of rotor blade first natural flapping response for up to three/rev excitations
[AD-A141725] p 773 N84-28782

X-24 AIRCRAFT

- A comparative study of the parabolized Navier-Stokes code using various grid-generation techniques
[AIAA PAPER 84-0459] p 266 A84-21302

XV-15 AIRCRAFT

- Frequency-domain identification of XV-15 tilt-rotor aircraft dynamics
[AIAA PAPER 83-2695] p 116 A84-13378
- XV-15 experience - Joint service operational testing of an experimental aircraft
p 192 A84-16158
- Tilt rotor technology thrusts
[SAE PAPER 831537] p 434 A84-29536
- Tilt-rotor - An odd marriage that works
p 767 A84-40575
- Ground-simulation investigation of VTOL instrument flight rules airworthiness criteria
[AIAA PAPER 84-2105] p 760 A84-42353
- Pilot modeling and control augmentation for the XV-15 in in-ground-effect hover
[AIAA PAPER 84-1892] p 895 A84-43442

- Aerodynamic design of the XV-15 advanced composite tilt rotor blade
p 846 A84-46331
- XV-15 shipboard evaluation
p 876 A84-46359
- An assessment of the capability to calculate tilting prop-rotor aircraft performance, loads and stability
[NASA-TP-2291] p 351 N84-19333
- Identification and verification of frequency-domain models for XV-15 tilt-rotor aircraft dynamics
[NASA-TM-86009] p 991 N84-34445

Y

YAG LASERS

- Laser drilling of aero engine components
[PNR-90185] p 560 N84-22956

YAW

- Instabilities of a gyroscope produced by rapidly rotating, highly viscous liquids
p 919 A84-45584
- Low aspect ratio wing/body vortex interaction at large angles of pitch and yaw
p 20 N84-11140
- Evaluation of the effects of lateral and longitudinal aperiodic modes on helicopter instrument flight handling qualities
[AD-A134116] p 201 N84-14135
- Recent developments and future directions in dynamic stability research at NAE, Ottawa
p 514 N84-23582
- Space Shuttle separate-surface control-system study
[NASA-TP-2340] p 788 N84-28801

YAWING MOMENTS

- Minimal drag for wings with prescribed lift, roll moment and yaw moment
[AD-A134572] p 272 N84-16152
- Flight data on liquid-filled shell for spin-up instabilities
[AD-A139136] p 517 N84-23610

YF-12 AIRCRAFT

- Analytical comparison of two wing structures for Mach 5 cruise airplanes
p 429 A84-26958

YIELD STRENGTH

- Effects of metal flow on fatigue strength and mechanical properties of ZK60A magnesium alloy forging
p 913 A84-44173
- Effects of long-time elevated temperature exposures on hot-isostatically-pressed power-metallurgy Udimet 700 alloys with reduced cobalt contents
[NASA-TM-83632] p 799 N84-28917

YTTERBIUM COMPOUNDS

- Improved thermal barrier coating system
[NASA-CASE-LEW-14057-1] p 998 N84-33595

YTTRIUM ALLOYS

- Oxidation of CoCrAlY and Y-implanted CoCrAl alloys
p 798 A84-42659

YTTRIUM OXIDES

- Phase distributions in plasma-sprayed zirconia-yttria
p 236 A84-18948
- Phase analysis of plasma-sprayed zirconia-yttria coatings
p 308 A84-19781
- Materials for Advanced Turbine Engines (MATE): Project 3: Design, fabrication and evaluation of an oxide dispersion strengthened sheet alloy combustor liner, volume 1
[NASA-CR-174691] p 915 N84-32504

Z

Z-37 AIRCRAFT

- Fatigue life of the Z-37 agricultural aircraft, ways of gradual raising of it, operation, and maintenance without overhaul
p 502 A84-32961

ZERO ANGLE OF ATTACK

- Turbulent flow near the trailing edge of a plate at zero angle of attack
p 260 A84-19553

ZERO LIFT

- Finite difference computation of wave drag and pressure on slender bodies of revolution at transonic speeds with zero-lift
p 15 A84-12037
- A technique to determine lift and drag polars in flight
p 966 N34-34402

ZIPPERS

- Thermoelastic limit cycling of zippered cross section spacecraft booms
[AIAA PAPER 84-1065] p 613 A84-34915

ZIRCONIUM OXIDES

- Phase distributions in plasma-sprayed zirconia-yttria
p 236 A84-18948
- Phase analysis of plasma-sprayed zirconia-yttria coatings
p 308 A84-19781
- Mechanical and physical properties of plasma-sprayed stabilized zirconia
p 308 A84-19786
- Overview of zirconia with respect to gas turbine applications
[NASA-TP-2286] p 473 N84-21740
- Improved thermal barrier coating system
[NASA-CASE-LEW-14057-1] p 998 N84-33595

SUBJECT INDEX

ZUNI ROCKET VEHICLE

- Development of an 8-ft-dia ribbon parachute for recovery of a test device at transonic speeds
[AIAA PAPER 84-0793] p 415 A84-26561

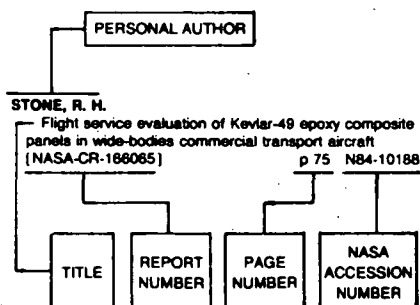

PERSONAL AUTHOR INDEX

AERONAUTICAL ENGINEERING / A Continuing Bibliography

JANUARY 1985

1984 Cumulative Index

Typical Personal Author Index Listing

Listings in this index are arranged alphabetically by personal author. The title of the document provides the user with a brief description of the subject matter. The report number helps to indicate the type of document listed (e.g., NASA report, translation, NASA contractor report). The page and accession numbers are located beneath and to the right of the title. Under any one author's name the accession numbers are arranged in sequence with the AIAA accession numbers appearing first.

A

- ABAIMOV, L. S.**
An evaluation of the effect of the circumferential inhomogeneity of the total pressure field of the inlet flow on the parameters of an axial-flow compressor p 332 A84-25565
- ABBOTT, K. H.**
A route generator concept for aircraft onboard fault monitoring [NASA-TM-86264] p 862 N84-31104
- ABBOTT, L. W.**
Operational characteristics of the dispersed sensor processor mesh p 440 A84-26737
- ABBOTT, T. S.**
In-trail dynamics of multiple CDTI-equipped aircraft queues [NASA-TM-85699] p 295 N84-16178
Simulation of a cockpit-display concept for executing a wake-vortex avoidance procedure [NASA-TP-2300] p 447 N84-21542
- ABBOTT, W. Y.**
Evaluation of UH-1H hover performance degradation caused by rotor icing [AD-A141252] p 689 N84-27727
- ABBOUD, M.**
Transonic supersonic flow from a wedge p 644 A84-37746
- ABDELSALAM, M. K.**
Magnetic suspension and balance system study [NASA-CR-3802] p 794 N84-29888
- ABE, T.**
Active control of asymmetric vortex effects in circular cylinder [AIAA PAPER 84-2101] p 751 A84-42351
Cooling characteristics of film-cooled turbine blades [ASME PAPER 84-GT-73] p 1002 A84-46918
- ABEL, I.**
Active control - A look at analytical methods and associated tools p 898 A84-44954
Experiences with the design and implementation of flutter suppression systems p 463 N84-20593
Active controls: A look at analytical methods and associated tools [NASA-TM-86269] p 927 N84-31684

- ABERNETHY, R. B.**
Uncertainty methodology for in-flight thrust determination [SAE PAPER 831438] p 431 A84-29452
Application of in-flight thrust determination uncertainty [SAE PAPER 831439] p 432 A84-29453
- ABIDA, L.**
Model reference adaptive control for linear time varying and nonlinear systems p 251 A84-19085
Model reference adaptive control for systems with time varying model commands p 391 A84-25491
- ABLA, M.**
Weight comparison of divergence-free tailored metal and composite forward swept wings for an executive aircraft p 682 A84-38422
- ABOUSEIF, G. E.**
Ramjet rumble - The low-frequency instability mechanism in coaxial dump combustors p 453 A84-29791
- ABRAHAMSON, I. D.**
Scattering of sound by an elastic plate with flow p 320 A84-21216
- ABRAHAMSON, A. L.**
A preliminary design study on an acoustic muffler for the laminar flow transition research apparatus [NASA-CR-172374] p 756 N84-28748
- ABRAHAMSON, T. D.**
A critique of NAVSTAR Global Positioning System, user equipment, configuration control for DoD common and Navy unique items [AD-A131234] p 43 N84-10047
- ABRAMOVITZ, M.**
Experimental investigation of elastic mode control on a model of a transport aircraft [NASA-CR-3472] p 688 N84-27721
- ABRAMS, H. C.**
Improved paint removal technique [AD-A136671] p 376 N84-19580
- ABRAO, R. B.**
Design study for a low density wind tunnel [INPE-3072-TDL/160] p 706 N84-26707
- ABUJELALA, M. T.**
Lateral jet injection into typical combustor flowfields [AIAA PAPER 84-0374] p 242 A84-19251
- ACEVEDO, W.**
The role of spatial, spectral and radiometric resolution on information content p 143 A84-13043
- ACKERMANN, J.**
Sampled-data control. Volume 1 - Analysis and synthesis. Volume 2 - Design of robust systems / 2nd revised and enlarged edition/ p 491 A84-28770
Robustness against sensor failures p 540 A84-30274
- ACREE, C. W., JR.**
Preliminary results of the first static calibration of the RSRA helicopter active-isolator rotor balance system [NASA-TM-84395] p 124 N84-13178
Results of the first complete static calibration of the RSRA rotor-load-measurement system [NASA-TP-2327] p 879 N84-31111
- ADACHI, T.**
Unsteady pressure on a cambered blade under periodic gusts (Comparison with the experiments) p 12 A84-10899
A numerical analysis of the flow around structures by the discrete vortex method p 381 A84-24976
A numerical analysis of unsteady separated flow by discrete vortex model using boundary element method p 382 A84-25882
A numerical analysis of unsteady separated flow by vortex shedding model. I - Flow around a square prism p 403 A84-26948
- ADAIR, D.**
Measurements and calculations of a separating boundary-layer and the downstream wake p 5 A84-10084
- ADAM, V.**
Precision timing in commercial flight - A way to increase efficiency through onboard and ground-based aids [DGLR PAPER 82-095] p 29 A84-10568

- ADAMCZYK, J. J.**
Numerical aspects of unsteady flow calculations p 626 N84-25968
Unsteady transonic flow in cascades [NASA-TM-83780] p 849 N84-32351
- ADAMS, G. R.**
Uncertainty methodology for in-flight thrust determination [SAE PAPER 831438] p 431 A84-29452
Application of in-flight thrust determination uncertainty [SAE PAPER 831439] p 432 A84-29453
- ADAMS, G. W.**
Breaking the precision barrier for aircraft inertial systems p 521 A84-33022
- ADAMS, J. C., JR.**
One-dimensional unsteady modeling of supersonic inlet unstart/restart [AIAA PAPER 84-0439] p 168 A84-18094
- ADAMS, J. J.**
Simulator study of pilot-aircraft-display system response obtained with a three-dimensional-box pictorial display [NASA-TP-2122] p 127 N84-13182
- ADAMS, K. J.**
The Air Force Flight Test Center artificial icing and rain testing capability [AIAA PAPER 83-2688] p 71 A84-12305
- ADAMS, M. L.**
Nonlinear/transient rotor dynamics analysis p 560 N84-22977
Interactive finite elements for general engine dynamics analysis p 927 N84-31698
- ADAMS, M. L., JR.**
Rotor dynamical instability; Proceedings of the Applied Mechanics, Bioengineering, and Fluids Engineering Conference, Houston, TX, June 20-22, 1983 p 141 A84-13226
- ADAMS, M. R.**
Electronic fuel controls for executive jet aircraft [SAE PAPER 831478] p 451 A84-29457
- ADAMS, R. G.**
An improved method for the prediction of centrifugal compressor rotational-tone noise [DE84-013345] p 930 N84-32842
- ADAMS, S. E.**
Distributed avionics processing using ADA p 250 A84-16647
- ADAMS, W. M.**
Eigenspace design of an active flutter suppression system [AIAA PAPER 84-1867] p 894 A84-43425
- ADAMS, W. M., JR.**
Active control - A look at analytical methods and associated tools p 898 A84-44954
Tools for active control system design p 462 N84-20582
STABCAR: A program for finding characteristic root systems having transcendental stability matrices [NASA-TP-2165] p 733 N84-27461
Design of a candidate flutter suppression control law for DAST ARW-2 [NASA-TM-88257] p 790 N84-29883
Active controls: A look at analytical methods and associated tools [NASA-TM-86269] p 927 N84-31684
- ADATIA, N.**
Depolarisation properties of airborne radomes p 592 A84-36281
- ADCOCK, J. B.**
Effect of boundary layers on solid walls in three-dimensional subsonic wind tunnels p 329 A84-23359
- ADDY, A. L.**
Multiple ducted streams with a periodic or a steady supersonic driver flow [AIAA PAPER 84-0350] p 166 A84-18042
An investigation of the effects of non-uniform throat flow on base pressure at supersonic flight speeds [AIAA PAPER 84-0314] p 174 A84-19248

ADELMAN, H. M.

Static and dynamic structural-sensitivity derivative calculations in the finite-element-based Engineering Analysis Language (EAL) system
[NASA-TM-85743] p 485 N84-20880

ADGAMOV, R. I.

Automation of small-scale machine-shop production and the product quality p 717 A84-37523

ADLER, R. S.

Preliminary airworthiness evaluation of the UH-60A configured with the External Stores Support System (ESSS)
[AD-A132964] p 201 N84-14139

ADNEY, P. S.

Design of a composite wing extension for a general aviation aircraft
[NASA-CR-173832] p 880 N84-32377

ADRIAN, R. J.

Aerodynamic disturbances of hot-wire probes and directional sensitivity p 382 A84-25802

AFCHAIN, D.

The F2 wind-tunnel at Fauga-Mauzac
[ONERA, TP NO. 1983-139] p 306 A84-19928
The F2 wind tunnel at Fauga-Mauzac
[NASA-TM-77482] p 792 N84-28814

AFFENS, W. A.

A statistical examination of the effect of composition on the freezing points of hydro-carbon mixtures
[AD-A131000] p 77 N84-11321

AGAR, J. R.

DC-10-10 winglet flight test program management p 866 A84-44452

AGARWAL, R. K.

Numerical solution of the Euler equations on body-conforming curvilinear grids p 13 A84-11590
Numerical solution of the Euler equations for flow past an airfoil in ground effect
[AIAA PAPER 84-0051] p 156 A84-17847

Computation of transonic viscous airfoil, inlet, and wing flowfields
[AIAA PAPER 84-1551] p 844 A84-46111

Application of a new Navier-Stokes solver to three-dimensional jet flows p 963 A84-49113

AGARWALA, V. S.

Causes and prevention of structural materials failures in naval environments
[AD-A141560] p 800 N84-28972

AGEEV, A. B.

A lobe mixer for bypass engines p 985 A84-47551

AGGARWAL, H. R.

The calculation of transonic rotor noise p 735 A84-38847

AGLIULLIN, I. M.

The optimal thermal gasdynamic design of gas turbine engines on the basis of the characteristics of part prototypes. II p 532 A84-30415

AGNONE, A.

Investigation of aerodynamics of non axisymmetric projectiles
[AD-A139107] p 517 N84-23609

AGRAWAL, A. K.

End effects in coupled rectangular resonators in unilateral fin line p 475 A84-27985

AGRAWAL, R. K.

An approach to selecting gas turbine engine ratings for fixed wing airplanes
[ASME PAPER 84-GT-163] p 973 A84-46967

AGRAWAL, S. K.

High speed braking of an aircraft tire on grooved wet surfaces p 870 A84-44969
Modified reflex-percussive grooves for runways
[AD-A143569] p 909 N84-32400

AGRELL, J.

The wind tunnel simulation of propulsion jets and their modeling by congruent plumes including limits of applicability
[AIAA PAPER 84-0232] p 231 A84-17962

AGRELL, N.

Transonic aerodynamic computations for a canard configuration
[AIAA PAPER 84-2158] p 745 A84-41333
Effects of engine nacelles on transonic flow around airplane configurations, calculations by TSP-method p 837 A84-45055

AHLWEDE, M.

Field evaluation of proposed ICAO annex 16 takeoff noise certification procedure for propeller-driven airplanes not exceeding 5700 kg
[DFVLR-FB-83-34] p 496 N84-22378

AHMAD, J.

A critical review of the short crack problem in fatigue
[AD-A131349] p 81 N84-11516

AHMED, A.

Natural laminar flow flight experiments on a swept-wing business jet
[AIAA PAPER 84-2189] p 746 A84-41344

AHMED, S. A.

Characteristics of inhomogeneous jets in confined swirling air flows p 482 N84-20550

An experimental investigation of gas jets in confined swirling air flow p 988 N84-33412

AHUJA, K. K.

Acoustic power dissipation on radiation through duct terminations - Experiments p 321 A84-21272

AIDAGULOV, R. R.

Two-dimensional gas-particle flow past thin bodies p 962 A84-47777

AIGRET, G.

Composite casting/bonding construction of an air-cooled, high temperature radial turbine wheel
[SAE PAPER 831519] p 480 A84-29462

AIHARA, Y.

Transient aerodynamic characteristics of a two-dimensional low-speed wing at several angles of attack
[AIAA PAPER 84-2076] p 749 A84-42332

AIKEN, E. W.

An investigation of side-stick-controller/stability and control-augmentation system requirements for helicopter terrain flight under reduced visibility conditions
[AIAA PAPER 84-0235] p 226 A84-17965

Simulator investigations of side-stick controller/stability and control augmentation systems for night nap-of-earth flight p 277 A84-19744

A piloted simulator investigation of side-stick controller/stability and control augmentation system requirements for helicopter visual flight tasks p 906 A84-46370

A review of US Army aircrew-aircraft integration research programs
[NASA-TM-85947] p 790 N84-28809

AKAI, T. J.

Effect of upstream parallel flow on two-dimensional wind-tunnel tests
[AIAA PAPER 84-2153] p 745 A84-41331

AKAY, H. U.

Application of a finite element algorithm to the solution of steady transonic Euler equations p 10 A84-10133

AKED, A.

Studies of lightning-attachment testing using aircraft models p 198 A84-18532

AKHMEZIANOV, A. M.

A study of the efficiency of algorithms for the gas-air path diagnostics of gas turbine engines on the basis of thermogasdynamic parameters p 985 A84-47552

AKHTER, M. M.

HYTESS: A hypothetical turbofan engine simplified simulation
[NASA-TM-83561] p 299 N84-16184

AKHURST, K. N.

The effect of mode III loading on fatigue crack growth in a rotating shaft p 312 A84-19747

AKIMOV, G. A.

Characteristics of the interaction of a supersonic jet above the critical pressure with a finite obstacle p 406 A84-28367

AKINFIEV, V. O.

Characteristics of flow past an air intake with a sharp cowl edge at Mach less than 1 p 839 A84-45705

AKISHITA, S.

Theoretical prediction of roll moment on wing-controlled missile
[AIAA PAPER 84-2148] p 745 A84-41328

AKIYAMA, H.

Microgravity system by using stratospheric balloons
[AD-A143288] p 636 A84-38288

Development of relay balloon system p 670 A84-38289

Feasibility studies on trans-oceanic flights from Japan p 670 A84-38293

AKKERMAN, J. W.

High altitude aerodynamic platform concept evaluation and prototype engine testing
[NASA-TM-58256] p 299 N84-16182

AL-ASTRADADI, F.

Thermal control of tethered satellite in a very low altitude aerodynamic mission p 373 N84-19444

AL-DABBAGH, N. A.

Shear layer mixing for low emission gas turbine primary zones
[ASME PAPER 84-GT-13] p 980 A84-46883

AL-JAAR, R. Y.

A case for nonlinear model simplification in the design of flight control systems p 361 A84-25505

AL-MODAFAR, M. M. H.

A computer aided design method for vaned diffusers in centrifugal compressors
[ASME PAPER 84-GT-83] p 1002 A84-46925

AL-MUDHAFAR, M. M.

Further data on the performance of a rectangular diffuser in distorted inlet flows
[ASME PAPER 84-GT-64] p 952 A84-46911

ALAKEL, M. N.

Multisensor speech input
[AD-A140894] p 726 N84-26974

ALAM, M.

A blade loss response spectrum for flexible rotor systems
[ASME PAPER 84-GT-29] p 1001 A84-46893

ALBER, I. E.

Turbulent flow over vehicles at angle of attack p 328 A84-23351

ALBERS, J. W.

High speed transparent system reconfiguration for failsafe computer networks p 935 A84-44745

ALBERSHEIM, S. R.

Helicopter noise survey performed at Parker Center, Pasadena, and Anaheim, California, on February 10-14, 1983
[AD-A130962] p 83 N84-11887

ALBRIGHT, A. E.

An improved method of predicting anti-icing flow rates for a fluid ice protection system
[AIAA PAPER 84-0023] p 279 A84-21280

ALBUL, A. V.

The use of the perturbation method for determining the optimum distribution of the load-bearing material in swept wings p 920 A84-45725

ALCORN, J.

Radio Technical Commission for Aeronautics, Technical Symposium and Annual Assembly Meeting, Washington, DC, November 17-19, 1982, Proceedings p 113 A84-15393

ALDHOUSE, G. L. P.

United Kingdom military engine monitoring experience
[AIAA PAPER 84-1409] p 603 A84-35207

ALEKSANDROV, A. A.

Pressure losses in gas flows in cylindrical ducts with friction and heating p 917 A84-43935

ALEKSEEV, I. A. N.

Assembly, control, and testing of aircraft instrumentation (2nd revised and enlarged edition) p 354 A84-25902

ALEKSEEV, K. P.

The effect of service conditions on the technical-economical characteristics of aircraft engines p 987 A84-47628

ALEKSEEVA, E. V.
